## 1. Consultation, medical history and record-taking 1

Ian Watt

The consultation	1
Gathering information: the history	3
Systems review	7
Recording the medical interview	10

---

## 2. The general examination 20

Owen Epstein

General examination	20
Formal examination	21
Recognisable syndromes and facies	22
Endocrine syndromes	27
The thyroid gland	27
The parathyroid glands	33
The adrenal glands	35
The pituitary gland	38
Nutrition	40
Clinical assessment of vitamin status	43
Clinical assessment of hydration	44
Clinical assessment of shock	44
Colour	45
Oedema	46
Temperature and fever	49
The lymphatic system	50

---

## 3. Skin, hair and nails 57

Owen Epstein

Structure and function	57
Symptoms of skin disease	59
Symptoms of hair disease	60
Symptoms of nail disease	61
Examination of the skin, hair and nails	61
Skin infections	71
Skin manifestations of systemic disease	78
Nail disorders	79

---

## 4. Ear, nose and throat 82

Graham A. W. Hornett

Structure of the ear	82
Symptoms of ear disease	83
Examination of the ear	86
Structure of the nose and sinuses	93
Symptoms of diseases of the nose and sinuses	94
Examination of the nose and sinuses	96
Structure of the throat	98
Symptoms of diseases of the throat	100
Examination of the throat	101

---

## 5. The respiratory system 105

John Cookson

Structure and function	105
Symptoms of respiratory disease	112
General examination	120
Examination of the chest	125
Common patterns of abnormality	133

---

## 6. The heart and cardiovascular system 139

Roby Rakhit

Structure and function	139
Electrical activity of the heart	144
Cardiac arrhythmias	145
Blood supply to the heart	148
The arterial system	151
The venous system	152
Clinical history	152
Occupation and family history	157
Clinical examination of the cardiovascular system	157
Examination of the jugular venous pulse	164
Palpation of the precordium	166
Auscultation of the heart	167

Cardiovascular system and chest examination	173	The hip	290
Cardiovascular system and abdominal examination	173	The knee	295
Peripheral vascular system	174	The ankle and foot	299
Peripheral vascular disease	178	Patterns of weakness in muscle diseases	303
<hr/>		<hr/>	
<b>7. The abdomen</b>	<b>186</b>	<b>11. The nervous system</b>	<b>307</b>
<b>Owen Epstein</b>		<b>G. David Perkin</b>	
Structure and function	186	The cortex	307
Symptoms of abdominal disorders	193	Examination	310
Examination of the abdomen	204	Clinical application	314
Examining the groin	220	<b>The psychiatric assessment</b>	<b>317</b>
Examining the anus, rectum and prostate	221	Examination	319
<hr/>		Clinical application	319
<b>8. Female breasts and genitalia</b>	<b>226</b>	Headache and facial pain	320
<b>Owen Epstein</b>		The cranial nerves	321
Structure and function	226	The olfactory (first) nerve	321
Breast structure and function	229	Examination	322
Symptoms of breast disease	230	Clinical application	322
Examination of the breast	231	<b>The optic (second) nerve</b>	<b>322</b>
Structure of the genital tract	235	Examination	323
Symptoms of genital tract disease	238	Clinical application	327
Examination of the female genital tract	242	<b>The oculomotor, trochlear and abducens (third, fourth and sixth) nerves</b>	<b>332</b>
Examination of the abdomen	242	Examination	337
Examining the external genitalia	243	Clinical application	340
Examination of the vagina	244	<b>The trigeminal (fifth) nerve</b>	<b>345</b>
Examination of the cervix	246	Examination	347
Internal examination of the uterus	248	Clinical application	349
<hr/>		<b>The facial (seventh) nerve</b>	<b>349</b>
<b>9. The male genitalia</b>	<b>252</b>	Examination	350
<b>Owen Epstein</b>		Clinical application	351
Structure and function	252	<b>The acoustic (eighth) nerve</b>	<b>353</b>
Symptoms of genital tract disease	255	Examination and clinical application	354
Examination of the male genitalia	257	<b>The glossopharyngeal (ninth) nerve</b>	<b>354</b>
<hr/>		Examination	355
<b>10. Bone, joints and muscle</b>	<b>265</b>	Clinical application	355
<b>G. David Perkin</b>		<b>The vagus (tenth) nerve</b>	<b>355</b>
Structure and function	265	Examination	355
Symptoms of bone, joint and muscle disorders	267	Clinical application	356
General principles of examination	269	<b>The accessory (eleventh) nerve</b>	<b>356</b>
GALS	272	Examination	356
Regional structure, function and examination	274	Clinical application	357
Temporomandibular joints	274	<b>The hypoglossal (twelfth) nerve</b>	<b>357</b>
The spine	274	Examination	357
The shoulder	279	Clinical application	358
The elbow	282		
The forearm and wrist	283		
The hand	286		

The motor system	359
Examination	362
Clinical application	370
<b>The cerebellar system</b>	<b>371</b>
Examination	372
Clinical application	374
<b>The sensory system</b>	<b>374</b>
Examination	377
Clinical application	380
<b>The unconscious patient</b>	<b>382</b>
Examination	383
Clinical application	385
<hr/>	
<b>12. Infants and children</b>	<b>390</b>
<b>Andrew Robins</b>	
Taking a history	390
The examination	392
Growth and development	393
The newborn and very young baby	397
Older babies and toddlers	407
The preschool child	412
The school-aged child	414
Adolescents	416
 Index	 421
