

MODERN TECHNIQUES — FOR — FOOD AUTHENTICATION

Edited by
DA-WEN SUN

Contents

About the Editor	xi
Contributors	xiii
Preface	xv
List of Abbreviations	xvii

1	Introduction to Food Authentication	1
	<i>Andreas Schieber</i>	
	Introduction	1
	Modern techniques in food authentication	6
	Food authentication – still a challenging issue	16
	Conclusions	17
	References	17
2	Spectroscopic Technique: Mid-infrared (MIR) and Fourier Transform Mid-infrared (FT-MIR) Spectroscopies	27
	<i>Romdhane Karoui, Juan Antonio Fernández Pierna and Eric Dufour</i>	
	Introduction	27
	Theory and principles	28
	Instrumentation	29
	Applications of MIR and FT-MIR in foods, drinks, cotton and wood	31
	Conclusions	57
	References	57
3	Spectroscopic Technique: Near-infrared (NIR) Spectroscopy	65
	<i>Marena Manley, Gerard Downey and Vincent Baeten</i>	
	Introduction	65
	Theory and principles	68
	Instrumentation	69
	Chemometrics	74
	Advantages and disadvantages	82
	Applications in food and beverage authenticity	84
	Conclusions	99
	References	99

4	Spectroscopic Technique: Fourier Transform Near-infrared (FT-NIR) Spectroscopy	117
	<i>Vincent Baeten, Marena Manley, Juan Antonio Fernández Pierna, Gerard Downey and Pierre Dardenne</i>	
	Introduction	117
	Theory and instrumentation	119
	New trends in chemometrics as applied to NIR spectroscopic data	126
	Authentication by FT-NIR	130
	Authentication by FT-NIR microscopy	140
	Conclusions	142
	References	142
5	Spectroscopic Technique: Raman Spectroscopy	149
	<i>Hartwig Schulz</i>	
	Introduction	149
	Instrumentation	150
	Applications in the agricultural and food sectors	153
	Conclusions	176
	References	177
6	Spectroscopic Technique: Fourier Transform Raman (FT-Raman) Spectroscopy	185
	<i>Ramazan Kizil and Joseph Irudayaraj</i>	
	Introduction	185
	Fundamentals of Raman spectroscopy	186
	Raman band intensities and basis of qualitative aspects of Raman spectroscopy	186
	FT-Raman instrumentation	187
	Applications of FT-Raman spectroscopy	189
	Conclusions	197
	References	197
7	Spectroscopic Technique: Fluorescence and Ultraviolet-visible (UV-Vis) Spectroscopy	201
	<i>Romdhane Karoui and Eric Dufour</i>	
	Introduction	201
	Fluorescence spectroscopy	202
	Instrumentation	209
	Applications of fluorescence in foods and drinks	210
	Advantages and disadvantages of fluorescence spectroscopy	236
	Conclusions	237
	References	238
8	Isotopic-spectroscopic Technique: Site-specific Nuclear Isotopic Fractionation Studied by Nuclear Magnetic Resonance (SNIF-NMR)	247
	<i>Wen-Ching Ko and Chang-Wei Hsieh</i>	
	Introduction	247
	Natural isotope fractionation	248

	Determining site-specific ratios by nuclear magnetic resonance (NMR)	249
	^2H -NMR for quantitative determinations of site-specific ratios	252
	Conclusions	262
	References	263
9	Isotopic-spectroscopic Technique: Stable Isotope Ratio Mass Spectrometry (IRMS)	269
	<i>G�rard Gremaud and Andreas Hilkert</i>	
	Introduction	269
	Theory and principles	270
	Equipment and instruments	272
	Recent applications in food authenticity	289
	Strengths and limitations	307
	Applicability of different isotopic variables to authenticity	308
	Conclusions	311
	Definitions	312
	Acknowledgement	312
	References	312
10	Chromatographic Technique: Gas Chromatography (GC)	321
	<i>Ana Soria, Ana Ruiz-Matute, Maria Sanz and Isabel Mart�nez-Castro</i>	
	Introduction	321
	Theory and fundamentals	322
	Instrumentation	327
	Applications	331
	Conclusions	349
	References	350
11	Chromatographic Technique: High-performance Liquid Chromatography (HPLC)	361
	<i>Agnes Sass-Kiss</i>	
	Introduction	361
	Principle of liquid chromatography	362
	Applications	371
	Conclusions	396
	References	396
12	DNA-based Technique: Polymerase Chain Reaction (PCR)	411
	<i>Robert E. Levin</i>	
	Introduction	411
	Stability of DNA in foods	412
	Methods of DNA extraction from foods	413
	Molecular techniques used to discriminate between similar species and strains	413
	Species-specific PCR assays	426
	Conclusions	467
	References	468

13	Enzymic Technique: Enzyme-linked Immunosorbent Assay (ELISA)	477
	<i>Ángel Maquieira Catala and Rosa Puchades</i>	
	Introduction	477
	Immunoassays	481
	Food authentication testing – recent applications	491
	Alternative ELISA developments	508
	Conclusions	510
	References	511
14	Electrophoretic Technique: Capillary Zone Electrophoresis	521
	<i>Alejandro Cifuentes and Virginia García-Cañas</i>	
	Introduction	521
	Equipment and instrumentation used in CE	523
	Theory and principles of CE	524
	Modes of CE	526
	Application of CE to food authentication	529
	Future outlook	536
	Conclusions	536
	Acknowledgements	537
	References	537
15	Thermal Technique: Differential Scanning Calorimetry (DSC)	543
	<i>Oi-Ming Lai and Seong-Koon Lo</i>	
	Introduction	543
	Differential scanning calorimetry	544
	Factors affecting DSC curves	550
	Application in foods	554
	Conclusions	578
	Nomenclature	579
	References	579
16	Chemometric Methods in Food Authentication	585
	<i>Riccardo Leardi</i>	
	Introduction	585
	Data collection	586
	Data display	587
	Process monitoring and quality control	598
	Three-way PCA	601
	Classification	604
	Modeling	606
	Calibration	607
	Variable selection	609
	Future trends	611
	Advantages and disadvantages of chemometrics	613
	Conclusions	614
	References and further reading	614

17	Trends in Food Authentication	617
	<i>Ioannis S. Arvanitoyannis</i>	
	Introduction	617
	Emerging authentication methods	618
	Conclusions	635
	References	635
	Index	645
