

LAURIE BROWN

APPLIED PRINCIPLES OF
HORTICULTURAL
SCIENCE
THIRD EDITION

B
H

Contents

<i>About the author</i>	ix
<i>Preface</i>	xi
<i>Acknowledgements</i>	xv

Part One: Plant science

1 Plant kingdom: classification and nomenclature	3
Exercise 1.1 The plant kingdom	11
Exercise 1.2 Principles of classification	12
Exercise 1.3 Nomenclature for plant ordering	14
Exercise 1.4 Flowering plants (angiosperms)	16
Answers	20
2 Seed propagation (viability and vigour)	22
Exercise 2.1 Seed structure and dissection	25
Exercise 2.2 Percentage germination	27
Exercise 2.3 Effects of seed age on germination	28
Exercise 2.4 Tetrazolium test	29
Exercise 2.5 Germination environment	31
Answers	33
3 Propagation	34
Exercise 3.1 Vegetative propagation by cuttings	38
Exercise 3.2 Propagation and layering (stemrhizomes and stolons)	42
Exercise 3.3 Propagation and division (stem corms and bulbs)	44
Exercise 3.4 Propagation by division (bulbs)	46
Answers	47
4 Weed – biology and control	48
Exercise 4.1 Weed collecting and identification	50
Exercise 4.2 Pressing and mounting weed specimens	52
Exercise 4.3 Root structure	53
Exercise 4.4 Cultural weed control	56
Exercise 4.5 Chemical weed control	59
Answers	62
5 The leaf and photosynthesis	64
Exercise 5.1 Dicotyledonous leaf structure and photosynthesis	68
Exercise 5.2 Chlorophyll and photosynthesis	70
Exercise 5.3 Light and photosynthesis	72
Exercise 5.4 Carbon dioxide and photosynthesis	73

Exercise 5.5 Water and photosynthesis	76
Exercise 5.6 Oxygen and photosynthesis	77
Exercise 5.7 Cells and photosynthesis	78
Answers	82
6 Respiration and storage	84
Exercise 6.1 Storage of plant materials	87
Exercise 6.2 Aerobic germination of pea seeds	89
Exercise 6.3 Anaerobic respiration of yeast	90
Exercise 6.4 Energy release during respiration	92
Answers	94
7 Plant water	96
Exercise 7.1 Model of osmosis	97
Exercise 7.2 Diffusion	99
Exercise 7.3 Osmosis	100
Exercise 7.4 Plasmolysis	102
Exercise 7.5 Osmosis, diffusion and plasmolysis	104
Exercise 7.6 Root pressure osmosis	105
Answers	107
8 Water transportation pathways and processes	109
Exercise 8.1 Stem tissue functions	111
Exercise 8.2 Transport through plant stems	113
Exercise 8.3 Water loss from leaf stomata	114
Exercise 8.4 Transpiration	116
Exercise 8.5 Transpiration balance	120
Exercise 8.6 The weather	121
Answers	123
9 Flower structure	126
Exercise 9.1 Flower dissection	130
Exercise 9.2 Structure and function	131
Exercise 9.3 Floral structures	132
Exercise 9.4 Pollen investigation	134
Exercise 9.5 Insect-pollinated plants	136
Exercise 9.6 Fertilization	137
Answers	139
 Part Two: Soil science	
10 Soil formation and texture	145
Exercise 10.1 Properties of soil particles	150
Exercise 10.2 Features of coarse, medium and fine grade sand	152
Exercise 10.3 Sand grade investigation	153
Exercise 10.4 Soil texture assessment	154
Exercise 10.5 Soil texture assessment of personal plot sites	156
Answers	158
11 Soil structure and profiles	160
Exercise 11.1 Soil structure and profile assessment	164
Answers	169

12	Soil water	170
	Exercise 12.1 Available water-holding capacity	172
	Exercise 12.2 Effects of waterlogged soils	174
	Exercise 12.3 Capillary rise	175
	Exercise 12.4 Plant physiological response to water stress	176
	Answers	178
13	Measuring soil pH	180
	Exercise 13.1 Soil and compost pH testing	187
	Exercise 13.2 Soil texture assessment	189
	Answers	191
14	Raising soil pH	192
	Exercise 14.1 Soil texture and lime requirements	193
	Exercise 14.2 Liming materials and neutralizing value	195
	Exercise 14.3 Integration of skills	197
	Answers	199
15	Lowering soil pH (increasing soil acidity)	200
	Exercise 15.1 Soil and compost pH testing	202
	Exercise 15.2 Soil texture	202
	Exercise 15.3 Free lime (calcium carbonate) content	203
	Exercise 15.4 Sulphur requirements to lower pH	204
	Exercise 15.5 Lowering pH – integration of skills	205
	Answers	207
16	Soil organisms and composting	209
	Exercise 16.1 Classification of soil organisms	210
	Exercise 16.2 Biodiversity in a compost heap	213
	Answers	215
17	Soil organic matter	216
	Exercise 17.1 Soil organic matter determination	217
	Exercise 17.2 Properties of organic matter	219
	Exercise 17.3 Organic matter and nitrogen	220
	Answers	223
18	Plant nutrition	224
	Exercise 18.1 Plant nutrition	226
	Exercise 18.2 Tomato plant deficiency symptoms	226
	Exercise 18.3 Function of plant nutrient	229
	Exercise 18.4 Major nutrient roles	231
	Exercise 18.5 Nitrate fertilizers	233
	Answers	235
19	Fertilizers	237
	Exercise 19.1 Fertilizer nutrient content	241
	Exercise 19.2 Structure of fertilizers	242
	Exercise 19.3 Fertilizer spreading	243
	Exercise 19.4 Types of fertilizer	244
	Exercise 19.5 Speed and mode of nutrient release	245
	Exercise 19.6 Fertilizer recommendations and calculations	247

Exercise 19.7 Area and amount of fertilizer required	250
Exercise 19.8 Total fertilizer quantity measurements	251
Answers	253

Part Three: Pest and disease

20 Fungi	259
Exercise 20.1 Mycelium investigation	263
Exercise 20.2 Spore cases and germinating spores	265
Exercise 20.3 Spore cases and spore survival techniques	266
Exercise 20.4 Rust disease	267
Exercise 20.5 Powdery mildew disease	267
Exercise 20.6 Structure of a mushroom	268
Exercise 20.7 Spore mapping	269
Answers	271
21 Insects and mites	273
Exercise 21.1 Pit fall trapping	275
Exercise 21.2 Pooter bug hunting	276
Exercise 21.3 Vine weevils (<i>Otiorhynchus</i>)	277
Exercise 21.4 Wireworms and click beetles (<i>Agriotes</i> , <i>Athous</i> and <i>Ctenicera</i>)	280
Exercise 21.5 Leatherjackets and crane fly (<i>Diptera</i> , <i>Tipula</i>)	281
Exercise 21.6 Cabbage root fly (<i>Delia radicum</i>)	282
Exercise 21.7 Cutworms	282
Exercise 21.8 Common gooseberry sawfly (<i>Nematus ribesii</i>)	283
Exercise 21.9 Cabbage white butterfly (<i>Mamestra brassicae</i>)	284
Exercise 21.10 Red spider mite (<i>Tetranychus urticae</i>)	285
Exercise 21.11 Aphids (<i>Hemiptera</i>)	286
Answers	289
22 Nematodes	292
Exercise 22.1 Vinegar nematode (<i>Angiullula aceti</i>)	294
Exercise 22.2 Nematode damage to plants	296
Exercise 22.3 Potato cyst nematode (<i>Globodera</i> spp) in soils	297
Answers	299
23 Biological control	300
Exercise 23.1 Common uses of biological control agents	305
Exercise 23.2 Diagnosis of pest damage	309
Exercise 23.3 Monitoring pest levels	311
Exercise 23.4 Predators and prey	313
Answers	315
List of useful suppliers	317
Bibliography	319
Index	321
