

Maria Virvou
Lakhmi C. Jain (Eds.)

Intelligent Interactive Systems in Knowledge- Based Environments

Contents

1 Intelligent Interactive Systems in Knowledge-Based Environments: An Introduction

<i>Maria Virvou and Lakhmi C. Jain</i>	1
1.1 Introduction	1
1.2 Intelligent Interactive Systems	2
1.3 Current Applications of Intelligent Interactive Systems	3
1.4 Development Process of Intelligent Interactive Systems	4
1.5 Chapters Included in This Book	5
1.6 Summary	6
References	6

2 Requirements Analysis and Design of an Affective Bi-Modal Intelligent Tutoring System: The Case of Keyboard and Microphone

<i>Efthymios Alepis, Maria Virvou, and Katerina Kabassi</i>	9
2.1 Introduction	9
2.2 SAW: A Simple Decision Making Method	11
2.3 Requirements Analysis for Affective Bi-Modal Interaction	12
2.3.1 Affect Perception Based on Speech	13
2.3.2 Affect Perception Based on Keyboard Actions	13
2.4 Specification and Analysis of Multiple Criteria	15
2.5 Overview of the System	15
2.6 Application of the Decision Making Method	19
2.7 Conclusions and Ongoing Work	22
References	23

3 Estimating the Development Cost for Intelligent Systems

<i>Stamatia Bibi and Ioannis Stamelos</i>	25
3.1 Introduction	25
3.2 Related Work	26
3.3 Estimation Methods	28

3.3.1	Classification and Regression Trees	28
3.3.2	Association Rules	29
3.3.3	Bayesian Belief Networks	31
3.3.4	Rule Induction	31
3.3.5	Analogy Based Estimation	33
3.4	Data Description and Preparation	35
3.5	Results and Discussion Regarding Functional Size	37
3.6	Results and Discussion Regarding Productivity	39
3.7	Identification of Associations Between Attributes	41
3.8	Conclusions and Future Work	42
	References	43

4 In Search of Narrative Interactive Learning Environments

<i>Paul Brna</i>	47
4.1 The Promise of Narrative	47
4.2 A Framework	48
4.2.1 Preconditions for Learning	50
4.2.2 The Postconditions of Learning	51
4.2.3 Learning the Content	51
4.2.4 Design	51
4.2.5 Evaluation	52
4.3 The Achievements	53
4.3.1 Ghostwriter – Preparing the Learner to Write	53
4.3.2 FearNot! – Improving Social Relationships	55
4.3.3 SAGA – Planning and Managing the Experience	56
4.3.4 NCID – Bringing Narrative into the Design Process	61
4.3.5 Evaluating the Experience	62
4.4 Where’s the Pedagogy?	64
4.5 The Next 10 Years	66
4.6 The Way Forward	67
References	69

5 Knowledge Acquisition for Configurable Products and Services

<i>Alexander Felfernig</i>	75
5.1 Introduction	75
5.2 Knowledge-Based Configuration	76
5.3 UML-Based Development of Configuration Knowledge Bases	78
5.4 Effective Development of Configurator User Interfaces	81
5.5 Future Work	86
5.6 Conclusions	86
References	86

6 Interaction Modalities in Mobile Contexts

<i>M.J. O'Grady, G.M.P. O'Hare, and S. Keegan</i>	89
6.1 The Nature of the Mobile User	89
6.1.1 Historical Developments in HCI	90
6.1.2 Paradigms for Mobile Computing	90
6.2 Interaction Techniques in Mobile Computing	91
6.2.1 Interaction as Intention	92
6.2.2 The Question of Context	94
6.2.3 Interaction: A Software Engineering Perspective	94
6.3 Intelligent Agents	95
6.3.1 Agent Architectures	96
6.3.2 Agent Characteristics and Interaction	97
6.3.3 Agent Systems for Mobile Devices	97
6.4 Case Study: EasiShop	99
6.4.1 Interaction in EasiShop	99
6.4.2 Architecture of EasiShop	102
6.4.3 Utilization of Mobile Intelligent Agents	103
6.5 Conclusion	103
References	104

7 Automated Processing and Classification of Face Images for Human-Computer Interaction Applications

<i>Ioanna-Ourania Stathopoulou and George A. Tsihrintzis</i>	107
7.1 Introduction	107
7.1.1 The Importance of Understanding Emotions	107
7.1.2 How Advanced Human Computer Interaction Techniques Can Help	108
7.1.3 The Role of Facial Expression Recognition	110
7.2 Face Detection Module	111
7.2.1 General Information	111
7.2.2 Proposed Face Detection Algorithm	112
7.2.3 The Artificial Neural Network Structures	114
7.2.4 Performance Evaluation	115
7.3 Empirical Study of Facial Expression Classification by Humans ...	117
7.3.1 General Information	117
7.3.2 Our Study of Expression Classification by Humans Consisted of Three Steps	118
7.4 Feature Selection	121
7.5 Eye Detection	122
7.5.1 General Information	122
7.5.2 The Eye Detection Algorithm	122
7.5.3 Results	126
7.6 Quantification of Feature Discrimination Power	127
7.7 Feature Extraction	129
7.8 Facial Expression Classifier	131

7.9	Results	131
7.10	Conclusions	132
7.11	Future Work	132
	References	133

8 On Developing and Communicating User Models for Distance Learning Based on Assignment and Exam Data

	<i>Thanasis Hadzilacos, Dimitris Kalles, and Christos Pierrakeas</i>	137
8.1	Introduction	137
8.2	Background on the Educational Domain	138
8.3	The Experimentation Toolkit	140
8.4	The Experimental Results	142
8.4.1	Addressing the Fundamental Problem: Can Success (Failure) be Modeled?	142
8.4.2	Forming and Testing Focused Hypotheses: Dealing with Drop-Out Students	145
8.4.3	Forming and Testing Focused Hypotheses: When Tutors do Matter	149
8.5	Discussion	150
8.6	Conclusions	153
	References	154

9 Group Adaptation and Group Modelling

	<i>J. Masthoff</i>	157
9.1	Introduction	157
9.2	Scenarios	158
9.2.1	Interactive Television	158
9.2.2	Ambient Intelligence	159
9.3	Aggregation Strategies	159
9.4	Impact of Sequence Order	161
9.5	Modelling Affective State	162
9.5.1	Effects of the Group on an Individual's Satisfaction	163
9.6	Using Affective State Inside Aggregation Strategies	165
9.7	Applying Group Modelling to Individual Users	166
9.7.1	Multiple Criteria	166
9.7.2	Cold-Start Problem	168
9.7.3	Virtual Group Members	169
9.8	Other Work on Group Adaptation and Group Modelling	170
9.9	Conclusions	172
	References	173

10 PNS: A Personalized News Aggregator on the Web

	<i>Georgios Paliouras, Alexandros Mouzakidis, Vassileios Moustakas, and Christos Skourlas</i>	175
10.1	Introduction	175
10.2	Personalized News Service	177

10.2.1	Content Aggregation	178
10.2.2	Personalized Content Selection	180
10.2.3	Reading Personalized News	183
10.3	User Evaluation	187
10.3.1	Set-Up of the Study	187
10.3.2	Evaluating the Functionality of the System	188
10.3.3	Evaluating the Personalization Aspects	189
10.3.4	Recommendations for Improvement	191
10.4	Related Work	191
10.5	Conclusions and Future Work	195
	References	196
