*Preface to the First Edition*

ix

<b>1. Functions of a Real Variable</b>	<b>1.1</b>
1.1 Introduction	1.1
1.2 Limits, Continuity and Differentiability	1.1
1.2.1 Limit of a Function	1.1
1.2.2 Continuity of a Function	1.3
1.2.3 Derivative of a Function	1.5
1.3 Application of Derivatives and Taylor's Series	1.10
1.3.1 Differentials and Approximations	1.10
1.3.2 Mean Value Theorems	1.11
1.3.3 Indeterminate Forms	1.14
1.3.4 Increasing and Decreasing Functions	1.15
1.3.5 Maximum and Minimum Values of a Function	1.17
1.3.6 Taylor's Theorem and Taylor's Series	1.19
1.3.7 Exponential, Logarithmic and Binomial Series	1.23
1.4 Integration and its Applications	1.30
1.4.1 Indefinite Integrals	1.30
1.4.2 Definite Integrals	1.31
1.4.3 Area of a Bounded Region	1.33
1.4.4 Arc Length of a Plane Curve	1.37
1.4.5 Volume of a Solid	1.38
1.4.6 Surface Area of a Solid of Revolution	1.45
1.5 Improper Integrals	1.49
1.5.1 Improper Integrals of the First Kind	1.50
1.5.2 Improper Integrals of the Second Kind	1.54
1.5.3 Absolute Convergence of Improper Integrals	1.59
1.5.4 Beta and Gamma Functions	1.60
1.5.5 Improper Integrals Involving a Parameter	1.68
1.5.6 Error Functions	1.72
1.6 Some Properties of Curves and Curve Sketching	1.79
1.6.1 Convexity and Concavity of a Curve	1.79
1.6.2 Curvature, Circle of Curvature and Radius of Curvature	1.82
1.6.3 Evolute and Involute of a Curve	1.89
1.6.4 Envelope of a Family of Curves	1.91
1.6.5 Asymptotes to a Curve	1.93
1.6.6 Curve Sketching	1.100
1.7 Answers and Hints	1.104

<b>2. Functions of Several Real Variables</b>	<b>2.1</b>
2.1 Introduction	2.1
2.2 Functions of Two Variables	2.1
2.2.1 Limits	2.4
2.2.2 Continuity	2.7
2.3 Partial Derivatives	2.12
2.3.1 Total Differential and Derivatives	2.17
2.3.2 Approximation by Total Differentials	2.22
2.3.3 Derivatives of Composite and Implicit Functions	2.24
2.4 Higher Order Partial Derivatives	2.32
2.4.1 Homogeneous Functions	2.35
2.4.2 Taylor's Theorem	2.38
2.5 Maximum and Minimum Values of Functions	2.46
2.5.1 Lagrange Method of Multipliers	2.51
2.6 Multiple Integrals	2.55
2.6.1 Double Integrals	2.55
2.6.2 Triple Integrals	2.65
2.6.3 Change of Variables in Integrals	2.68
2.6.4 Dirichlet Integrals	2.72
2.7 Answers and Hints	2.79
<b>3. Matrices and Eigenvalue Problems</b>	<b>3.1</b>
3.1 Introduction	3.1
3.2 Matrices	3.1
3.2.1 Matrix Algebra	3.3
3.2.2 Some Special Matrices	3.5
3.2.3 Determinants	3.7
3.2.4 Inverse of a Square Matrix	3.12
3.2.5 Solution of $n \times n$ Linear System of Equations	3.14
3.3 Vector Spaces	3.21
3.3.1 Subspaces	3.24
3.3.2 Linear Independence of Vectors	3.27
3.3.3 Dimension and Basis	3.29
3.3.4 Linear Transformations	3.32
3.4 Solution of General Linear System of Equations	3.47
3.4.1 Existence and Uniqueness of the Solution	3.48
3.4.2 Elementary Row and Column Operations	3.50
3.4.3 Echelon Form of a Matrix	3.51
3.4.4 Gauss Elimination Method for Non-homogeneous Systems	3.54
3.4.5 Homogeneous System of Linear Equations	3.58
3.4.6 Gauss Jordan Method to Find the Inverse of a Matrix	3.59
3.5 Eigenvalue Problems	3.62
3.5.1 Eigenvalues and Eigenvectors	3.63
3.5.2 Similar and Diagonalisable Matrices	3.71
3.5.3 Special Matrices	3.77
3.5.4 Quadratic Forms	3.81
3.6 Answers and Hints	3.87

<b>4. Ordinary Differential Equations of First Order</b>	<b>4.1</b>
4.1 Introduction	4.1
4.2 Formation of Differential Equations	4.2
4.3 Solution of a Differential Equation	4.3
4.4 Initial and Boundary Value Problems	4.5
4.5 Solution of Equations in Separable Form	4.7
4.5.1 Equations Reducible to Separable Form	4.10
4.6 Exact First Order Differential Equations	4.15
4.6.1 Integrating Factors	4.18
4.7 Linear First Order Equations	4.25
4.8 Some Special First Order Equations	4.29
4.8.1 Bernoulli Equation	4.29
4.8.2 Riccati Equation	4.31
4.8.3 Clairaut's Equation	4.32
4.9 Orthogonal Trajectories of a Given Family of Curves	4.34
4.10 Existence and Uniqueness of Solutions	4.40
4.10.1 Picard's Iteration Method of Solution	4.44
4.11 Answers and Hints	4.47
<b>5. Linear Differential Equations</b>	<b>5.1</b>
5.1 Introduction	5.1
5.2 Solution of Linear Differential Equations	5.2
5.2.1 Linear Independence and Dependence	5.4
5.3 Methods for Solution of Linear Equations	5.9
5.3.1 Differential Operator $D$	5.9
5.3.2 Solution of Second Order Linear Homogeneous Equations with Constant Coefficients	5.11
5.3.3 Method of Reduction of Order for Variable Coefficient Linear Homogeneous Second Order Equations	5.16
5.3.4 Solution of Higher Order Homogeneous Linear Equations with Constant Coefficients	5.19
5.4 Solution of Non-homogeneous Linear Equations	5.25
5.4.1 Method of Variation of Parameters	5.27
5.4.2 Method of Undetermined Coefficients	5.32
5.4.3 Solution of Euler-Cauchy Equation	5.37
5.5 Operator Methods for Finding Particular Integrals	5.44
5.5.1 Case $r(x) = e^{\alpha x}$	5.45
5.5.2 Case $r(x) = \cos(\alpha x)$ or $\sin(\alpha x)$	5.49
5.5.3 Case $r(x) = x^\alpha$ , $\alpha > 0$ and Integer	5.52
5.6 Simultaneous Linear Equations	5.55
5.6.1 Solution of First Order Systems by Matrix Method	5.58
5.6.2 Method of Undetermined Coefficients to Find Particular Integral	5.62
5.6.3 Method of Diagonalisation to Find Particular Integral	5.65
5.7 Answers and Hints	5.68
<b>6. Series Solution of Differential Equations</b>	<b>6.1</b>
6.1 Introduction	6.1

- 6.2 Ordinary and Singular Points of an Equation 6.1
- 6.3 Power Series Solution 6.4
- 6.4 Series Solution about a Regular Singular Point: Frobenius Method 6.15
- 6.5 Answers and Hints 6.28

## **7. Legendre Polynomials, Chebyshev Polynomials, Bessel Functions and Sturm-Liouville Problem**

7.1

- 7.1 Introduction 7.1
- 7.2 Legendre Differential Equation and Legendre Polynomials 7.1
  - 7.2.1 Rodrigue's Formula 7.3
  - 7.2.2 Generating Function for Legendre Polynomials 7.5
  - 7.2.3 Recurrence Relations for Legendre Polynomials 7.7
  - 7.2.4 Orthogonal and Orthonormal Functions 7.9
  - 7.2.5 Orthogonal Property of Legendre Polynomials 7.11
  - 7.2.6 Fourier-Legendre Series 7.13
- 7.3 Chebyshev Differential Equation and Chebyshev Polynomials 7.16
  - 7.3.1 Chebyshev Polynomials of First Kind 7.18
  - 7.3.2 Chebyshev Polynomials of Second Kind 7.26
- 7.4 Bessel's Differential Equation and Bessel's Functions 7.32
  - 7.4.1 Bessel's Function of the First Kind 7.36
  - 7.4.2 Bessel's Function of the Second Kind 7.42
- 7.5 Sturm-Liouville Problem 7.48
  - 7.5.1 Orthogonality of Bessel Functions 7.55
  - 7.5.2 Fourier-Bessel Series 7.57
- 7.6 Answers and Hints 7.61

## **8. Laplace Transformation**

8.1

- 8.1 Introduction 8.1
- 8.2 Basic Theory of Laplace Transforms 8.1
- 8.3 Laplace Transform Solution of Initial Value Problems 8.7
  - 8.3.1 Laplace Transforms of Derivatives 8.7
  - 8.3.2 Laplace Transforms of Integrals 8.11
- 8.4 Translation Theorems (Shifting Theorems) 8.14
  - 8.4.1 Heaviside Function or Unit Step Function 8.17
- 8.5 Laplace Transform of Dirac-delta Function and More Properties of Laplace Transforms 8.25
  - 8.5.1 Laplace Transform of Dirac-delta Function 8.25
  - 8.5.2 Differentiation of Laplace Transform 8.28
  - 8.5.3 Integration of Laplace Transform 8.32
  - 8.5.4 Convolution Theorem 8.34
- 8.6 Laplace Transform of Periodic Functions 8.39
- 8.7 Laplace Transform Method for the Solution of Some Partial Differential Equations 8.45
- 8.8 Answers and Hints 8.61

<b>9. Fourier Series, Fourier Integrals and Fourier Transforms</b>	<b>9.1</b>
9.1 Introduction 9.1	
9.2 Fourier series 9.1	
9.2.1 Fourier Series of Even and Odd Functions 9.7	
9.2.2 Convergence of Fourier Series 9.9	
9.3 Fourier Half-range Series 9.16	
9.3.1 Complex Form of Fourier Series 9.18	
9.4 Fourier Integrals 9.21	
9.5 Application of Fourier Series: Separation of Variables Solution of Linear Partial Differential Equations 9.29	
9.5.1 Classification of Linear Second Order Partial Differential Equations 9.29	
9.5.2 Separation of Variables Method (Fourier Method) 9.30	
9.5.3 Fourier Series Solution of the Heat Equation 9.31	
9.5.4 Fourier Series Solution of the Wave Equation 9.37	
9.5.5 Fourier Series Solution of the Laplace Equation 9.47	
9.6 Fourier Transforms 9.53	
9.6.1 Fourier Transform Solution of Some Partial Differential Equations 9.66	
9.7 Answers and Hints 9.72	
<b>10. Functions of a Complex Variable: Analytic Functions</b>	<b>10.1</b>
10.1 Introduction 10.1	
10.2 Complex Number System 10.1	
10.2.1 Algebra of Complex Numbers 10.2	
10.2.2 Polar Form of a Complex Number 10.3	
10.2.3 Powers and Roots of a Complex Number 10.5	
10.3 Sets of Points in the Complex Plane 10.12	
10.4 Functions of a Complex Variable 10.15	
10.5 Elementary Functions 10.22	
10.5.1 Exponential function 10.22	
10.5.2 Trigonometric and Hyperbolic Functions 10.24	
10.5.3 Logarithm Function 10.29	
10.5.4 General Powers of Functions 10.31	
10.5.5 Inverse Trigonometric and Hyperbolic Functions 10.32	
10.6 Limits and Continuity 10.36	
10.6.1 Limit of a Function 10.36	
10.6.2 Continuity of a Function 10.42	
10.6.3 Uniform Continuity 10.45	
10.7 Differentiability and Analyticity 10.48	
10.7.1 Cauchy-Riemann Equations 10.52	
10.8 Harmonic Functions 10.65	
10.9 Answers and Hints 10.70	
<b>11. Integration of Complex Functions</b>	<b>11.1</b>
11.1 Introduction 11.1	
11.2 Definite Integrals 11.1	
11.2.1 Curves in the Complex Plane 11.3	
11.2.2 Contour Integrals (Line Integrals in the Complex Plane) 11.6	

- 11.3 Cauchy Integral Theorem 11.20
  - 11.3.1 Extension of Cauchy Integral Theorem for Multiply Connected Domains 11.27
  - 11.3.2 Use of Indefinite Integrals in the Evaluation of Line Integrals 11.32
- 11.4 Cauchy Integral Formula 11.36
- 11.5 Cauchy Integral Formula for Derivatives 11.43
- 11.6 Answers and Hints 11.50

## 12. Power Series, Taylor and Laurent Series

12.1

- 12.1 Introduction 12.1
- 12.2 Infinite Sequences 12.1
  - 12.2.1 Real Sequences 12.1
  - 12.2.2 Complex Sequences 12.6
  - 12.2.3 Sequences of Functions 12.9
  - 12.2.4 Uniform Convergence 12.11
- 12.3 Infinite Series 12.13
  - 12.3.1 Tests for Convergence 12.15
  - 12.3.2 Uniform Convergence for Series of Functions 12.21
- 12.4 Power Series 12.24
- 12.5 Taylor Series 12.29
- 12.6 Laurent Series 12.38
- 12.7 Answers and Hints 12.48

## 13. Zeros, Singularities and Residues

13.1

- 13.1 Introduction 13.1
- 13.2 Zeros and Singularities of Complex Functions 13.1
- 13.3 Residues 13.10
- 13.4 Evaluation of Contour Integrals Using Residues 13.18
- 13.5 Evaluation of Real Integrals Using Residues 13.23
  - 13.5.1 Real Definite Integrals Involving Trigonometric Functions 13.23
  - 13.5.2 Improper Integrals of the Form  $\int_{-\infty}^{\infty} f(x)dx$  13.27
  - 13.5.3 Improper Integrals of the Form  $\int_{-\infty}^{\infty} \cos(ax)f(x)dx$  or  $\int_{-\infty}^{\infty} \sin(ax)f(x)dx$  13.33
  - 13.5.4 Improper Integrals with Singular Points on the Real Axis 13.37
- 13.6 Answers and Hints 13.48

## 14. Bilinear Transformations and Conformal Mapping

14.1

- 14.1 Introduction 14.1
- 14.2 Linear and Inverse Transformations 14.2
  - 14.2.1 Linear Transformation 14.2
  - 14.2.2 Inverse Transformation 14.7
- 14.3 Bilinear Transformations 14.15
- 14.4 Conformal Mapping 14.28
- 14.5 Answers and Hints 14.34

<b>15. Vector Differential and Integral Calculus</b>	<b>15.1</b>
15.1 Introduction	15.1
15.2 Parametric Representations, Continuity and Differentiability of Vector Functions	15.2
15.2.1 Motion of a Body or a Particle on a Curve	15.8
15.3 Gradient of a Scalar Field and Directional Derivative	15.10
15.4 Divergence and Curl of a Vector Field	15.18
15.5 Line Integrals and Green's Theorem	15.25
15.5.1 Line Integrals Independent of the Path	15.30
15.5.2 Green's Theorem	15.34
15.6 Surface Area and Surface Integrals	15.42
15.6.1 Surface Area	15.42
15.6.2 Surface Integrals	15.47
15.7 Divergence Theorem of Gauss and Stokes's Theorem	15.56
15.7.1 Divergence Theorem of Gauss	15.56
15.7.2 Stokes's Theorem	15.63
15.8 Answers and Hints	15.71
<b>16. Partial Differential Equations</b>	<b>16.1</b>
16.1 Introduction	16.1
16.2 Formation of First and Second Order Equations	16.3
16.3 Solution of First Order Equations	16.7
16.3.1 Lagrange's Equation	16.8
16.3.2 Non-linear First Order Equations	16.16
16.3.3 Charpit's Method	16.16
16.3.4 Higher Order Linear Equations with Constant Coefficients	16.26
16.3.5 Quasi-Linear Second Order Equations: Monge's Method	16.41
16.4 Answers and Hints	16.47
<b>17. Z Transformation</b>	<b>17.1</b>
17.1 Introduction	17.1
17.2 Basic Theory of Z Transforms	17.1
17.3 Solution of Difference Equations Using Z Transforms	17.19
17.4 Answers and Hints	17.23
<b>18. Numerical Methods</b>	<b>18.1</b>
18.1 Introduction	18.1
18.2 Solution of Algebraic and Transcendental Equations	18.5
18.2.1 Initial Approximations	18.7
18.2.2 Bisection Method	18.8
18.2.3 Secant and Regula-Falsi Methods	18.9
18.2.4 Newton-Raphson Method	18.12
18.2.5 General Iteration Method	18.14
18.2.6 Rate of Convergence	18.16
18.2.7 System of Nonlinear Equations	18.19
18.3 Solution of Linear System of Equations	18.23
18.3.1 Gauss Elimination Method	18.25

18.3.2	Gauss-Jordan Method	18.28	
18.3.3	LU Decomposition Method	18.29	
18.3.4	Choleski Decomposition Method	18.32	
18.3.5	Gauss-Jacobi Iteration Method	18.36	
18.3.6	Gauss-Seidel Iteration Method	18.37	
18.4	Interpolation	18.44	
18.4.1	Lagrange Interpolation	18.44	
18.4.2	Newton's Divided Difference Interpolation	18.50	
18.4.3	Finite Difference Operators	18.53	
18.4.4	Newton's Forward Difference Interpolation	18.57	
18.4.5	Newton's Backward Difference Interpolation	18.58	
18.5	Least Squares Approximation	18.61	
18.5.1	Approximation by Polynomials	18.61	
18.5.2	Approximation by Exponential Functions	18.66	
18.5.3	Approximation by Power Function	18.67	
18.6	Numerical Differentiation and Integration	18.69	
18.6.1	Numerical Differentiation Methods	18.69	
18.6.2	Numerical Integration Methods	18.75	
18.7	Numerical Solution of Ordinary Differential Equations	18.84	
18.7.1	Taylor Series Method	18.85	
18.7.2	Runge-Kutta Methods	18.88	
18.7.3	Multi Step Methods and Predictor-Corrector Methods	18.93	
18.8	Answers and Hints	18.103	
<b>19</b>	<b>Theory of Probability</b>		<b>19.1</b>
19.1	Introduction	19.1	
19.2	Random Experiments and Events	19.1	
19.3	Probability of an Event	19.5	
19.4	Conditional Probability	19.12	
19.5	Independent Events and Independent Experiments	19.15	
19.6	Theorem of Total Probability and Baye's Theorem	19.20	
19.7	Random Variables	19.24	
19.7.1	Two Dimensional Random Variables	19.31	
19.7.2	Functions of Random Variables	19.40	
19.7.3	Transformations of Two Dimensional Random Variables	19.41	
19.8	Some Probability Distributions	19.48	
19.8.1	Binomial Distribution	19.48	
19.8.2	Poisson Distribution	19.52	
19.8.3	Uniform (Rectangular) Distribution	19.57	
19.8.4	Normal Distribution	19.60	
19.9	Answers and Hints	19.75	
<b>20.</b>	<b>Mathematical Statistics—Tests of Significance</b>		<b>20.1</b>
20.1	Introduction	20.1	
20.2	Sampling and Standard Error	20.1	
20.3	Tests of Significance for Large Samples	20.4	
20.4	Tests of Significance for Small Samples	20.17	

20.4.1 Student's $t$ -Distribution	20.18
20.4.2 Snedecor's $F$ -Distribution	20.26
20.5 Chi-Square Distribution	20.34
20.6 Answers and Hints	20.45
Appendix 1: Mean Value Theorems and Remainders of Taylor's Theorem	A.1
Appendix 2: Tests for Convergence	A.6
Appendix 3: Canonical form of Variable Coefficient Second Order Partial Differential Equations	A.10
Appendix 4: Orthogonal Curvilinear Coordinate Systems	A.13
Some Reference Textbooks	R.1
Index	I.1
