

PROCESS INTENSIFICATION

ENGINEERING FOR EFFICIENCY,
SUSTAINABILITY AND FLEXIBILITY

David Reay • Colin Ramshaw • Adam Harvey

CONTENTS

<i>Foreword by Dave Trent, Dow</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
<i>Acknowledgements</i>	<i>xiii</i>
<i>Introduction</i>	<i>xxi</i>
Chapter 1 A Brief History of Process Intensification	1
1.1 Introduction	1
1.2 Rotating boilers	2
1.3 The rotating heat pipe	6
1.4 The chemical process industry – the process intensification breakthrough at ICI	8
1.5 Separators	10
1.6 Reactors	14
1.7 Non-chemical industry related applications of rotating heat and mass transfer	16
1.8 Where are we today?	18
1.9 Summary	18
References	19
Chapter 2 Process Intensification – An Overview	21
2.1 Introduction	21
2.2 What is process intensification?	21
2.3 The original ICI PI strategy	24
2.4 The advantages of PI	26
2.5 Some obstacles to PI	37
2.6 A way forward	38
2.7 To whet the reader's appetite	39
2.8 Equipment summary – finding your way around this book	40
2.9 Summary	40
References	44
Chapter 3 The Mechanisms involved in Process Intensification	47
3.1 Introduction	47
3.2 Intensified heat transfer – the mechanisms involved	49
3.3 Intensified mass transfer – the mechanisms involved	63

3.4	Electrically enhanced processes – the mechanisms	65
3.5	Micro-fluidics	70
3.6	Pressure	74
3.7	Summary	74
	References	74
Chapter 4 Compact and Micro-Heat Exchangers		77
4.1	Introduction	77
4.2	Compact heat exchangers	78
4.3	Micro-heat exchangers	91
4.4	What about small channels?	94
4.5	Heat transfer applications of chemical reactions	98
4.6	Summary	100
	References	100
Chapter 5 Reactors		103
5.1	Reactor engineering theory	103
5.2	Spinning disc reactors	109
5.3	Oscillatory baffled reactors (OBRs)	128
5.4	Other rotating reactors	137
5.5	Micro-reactors (including hex-reactors)	141
5.6	Field-enhanced reactions	159
5.7	Reactive separations	163
5.8	Membrane reactors	167
5.9	Supercritical operation	170
5.10	Miscellaneous intensified reactor types	172
5.11	Summary	180
	References	180
Chapter 6 Intensification of Separation Processes		187
6.1	Introduction	187
6.2	Distillation	188
6.3	Centrifuges	198
6.4	Membranes	201
6.5	Drying	203
6.6	Precipitation and crystallisation	205
6.7	Mop fan/deduster	208
6.8	Summary	212
	References	212
Chapter 7 Intensified Mixing		215
7.1	Introduction	215
7.2	In-line mixers	216

7.3	Mixing on a spinning disc	220
7.4	Induction-heated mixer	220
7.5	Summary	220
	References	221
Chapter 8 Application Areas – Petrochemicals and Fine Chemicals		223
8.1	Introduction	223
8.2	Refineries	225
8.3	Bulk chemicals	226
8.4	Fine chemicals and pharmaceuticals	250
8.5	Bioprocessing or processing of bioderived feedstock	258
8.6	Further reading	259
8.7	Summary	260
	References	260
Chapter 9 Application Areas – Offshore Processing		265
9.1	Introduction	265
9.2	Some offshore scenarios	266
9.3	Offshore on platforms or subsea	270
9.4	FPSO activities	281
9.5	Safety offshore – can PI help?	284
9.6	Summary	285
	References	285
Chapter 10 Application Areas – Miscellaneous Process Industries		287
10.1	Introduction	287
10.2	The nuclear industry	287
10.3	The food and drink sector	293
10.4	Textiles	303
10.5	The metallurgical and glass industries	308
10.6	Aerospace	312
10.7	Biotechnology	313
10.8	Summary	320
	References	320
Chapter 11 Application Areas – The Built Environment, Electronics and the Home		323
11.1	Introduction	323
11.2	Refrigeration/heat pumping	324
11.3	Power generation	334
11.4	Microelectronics	338
11.5	Summary	352
	References	352

Chapter 12	Specifying, Manufacturing and Operating PI Plant	355
12.1	Introduction	355
12.2	Various approaches to adopting PI	356
12.3	Initial assessment	359
12.4	Equipment specification	364
12.5	Installation features of PI plant	369
12.6	Pointers to the successful operation of PI plant	369
12.7	The 'systematic' approach to selecting PI technology	370
12.8	An application of the methodology to synthesis gas/hydrogen production	375
12.9	The ultimate goal – whole plant intensification	384
12.10	Summary	386
	References	387
Appendices		
Appendix 1	Abbreviations Used	389
Appendix 2	Nomenclature	391
Appendix 3	Relevant Review Papers/Texts	393
Appendix 4	Equipment Suppliers	397
Appendix 5	R&D Organisations, Consultants and Miscellaneous Groups Active in PI	415
Appendix 6	A Selection of Other Useful Contact Points, including Networks and Web Sites	429
A6.1	UK Assistance/information/support programmes	429
A6.2	Centres of excellence/groupings	430
A6.3	Patent sources	431
A6.4	Networks	432
