|--|------|
| Preface | xiii |
| Preface to the First Edition | xv |
| 1 | |
| INTRODUCTION..... | 1 |
| 1.1 Science and Factor Analysis | 1 |
| 1.2 Elementary Procedures for Factoring | 5 |
| 1.3 Examples..... | 9 |
| 2 | |
| BASIC FACTOR MODELS | 14 |
| 2.1 Multivariate Linear Models and Factor Analysis | 14 |
| 2.2 The Full Component Model..... | 20 |
| 2.3 The Common Factor Model..... | 26 |
| 2.4 Correlated and Uncorrelated Factor Models | 33 |
| 2.5 Which Factor-Analytic Model? | 34 |
| 3 | |
| MATRIX ALGEBRA AND FACTOR ANALYSIS | 37 |
| 3.1 Matrix Definitions and Notation | 37 |
| 3.2 Matrix Operations..... | 41 |

| | | |
|------|--|-----|
| 3.3 | Definitional Equations in Matrix Algebra Form | 48 |
| 3.4 | The Full Component Model Expressed in Matrix Algebra | 51 |
| 3.5 | The Common Factor Model in Matrix Algebra | 53 |
| 3.6 | Uncorrelated Factor Models and Matrix Algebra | 55 |
| *4 | | |
| | GEOMETRIC REPRESENTATION OF FACTOR MODELS | 57 |
| 4.1 | Representing Variables and Factors Geometrically | 58 |
| 4.2 | The Uncorrelated (Orthogonal) Component Model | 67 |
| 4.3 | The Correlated (Oblique) Component Model | 69 |
| 4.4 | Common Factor Models | 72 |
| 5 | | |
| | DIAGONAL AND MULTIPLE-GROUP ANALYSIS | 73 |
| 5.1 | Diagonal Analysis | 74 |
| 5.2 | Multiple-Group Factor Analysis | 80 |
| 5.3 | Applications of Diagonal and Multiple-Group Factor Analysis | 88 |
| 6 | | |
| | PRINCIPAL FACTOR SOLUTIONS | 94 |
| 6.1 | Characteristics of Principal Factor Methods | 95 |
| 6.2 | Principal Components | 99 |
| 6.3 | Communality Estimation and Principal Axes | 102 |
| *6.4 | Image Analysis | 112 |
| *6.5 | Other Related Procedures | 115 |
| *6.6 | Nonlinear and Nonmetric Factor Analysis | 118 |
| 6.7 | Applications for Principal Factors | 120 |
| 6.8 | A Comparison of Factor Extraction Procedures | 121 |
| 7 | | |
| | CONFIRMATORY MAXIMUM LIKELIHOOD SOLUTIONS | 127 |
| 7.1 | The Maximum Likelihood Concept | 127 |
| 7.2 | Confirmatory Maximum Likelihood Factor Analysis | 129 |

*Advanced topic. May be considered optional reading.

| | | |
|-------------|---|------------|
| 7.3 | Applications | 133 |
| 7.4 | Hypothesis Testing by Maximum Likelihood and Multiple-Group Procedures | 140 |
| 8 | | |
| | DETERMINING THE NUMBER OF FACTORS | 142 |
| 8.1 | Adequacy of the Fit of the Model to the Data | 143 |
| 8.2 | Statistical Approaches to the Number of Factors | 148 |
| 8.3 | Mathematical Approaches to the Number of Factors | 156 |
| 8.4 | Extracting the Nontrivial Factors | 164 |
| 8.5 | The Search for the Proper Number of Factors | 171 |
| 9 | | |
| | ROTATION AND INTERPRETATION OF FACTORS | 175 |
| 9.1 | Principles For Guiding the Rotation of Factors | 176 |
| 9.2 | Orthogonal Rotation for Simple Structure | 182 |
| 9.3 | Oblique Analytic Rotation for Simple Structure | 188 |
| 9.4 | Comparing Alternative Solutions | 197 |
| 9.5 | Interpreting Factors | 206 |
| * 10 | | |
| | ROTATION | 213 |
| 10.1 | Algebraic Principles of Rotation | 213 |
| 10.2 | Rotating Visually | 218 |
| 10.3 | Orthoblique Solutions | 227 |
| 10.4 | Nonsimple Structure Rotation | 231 |
| 10.5 | Extension Analysis | 236 |
| 11 | | |
| | HIGHER-ORDER FACTORS | 239 |
| 11.1 | Interpretation of Higher-Order Factors | 240 |
| 11.2 | Extracting Higher-Order Factors | 242 |
| 11.3 | Relationship of Variables to Higher-Order Factors | 245 |
| 11.4 | Usefulness of Higher-Order Factors | 254 |

*Advanced topic. May be considered optional reading.

12

| | |
|---|-----|
| FACTOR SCORES | 257 |
| *12.1 Procedures For Computing Factor Scores | 258 |
| 12.2 Approximation Procedures For Factor Scores | 266 |
| *12.3 Cluster Analysis of Individuals: Typological Scoring. . . | 270 |
| 12.4 Evaluating the Factor Scores | 272 |
| 12.5 Selecting Among Procedures | 275 |

13

| | |
|--|-----|
| RELATING FACTORS ACROSS STUDIES | 277 |
| 13.1 Information Useful in Relating Factors | 278 |
| 13.2 Same Individuals and Variables but Different Procedures | 280 |
| 13.3 Same Individuals but Different Variables | 281 |
| 13.4 Same Variables but Different Individuals (R_{vv} , S_{vf} , and W_{vf} Available) | 282 |
| 13.5 Same Variables But Different Individuals (R_{vv} , S_{vf} , and W_{vf} Unavailable) | 284 |
| 13.6 Different Variables and Different Individuals | 289 |
| 13.7 Matching Factors | 289 |

*14

| | |
|--|-----|
| DATA TRANSFORMATIONS AND INDICES OF ASSOCIATION | 291 |
| 14.1 Noncontinuous Data | 291 |
| 14.2 Effects of Transformations | 297 |
| 14.3 Indices of Association | 303 |

*15

| | |
|---|-----|
| TWO- AND THREE-MODE FACTOR ANALYSIS | 310 |
| 15.1 Two-Mode Factor Analysis | 311 |
| 15.2 Three-Mode Factor Analysis | 319 |

*Advanced topic. May be considered optional reading.

16

| | |
|---|-----|
| THE REPLICATION AND INVARIANCE OF FACTORS..... | 328 |
| 16.1 The Replication of Factors Across Random Samples of Individuals | 328 |
| 16.2 The Invariance of Factors | 334 |

17

| | |
|--|-----|
| FACTOR ANALYSIS AS A RESEARCH TECHNIQUE | 350 |
| 17.1 Operationalization of Constructs | 350 |
| 17.2 Factor Analysis of Independent and Dependent Variables..... | 359 |
| 17.3 Using Factor Analysis to Suggest New Leads for Future Research | 365 |
| 17.4 Other Uses of Factor Analysis..... | 367 |
| 17.5 Concluding Note..... | 368 |

18

| | |
|--|-----|
| EPILOGUE | 369 |
| 18.1 Criticisms of Present Factor-Analytic Practices | 369 |
| 18.2 Recommended Procedures for Selected Research Designs | 372 |
| 18.3 The Future of Factor Analysis..... | 379 |

| | |
|-----------------------------------|-----|
| Appendix A DATA FOR EXAMPLES..... | 383 |
|-----------------------------------|-----|

| | |
|--|-----|
| Appendix B.1 COMPUTER PROGRAMS FOR FACTOR ANALYSIS..... | 387 |
|--|-----|

| | |
|---|-----|
| Appendix B.2 ACCURACY OF COMPUTER PROCESSING. . . | 389 |
|---|-----|

| | |
|-----------------|-----|
