

Automotive Fuels and Emissions

We Support
ASE Program Certification
Through

BARRY HOLLEMBEAK

Contents

Preface	x
About the Author	xi
Acknowledgments	xii
Features of the Text	xiii

Section 1: Safety and Communication 1

Chapter 1 • Safe Work Practices 3	
Introduction	3
Personal Safety	3
Fire Hazards and Prevention	6
Lifting the Vehicle	9
Running the Vehicle while in the Shop	11
Hazardous Materials	11
Fuel System Safety	14
Summary	14
Review Questions	15

Chapter 2 • Special Tools and Equipment 16	
Introduction	16
Fuel Pressure Gauge	16
Injector Balance Tester	17
Fuel-Injector Cleaner	17
Flow Meters	18
Evaporative Emissions Leak Detector	18
Exhaust Analyzers	19
Engine Analyzers	20
Scan Tools	21
Special Hand Tools	22
Service Information	24
Summary	29
Review Questions	30

Chapter 3 • Electrical Test Equipment 31	
Introduction	31
Test Lights	31
Injector Circuit Test Light	32

Logic Probes	32
Multimeters	33
Lab Scopes	34
Summary	36
Review Questions	37

Chapter 4 • Working as a Fuels and Emissions Technician 38	
Introduction	38
Compensation	38
Workplace Relationships	38
Customer Relations	39
ASE Certification	39
Duties of a Fuels and Emissions Technician	40
Diagnostics	40
Use and Interpretation of Vehicle	
Identification and Calibration Numbers	41
Emissions-Tampering Laws	43
Summary	44
Review Questions	45

Section 2: Computer Systems 46

Chapter 5 • Introduction to the Computer 47	
Introduction	47
Basic Computer Operation	47
Analog and Digital Principles	47
Central Processing Unit	51
Computer Memory	51
Information Processing	53
EMI Suppression	58
Summary	59
Review Questions	59

Chapter 6 • Computer System Diagnosis 60	
Introduction	60
Electronic Service Precautions	60
Powers and Grounds	61

vi • Contents

Trouble Codes	63
Visual Inspection	66
Entering Diagnosis	66
Computer Flashing	67
Summary	67
Review Questions	68

Chapter 7 • Computer Inputs and Outputs	69
Introduction	69
Sensors	69
Feedback Signals	75
Computer Controlled Outputs	77
High-Side and Low-Side Drivers	80
Summary	81
Review Questions	82

Chapter 8 • Input and Output Diagnostics	83
Introduction	83
Testing Sensors	83
Breakout Boxes	88
Testing Actuators	88
Summary	89
Review Questions	90

Section 3: Automotive Fuels **91**

Chapter 9 • Automotive Fuels	93
Introduction	93
Gasoline	93
Combustion Chemistry	95
Gasoline Characteristics	96
Octane Ratings	99
Oxygenated Fuels	102
Reformulated Gas	104
Government Test Fuel	104
Summary	104
Review Questions	105

Chapter 10 • Alternative Fuels	106
Introduction	106
Liquid Petroleum Gas	106
Natural Gas	106
Hydrogen	107
Diesel Fuel	107
Summary	111
Review Questions	111

Chapter 11 • Basic Fuel Testing	112
Introduction	112
Fuel Quality Testing	112
Diesel Fuel Testing	114
Typical Procedures for Relieving Fuel Pressure	114
Fuel-Injector Cleaning	116
Summary	117
Review Questions	117

Section 4: Fuel Delivery **118**

Chapter 12 • Fuel Tanks	119
Introduction	119
Fuel Tank	120
Fuel Filler Caps	122
Rollover Check Valve	122
Onboard Refueling Vapor Recovery	123
Summary	128
Review Questions	128

Chapter 13 • Fuel Tank Service	129
Introduction	129
Fuel Tank Draining	129
Fuel Tank Removal	130
Fuel Filler Cap Testing	131
Summary	132
Review Questions	132

Chapter 14 • Fuel Pumps and Lines	133
Introduction	133
Electric Fuel Pumps	133
Fuel Filters	134
Fuel Lines	135
Fuel Rail	136
Fuel Pressure Regulation	137
Summary	140
Review Questions	141

Chapter 15 • Fuel Filter and Fuel Line Service	142
Introduction	142
In-line Filter Replacement	142
Fuel Line Service	143
Fuel Rail Service	149
Summary	150
Review Questions	151

Chapter 16 • Electric Fuel Pump Circuits	152
Introduction	152
Fuel Pump Relay	152
Inertia Switch	153
Circuit-opening Relay	153
Summary	154
Review Questions	154

Chapter 17 • Fuel Pump Diagnosis and Repair	155
Introduction	155
Fuel Pump Diagnosis and Service	155
Replacing Electric Fuel Pumps	161
Fuel-level Sending Unit Replacement	165
Summary	166
Review Questions	166

Section 5: Fuel System Principles **168**

Chapter 18 • The Importance of the Air-Fuel Ratio	169
Introduction	169

The Stoichiometric Ratio	172	Section 6: Emissions-Control Systems	237
Open Loop versus Closed Loop	172		
Computer-controlled Air-Fuel Ratio Strategy	173		
EFI Modes of Operation	181		
Summary	181		
Review Questions	182		
Chapter 19 • Adaptive Memory	183	Chapter 24 • Emissions and the Automotive Industry	239
Introduction	183	Introduction	239
Chrysler's Adaptive Strategies	183	Emissions Laws and the Automotive Industry	239
General Motors's Integrator and Block Learn	185	History of Emissions Laws	239
Ford's Adaptive Strategies	186	The Combustion Process and Exhaust Gases	242
Import Adaptive Memory Strategy	187	The Importance of the Air-Fuel Ratio	248
Summary	187	Summary	251
Review Questions	188	Review Questions	252
Chapter 20 • Fuel-Injection Systems	189	Chapter 25 • Precombustion Controls	253
Introduction	189	Introduction	253
Injector Internal Design and Electrical Connections	189	Precombustion Controls	253
Throttle Body Injection Systems	190	Summary	268
Port Fuel-Injection Systems	191	Review Questions	268
Sequential Fuel-Injection Systems	192	Chapter 26 • Postcombustion Controls	269
Multipoint Injection Systems	196	Introduction	269
Central Port Injection Systems	197	Air Injection	269
Gasoline Direct-Injection Systems	199	Catalytic Converter	274
Summary	201	Summary	278
Review Questions	202	Review Questions	278
Chapter 21 • Electronic Fuel-Injection Input Sensor Diagnosis and Service	203	Chapter 27 • Exhaust Analyzer Operation	279
Introduction	203	Introduction	279
Service Precautions	203	Exhaust Analyzers	279
Preliminary Inspection	203	Preparing the Vehicle for Exhaust Gas Testing	280
Input Sensor Diagnosis and Service	203	Exhaust Testing	281
Summary	219	Analyzer Results	282
Review Questions	220	Locating Cylinder Misfiring	283
Chapter 22 • Injector Testing and Service	221	Head Gasket and Combustion Chamber Leaks	284
Introduction	221	Summary	285
Injector Sound Test	221	Review Questions	286
Injector Ohmmeter Test	221	Chapter 28 • Diagnosing the Emissions System	287
Noid Light Test	222	Introduction	287
Lab Scope Testing of the Injector	222	Evaporative Emissions-Control System	
Injector Balance Test	223	Diagnosis and Service	287
Injector Flow Test	224	Exhaust Gas Recirculation (EGR) System Diagnosis	289
Injector Service	224	Electronic EGR Control Diagnosis	293
Summary	225	Positive Crankcase Ventilation (PCV)	
Review Questions	226	System Diagnosis and Service	297
Chapter 23 • Scan Tester Diagnostics	227	Air-Injection System Diagnosis and Service	298
Introduction	227	Catalytic Converter Diagnosis	302
Scan Tester Functions	227	Summary	303
Ford Breakout Box Testing	229	Review Questions	304
Fuel-Injection Data Recording Interpretation	231	Section 7: Onboard Diagnostics Second Generation (OBD-II)	305
Summary	235		
Review Questions	236	Chapter 29 • Introduction to OBD-II	307
		Introduction	307
		OBD-I versus OBD-II	307

viii • Contents

Federal Test Procedure Standards	308	Fuel System Monitoring	352
OBD-II Component Requirements	310	Heated Oxygen Sensor Monitor	352
OBD-II Monitors	311	Oxygen Sensor Heater Monitor	353
OBD-II Terms	315	EGR System Monitoring	353
OBD-II Scan Tool	318	Secondary Air-Injection (Air) System Monitor	355
Summary	319	Comprehensive Components Monitor	356
Review Questions	319	Summary	357
		Review Questions	358
Chapter 30 • DaimlerChrysler's OBD-II	321	Chapter 34 • Import OBD-II	359
Introduction	321	Introduction	359
Overview	321	Evaporative Systems Monitor	359
Comprehensive Components Monitor	322	Fuel Trim—System Too Lean	364
Fuel System Monitor	322	Fuel Trim—System Too Rich	364
Heated Oxygen Sensor Response Monitor	322	System Too Rich	364
Oxygen Sensor Heater Monitor	323	Misfire Monitor	364
Catalyst Monitor	324	Heated Oxygen Sensor Monitor	364
Misfire Monitor	325	Oxygen Sensor Heated Monitor	364
EVAP Monitor	327	A/F Sensor Monitor	365
EGR Monitor	329	Summary	366
Summary	329	Review Questions	367
Review Questions	330		
Chapter 31 • DaimlerChrysler's OBD-II with Next-Generation Controller	332	Chapter 35 • Introduction to OBD-II Diagnostics	368
Introduction	332	Introduction	368
Freeze-Frame	332	OBD-I versus OBD-II Diagnostics	369
Good Trip Counter	333	Generic Scan Tool Modes	371
HO ₂ S Response Monitor	333	Oxygen Sensor and Catalyst	
Oxygen Sensor Heater Monitor	333	System Configurations	372
Fuel System Lean/Rich Monitor	333	Summary	374
Misfire Monitor	333	Review Questions	374
EVAP and Purge Monitors	334		
Summary	335	Chapter 36 • OBD-II Diagnostics—Drive Cycles	376
Review Questions	336	Introduction	376
		Executing General Motors's Drive Cycle	376
Chapter 32 • General Motors's OBD-II	337	Executing Ford's Drive Cycle	377
Introduction	337	Executing Toyota's Drive Cycle	378
Diagnostic Executive	337	Summary	382
Comprehensive Components Monitor	339	Review Questions	382
Heated Oxygen Sensor Monitor	339		
Catalyst Monitor	339	Chapter 37 • EVAP Leak Diagnosis	384
Misfire Monitor	339	Introduction	384
Fuel Trim Monitors	342	Leak-Detection Pump Systems	384
Exhaust Gas Recirculation Monitor	342	Vacuum-Type Leak-Detection Testing	387
Secondary Air-Injection Monitor	342	Summary	387
Evaporative Emissions System Monitor	343	Review Questions	388
Summary	345		
Review Questions	346	Section 8: Alternative Fuel and Power Vehicles	389
Chapter 33 • Ford's OBD-II	347	Chapter 38 • Alternative Fuel Vehicles	391
Introduction	347	Introduction	391
Catalyst Efficiency Monitor—Steady State	347	Alternative Gaseous Fuels	391
Catalyst Efficiency Monitor—Federal		CNG and Propane Cylinder Codes	393
Test Procedure	347	Flex Fuel Vehicles	398
Evaporative (EVAP) Emissions System Monitor	349	Summary	399
Misfire Monitor	351		

Review Questions	400	Review Questions	413
Chapter 39 • Alternative Fuel System Service	401	Chapter 41 • Vehicles with Alternative Power Sources	414
Introduction	401	Introduction	414
CNG Fuel System Modes of Operation	401	Electric Vehicles	414
CNG Fuel-Delivery System Service	401	Hybrid Vehicles	415
Summary	408	Fuel Cells	419
Review Questions	409	Summary	425
Chapter 40 • CNG Electrical Component Diagnostics and Service	410	Review Questions	425
Introduction	410	Bilingual Glossary	426
Fuel Low-Pressure Sensor Testing	410	Index	458
Fuel Temperature Sensor Testing	411		
Fuel Gauge Pressure Sensor Testing	411		
High-Pressure Fuel Shutoff Solenoid Testing	412		
Low-Pressure Fuel Shutoff Solenoid Testing	412		
Fuel-Injector Testing	412		
Summary	412
