NETWORK ANALYSIS AND CIRCUITS

M. Arshad

CONTENTS

Chapter I.	Introduction	1
	1.1 What is a Network?	1
	1.2 Systems	4
	1.3 Electrical Energy Sources	6
	1.4 Dependent Source or Controlled Source	6
	1.5 Kirchhoff's Voltage Law (KVL)	8
	1.6 Kirchhoff's Current Law (KCL)	9
	1.7 Mesh Analysis	10
	1.8 Nodal Analysis	13
	1.9 Passive Elements	14
	1.10 Current Division Formula	19
	1.11 Voltage Division Formula for Two Resistors	21
	1.12 Power and RMS Values	23
Chapter 2.	Kirchhoff's Laws and Their Applications	39
	2.1 Introduction	39
	2.1 Introduction2.2 Branch Current Method	39 42
Chapter 3.		
Chapter 3.	2.2 Branch Current Method	42
Chapter 3.	2.2 Branch Current Method Graph Theory	42 73
Chapter 3.	2.2 Branch Current MethodGraph Theory3.1 Introduction	42 73 73
Chapter 3.	 2.2 Branch Current Method Graph Theory 3.1 Introduction 3.2 Rules for Drawing a Graph 3.3 Some Useful Definitions 	42 73 73 73
Chapter 3.	2.2 Branch Current MethodGraph Theory3.1 Introduction3.2 Rules for Drawing a Graph	42 73 73 73 74
Chapter 3.	 2.2 Branch Current Method Graph Theory 3.1 Introduction 3.2 Rules for Drawing a Graph 3.3 Some Useful Definitions 3.4 Complete Incidence Matrix (A_C) 	42 73 73 73 74 79
Chapter 3.	 2.2 Branch Current Method Graph Theory 3.1 Introduction 3.2 Rules for Drawing a Graph 3.3 Some Useful Definitions 3.4 Complete Incidence Matrix (A_C) 3.5 Drawing a Graph from an Incidence Matrix 	42 73 73 73 74 79 81
Chapter 3.	 2.2 Branch Current Method Graph Theory 3.1 Introduction 3.2 Rules for Drawing a Graph 3.3 Some Useful Definitions 3.4 Complete Incidence Matrix (A_C) 3.5 Drawing a Graph from an Incidence Matrix 3.6 Drawing a Graph from a Reduced Incidence Matrix 	42 73 73 73 74 79 81 82
Chapter 3.	 2.2 Branch Current Method Graph Theory 3.1 Introduction 3.2 Rules for Drawing a Graph 3.3 Some Useful Definitions 3.4 Complete Incidence Matrix (A_C) 3.5 Drawing a Graph from an Incidence Matrix 3.6 Drawing a Graph from a Reduced Incidence Matrix 3.7 Kirchhoff's Current Law (KCL) 	42 73 73 74 79 81 82 82
Chapter 3.	 2.2 Branch Current Method Graph Theory 3.1 Introduction 3.2 Rules for Drawing a Graph 3.3 Some Useful Definitions 3.4 Complete Incidence Matrix (A_C) 3.5 Drawing a Graph from an Incidence Matrix 3.6 Drawing a Graph from a Reduced Incidence Matrix 3.7 Kirchhoff's Current Law (KCL) 3.8 Fundamental Loops (Tie-Sets) of a Graph 	42 73 73 74 79 81 82 82 83

	3.11 Nodal Analysis Based on Graph Theory3.12 Loop Analysis Based on Graph Theory	94 95
Chapter 4.	The Laplace Transform	337
	 4.1 Introduction 4.2 Laplace Transform of Some Commonly Used Functions 4.3 Basic Laplace Transform Theorem 4.4 Laplace Transform of Some Other Functions 4.5 Initial Value Theorem 4.6 Final Value Theorem 4.7 Inverse Laplace Transformation 	137 137 141 143 145 145
Chapter 5.	Basic Signals and Waveform Synthesis	173
	 5.1 Introduction 5.2 Step Function 5.3 Ramp Function 5.4 Parabolic Function 5.5 Impulse Function or Dirac Delta Function 5.6 Exponential Function 5.7 Sinusoidal Signal 5.8 Relation Between Parabolic, Ramp, Unit Step, and Impulse Functions 5.9 Synthesis of General Waveforms 	173 173 179 182 183 185 186
Chapter 6.	Circuit Analysis by the Classical Method	217
	 6.1 Introduction 6.2 Linear Differential Equations 6.3 Determination of the Complementary Function (C.F.) 6.4 Determination of the Particular Integral (P.I.) 6.5 Initial Conditions in Circuits 6.6 Transient Response of Series RL Circuit Having D.C. Excitation 6.7 Transient Response of Series RC Circuit Having D.C. Excitation 6.8 Transient Response of Series RLC Circuit Having D.C. Excitation 	217 219 221 223 225 227 230
Chapter 7.	Applications of the Laplace Transform	255
	 7.1 Introduction 7.2 Solution of Linear Differential Equations 7.3 Transformed Circuit Components Representation 	255 255 257

CONTENTS	ΙX

Chapter 8.	Network Theorems	297
	8.1 Introduction to Network Theorems	297
	8.2 Millman's Theorem	297
	8.3 Superposition Theorem	304
	8.4 Thevenin's Theorem	313
	8.5 Norton's Theorem	318
	8.6 Millman's Theorem Revisited	330
	8.7 Maximum Power Transfer Theorem	332
	8.8 Δ -Y and Y- Δ Conversions	337
	8.9 Compensation Theorem	343
	8.10 Tellegen's Theorem	349
	8.11 Reciprocity Theorem	355
Chapter 9.	Network Functions; Poles and Zeros	399
	9.1 Introduction	399
	9.2 Network Functions for a One-Port Network	400
	9.3 Network Functions for a Two-Port Network	401
	9.4 Network Functions as a Quotient of Polynomials in S	409
	9.5 Poles and Zeros of Network Functions	410
	9.6 Significance of Poles and Zeros in Network Functions	413
	9.7 Restrictions on Locations of Poles and Zeros in	41.4
	Driving-Point Functions	414
	9.8 Restrictions on Locations of Poles and Zeros for	423
	Transfer Functions	430
	9.9 Time-Domain Response from Pole and Zero Plots9.10 Routh Criterion	438
CI 1 10		459
Chapter 10.	Two-Port Networks	
	10.1 Introduction	459
	10.2 Open Circuit Impedance or [Z] Parameters	460 463
	10.3 Short Circuit Admittance or [Y] Parameters	466 466
	10.4 ABCD or Transmission Parameters	470
	10.5 Hybrid or h-Parameters	472
	10.6 Inverse Hybrid (or G) Parameters	476
	10.7 Inter-Relationship of Parameters	489
	10.8 Condition for Reciprocity10.9 Condition for Symmetry	492
	10.10 Interconnections of Two-Port Networks	496
	10.11 Lattice Networks	508
	10.11 Lattice Networks 10.12 Image Parameters	512

Chapter 11.	Network Synthesis	567
	11.1 Introduction	567
	11.2 Analysis and Design	567
	11.3 Elements of the Realizability Theory	568
	11.4 Hurwitz Polynomial	568
	11.5 Procedure for Obtaining the Continued	
	Fraction Expansion	570
	11.6 Positive Real Functions	577
	11.7 Synthesis of One-Port Networks with	
	Two Elements (R, L, C)	581
	11.8 LC Immittance Function or LC Network Synthesis	595
	11.9 RC Impedance or RL Admittance Function	597
	11.10 RL Impedance or RC Admittance Function	599
Chapter 12.	Resonance and Selectivity	635
	12.1 Introduction	635
	12.2 Series Resonance	635
	12.3 Phasor Diagram of Series RLC Circuit	640
	12.4 Reactance and Impedance Curves of a	
	Series RLC Circuit	643
	12.5 Vibration of Current and Voltages with Frequency	
	in a Series RLC Circuit	644
	12.6 Selectivity and Bandwidth	647
	12.7 Quality Factor or Q-Factor	649
	12.8 Series Resonance and Selectivity of Series RLC Circuit with Frequency Variable '	652
	12.9 Selectivity or Series RLC Circuit with a	
	Capacitance Variable	657
	12.10 Selectivity of Series RLC Circuit with an L Variable	659
	12.11 Parallel Resonance	661
	12.12 Impedance of Parallel-Tuned Circuit	663
	12.13 Selectivity and Bandwidth of a Parallel-Tuned Circuit	667
Chapter 13.	Filters	671
	13.1 Introduction	671
	13.2 Parameters of a Filter	671
	13.3 Decibel and Neper	672
	13.4 Propagation Constant	673
	13.5 Classification of Filters	675
	13.6 Basic Filter Networks	677
	13.7 Cut-Off Frequencies	682

	Contents	xi
	13.8 Constant-K Filters13.9 m-Derived Filters13.10 m-Derived Band-Pass Filter	684 703 714
Chapter 14.	Fourier Analysis	727
	14.1 Introduction 14.2 Periodic Functions 14.3 Even and Odd Functions 14.4 Fourier Series 14.5 Alternative Forms of Fourier Series 14.6 Useful Integrals in Fourier Series 14.7 Evaluation of Fourier Series Constants 14.8 Fourier Series Constants for Period $(0 + 0.2\pi)$ 14.9 Limits of Integration per Time Period 14.10 Fourier Constants in Terms of Even and Odd Functions 14.11 Waveform Symmetries 14.12 Use of Fourier Series	727 728 731 732 733 734 737 738 738 746
Appendix A.	Selected Answers to Exercises	775
Appendix B.	About the CD-ROM	777
	Index	779
