Preface		xxv
Part I	Introduction	
1 Ne	w Product Development: systematic industrial technology	3
Mary	Earle and Richard Earle, New Zealand	
1.1	Introduction	4
1.2	Food products in the food chain	5
1.3	Strategy and management in different situations	7
1.4	Product Development Processes	9
1.5	Technological development	12
1.6	Consumer and market research	14
1.7	Managing the Product Development Process	16
1.8	Educating the next generation of product developers	18
1.9	New Product Development: a technology	19
Part II	Product development strategy and management	
	e multinational food business – strategic, organizational	
	I management issues for product development	23
	Inwood, Australia and Europe	
2.1	Introduction	24
2.2	Multinational food businesses	24

### vi Contents

2.3	Recent history shaping the behaviour of multinational food
a .	businesses
2.4	Current state of innovation in multinational food businesses .
2.5	The roles of the research and development manager
2.6	Organization of research and development
2.7	Marketing of research and development
2.8	Research and development and its contribution to corporate
• •	growth
2.9	The New Product Development programme – establishing
• • •	the investment in the 'R' of R&D
2.10	Bundling
2.11	The research and development role
2.12	Organizing and acquiring knowledge
2.13	Multinational research and development organization
2.14	Problems met and lessons learnt
2.15	References and further reading
3 The	e food research centre – assisting small and medium
	ed industry
	on Thammarutwasik, Thailand
3.1	Introduction
3.2	Product development in the research centre
3.3	Guidelines for technology transfer in the Agro-Industry
	Development Centre for Export (ADCET)
3.4	Cost estimation and return on investment
3.5	Intellectual property
3.6	Communication with clients
3.7	Case Study 1 in ADCET related to food product
5.,	development
3.8	Case Study 2 in ADCET related to food process
2.0	development
3.9	Problems met and lessons learnt
3.10	References
	e supermarket industry – private label brand development .  Adapa and Kumaresh Chakraborty, USA
	± * * * * * * * * * * * * * * * * * * *
4.1	Introduction
4.2	Development of store brands and brand equity
4.3	Product Development Process for private brands
4.4	New Product Development leadership culture
4.5	Future trends and evolution in food retailing
4.6	Pursuit of global food retailing strategies
4.7	Problems met and lessons learnt
4.8	References and bibliography

	·Contents	vii
5 Rui	ral agroenterprise – cassava development in Latin America	81
Bill E	dwardson and Rupert Best, Canada	
5.1	Introduction	82
5.2	Background	82
5.3	Cassava development in Colombia	83
5.4	Product development strategy for cassava	85
5.5	Product Development Process for cassava flour	86
5.6	Phase 1. Research on the product, the process and the market	89
5.7	Phase 2. Pilot plant establishment and test marketing of	
- 0	cassava flour	90
5.8	Phase 3. Commercial development	92
5.9	Problems met and lessons learnt	93
5.10	Impact	95
5.11	References	97
Part III	Product Development Process	
	m farm to consumer - pioneering an early	
	riceutical, Stolle milk	101
	Woodhams, New Zealand	
6.1	Introduction	102
6.2	Setting up operations in New Zealand	104
6.3	Government requirements	106
6.4	Research and development in New Zealand	108
6.5	Initial production	111
6.6	Overall outcomes of the 1988/89 season	114
6.7	Review of the 1988/89 season and planning for the 1989/90	117
6.8	season	117
	Commercial production 1989/90	121
6.9	Product launch in Taiwan	123
6.10	More recent history	123
6.11	Problems met and lessons learnt	124
6.12	References	126
	m concept to international company – development of a	107
	y pet food product	127
	Wilkinson and John Palamountain, New Zealand	
7.1	Introduction	128
7.2	Background	129
7.3	Product concept	129
7.4	Product formulation and process development	130

8 Fro	om kitchen to market – first came the oat cake, now the	
oat	bake, a traditional product for today's consumers	149
Liz (A	(shworth) Bowie, Scotland	
8.1	Introduction	150
8.2	Initial idea	150
8.3	Protection of the idea	151
8.4	Home kitchen development	151
8.5	Market research	152
8.6	Initial factory trials	154
8.7	Further kitchen work	155
8.8	Co-operation with Aberdeen company	155
8.9	The commercial partner: Simmers of Edinburgh	156
8.10	Initial product and packaging development	156
8.11	Manufacture	158
8.12	Shelf life testing	159
8.13	Marketing development	159
8.14	Launch of product	161
8.15	Evaluation of launch	161
8.16	Problems met and lessons learnt	161
8.17	Conclusions	161
	om basic research to marketable product – success and	
	ure of instant baked potatoes	163
	ha Ooraikul, Canada	
9.1	French fry industry and waste problems	164
9.2	Product development challenge	164
9.3	Product conception	165
9.4	Development of prototype product	166
9.5	Market assessment of prototype product	169
9.6	Fine-tuning the product	171
9.7	Process development	172
9.8	Pilot plant development	172
9.9	Production trial	177
9.10	Consumer test	179
9.11	Intellectual property development	179
9.12	Commercial trial	180
9.13	Problems met and lessons learnt	183

## Part IV Technological development

10		ical process development – cutting techniques for an	
		ted sugar confectionery	187
I	Rex Pe	erreau, UK	
	10.1	Introduction	188
	10.2	The history	188
	10.3	Methods explored for cutting of sugar glass foam	191
	10.4	Pilot plant development of liquid jet cutting of sugar foam	192
	10.5	The full-scale plant	197
	10.6	Problems met and lessons learnt	199
	10.7	Conclusions	201
11	Proc	cess innovation from research and development to	
	proc	duction in a large company – development and	
	com	mercialisation of a low temperature extrusion process	202
A	4ndrev	v Russell, UK	
	11.1	Introduction	203
	11.2	Invention	204
	11.3	Building a business case	209
	11.4	Equipment development and scale up	211
	11.5	Building the science base	212
	11.6	Developing and testing prototype extruder in the factory	215
	11.7	Factory implementation	217
	11.8	Roll-out	218
	11.9	Problems met and lessons learnt	219
	11,10	Further reading	221
	11.11	Acknowledgements	222
	11.12	References	222
12	Up-	scaling from development to production by small	
	mar	nufacturers – fishing, baking and sauce industries	223
2	Torber	n Sorensen, New Zealand	
	12.1	Introduction	224
	12.2	Case study 1: Raw materials that vary	225
	12.3	Case study 2: The importance of correctly designed facilities .	231
	12.4	Case study 3: The need for qualified and trained people in	
		product and process development	235
	12.5	References	243
13		rit of entrepreneurship in commercialisation – product and	
	pro	cess development of coconut beverage mix	244
(	Choon	Nghee Gwee, Malaysia	
	13.1	Introduction	245
	13.2	Entrepreneur's dream	245
