

A photograph of two brown cows in a stable. The cow on the left is pulling a large amount of hay through a metal grate. The cow on the right is also eating hay. The background is dark, and the lighting is warm, highlighting the texture of the hay and the fur of the cows.

# **Voluntary Food Intake and Diet Selection in Farm Animals**

**2nd Edition**

**J. M. Forbes**

# Contents

<b>Preface</b>	<b>vii</b>
<b>Part I Basics</b>	
<b>1 Introduction</b>	<b>1</b>
<b>2 Feeding Behaviour</b>	<b>12</b>
<b>Part II Mechanisms</b>	
<b>3 Feedbacks from the Gastrointestinal Tract</b>	<b>41</b>
<b>4 Metabolites and Hormones</b>	<b>69</b>
<b>5 Central Nervous System and the Special Senses</b>	<b>91</b>
<b>6 Learning about Food: Conditioned Preferences and Aversions</b>	<b>117</b>
<b>7 Diet Selection: Principles</b>	<b>144</b>
<b>8 Diet Selection: Practicalities</b>	<b>171</b>
<b>Part III Theories</b>	
<b>9 Integrative Theories of Food Intake Control</b>	<b>188</b>
<b>10 Minimal Total Discomfort</b>	<b>203</b>
<b>Part IV Food Composition</b>	
<b>11 Diet Digestibility, Energy Concentration and Supplementation of Forages</b>	<b>219</b>

<b>12 Protein and Other Nutrients</b>	<b>243</b>
<b>13 Appetites for Specific Nutrients</b>	<b>261</b>
<b>14 Silage</b>	<b>287</b>
<b>Part V Animal and Environmental Factors</b>	
<b>15 Growth and Fattening</b>	<b>310</b>
<b>16 Reproduction and Lactation</b>	<b>341</b>
<b>17 Environmental Factors Affecting Intake</b>	<b>365</b>
<b>18 Epilogue</b>	<b>391</b>
