Part I The Patient Problem with

1. Abnormal Bleeding	3
Absent periods	3
Heavy periods	6
Intermenstrual and postcoital bleeding	7
Painful periods	7
Postmenopausal bleeding	9
2. Pelvic Pain and Dyspareunia	11
Differential diagnosis	11
Relevant history	11
Physical exam	13
Appropriate work-up	14
3. Vaginal Discharge	17
Differential diagnosis	17
Relevant history	17
Physical exam	18
Appropriate work-up	19
4. Vulvar Symptoms	21
History	21
Examination	22
Appropriate work-up	23
5. Urinary Incontinence	25
History	25
Physical exam	26
Laboratory studies	26
6. Prolapse	29
Differential diagnosis	29
Relevant history	29
Physical exam	30
Appropriate work-up	31
7. Bleeding and/or Pain in Early Pregnancy	33
Relevant history	33
Physical exam	34

Appropriate work-up	35
Recurrent miscarriage	35
Trophoblastic disease	37

8. Infertility	39
Taking the history	39
Physical exam	41
Work-up of infertility	41
9. Menopause	45
Presentation and differential diagnosis	45
Bleeding disturbances	45
Vasomotor symptoms	45
Psychologic symptoms	45
Systemic menopausal symptoms	46
Long-term symptoms of menopause	46
10. Bleeding in the Second and Third Trimesters of Pregnancy	49
Differential diagnosis of bleeding	49
Relevant history	49
Physical exam	50
Appropriate work-up	50
Management	51
11. Large- or Small-for-Dates	53
Differential diagnosis	53
Relevant history	53
Examination of the patient with an S > D or S < D uterus	54
Investigation of the patient with an S > D or S < D uterus	54
12. Abdominal Pain in the Second and Third Trimesters of Pregnancy	57
Differential diagnosis	57
Relevant history	57
Physical exam	58
Appropriate work-up	59
Management	60
13. Hypertension in Pregnancy	61
Differential diagnosis	61
History	61

Physical exam	61	Menorrhagia	94
Work-up	62	Postmenopausal bleeding	100
14. Stillbirth	65	Further reading	102
History	65	20. Fibroids	103
Physical exam	66	Symptoms of uterine fibroids	103
Work-up	66	Complications	103
Management of stillbirth	67	Clinical evaluation	104
Follow-up	67	Indications for treatment	104
15. Failure to Progress in Labor	69	Medical therapy	104
Relevant history	69	Surgical treatment	105
Physical exam	70	Advances in fibroid treatment	105
Work-up	71	Further reading	105
Management	72	21. Endometriosis	107
16. Abnormal Fetal Heart Rate		Etiology	107
Tracing in Labor	73	Sites of endometriosis	108
Features of the fetal heart rate		Symptoms	108
tracing	73	Infertility	108
Physiology	75	Clinical evaluation	110
Monitoring uterine contractions	75	Differential diagnosis	110
History of the patient who		Treatment	110
presents with an abnormal fetal		Further reading	112
heart rate tracing in labor	76	22. Benign Ovarian Tumors	113
Examination of the patient who		Incidence	113
presents with an abnormal fetal		Etiology	113
heart rate tracing in labor	76	Diagnosis	114
Investigating the abnormal fetal		Examination	114
heart rate tracing	77	Work-up	115
17. Bleeding after Delivery	79	Management of a benign ovarian	
Postpartum hemorrhage	79	tumor	115
History to focus on the differential		Further reading	116
diagnosis	79	23. Gynecologic Malignancy	117
Examination	80	Ovarian malignancy	117
Appropriate work-up	81	Uterine endometrial tumors	119
18. Maternal Collapse	83	Uterine sarcoma	120
Hemorrhage	83	Cervix	120
Amniotic fluid embolism	84	Cervical carcinoma	123
Acute myocardial infarction	84	Vulvar tumors	124
Eclampsia	84	Vaginal tumors	126
Diabetic emergency	84	Further reading	127
Drug toxicity	86	24. Vulvar Disease	129
Puerperal sepsis	86	Histology of the vulva	129
Thromboembolism	87	Vulvar dystrophies	129
Part II Diseases and Disorders	89	Neoplasia	129
19. Abnormal Uterine Bleeding	91	Dermatologic conditions	132
Amenorrhea	91	Further reading	132

25. Pelvic Inflammatory Disease	133	Clinical features of menopause.	161
Definition	133	Management	163
Incidence	133	Further reading.	165
Etiology	133		
Diagnosis	133	31. Contraception, Sterilization, and	
History	133	Unwanted Pregnancy	167
Examination	133	Introduction	167
Work-up.	134	Natural family planning methods	167
Complications.	134	Barrier methods	167
Treatment.	135	Hormonal contraception.	168
Prevention	135	Intrauterine devices	169
Further reading.	135	Female sterilization	170
		Male sterilization	171
26. Urinary Incontinence	137	Termination of pregnancy	171
Incidence	137	Further reading.	171
Etiology	137		
Appropriate work-up	139	32. Gynecologic Endocrinology	173
Complications.	139	Amenorrhea: primary and secondary	173
Treatment.	139	Hirsutism and virilism	173
Further reading.	141	Further reading.	178
27. Pelvic Organ Prolapse	143	33. Prenatal Diagnosis	179
Definition	143	Who is offered prenatal diagnosis?	179
Incidence	144	Techniques for prenatal diagnosis.	179
Pelvic anatomy	144	Further reading.	182
Etiology	145		
Clinical features	145	34. Multiple Pregnancy	183
Management	146	Incidence of multiple pregnancy.	183
Further reading.	148	Diagnosis of multiple pregnancy.	183
		Etiology of multiple pregnancy.	183
28. Infertility	149	Complications of multiple pregnancy	186
Anovulation	149	Intrapartum management of a	
Uterine and pelvic problems.	149	twin pregnancy.	187
Tubal problems.	149	Higher order multiple pregnancies	188
Male infertility	150	Further reading.	188
Unexplained infertility.	151		
Ovarian hyperstimulation syndrome.	151	35. Hypertension in Pregnancy	189
Prognosis for the infertile couple	152	Nonproteinuric hypertension in	
Further reading.	152	pregnancy.	189
		Pre-eclampsia	190
29. Early Pregnancy Failure	153	Eclampsia	191
Miscarriage	153	Further reading.	193
Recurrent miscarriage	154		
Ectopic pregnancy	155	36. Medical Disorders in Pregnancy	195
Trophoblastic disease	157	Anemia.	195
Further reading.	159	Asthma.	195
		Diabetes	195
30. Menopause	161	Epilepsy	198
Definitions	161	Human immunodeficiency virus	199
Pathophysiology.	161	Liver disorders	200

Multiple sclerosis	201	41. Operative Intervention in Obstetrics	245
Psychiatric disorders	201	Episiotomy	245
Drug and alcohol dependence	203	Perineal repair.	246
Thromboembolism	203	Vacuum delivery.	246
Thyroid disorders	205	Forceps delivery	247
Further reading.	206	Cesarean section.	248
37. Antepartum Hemorrhage	207	Further reading.	250
Definition	207	42. Complications of the Third Stage	
Incidence	207	of Labor and the Puerperium	251
Etiology	207	Postpartum hemorrhage.	251
Placenta previa.	207	Early postpartum hemorrhage	251
Placental abruption.	208	Placenta accreta	253
Vasa previa.	210	Uterine inversion	253
Circumvallate placenta	210	Uterine rupture.	253
Unexplained antepartum		Late postpartum hemorrhage	253
hemorrhage	210	Lactation.	253
Further reading.	211	Postpartum infection	254
38. Premature Labor.	213	Postpartum mental illness.	254
Incidence	213	Thromboembolic disease	256
Clinical evaluation and investigation		Further reading.	256
of women in preterm labor.	214	43. Maternal Death	257
Treatment of women presenting in		Pregnancy mortality surveillance	
preterm labor	215	system.	257
Management of future pregnancies.	217	Causes of maternal death.	257
Further reading.	217	Further reading.	260
39. Malpresentation and Malpositions		Part III History and Examination	261
of the Occiput	219	44. Taking a History.	263
Malpresentation	219	Patient details.	263
Malposition.	228	Chief complaint	263
Further reading.	230	History of presenting illness	263
40. Labor	231	Past gynecologic history	264
Onset of labor	231	Past obstetric history	264
Progress in labor.	231	Past medical history	265
Mechanisms of normal delivery:		Review of systems	265
action of the uterus	235	Drug history	265
Delivery of the fetus.	235	Family history.	265
Management of the first stage		Social history	265
of labor.	235	Allergies	265
Management of the second stage		45. Prenatal Care	271
of labor.	239	The history	271
Management of the third stage		Examination	275
of labor.	239	Laboratory studies	275
Induction of labor.	240	Planning prenatal care	277
Failure to progress in labor.	241	Education at initial visit.	277
Further reading.	243		

46. Examination	279
General examination.	279
Abdominal examination	279

47. Common Investigations	293
Imaging techniques	293
Laparoscopy	295

Hysteroscopy	295
Cervical cytology/colposcopy	295
Urodynamics.	297

Glossary.	299
Index.	301
