

FOURTH EDITION

COMPREHENSIVE NEONATAL CARE

AN INTERDISCIPLINARY APPROACH

Carole **Kenner** • Judy Wright **Lott**

UNIT I **SYSTEMS ASSESSMENT AND** **MANAGEMENT OF DISORDERS, 1**

Chapter 1 Respiratory System, 1

Javier Cifuentes • Waldemar A. Carlo

Embryologic Development of the Lung, 1
Newborn Pulmonary Physiology and the Onset
of Breathing, 1
Assessment of the Neonate with Respiratory
Distress, 4
Common Disorders of the Respiratory
System, 7
Congenital Anomalies That Affect Respiratory
Function, 11
Collaborative Management of Infants with
Respiratory Disorders, 12
Assessment and Monitoring, 14
Environmental Considerations, 15
Family Care, 15

Chapter 2 Emerging Technologies for the Management of Respiratory Disorders, 18

Waldemar A. Carlo

Neonatal Hypoxemia, 18
Conventional Management of Neonatal
Hypoxemia, 18
Treatment of Neonatal Lung Disease with
Exogenous Surfactant, 20
Conventional Ventilatory Support and
Respiratory Considerations, 21
High-Frequency Ventilation, 22
Inhaled Nitric Oxide, 25
Treatment of Neonatal Hypoxemia with
Extracorporeal Membrane Oxygenation
(ECMO), 26
Liquid Ventilation, 27
Pharmacologic Therapies for Ventilated
Infants, 29

Chapter 3 Cardiovascular System, 32

Judy Wright Lott

Cardiovascular Adaptation, 32
Normal Cardiac Function, 34
Cardiac Assessment, 35
Cardiac Murmurs, 37
Congenital Heart Defects, 39

Chapter 4 Integumentary System, 65

*Carolyn Houska Lund •
Joanne McManus Kuller*

Skin Structure and Function, 65
Assessment and Physiologic Variations, 70
Dermatologic Diseases, 72
Skin Care Practices, 80
Management of Skin Care Problems, 84
Evidence-Based Skin Care Guideline, 88

Chapter 5 Gastrointestinal System, 92

Janet Thigpen

Physiology of the Gastrointestinal Tract, 92
Maturation of Gastrointestinal Function, 94
Assessment of the Gastrointestinal Tract, 95
Collaborative Management, 100
Consideration of Ethical Issues, 102
Management of Problems with Ingestion, 102
Management of Problems with Digestion, 109
Management of Problems with Elimination, 118
Other Gastrointestinal Disorders, 129
Support of Family with an Infant with a
Gastrointestinal System Disorder, 131

Chapter 6 Metabolic System, 134*Laura Stokowski*

General Principles: The Neonate with a Metabolic Disorder, 134
 Urea Cycle Disorders, 135
 Disorders of Amino Acid Metabolism, 138
 Disorders of Organic Acid Metabolism, 139
 Fatty Acid Oxidation Disorders, 143
 Congenital Lactic Acidoses, 145
 Disorders of Carbohydrate Metabolism, 146
 Peroxisomal Disorders, 148
 Lysosomal Disorders, 148
 Disorders of Cholesterol Synthesis, 150
 Disorders of Metal Metabolism, 151

Chapter 7 Endocrine System, 155*Laura Stokowski*

The Endocrine System, 155
 Pituitary Gland and Hypothalamus, 156
 Thyroid Gland, 157
 Adrenal Gland, 162
 Ambiguous Genitalia, 164
 Pancreas, 170

Chapter 8 Genitourinary System, 175*Leslie Parker*

The Urinary System, 175
 Physiology of Kidney Function, 175
 Assessment of the Genitourinary System, 179
 Risk Factors, 180
 Diagnostic Workup, 180
 Management, 184
 Urinary Tract Infection, 185
 Circumcision, 186
 Acute Renal Failure, 187
 Potter's Syndrome, 190
 Renal Aplasia, 190
 Cystic Kidney Disease, 191
 Prune-Belly Syndrome (Eagle-Barrett Syndrome), 192
 Exstrophy of the Bladder, 193
 Renal Vein Thrombosis, 194
 Hydronephrosis, 194
 Obstructive Uropathy, 195
 Hydrocele, 196
 Inguinal Hernia, 196
 Torsion of the Testicle, 197
 Nephroblastoma (Wilms' Tumor), 198

Chapter 9 Immune System, 203*Judy Wright Lott*

Incidence of Neonatal Infection, 203
 Clinical Signs of Infection, 203
 Types of Neonatal Infection, 206

Chapter 10 Hematologic System, 221*Gail A. Bagwell*

Overview of the Hematologic System, 221
 Hemostatic System, 224
 Assessment of Hematologic Function, 229
 Common Hematologic Disorders, 229
 Common Coagulation Disorders in the Newborn, 247
 Blood Component Replacement Therapy, 250

Chapter 11 Musculoskeletal System, 254*Joyce M. Butler*

Assessment, 254
 Skeletal Dysplasias/Connective Tissue Disorders, 254
 Arthrogryposis, 258
 Developmental Dysplasia of the Hip (DDH), 259
 Clubfoot, 261
 Syndactyly, 261
 Polydactyly, 262
 Amniotic Band Syndrome, 262
 Congenital Muscular Torticollis, 263
 Birth Trauma, 263
 Craniosynostosis, 263
 TAR Syndrome: Thrombocytopenia–Absent Radius, 264

Chapter 12 Neurologic System, 267

*Susan Tucker Blackburn •
 Georgia R. Ditzenberger*

Central Nervous System Development and Structural Abnormalities, 267
 Neurologic Assessment, 273
 General Management, 276
 Neonatal Seizures, 277
 Hypoxic-Ischemic Encephalopathy, 281
 Germinal Matrix and Intraventricular Hemorrhage, 284
 White-Matter Injury in Preterm Infants, 287
 Birth Injuries, 288

Chapter 13 Auditory System, 300*Kathleen Haubrich*

- Anatomy of the Ear, 300
- Physiology of Audiologic Function, 302
- Hearing Impairment, 302
- Identification of the Hearing-Impaired Infant, 303
- History, 304
- Hereditary Hearing Loss, 305
- Other Perinatal and Postnatal Factors Associated with Hearing Loss, 306
- Differential Diagnosis, 307
- Diagnostic Tests, 307
- Imaging Studies, 307
- Screening Methods for Identification of Hearing Loss, 307
- Development of a Treatment Plan for the Hearing-Impaired Neonate, 309
- Implementation and Evaluation, 309

Chapter 14 Ophthalmic System, 313*Frances Strodbeck*

- Embryology, 313
- Assessment of the Eyes, 313
- Diagnostic Tests, 315
- Neonatal Conjunctivitis, 317
- Retinopathy of Prematurity, 318
- Congenital Defects, 326
- Congenital Infections, 327
- Other Disorders That Affect the Eyes, 328

UNIT II**SPECIAL CONSIDERATIONS, 333****Chapter 15 Fluids, Electrolytes, Vitamins, and Minerals, 333***Sergio DeMarini • Linda L. Rath*

- Water and Electrolytes, 333
- Water-Soluble Vitamins, 342
- Fat-Soluble Vitamins, 344
- Trace Minerals, 346
- Management, 347

Chapter 16 Neonatal and Infant Pharmacology, 350*Beth Shields*

- General Principles of Drug Therapy, 350
- Pediatric Off-Label Use, 350
- Pediatric Dosing Methods, 350
- Adverse Drug Effects, 350
- Developmental Pharmacokinetics, 351
- Therapeutic Drug Monitoring, 354
- Fetal and Infant Exposure to Maternal Medications, 355
- Medication Administration, 356

Chapter 17 Pain in the Newborn and Infant, 360*Marlene Walden*

- Defining Pain and Distress in Infants and Children, 360
- Developmental Neurophysiology of Pain, 360
- Clinical Assessment of Pain, 361
- Management of Neonatal Pain, 363
- Neonatal Nurse's Role and Responsibilities, 369

Chapter 18 Fetal Therapy, 372*Jody A. Farrell • Kathy Bergman • Carole Kenner*

- Historical Overview, 372
- Fetus as Patient: Maternal-Fetal Risks and Benefits, 373
- Fetal Surgical Techniques, 374
- Fetal Malformations Amenable to Surgical Correction, 375
- Intraprofessional Collaborative Approach to Fetal Therapy, 379
- Fetal Therapy: New Horizons, 382

Chapter 19 Surgical Considerations in the Newborn and Infant, 385*Kaye Spence*

- Antenatal Considerations, 385
- Transportation of Infants for Surgery, 385
- Surgical Neonatal Intensive Care Units (SNICUs), 385
- Classification of Neonatal Surgery, 386
- Preparation for Surgery, 386
- During Surgery, 389
- Postoperative Care, 390

UNIT III

VULNERABLE POPULATIONS, 392

Chapter 20 Newborn or Infant Transplant Patient, 392

Linda MacKenna Ikuta

Liver Transplantation in Infants and Children, 392
 Contraindications for Liver Transplantation, 393
 Transplant Selection, 393
 Estimation Scales of Liver Allocation, 393
 Pretransplant Management, 393
 Types of Liver Transplants, 393
 Heterotopic Liver Transplantation, 393
 Reduced-Size Liver Transplantation, 393
 Living Donor Transplantation, 393
 Auxiliary Liver Transplantation, 393
 Portal Hypertension, 394
 Infection, 394
 Posttransplant Management, 394
 Postoperative Complications, 395
 Heart Transplant, 395
 Physiology of the Transplanted Heart, 395
 Renal Transplantation in Infants and Children, 395
 Intestinal Transplant, 396
 Organ Procurement, 397
 Pediatric Critical Pathway, 397
 Stem Cell Transplantation, 397

Chapter 21 Substance-Exposed Newborn, 404

Deborah L. Fike

Overview, 404
 Screening for Maternal Substance Use, 405
 Laboratory Tests, 407
 Ethical Considerations, 408
 Drugs and the Internet, 408
 Tobacco, 408
 Alcohol, 413
 Cocaine, 418
 Heroin, 425
 Neonatal Abstinence Syndrome (NAS), 427
 Methamphetamine, 432
 Ecstasy/MDMA, 432

Chapter 22 Extremely Low Birth Weight (ELBW) Infant, 437

Shahirose Premji

Evidence-Based Neonatal Nursing Care, 437
 Impact of Birth of Extremely Low Birth Weight Infants, 437
 Complications of Being Born at Extremely Low Birth Weight, 440
 Families of Extremely Low Birth Weight Infants, 444

UNIT IV

ENVIRONMENTAL HEALTH AND FAMILY-CENTERED CARE, 448

Chapter 23 Neurobehavioral Development, 448

Diane Holditch-Davis • Susan Tucker Blackburn

Fetal and Neonatal Central Nervous System Development, 448
 Neonatal Neurobehavioral Development, 451
 Assessment of Neonatal Neurobehavioral Development, 454
 State Scoring Systems, 461
 Effect of Physiologic Parameters on State, 465
 Effect of Health Care Interventions on State, 469
 Usefulness of Neonatal Sleep-Wake States for Assessment, 473

Chapter 24 The Neonatal Intensive Care Unit (NICU) Environment, 480

Leslie Altmier

Intrauterine vs Extrauterine Environment, 481
 Dimensions of Neurobehavioral Organization, 481
 Environmental Factors/Macroenvironment, 482
 Caregiving Factors/Microenvironment, 486
 Family-Centered Care, 489
 Touch and Massage in the Neonatal Intensive Care Unit, 489

Chapter 25 Family: Essential Partner in Care, 491

Jacqueline M. McGrath

Family-Centered Care, 491
 Definition of Family, 492
 Role Theory, 492
 Parental Role, 493
 Cultural Perspectives, 499
 Parent and Staff Expectations, 499
 Siblings, 506

UNIT V BEYOND THE NICU, 510

Chapter 26 Palliative and End-of-Life Care, 510

Carole Kenner • Tanya Sudia-Robinson

Ethical Obligation to Provide Optimum
 End-of-Life Care, 510
 Neonatal Pain Management at the End
 of Life, 512
 Hospice Care, 512
 Pediatric Palliative Care, 513
 Incorporating Pediatric Palliative Care into the
 NICU, 513
 Bereavement, 520

Chapter 27 When a Baby Dies: Caring for Bereaved Families, 522

Karen Kavanaugh • Sara Rich Wheeler

Theoretic Models, 522
 Grief Responses of Families When an
 Infant Dies, 526
 Nursing Care of Bereaved Families, 528
 Special Considerations, 538
 Care for the Caregiver, 540

Chapter 28 Complementary and Integrative Therapies, 543

Nadine Kassity-Krich • Jamieson Jones

Complementary and Alternative Medicine, 543
 Lifestyle Therapies (Developmental Care), 543
 Bioenergetic Therapies, 547
 Biochemical Interventions, 548
 Research, 549

Chapter 29 Postdischarge Care of the Newborn and Infant, 551

Carole Kenner • Susan Ellerbee

The Neonatal Intensive Care Unit
 Experience, 551
 Parental Transition, 551
 Intervention Strategies, 555
 Home Care, 558

UNIT VI NEW CHALLENGES IN NEONATAL CARE, 563

Chapter 30 Trends in Neonatal Care Delivery, 563

Carole Kenner • Jana L. Pressler

Levels of Care, 563
 Developmental Care, 563
 Neonatal Statistics, 563
 Maternal/Fetal Neonatal Units, 565
 Genetics, 565
 Globalization, 565
 Palliative and End-of-Life Care, 566

Chapter 31 Electronic Medical Records and Technology, 567

*Rebecca Lynn Roys Gelrud •
 Tony C. (Chris) Carnes • Willa Drummond*

Background Information, 567
 Types of Information Systems, 568
 Integrating Computer Information Systems, 569
 Information System Evaluation, Selection, and
 Implementation, 572

Chapter 32 Impact of Genomics on Neonatal Care, 577

Carole Kenner • Kristie Nix

Incidence of Genetic Conditions, 577
 Human Genome Project, 577
 Protein Synthesis, 583
 Patterns of Inheritance, 584
 Chromosomal Aberrations, 588
 Prenatal Testing and Screening, 589
 Newborn Testing and Screening, 590
 Family History Tool and Nursing, 591

Chapter 33 Neonatal Research and Evidence-Based Practice, 594

Kathleen R. Stevens • Lynda Harrison

Evidence-Based Neonatal Nursing

Practice, 594

What Is Evidence-Based Practice?, 594

A Model of Evidence-Based Nursing, 594

What Are the Major Features of Evidence-Based Practice?, 596

Sources of Evidence for Practice, 597

Skills Essential in Employing Evidence-Based Practice, 597

How to Employ Evidence-Based Practice, 597

Using the EBP Model to Change Neonatal

Nursing Practice, 599

Conducting Research in Neonatal Nursing, 600

Why Do Research?, 600

Research Roles for Neonatal Nurses, 601

Obstacles to Involvement in Research, 601

Identifying the Research Problem or Question, 602

Current Trends in Neonatal Nursing Research, 604

Chapter 34 Legal and Ethical Issues of Neonatal Care, 606

Pamela Holtzclaw Williams • Tanya Sudia-Robinson

Elements of Legal and Ethical Issues in Neonatal Nursing, 606

Chapter 35 Competency-Based Education in Neonatal Nursing, 615

Frances Strodbeck • Carole Kenner

History of the Competency Movement, 615

Competence and Competency, 617

Competency-Based Education, 617

Implications for Neonatal Nursing, 620

Competency Validation, 622

UNIT VII PRENATAL, INTRAPARTAL, AND NEWBORN CARE, 625

Chapter 36 Fetal Development: Environmental Influences and Critical Periods, 625

Judy Wright Lott

Early Fetal Development, 625

Placental Development and Function, 630

Embryonic Period: Weeks 4 Through 8, 632

Fetal Period: Week 9 Through Birth, 632

Development of Specific Organs and Structures, 637

Congenital Defects, 644

Chapter 37 Prenatal, Antenatal, and Postpartal Risk Factors, 648

Beverly Bowers

Perinatal Outcomes, 648

Prenatal Maternal Risk Factors, 651

Maternal Medical and Obstetric Conditions, 658

Postpartum Risk Factors, 661

Perinatal Care in Developing Nations, 663

Chapter 38 Resuscitation and Stabilization of the Newborn and Infant, 666

Gail A. Bagwell

Causes of Cardiorespiratory Depression in the Newborn, 666

Preparation for Delivery, 667

General Considerations, 668

Oxygenation and Ventilation, 670

Chest Compressions, 671

Medications, 672

Special Circumstances, 675

Chapter 39 Assessment of the Newborn and Infant, 677

Debra A. Sansoucie • Terri A. Cavaliere

First Neonatal Assessment and the
Apgar Score, 677

Other Considerations for the Initial Neonatal
Assessment, 677

Evaluation of Transition, 677

Newborn Examination, 679

Discharge Examination, 679

Outpatient Examination, 680

Environment, 680

Components of a Comprehensive History, 680

Assessment of Gestational Age, 683

Clinical Assessment of Nutritional Status
(CANSORE), 683

Health Maintenance in the First Year of Life, 695

Health Maintenance for High-Risk Infants in the
First Year of Life, 712

Appendix Preconception and Pregnancy Risk Factors and Risk Reduction Strategies Resources, 719
