

BIOACTIVE COMPOUNDS IN FOODS

Edited by John Gilbert
and Hamide Z. Şenyuva

Blackwell
Publishing

Contents

Contributors xv

PART ONE: NATURAL TOXICANTS 1

1 Introduction 3

John Gilbert and Hamide Z. Şenyuva

- 1.1 Different perceptions of chemicals in food 3
- 1.2 Residues and contaminants in foods 4
- 1.3 Natural toxicants in foods 5
- 1.4 Developments in analytical methodology 6
- 1.5 Emerging risks 7
- 1.6 Bioactive compounds in foods 8

2 Pyrrolizidine Alkaloids 10

Colin Crews and Rudolf Krska

Summary 10

- 2.1 Introduction 10
- 2.2 The pyrrolizidine alkaloids 11
- 2.3 Occurrence 12
 - 2.3.1 Formation and function 13
- 2.4 Exposure 13
 - 2.4.1 Contamination of foods 14
 - 2.4.2 Pyrrolizidines in herbal preparations 15
- 2.5 Regulations 17
- 2.6 Toxicity and metabolism 17
 - 2.6.1 General toxicity 17
 - 2.6.2 Metabolism 18
 - 2.6.3 Carcinogenicity and mutagenicity 18
- 2.7 Analytical methods 19
 - 2.7.1 Extraction 20
 - 2.7.2 Gas chromatography 20
 - 2.7.3 High performance liquid chromatography 21
 - 2.7.4 Other methods 22

Conclusions 24

3	Glucosinolates	31
	Ruud Verkerk and Matthijs Dekker	
	Summary	31
3.1	Introduction	31
3.2	Nature and occurrence	32
3.3	Biosynthesis	33
3.3.1	Amino acid modification	34
3.3.2	Conversion of amino acids	34
3.3.3	Secondary transformations	35
3.4	Hydrolysis	35
3.4.1	Myrosinase	35
3.4.2	Hydrolysis products	36
3.5	Analytical methods	38
3.5.1	Total glucosinolates	38
3.5.2	Individual glucosinolates	38
3.5.3	Breakdown products	40
3.6	Biological effects	40
3.6.1	Anticarcinogenicity	40
3.6.2	Toxicity	42
3.7	Taste versus health	43
3.8	Responses to stress factors	44
3.9	Effects of processing	44
	Conclusions	47
	References	47
4	Phycotoxins in Seafood	52
	John W. Leftley and Fiona Hannah	
	Summary	52
4.1	Introduction	52
4.2	Causative and vector organisms	52
4.3	Classification of phycotoxins	55
4.4	The saxitoxin (STX) group (PSP)	55
4.4.1	The toxins causing PSP: the saxitoxin family	58
4.4.2	Toxic effects	60
4.5	The okadaic acid (OA) group (DSP)	61
4.5.1	The toxins causing DSP: okadaic acid and the dinophysistoxins	64
4.5.2	Toxic effects	66
4.6	The domoic acid (DA) group (ASP)	68
4.6.1	The toxins causing ASP (DAP): domoic acid and its isomers	69
4.6.2	Toxic effects	69
4.7	The azaspiracid (AZA) group (AZP)	69
4.7.1	The toxins causing AZP: the azaspiracids	70
4.7.2	Toxic effects	71
4.8	The brevetoxin (BTX) group (NSP)	74
4.8.1	The toxins causing NSP: the brevetoxins	74
4.8.2	Toxic effects	75

4.9	The ciguatera toxin (CTX) group (CFP)	75
4.9.1	The toxins causing CFP	76
4.9.2	Toxic effects of CTXs	77
4.10	Other phycotoxins	77
4.10.1	The pectenotoxin group	77
4.10.2	The yessotoxin group	78
4.10.3	The cyclic imine group	80
4.10.4	The cyanobacterial toxins	82
4.10.5	Miscellaneous phycotoxins	83
4.11	Detection of phycotoxins in seafood and algae	83
4.11.1	Assays and analyses	84
4.11.2	Mammalian bioassays	85
4.11.3	Instrumental (physico-chemical) analysis	86
4.11.4	In vitro assays	87
4.12	Depuration of phycotoxins	88
4.12.1	Natural depuration	88
4.12.2	Studies on cooking as a method of depuration	89
4.12.3	The effects of freezing and chilling	91
4.13	Monitoring and regulation	92
4.13.1	Phytoplankton monitoring	92
4.13.2	Monitoring of shellfish tissues for toxicity	93
4.13.3	Risk analysis	93
4.14	Future prospects	96
4.15	A note on the IOC harmful algal bloom programme	96
