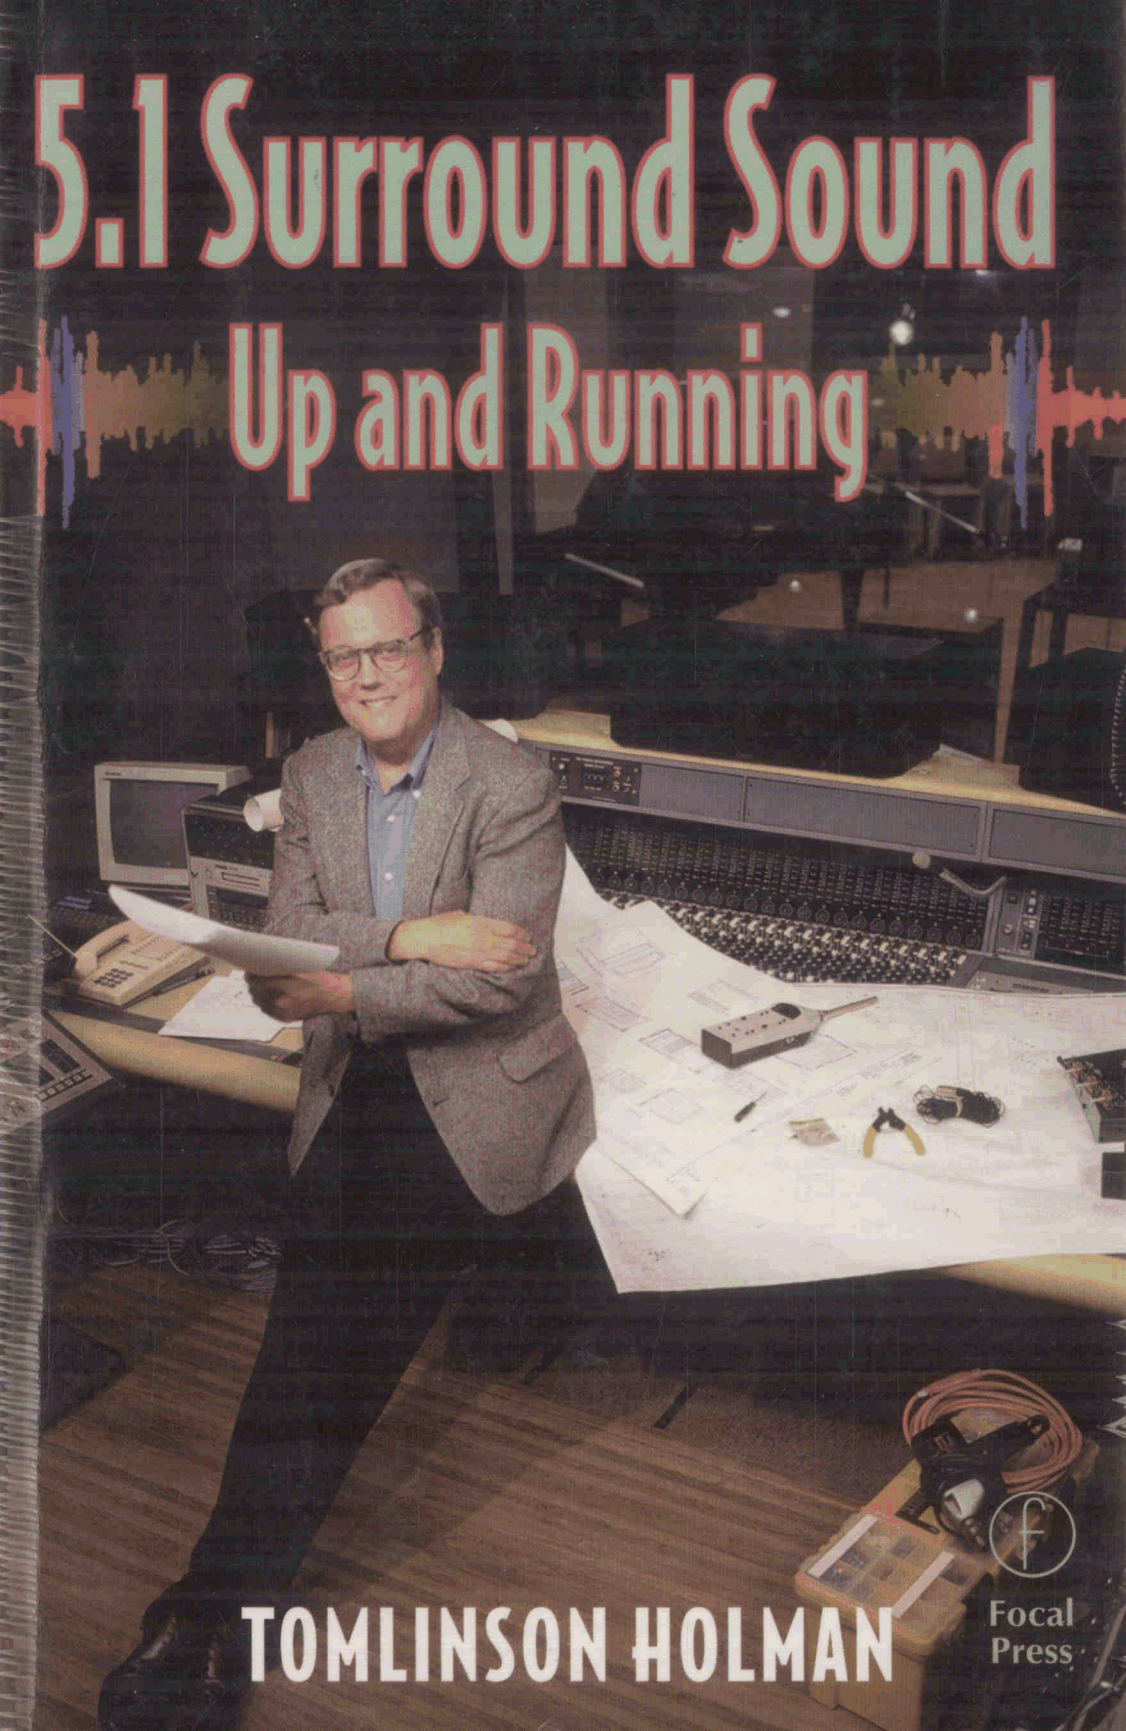
5.1 Surround Sound

Up and Running



TOMLINSON HOLMAN

Focal Press

Table of Contents

Table of Contents 3
Preface 7
Colophon 8
Dedication 9
1 **Introduction** 11
A Brief History 12
2 **Montoring** 25
Introduction 27
How monitoring affects the mix 27
Full range monitoring 27
Spatial balance 28
Room acoustics for multichannel sound 32
Choice of monitor loudspeakers 36
A standardized setup, the ITU solution 42
Left and right 42
Surround 43
Subwoofer 43
Setting up the loudspeaker locations with 3 pieces of string 44
Setup compromises 46
Center 47
Left and right 50
Surround 50
Subwoofer 51
Setup variations 53
Use of surround arrays 53
Surround loudspeaker directivity 55
Square Array 57
Near Field Monitoring 58
Time adjustment of the loudspeaker feeds 60
Low Frequency Enhancement—the 0.1 channel 62
Film roots 62
Headroom on the medium 64
Digital Film Sound enters the picture 66
Bass management or redirection 66
Digital Television comes along 68
Home reproduction 69
0.1 for music? 71
The bottom line 77
Calibrating the monitor system: frequency response 78

A choice of standardized response 79
Calibrating the monitor system: level 81
3 **Multichannel Microphone Technique** 87
Introduction 88
Pan Pot Stereo 88
Spaced Omnis 91
Coincident and Near-Coincident Techniques 94
Crossed Figure 8 94
M-S Stereo 95
X-Y Stereo 97
Near-Coincident Technique 97
Binaural 100
Spot Miking 101
Point of View in Multichannel 102
Use of the Standard Techniques in Multichannel 102
Simultaneous 2- and 5-channel Recording 106
Surround Technique 107
Microphone Technique for the Direct/Ambient Approach 107
Microphone Technique for the Direct Sound Approach 109
Special Microphones for 5.1-channel Recordings 110
Combinations of Methods 112
4 **Multichannel Mixing** 115
Introduction 116
Mechanics 118
Panners 118
Work arounds for 2-channel oriented equipment 121
Panning law 122
The art of panning 124
Non-standard Panning 126
Panning in live presentations 127
A major panning error 128
Increasing the "size" of a source 129
Equalizing multichannel 130
Routing multichannel in the console and studio 131
Track layout of masters 133
Double-system delivery with accompanying video 134
Reference level for multichannel program 134
Fitting multichannel on digital video recorders 135
Multichannel monitoring electronics 136
Multichannel outboard gear 137

5 **Delivery Formats** 141
Introduction 143
New terminology 144
Audio coding 145
Cascading coders 150
Sample rate and word length 151
Inter-track synchronization 154
Reference level 155
Post-production formats 156
Track layout 156
Post-production delivery formats 157
Multiple streams 159
Metadata 161
Three level-setting mechanisms 163
Dialogue Normalization (dialnorm) 163
Dynamic Range Compression, DRC 167
Night listening 169
Mixlevel 169
Audio Production Information exists 171
Room Type 171
Dolby Surround mode switch 172
Downmix options 172
Level adjustment of film mixes 174
Debugging 174
Lip-sync and other sync problems 174
Reel edits or joins 176
Media specifics 177
DTS CD 178
Digital Television 181
Digital Versatile Disc 182
Audio on DVD-Video 183
DVD-Audio 186
Super Audio CD 193
Intellectual Property Protection 194
Toward the Future 196
6 **Psychoacoustics** 203
Introduction 204
Principal localization mechanisms 205
The Minimum Audible Angle 207
Bass management and LFE Pyschoacoustics 207
Effects of the localization mechanisms on 5.1 channel sound 209

The law of the first wavefront 211
Phantom Image Stereo 212
Phantom Imaging in Quad 213
Localization, spaciousness, and envelopment 215
Lessons from Concert Hall Acoustics 216
Rendering 5 channels over 2; Mixdown 217
Auralization and Auditory Virtual Reality 219
Beyond 5.1 220
Conclusion 236
Appendix 1: **Sample Rate** 223
What's Aliasing? 237
Definitions 238
Multi-Bit and One-Bit Conversion 239
Converter Tests 240
Appendix 2: **Word Length** 241
Conversion 242
Dither to the rescue 243
Dynamic Range 244
Actual Performance 246
How Much Performance is Needed 247
Noise shaping 249
The bottom line 250
Analog Reference Levels related to Digital Recording 253
Appendix 3: **Surround Resources** 255
Facilities Consulting 255
Setup and Test Materials and Equipment 255
Microphones 256
Small Format Consoles 257
Large Format Consoles 258
Systems for Live Sound 259
Multichannel on Digital Audio Workstations, Hardware and corresponding Software 259
Hardware Platform: Pro Tools 259
Software 260
Hardware Platform: Digital Audio Labs V8 260
Software 260
Hardware Platform: Direct X, etc. 260
Software 260
Harware and Software: Sonic Solutions 261
3D Sound Production Tools 261
Monitoring Switching Systems, Volume Controls, Controllers 262

Outboard Equipment 263
Multichannel Meters 263
Format Encoders and Decoders, Hardware and Software 263
Headphones for 5.1 265
Multichannel Power Amplifiers 265
Upmixing Facilities 265
Organizations 266
Index 267
