Foreword to second edition	xiii
Foreword to first edition	xv
Preface	xvii

SECTION 1 THE CONTEXT FOR EVIDENCE-BASED PRACTICE

1. Evidence-based practice in nursing	3
Jean V Craig and Maggie Pearson	
Introduction	4
Evidence-based health care: what is it and why do we need it?	4
The evidence-based movement across health care	8
Challenges	10
A wide range of evidence bases relevant to nursing practice	12
The problem of generalisability	15
When will we get there?	16

SECTION 2 SKILLS FOR EVIDENCE-BASED PRACTICE

2. How to ask the right question	25
Jean V Craig	
Introduction	26
Information for effective nursing care	26
Turning information needs into focused questions	29
A framework for formulating questions	32
Becoming proficient in asking questions	40

Specific prompts for accessing research evidence	42
Prioritising questions	43
Questions for research	43
Questions and research evidence aren't enough	44
Summary	45
3. Searching the literature	51
Olwen Beaven and Jean V Craig	
Introduction	52
Where is research information found?	52
Getting help	53
Basic search principles.	53
Where to search first	60
Where to search next.	65
An example search on the MEDLINE database (PubMed version)	66
Common queries regarding searching	73
Tips for more advanced users.	75
Searching for a systematic review	80
The internet.	83
4. Critical appraisal of quantitative studies I: Is the quality of the study good enough for you to use the findings?	95
Faith Gibson and Anne-Marie Glenny	
Introduction	96
Is the quality of the study good enough for me to use the results?	98
Worked example 4.1: Assessing the quality of a study that asks a question about the effectiveness of a therapy or intervention	104
Worked example 4.2: Assessing the quality of a study that asks a question about the performance or accuracy of a particular diagnostic test or method of assessment	110
Worked example 4.3: Assessing the quality of a study that asks a question about the likely pattern and/or outcome of a particular health problem/disease	116

Critical appraisal in practice	120
Summary	122
5. Critical appraisal of quantitative studies 2: Can the evidence be applied in your clinical setting?	127
Anne-Marie Glenny and Faith Gibson	
Introduction	128
Deciding whether the results can be applied in your clinical setting	129
What do the results of this study mean in my context/ for my patients?	131
Interpreting the results of studies about the effectiveness of a particular therapy or intervention	136
Interpreting the results of studies that investigate the performance or accuracy of a particular diagnostic test/method of assessment	141
Interpreting the results of studies about prognosis or outcome of a particular condition and/or harm	146
Summary	149
6. Qualitative research: critical appraisal.	153
Andrea Litva and Ann Jacoby	
Introduction	154
What is qualitative research?	154
Types of qualitative methods	156
Appraising qualitative research	162
How can qualitative research inform clinical practice?.	175
Conclusions	178
Summary	178
7. Systematic reviews: what are they and how can they be used?	185
Rosalind L Smyth	
What are systematic reviews?	186
Cochrane Systematic Reviews.	192

Critical appraisal of systematic reviews	193
Understanding meta-analysis	194
How can systematic reviews inform practice?.	201

8. Integrating research evidence into clinical decisions 209

Joan Livesley and Michelle Howarth

Introduction	210
More than research is needed	210
Clinical expertise	212
Patient preferences, values and beliefs.	217
Limited resources for health care	227
Conclusion	227

SECTION 3 THE PROCESS OF CHANGING PRACTICE

9. Evidence-based guidelines 237

Lois Thomas

Introduction	238
Guideline characteristics	238
National or local guideline development	239
Prioritising topic areas for guideline development	240
How are guidelines developed?	241
Consensus guidelines	246
Example of an evidence-based guideline	249
Appraising published guidelines	249
Adapting nationally developed guidelines for local use	255
Patient versions of guidelines	256
Introducing the guideline into practice	256
Evaluating the effectiveness of clinical guidelines in nursing and allied health professions.	257
Benefits and disbenefits of clinical guidelines	259
Conclusion	260

10. Implementing best evidence in clinical practice	267
Lin Perry	
Introduction	268
How is this relevant to me?	268
Implementing best evidence – where to start?	269
First steps	274
What changes are needed?	285
How to implement the changes	291
Evaluating the progress and effects of the changes	297
Conclusion	299
11. How can we develop an evidence-based culture?	305
Carl Thompson	
Introduction	306
National imperatives	306
What does an evidence-based culture look like?	307
Step one: diagnosing the challenges to changing practice – understanding complexity	310
Step two: how can evidence-based innovation and culture be encouraged?	312
Step three: how can change happen?	316
Real-life examples of changing practice and culture	325
Conclusion: culture, practice change and evidence-based health care	331
Glossary	339
Index	347
