

# Improving the health-promoting properties of fruit and vegetable products

Edited by F. A. Tomás-Barberán  
and M. I. Gil

# Contents

<i>Contributor contact details</i> .....	<i>xiii</i>
<i>Introduction</i> .....	<i>xix</i>

## **Part I Introductory issues**

<b>1 Overview of health-promoting compounds in fruit and vegetables</b> .....	<b>3</b>
<i>I. B. Jaganath, Malaysian Agricultural, Research and Development Institute, and A. Crozier, University of Glasgow, UK</i>	
1.1 Introduction: fruit, vegetables and health .....	3
1.2 Phytochemicals or health-promoting compounds in fruit and vegetables .....	4
1.3 Terpenoids .....	5
1.4 Phenolic and polyphenolic compounds .....	7
1.5 Alkaloids .....	19
1.6 Sulphur-containing compounds .....	20
1.7 Implications for human health .....	21
1.8 Changes in levels of health-promoting compounds in fruit and vegetables .....	24
1.9 Future trends .....	29
1.10 References .....	30

<b>2</b>	<b>Consumer attitudes towards fruit and vegetables</b> . . . . .	38
	<i>L. Lähteenmäki, VTT Technical Research Centre of Finland, Finland and University of Aarhus, Denmark</i>	
2.1	Fruit and vegetables belong to a healthy diet . . . . .	38
2.2	Learning to like fruit and vegetables. . . . .	40
2.3	Factors influencing our fruit and vegetable consumption . . . . .	42
2.4	Social environment. . . . .	45
2.5	Fruit and vegetable-based foods as carrier products for health claims . . . . .	46
2.6	Future trends. . . . .	50
2.7	References. . . . .	51
<b>3</b>	<b>Marketing healthy fruit</b> . . . . .	55
	<i>J. Mellentin, Centre for Food and Health Studies, UK and K. Crawford, HortResearch, New Zealand</i>	
3.1	A bright future for fruit. . . . .	55
3.2	Five success factors. . . . .	56
3.3	Case Study 1: Cranberries. . . . .	58
3.4	Case Study 2: Pomegranates . . . . .	61
3.5	Case Study 3: Blueberries . . . . .	64
3.6	Case study 4: Apples . . . . .	68
 <b>Part II The health effects of fruit and vegetables</b>		
<b>4</b>	<b>Fruit and vegetables and cancer</b> . . . . .	75
	<i>F. Berrino and A. Villarini, Fondazione IRCCS Istituto Nazionale dei Tumori, Italy</i>	
4.1	Introduction. . . . .	75
4.2	Overview of epidemiological studies of fruit and vegetables and cancer . . . . .	79
4.3	Overview of randomised chemopreventive studies with dietary supplementation of vitamins and minerals or fibre . . . . .	84
4.4	Conclusion. . . . .	88
4.5	References. . . . .	89
<b>5</b>	<b>Fruit and vegetables, cardiovascular disease, diabetes and obesity</b> . . . . .	95
	<i>M. J. Amiot and D. Lairon, Université de la Méditerranée (JRU INRA-INSERM), France</i>	
5.1	Introduction. . . . .	95
5.2	Fruit and vegetables: observational and intervention studies of diets rich in fruit and vegetables . . . . .	96
5.3	The role of fruit and vegetables components. . . . .	102

5.4	Conclusions .....	110
5.5	Acknowledgement .....	111
5.6	References .....	111
<b>6</b>	<b>Epidemiologic evidence for the effect of fruit and vegetables on cardiovascular diseases, diabetes and obesity .....</b>	<b>119</b>
	<i>L. A. Bazzano, Tulane University, USA</i>	
6.1	Introduction .....	119
6.2	Issues related to analysis of fruit and vegetable intake in human populations .....	120
6.3	Overview of different aspects of fruit and vegetables, biologic compounds, and potential mechanisms of action .....	124
6.4	Epidemiologic evidence of the protective effect of fruit and vegetables .....	129
6.5	Summary and future trends .....	134
6.6	References .....	136
<b>7</b>	<b>Beneficial effects of phenolic compounds from fruit and vegetables in neurodegenerative diseases .....</b>	<b>145</b>
	<i>M. Singh, INRS-Institut Armand Frappier, Canada and C. Ramassamy INRS-Institut Armand Frappier and INAF, Laval University, Canada</i>	
7.1	Introduction .....	145
7.2	Oxidative stress and the aging brain .....	146
7.3	Oxidative stress and neurodegenerative diseases .....	148
7.4	Role of NF- $\kappa$ B, sirtuins and MAP kinases in neuroprotection .....	153
7.5	Polyphenols from fruit and vegetables .....	156
7.6	Bioavailability and metabolism of polyphenols .....	165
7.7	Challenges for research on polyphenols in neurodegenerative diseases .....	167
7.8	Conclusions .....	168
7.9	References .....	168
<b>8</b>	<b>Fruit and vegetables, energy balance and weight management .....</b>	<b>182</b>
	<i>H. Arguin and A. Tremblay, Laval University, Canada</i>	
8.1	Introduction .....	182
8.2	The relationship between fruit and vegetable consumption, energy balance and body weight: epidemiological and clinical evidence .....	183
8.3	Role of fruit and vegetables in energy balance and weight management: mechanisms of action .....	185
8.4	Summary .....	191

8.5	Future trends in the study of fruit and vegetables as part of dietary management for the prevention and treatment of obesity . . . . .	192
8.6	References . . . . .	192

### **Part III Understanding fruit and vegetable phytochemicals**

<b>9</b>	<b>Physiological and ecological functions and biosynthesis of health-promoting compounds in fruit and vegetables . . . . .</b>	<b>201</b>
	<i>Y. Desjardins, Laval University, Canada</i>	
9.1	Introduction . . . . .	201
9.2	Glucosinolates . . . . .	202
9.3	Carotenoids . . . . .	210
9.4	Polyphenols . . . . .	217
9.5	Capsaicins of chili pepper . . . . .	227
9.6	Organosulfur compounds . . . . .	230
9.7	Conclusions . . . . .	236
9.8	References . . . . .	238
<b>10</b>	<b>Rapid analysis of phytochemicals in fruit and vegetables . . . . .</b>	<b>248</b>
	<i>P. Brat, Centre de Coopération Internationale en Recherche Agronomique pour le Développement (CIRAD), France</i>	
10.1	Introduction . . . . .	248
10.2	Analysis of phytochemicals in fruit and vegetables . . . . .	249
10.3	Future trends . . . . .	271
10.4	Sources of further information and advice . . . . .	273
10.5	References . . . . .	273
<b>11</b>	<b>Clinical evidence for biological activity of fruit and vegetable phytochemicals . . . . .</b>	<b>279</b>
	<i>I. T. Johnson, Institute of Food Research, UK</i>	
11.1	Introduction . . . . .	279
11.2	The current status of clinical evidence . . . . .	280
11.3	Other types of clinical intervention . . . . .	290
11.4	Making clinical trials more effective . . . . .	290
11.5	Future trends . . . . .	291
11.6	References . . . . .	293

### **Part IV Effect of pre- and post-harvest technologies on the health-promoting properties of fruit and vegetables**

<b>12</b>	<b>Traditional breeding to enhance the phytonutrient content of fruit and vegetables . . . . .</b>	<b>301</b>
	<i>T. K. McGhie and A. J. Currie, HortResearch, New Zealand</i>	
12.1	Introduction . . . . .	301

12.2	Phytochemicals and health: a short review. . . . .	301
12.3	Genetic and breeding strategies for improving plant cultivars . . . . .	306
12.4	Variation of phytochemical content within fruit types . . . .	309
12.5	Towards fruit cultivars with improved nutrition qualities . . . . .	312
12.6	The future of fruit and vegetable cultivars with improved nutritional qualities . . . . .	319
12.7	Conclusions . . . . .	320
12.8	Acknowledgements . . . . .	320
12.9	References . . . . .	320
<b>13</b>	<b>Genetic manipulation of vegetable crops to alleviate diet-related diseases . . . . .</b>	<b>326</b>
	<i>A. K. Mattoo, The Henry A. Wallace Beltsville Agricultural Research Center, USA; S. K. Yachha, Sanjay Gandhi Postgraduate Institute of Medical Sciences, India and T. Fatima, The Henry A. Wallace Beltsville Agricultural Research Center, USA and University of Maryland, USA</i>	
13.1	Introduction. . . . .	326
13.2	Diet and human diseases. . . . .	328
13.3	The need for genetic engineering to enhance nutritional quality for human health . . . . .	330
13.4	Creating vegetables with improved nutritional value by genetic manipulation . . . . .	331
13.5	Safety issues and consumer attitude to genetically modified vegetables . . . . .	339
13.6	Future trends. . . . .	340
13.7	Sources of further information and advice. . . . .	341
13.8	Acknowledgement . . . . .	341
13.9	References . . . . .	342
<b>14</b>	<b>Agronomy and the nutritional quality of fruit . . . . .</b>	<b>346</b>
	<i>M. Dorais and D. L. Ehret, Agriculture and Agri-food Canada, Research Branch, Canada</i>	
14.1	Introduction. . . . .	346
14.2	Environmental factors affecting nutritional quality of fruit . . . . .	348
14.3	Controlling agronomy to improve the nutritional value of fruit . . . . .	357
14.4	Maturity at harvest. . . . .	375
14.5	Mechanical injuries, microorganisms and pesticides . . . . .	377
14.6	Modelling quality . . . . .	378

14.7	Future trends. . . . .	379
14.8	References. . . . .	381
<b>15</b>	<b>Agronomy and the nutritional quality of vegetables . . . . .</b>	<b>392</b>
	<i>K. Crosby, J. Jifon and D. Leskovar, Texas A&amp;M University, USA</i>	
15.1	Introduction. . . . .	392
15.2	Nutrient management . . . . .	393
15.3	Irrigation management . . . . .	397
15.4	Environmental effects and maturity stages . . . . .	399
15.5	Location effects . . . . .	403
15.6	Concluding remarks. . . . .	406
15.7	References. . . . .	407
<b>16</b>	<b>Storage and handling of fruit and vegetables for optimum health-related quality . . . . .</b>	<b>412</b>
	<i>G. B. Bengtsson Matforsk AS, Norway and S. F. Hagen, Norwegian University of Life Sciences, Norway</i>	
16.1	Introduction. . . . .	412
16.2	Storage and handling procedures influencing the health-related quality of fruit and vegetables . . . . .	413
16.3	Influence of storage and handling on health-related properties of fruit and vegetables . . . . .	417
16.4	Future trends. . . . .	424
16.5	Sources of further information and advice. . . . .	424
16.6	References. . . . .	425
<b>17</b>	<b>Postharvest enhancement of bioactive compounds in fresh produce using abiotic stresses . . . . .</b>	<b>431</b>
	<i>J. Carlos Espín de Gea, CEBAS-CSIC, Spain</i>	
17.1	Introduction. . . . .	431
17.2	Phytoalexins and phytoanticipins. . . . .	432
17.3	Factors affecting the phytochemical content of fruit and vegetables . . . . .	436
17.4	Health-promoting activity of inducible phytochemicals. . . . .	438
17.5	Postharvest treatments to increase the phytochemical content of fruit and vegetables. . . . .	439
17.6	Undesirable effects of stress-inducible phytochemicals . . . . .	442
17.7	Future trends and final remarks. . . . .	443
17.8	References. . . . .	443
<b>18</b>	<b>Processing techniques and their effect on fruit and vegetable phytochemicals. . . . .</b>	<b>449</b>
	<i>L. Howard, University of Arkansas, USA</i>	
18.1	Introduction. . . . .	449

18.2	Consumption of fresh and processed fruit and vegetables .....	449
18.3	Importance of food composition databases for dietary recommendations .....	451
18.4	Effects of compound solubility, cellular and structural localization on phytochemical losses .....	452
18.5	Effects of processing unit operations on phytochemical losses .....	453
18.6	Thermal and non-thermal processing techniques influencing phytochemical content of fruit and vegetables .....	455
18.7	Packaging and storage effects on processed carotenoids and flavonoids .....	464
18.8	Future trends .....	466
18.9	Sources of further information and advice .....	467
18.10	References .....	467

## **Part V The nutritional quality of particular fruit and vegetable products**

<b>19</b>	<b>Fresh-cut fruit and vegetables</b> .....	<b>475</b>
	<i>M. I. Gil, CEBAS-CSIC, Spain and A. A. Kader, UC Davis, USA</i>	
19.1	Introduction .....	475
19.2	Consequences of cutting-induced changes in major classes of health-promoting constituents .....	475
19.3	Unit operations affecting the quality of fresh-cut fruit and vegetables .....	477
19.4	Pre- and post-cutting treatments affecting the health-promoting constituents of fresh-cut fruit and vegetables .....	480
19.5	Consequences of cutting on the health-promoting constituents of specific fresh-cut fruits .....	485
19.6	Consequences of cutting on the health-promoting constituents of specific fresh-cut vegetables .....	490
19.7	Conclusions .....	495
19.8	References .....	496
<b>20</b>	<b>Organic fruit and vegetables</b> .....	<b>505</b>
	<i>A. E. Mitchell, K. J. Meyers and E. Koh, University of California, USA</i>	
20.1	Introduction .....	505
20.2	What is an organic food? .....	507
20.3	Organic and conventional production systems .....	509
20.4	Pesticide residues .....	510

xii Contents

20.5	The nutritional value of organically and conventionally produced foods. . . . .	512
20.6	Agronomic factors that influence the phytochemical composition of fruit and vegetables. . . . .	515
20.7	A review (2000–2006) of the influence of cultivation practices on phytochemicals in fruit and vegetables. . . . .	519
20.8	Summary . . . . .	527
20.9	References. . . . .	527
<b>21</b>	<b>Extraction and concentration techniques for bioactives from fruit and vegetables. . . . .</b>	<b>533</b>
	<i>M. Surbled and B. Mompon, Archimex, France</i>	
21.1	Introduction. . . . .	533
21.2	New solvents. . . . .	534
21.3	Membrane technologies . . . . .	542
21.4	Microwave technologies . . . . .	543
21.5	Conclusion. . . . .	546
21.6	References. . . . .	546
