Series Editor's Preface xiii

Preface xv

Acknowledgments xviii

1 Digital Microfluidics in Today's Microfluidics 1

1.1 The Development of Microfluidics 1
1.2 The Advantages of Digital and Droplet Microfluidics Compared to Conventional Microflows 2
1.2.1 From Microflows to Microdrops 2
1.2.2 Microdrops: Comparison Between Digital and Droplet Microfluidics 2
1.3 The Respective Place of Digital and Droplet Microfluidics in Today's Microfluidics 4
1.4 Summary 5
References 5

2 Theory of Wetting 7

2.1 Introduction 7
2.2 Interfaces and Surface Tension 9
2.2.1 The Notion of Interface 9
2.2.2 Surface Tension 12
2.3 Laplace Law and Applications 18
2.3.1 Laplace's Law 18
2.3.2 Examples of Application of Laplace's Law 23
2.4 Wetting—Partial or Total Wetting 34
2.5 Contact Angle—Young's Law 36
2.5.1 Young's Law 36
2.5.2 Nano-bubbles on Hydrophobic Walls, Line Tension and the Modified Young's Law 38
2.6 Work of Adhesion, Work of Cohesion, and the Young–Dupré Equation 40
2.6.1 Work of Adhesion 40
2.6.2 Work of Cohesion 41
2.6.3 Young–Dupré Equation 42

2.7 Capillary Force, Force on a Triple Line 42
2.7.1 Introduction 42
2.7.2 Capillary Force Between Two Parallel Plates 43
2.7.3 Capillary Rise in a Tube 44
2.7.4 Capillary Rise Between Two Parallel Vertical Plates 47
2.7.5 Capillary Rise in a Pipette 49
2.7.6 Force on a Triple Line 51
2.7.7 Examples of Capillary Forces in Microsystems 52
2.8 Measuring Surface Tension of Liquids 53
2.8.1 Using Pressure (Bubble Pressure Method) 53
2.8.2 Using the Capillary Rise on a Plate—Wilhelmy Plate 55
2.8.3 Using Gravity: The Pendant Drop Method 55
2.8.4 Using Shear Stress in a Microflow 59
2.9 Surface Tension of Solids 61
2.9.1 Introduction 61
2.9.2 Surface Free Energy 62
2.9.3 Critical Surface Tension and Surface Free Energy 64
2.10 Minimization of the Surface Energy and Minimal Energy Surfaces 68
2.10.1 Minimal Surfaces 68
2.10.2 Minimization of the Surface Energy 69
2.11 Summary 70
References 71

3 The Physics of Droplets 75

3.1 Introduction 75
3.2 The Shape of Micro-drops 75
3.2.1 Sessile Droplets 75
3.2.2 Droplets Constrained Between Two Plates 83
3.2.3 Droplet At a Liquid Interface—Neumann's Construction 89
3.2.4 Droplet in a Corner 91
3.2.5 Droplet in a Groove 97
3.2.6 Droplet in a Micro-well 99
3.2.7 Droplet on Striped Surface Domains 101
3.2.8 Droplet Pierced by a Micro-wire (catena) 105
3.3 Drops on Inhomogeneous Surfaces 106
3.3.1 Wenzel's Law 108
3.3.2 Cassie–Baxter Law 110
3.3.3 Contact on Fabricated Surfaces: The Transition Between the Wenzel and Cassie Laws 112
3.4 Drops Moving by Capillarity 124
3.4.1 Drop Moving Over a Transition of Wettability 124
3.4.2 Drop Moving Uphill 126

3.4.3 Drop Moving up a Step 128
3.4.4 Drop Moving Over a Gradient of Surface Concentration of Surfactant 128
3.4.5 Conclusion 129
3.5 Contact Angle Hysteresis 130
3.6 Droplet Pinning 133
3.6.1 Droplet Pinning on a Surface Defect 133
3.6.2 Droplet Pinning at a Wettability Separation Line 134
3.6.3 Droplet Pinning on an Edge 135
3.7 The Effect of Surfactants 135
3.7.1 Introduction 135
3.7.2 From Partial Wetting to Total Wetting 137
3.8 Marangoni Convection 137
3.8.1 Introduction 137
3.8.2 Marangoni Convection Due to Thermal Non-uniformity 139
3.8.3 Marangoni Convection Due to Concentration Gradient 141
3.8.4 Marangoni Convection Due to an Electric Field 142
3.9 Evaporation 143
3.9.1 Evaporation of Sessile Droplets 144
3.9.2 Evaporation Rings 151
3.9.3 Evaporation Stains 151
3.9.4 Marangoni Convection During Evaporation 153
3.9.5 The Use of Droplet Evaporation in Biotechnology, Biology, and Nanoassembly 154
3.10 Summary 156
References 157

4 Electrowetting Theory 161

4.1 Introduction 161
4.2 Theoretical Background 163
4.2.1 Thermodynamic Approach 163
4.2.2 Energy Minimization Approach 167
4.2.3 Electromechanical Approach 172
4.3 Lippmann–Young Law and the Electrocapillary Equivalence. 176
4.4 Saturation 178
4.4.1 Saturation of the Electrowetting Effect 178
4.4.2 Possible Explanations for the Saturation Effect 180
4.4.3 Modified Lippmann–Young Law 190
4.5 Hysteresis 193
4.5.1 Introduction 193
4.5.2 Hysteresis and Minimum Actuation Potential 194
4.6 Working Range of EWOD Devices 202
4.6.1 Maximum Potential 202

4.6.2 Working Range 203
4.6.3 Conclusion 205
4.7 Materials and Substrates 206
4.7.1 Capacitance 206
4.7.2 Dielectric Breakdown 208
4.7.3 Materials 211
4.7.4 Existing Substrates and Their Characteristics 213
4.8 Discussion: Special Substrates and New Concepts 215
4.8.1 Low Voltages 215
4.8.2 Electrowetting Forces 216
4.8.3 Superhydrophobic Microfabricated Substrates 216
4.8.4 Superhydrophobic Droplets 219
4.9 Summary 221
References 222

5 EWOD Microsystems 225

5.1 Introduction 225
5.2 Open and Covered EWOD Microsystems 225
5.2.1 Open EWOD Microsystems 226
5.2.2 Covered EWOD Microsystems 229
5.3 Droplet Motion 230
5.3.1 Principle of Droplet Motion—Quasi-static Aspects and Departure From Equilibrium 231
5.3.2 Dynamic Aspect—Velocity of Motion 232
5.3.3 Shape of the Electrodes: Crenellated Electrodes 240
5.3.4 Motion from a Covered to an Open EWOD System . 250
5.3.5 Effect of a Catena 257
5.4 Division of Droplets 258
5.4.1 Theoretical Approach 259
5.4.2 Droplet Division in Open EWOD Systems 260
5.4.3 Droplet Division in Covered EWOD Systems 261
5.4.4 Experimental Results 263
5.4.5 Droplet Dispensing 263
5.4.6 Influence of the Cutting Electrode on Drop Volume and Reproducibility 268
5.4.7 Centering Electrode and Shape of Reservoir Electrode 271
5.5 Droplet Merging and Mixing 276
5.5.1 The Difficulty of Mixing in Covered EWOD Microsystems 277
5.5.2 Mixing in Open EWOD Systems 279
5.6 Dilution 281
5.6.1 Dilution of Solutes 281
5.6.2 Dilution of Discrete Particles 283
5.7 Magnetic Beads in EWOD Microsystems 284

5.8 Architecture of EWOD Microsystems 286
5.8.1 General Architecture 286
5.8.2 Multiplexing 286
5.9 Other EWOD Microsystems 287
5.9.1 Electrowetting Conveyor System 289
5.9.2 Extension of the Electrowetting Concept: Electrowetting Filament and Open Microfluidics 289
5.10 Summary 290
References 291

6 Biological Applications of EWOD 295

6.1 Introduction 295
6.2 Biological Liquids and Physiological Samples Compatible with EWOD Devices 295
6.2.1 Physiological Liquids 296
6.2.2 Proteins and Biofouling 297
6.2.3 Cells 297
6.2.4 Conclusion 298
6.3 Sample Collection and Analysis on a Lab-on-a-chip Platform 299
6.4 Polymerase Chain Reaction (PCR) on Digital Microfluidics Systems 301
6.4.1 Introduction 301
6.4.2 Architecture of a PCR-EWOD Microsystem 302
6.4.3 Thermal Analysis 303
6.4.4 Experimental Realization of PCR and Results 306
6.5 DNA Repair Microprocessor 310
6.6 Protein Analysis Coupled with Mass Spectrometry 314
6.7 Cell-on-a-chip Microsystems: Example of a Cell Concentrator 317
6.8 Summary 319
References 319

7 Chemical Applications 321

7.1 Introduction 321
7.1.1 Continuous Flow Systems 321
7.1.2 Digital Microfluidic 323
7.2 Non Aqueous Solvents on EWOD Chips 326
7.2.1 Volatile Organic Solvents (VOS) 326
7.2.2 Displacement of Ionic Liquids 331
7.3 Chemical Synthesis in Droplets in EWOD-based Systems 340
7.3.1 Synthesis in Aqueous Media 340
7.3.2 Synthesis in Volatile Organic Solvents 342
7.3.3 Synthesis in Ionic Liquids 343
7.4 Conclusions and Perspectives 348
References 349

8 Acoustic Methods for Manipulating Droplets 353

8.1 Introduction 353
8.2 Digital Microfluidics 355
8.2.1 Acoustic Streaming 356
8.2.2 Internal Streaming 363
8.2.3 Droplet Actuation 366
8.3 Example 1: Acoustic Mixing 368
8.4 Example 2: Acoustic Droplet Actuation 370
8.5 Applications 372
8.5.1 Micro-array Hybridization (Biological Application) .. 372
8.5.2 Polymerase Chain Reaction 376
8.5.3 Cell Adhesion 380
8.6 Summary 384
Acknowledgements 386
References 387

9 Introduction to Droplet Microfluidics and Multiphase Microflows 389

9.1 Introduction 389
9.2 Two-phase Flows: Plugs in Microchannels 390
9.2.1 Interface and Meniscus 390
9.2.2 Dynamic Contact Angle 390
9.2.3 Plugs Moving Inside a Capillary 393
9.2.4 Hysteresis of Static Contact Angle 398
9.2.5 Example of Three-phase Flow in a Microchannel 398
9.3 Two-phase Flows: Flowing Fluids Separated by an Interface . 401
9.3.1 Introduction 401
9.3.2 Model 401
9.3.3 Experimental Results 407
9.3.4 Discussion and Conclusions 408
9.4 Droplets in Two-phase Flows 410
9.4.1 Flow Focusing Devices (FFD) and T-junctions 410
9.4.2 Encapsulation 424
9.5 Summary 424
References 426

10 Epilog 429

10.1 Increasing the Domain of EWOD Applicability 429
10.2 Interconnecting the Different Microfluidic Toolboxes 429
10.3 Miniaturization: Nano-EWOD 431
10.4 Other Applications Specific to Digital Microfluidics 432
10.5 Summary 433
References 433
