Integrating Geographic Information Systems into Library Services

A Guide for Academic Libraries

JOHN ABRESCH, ARDIS HANSON,
SUSAN HERON, & PETE REEHLING

Integrating Geographic Information Systems into Library Services:

A Guide for Academic Libraries

Table of Contents

Foreword viii

Preface xi

Chapter I
Geography and Librarianship 1
Introduction 1
Geographic Study and Maps 2
Maps and Map Libraries 3
Communicating Geospatial Information 5
Libraries: Facilitating Research in Geographic Information Science 7
UCGIS Mission 8
Library and Information Science 10
Geospatial Data and the Information Economy 12

Spatial Databases and Data Infrastructures 13
Describing Geospatial Information 13
Describing GIS Data Standards 14
Access Issues in Using Geosptial Data 15
Reference Services, GIS, and Academic Libraries 15
Collection Management Issues in GIS 16
Strategies for Integrating GIS in Library and Information Science Education 16
Prognostication: Trends in GIS, Geospatial Data, and Academic Libraries Services 17
References 18

Chapter II
Information Economy and Geospatial Information **22**
Introduction 22
Role of Information in Contemporary Economy 23
Geographies of the Internet 30
Convergence of Communication Technologies 31
The Social Structure of the Information Economy 34
Community Internet Initiatives 35
The Role of Libraries in the Information Economy 36
Development of Geographic Information Systems (GIS) 38
Applications of Spatial Data and GIS 39
Map Libraries in Transition 42
Conclusion/Summary 42
References 44

Chapter III
Spatial Databases and Data Infrastructure **53**
Introduction 53
Characteristics of Spatial Data 54
Conceptualizing Spatial Databases 55
Elements of Database Design 56
Emergence of a Telecommunications Network 58
Characteristics of Distributed Spatial Databases 64
Databases, Web Services, and Internet GIS 67
Organizing a National Data Infrastructure 69
A Cooperative Information Network 71
Digital Geolibraries and Digital Collections 72
Web GIS and Libraries 75
Conclusion/Summary 77
References 78

Chapter IV
Describing Geospatial Information 82
Overview and Introduction 82
Descriptive Standards in Libraries 83
MARC 84
MARC XML 89
AACR2r 90
Resource Description and Access (RDA) 90
Classification Schedules 92
Subject Access 95
Finding Geographic Information in Libraries 96
Making the Map 98
Bibliographic Issues for Maps 99
Bibliographic Description and Access Points:
Title, Author, and Mathematical Data 100
Conclusion/Summary 108
References 110

Chapter V
From Print Formats to Digital: Describing GIS Data Standards 114
Introduction 114
What is Spatial Information? 115
Creating a National Spatial Digital Infrastructure 116
Standards Developers 119
The International Organization for Standardization (ISO) 121
Languages and Protocols 131
Content Standard for Digital Geospatial Metadata 136
Conclusion/Summary 139
References 142
Endnotes 145
Appendix 146

Chapter VI
Accessibility: Critical GIS, Ontologies, and Semantics 151
Introduction 151
Interoperability and Accessibility 152
The Emergence of Critical GIS 153
Ontologies and Semantics 154
Quality Assurance 156
Building Interoperable, Semantic Systems 159
Digital Libraries: Solutions and Possibilities 161
Individual and Organizational End Users: Issues in Accessibility 162
The Library's Role 165
Conclusion/Summary 167
References 168

Chapter VII
Reference Services 175
Introduction 175
Spatial Thinking 176
Interpreting the Milieu of Spatial Data 177
Reinterpreting Traditional Patron Interactions 179
Reconfiguring Instruction, Training, and Instructional Support 186
Achieving Information Competencies 193
Conclusion/Summary 196
References 196
Endnote 201

Chapter VIII
Collection Management Issues with Geospatial Information 202
Introduction 202
Creating a Collection Development Policy 203
Building Geospatial Information Collections 207
Collecting Governmental GIS Data 219
Managing Geospatial Data Records 224
Legal Considerations in Collecting Geospatial Information 227
Conclusion/Summary 235
References 236

Chapter IX
Geographic Information and Library Education 239
Introduction 239
Preparing Librarians for a Paradigm Shift 240
Basic Skills for Librarians 240
Important Components in SLIS/GIS Curricula 242
Promoting Geographic Literacy: Skills needed by Librarians, Educators, and Students 246
Developing a GIS-Integrated Curriculum for Library and Information Science 249
Linking Preservice to In-Service Training 257
Distance Learning in GIS 262
Conclusion/Summary 262
References 263
Endnotes 266

Chapter X
What the Future Holds: Trends in GIS and Academic Libraries 267
Introduction 267
Getting From Then to Now 268
GIScience Research 268

Social Informatics and GIS *275*
Spatially Integrated Social Sciences *276*
Information Ecology *277*
Spatial Visualization *277*
Geocomputation *278*
The Role(s) of Libraries *279*
Conclusion/Summary *284*
References *286*

About the Contributors **296**

Index **298**
