# **The Nature and Properties of Soils**

**NYLE C. BRADY  
RAY R. WEIL**

## PREFACE    xv

## 1 THE SOILS AROUND US    1

1.1 Functions of Soils in Our Ecosystem	2
1.2 Medium for Plant Growth	3
1.3 Regulator of Water Supplies	7
1.4 Recycler of Raw Materials	8
1.5 Modifier of the Atmosphere	8
1.6 Habitat for Soil Organisms	9
1.7 Engineering Medium	10
1.8 Pedosphere as Environmental Interface	11
1.9 Soil As a Natural Body	11
1.10 The Soil Profile and Its Layers (Horizons)	14
1.11 Topsoil and Subsoil	16
1.12 Soil: The Interface of Air, Minerals, Water, and Life	17
1.13 Mineral (Inorganic) Constituents of Soils	19
1.14 Soil Organic Matter	21
1.15 Soil Water: A Dynamic Solution	23
1.16 Soil Air: A Changing Mixture of Gases	24
1.17 Interaction of Four Components to Supply Plant Nutrients	25
1.18 Nutrient Uptake by Plant Roots	27
1.19 Soil Quality, Degradation, and Resilience	29
1.20 Conclusion	30
Study Questions	30
References	31

## 2 FORMATION OF SOILS FROM PARENT MATERIALS    32

2.1 Weathering of Rocks and Minerals	33
2.2 Factors Influencing Soil Formation	40
2.3 Parent Materials	41
2.4 Climate	53
2.5 Biota: Living Organisms	56
2.6 Topography	60
2.7 Time	62
2.8 Four Basic Processes of Soil Formation	64
2.9 The Soil Profile	69
2.10 Conclusion	73
Study Questions	74
References	74

### 3 SOIL CLASSIFICATION 76

3.1 Concept of Individual Soils	77
3.2 Comprehensive Classification System: <i>Soil Taxonomy</i>	78
3.3 Categories and Nomenclature of <i>Soil Taxonomy</i>	85
3.4 Soil Orders	87
3.5 Entisols (Recent: Little if Any Profile Development)	91
3.6 Inceptisols (Few Diagnostic Features: Inception of B Horizon)	92
3.7 Andisols (Volcanic Ash Soils)	93
3.8 Gelisols (Permafrost and Frost Churning)	95
3.9 Histosols (Organic Soils without Permafrost)	97
3.10 Aridisols (Dry Soils)	100
3.11 Vertisols (Dark, Swelling, and Cracking Clays)	102
3.12 Mollisols (Dark, Soft Soils of Grasslands)	104
3.13 Alfisols (Argillic or Natric Horizon, Moderately Leached)	107
3.14 Ultisols (Argillic Horizon, Highly Leached)	108
3.15 Spodosols (Acid, Sandy, Forest Soils, Highly Leached)	110
3.16 Oxisols (Oxic Horizon, Highly Weathered)	111
3.17 Lower-Level Categories in Soil Taxonomy	112
3.18 Conclusion	117
Study Questions	119
References	119

### 4 SOIL ARCHITECTURE AND PHYSICAL PROPERTIES 121

4.1 Soil Color	122
4.2 Soil Texture (Size Distribution of Soil Particles)	123
4.3 Soil Textural Classes	127
4.4 Structure of Mineral Soils	132
4.5 Formation and Stabilization of Soil Aggregates	136
4.6 Tillage and Structural Management of Soils	143
4.7 Soil Density	148
4.8 Pore Space of Mineral Soils	158
4.9 Soil Properties Relevant to Engineering Uses	162
4.10 Conclusion	170
Study Questions	171
References	171

### 5 SOIL WATER: CHARACTERISTICS AND BEHAVIOR 173

5.1 Structure and Related Properties of Water	174
5.2 Capillary Fundamentals and Soil Water	176
5.3 Soil Water Energy Concepts	179
5.4 Soil Water Content and Soil Water Potential	184
5.5 The Flow of Liquid Water in Soil	191
5.6 Infiltration and Percolation	197
5.7 Water Vapor Movement in Soils	202
5.8 Qualitative Description of Soil Wetness	203
5.9 Factors Affecting Amount of Plant-Available Soil Water	207
5.10 Mechanisms by Which Plants Are Supplied with Water	211
5.11 Conclusion	214
Study Questions	215
References	216

### 6 SOIL AND THE HYDROLOGIC CYCLE 218

6.1 The Global Hydrologic Cycle	219
6.2 Fate of Precipitation and Irrigation Water	221

6.3	The Soil–Plant–Atmosphere Continuum	227
6.4	Control of Evapotranspiration (ET)	232
6.5	Liquid Losses of Water from the Soil	238
6.6	Percolation and Groundwaters	239
6.7	Enhancing Soil Drainage	243
6.8	Septic Tank Drain Fields	251
6.9	Irrigation Principles and Practices	255
6.10	Conclusion	263
	Study Questions	263
	References	264
<b>7</b>	<b>SOIL AERATION AND TEMPERATURE</b>	<b>266</b>
7.1	Soil Aeration—The Process	267
7.2	Means of Characterizing Soil Aeration	269
7.3	Oxidation-Reduction (Redox) Potential	270
7.4	Factors Affecting Soil Aeration and $E_h$	273
7.5	Ecological Effects of Soil Aeration	277
7.6	Aeration in Relation to Soil and Plant Management	280
7.7	Wetlands and Their Poorly Aerated Soils	283
7.8	Processes Affected by Soil Temperature	288
7.9	Absorption and Loss of Solar Energy	296
7.10	Thermal Properties of Soils	299
7.11	Soil Temperature Control	303
7.12	Conclusion	306
	Study Questions	307
	References	308
<b>8</b>	<b>SOIL COLLOIDS: SEAT OF SOIL CHEMICAL AND PHYSICAL ACTIVITY</b>	<b>310</b>
8.1	General Properties and Types of Soil Colloids	311
8.2	Fundamentals of Layer Silicate Clay Structure	315
8.3	Mineralogical Organization of Silicate Clays	317
8.4	Structural Characteristics of Nonsilicate Colloids	322
8.5	Genesis and Geographic Distribution of Soil Colloids	325
8.6	Sources of Charges on Soil Colloids	328
8.7	Adsorption of Cations and Anions	331
8.8	Cation Exchange Reactions	333
8.9	Cation Exchange Capacity	337
8.10	Exchangeable Cations in Field Soils	343
8.11	Anion Exchange	345
8.12	Sorption of Pesticides and Groundwater Contamination	347
8.13	Binding of Biomolecules to Clay and Humus	349
8.14	Physical Implications of Swelling-Type Clays	351
8.15	Conclusion	354
	Study Questions	355
	References	356
<b>9</b>	<b>SOIL ACIDITY</b>	<b>358</b>
9.1	The Process of Soil Acidification	359
9.2	Role of Aluminum in Soil Acidity	363
9.3	Pools of Soil Acidity	364
9.4	Buffering of pH in Soils	369
9.5	Determination of Soil pH	372
9.6	Human-Influenced Soil Acidification	375
9.7	Biological Effects of Soil pH	381

9.8	Raising Soil pH by Liming	387
9.9	Alternative Ways to Ameliorate the Ill Effects of Soil Acidity	393
9.10	Lowering Soil pH	395
9.11	Conclusion	396
	Study Questions	398
	References	399
<b>10</b>	<b>SOILS OF DRY REGIONS: ALKALINITY, SALINITY, AND SODICITY</b>	<b>401</b>
10.1	Characteristics and Problems of Dry Region Soils	402
10.2	Causes of Alkalinity: High Soil pH	409
10.3	Development of Salt-Affected Soils	411
10.4	Measuring Salinity and Sodicity	415
10.5	Classes of Salt-Affected Soils	418
10.6	Physical Degradation of Soils by Sodic Chemical Conditions	420
10.7	Growth of Plants on Salt-Affected Soils	424
10.8	Water-Quality Considerations for Irrigation	428
10.9	Reclamation of Saline Soils	430
10.10	Reclamation of Saline-Sodic and Sodic Soils	436
10.11	Management of Reclaimed Soils	439
10.12	Conclusion	440
	Study Questions	441
	References	441
<b>11</b>	<b>ORGANISMS AND ECOLOGY OF THE SOIL</b>	<b>443</b>
11.1	The Diversity of Organisms in the Soil	444
11.2	Organisms in Action	446
11.3	Organism Abundance, Biomass, and Metabolic Activity	452
11.4	Earthworms	454
11.5	Ants and Termites	458
11.6	Soil Microanimals	461
11.7	Roots of Higher Plants	466
11.8	Soil Algae	469
11.9	Soil Fungi	469
11.10	Soil Prokaryotes: Bacteria and Archaea	476
11.11	Conditions Affecting the Growth of Soil Microorganisms	480
11.12	Beneficial Effects of Soil Organisms on Plant Communities	481
11.13	Soil Organisms and Damage to Higher Plants	483
11.14	Ecological Relationships Among Soil Organisms	487
11.15	Conclusion	491
	Study Questions	492
	References	492
<b>12</b>	<b>SOIL ORGANIC MATTER</b>	<b>495</b>
12.1	The Global Carbon Cycle	496
12.2	The Process of Decomposition in Soils	499
12.3	Factors Controlling Rates of Decomposition and Mineralization	504
12.4	Genesis and Nature of Soil Organic Matter and Humus	510
12.5	Influences of Organic Matter on Plant Growth and Soils	514
12.6	Amounts and Quality of Soil Organic Matter	517
12.7	Carbon Balance in the Soil–Plant–Atmosphere System	519
12.8	Factors and Practices Influencing Soil Organic Matter Levels	522
12.9	The Greenhouse Effect: Soils and Climate Change	529
12.10	Composts and Composting	535
12.11	Conclusion	538
	Study Questions	539
	References	539

<b>13 NITROGEN AND SULFUR ECONOMY OF SOILS</b>	<b>542</b>
13.1 Influence of Nitrogen on Plant Growth and Development	543
13.2 Distribution of Nitrogen and the Nitrogen Cycle	544
13.3 Immobilization and Mineralization	545
13.4 Soluble Organic Nitrogen (SON)	548
13.5 Ammonium Fixation by Clay Minerals	549
13.6 Ammonia Volatilization	550
13.7 Nitrification	551
13.8 The Nitrate Leaching Problem	552
13.9 Gaseous Losses by Denitrification	557
13.10 Biological Nitrogen Fixation	562
13.11 Symbiotic Fixation with Legumes	564
13.12 Symbiotic Fixation with Nonlegumes	568
13.13 Nonsymbiotic Nitrogen Fixation	569
13.14 Nitrogen Deposition from the Atmosphere	570
13.15 Practical Management of Soil Nitrogen	572
13.16 Importance of Sulfur	577
13.17 Natural Sources of Sulfur	580
13.18 The Sulfur Cycle	583
13.19 Behavior of Sulfur Compounds in Soils	583
13.20 Sulfur Oxidation and Reduction	586
13.21 Sulfur Retention and Exchange	588
13.22 Sulfur and Soil Fertility Maintenance	589
13.23 Conclusion	589
Study Questions	590
References	591
<b>14 SOIL PHOSPHORUS AND POTASSIUM</b>	<b>594</b>
14.1 Role of Phosphorus in Plant Nutrition and Soil Fertility	595
14.2 Effects of Phosphorus on Environmental Quality	597
14.3 The Phosphorus Cycle	602
14.4 Organic Phosphorus in Soils	606
14.5 Inorganic Phosphorus in Soils	608
14.6 Solubility of Inorganic Phosphorus in Acid Soils	611
14.7 Inorganic Phosphorus Availability at High pH Values	614
14.8 Phosphorus-Fixation Capacity of Soils	615
14.9 Practical Control of Phosphorus in Soils	619
14.10 Potassium: Nature and Ecological Roles	622
14.11 Potassium in Plant and Animal Nutrition	623
14.12 The Potassium Cycle	625
14.13 The Potassium Problem in Soil Fertility	627
14.14 Forms and Availability of Potassium in Soils	629
14.15 Factors Affecting Potassium Fixation in Soils	632
14.16 Practical Aspects of Potassium Management	633
14.17 Conclusion	635
Study Questions	636
References	636
<b>15 CALCIUM, MAGNESIUM AND TRACE ELEMENTS</b>	<b>639</b>
15.1 Calcium as Essential Nutrient	640
15.2 Magnesium as a Plant Nutrient	644
15.3 Deficiency versus Toxicity	645
15.4 Micronutrient Roles in Plants	647
15.5 Source of Micronutrients	651
15.6 General Conditions Conducive to Trace Element Deficiency/Toxicity	653

15.7	Factors Influencing the Availability of the Trace Element Cations	654
15.8	Organic Compounds as Chelates	660
15.9	Factors Influencing the Availability of the Trace Element Anions	663
15.10	Need for Nutrient Balance	668
15.11	Soil Management and Trace Element Needs	669
15.12	Conclusion	674
	Study Questions	675
	References	676
<b>16</b>	<b>PRACTICAL NUTRIENT MANAGEMENT</b>	<b>678</b>
16.1	Goals of Nutrient Management	679
16.2	Environmental Quality	682
16.3	Nutrient Resources and Cycles	691
16.4	Recycling Nutrients Through Animal Manures	694
16.5	Industrial and Municipal By-Product	701
16.6	Practical Utilization of Organic Nutrient Sources	704
16.7	Inorganic Commercial Fertilizers	708
16.8	Fertilizer Application Methods	712
16.9	Timing of Fertilizer Application	717
16.10	Diagnostic Tools and Methods	718
16.11	Soil Analysis	721
16.12	Site-Index Approach to Phosphorus Management	726
16.13	Some Broader Aspects of Fertilizer Practice	732
16.14	Conclusion	734
	Study Questions	735
	References	736
<b>17</b>	<b>SOIL EROSION AND ITS CONTROL</b>	<b>739</b>
17.1	Significance of Soil Erosion and Land Degradation	740
17.2	On-Site and Off-Site Effects of Accelerated Soil Erosion	744
17.3	Mechanics of Water Erosion	749
17.4	Models to Predict the Extent of Water-Induced Erosion	752
17.5	Factors Affecting Interrill and Rill Erosion	754
17.6	Conservation Tillage	762
17.7	Vegetative Barriers	768
17.8	Control of Gully Erosion and Mass Wasting	769
17.9	Control of Accelerated Erosion on Range- and Forestland	771
17.10	Erosion and Sediment Control on Construction Sites	774
17.11	Wind Erosion: Importance and Factors Affecting It	778
17.12	Predicting and Controlling Wind Erosion	781
17.13	Land Capability Classification as a Guide to Conservation	785
17.14	Progress in Soil Conservation	787
17.15	Conclusion	790
	Study Questions	791
	References	791
<b>18</b>	<b>SOILS AND CHEMICAL POLLUTION</b>	<b>794</b>
18.1	Toxic Organic Chemicals	795
18.2	Kinds of Organic Contaminants	798
18.3	Behavior of Organic Chemicals in Soil	800
18.4	Effects of Pesticides on Soil Organisms	806
18.5	Remediation of Soils Contaminated with Organic Chemicals	808
18.6	Contamination with Toxic Inorganic Substances	817
18.7	Potential Hazards of Chemicals in Sewage Sludge	820

18.8 Reactions of Inorganic Contaminants in Soils	821
18.9 Prevention and Elimination of Inorganic Chemical Contamination	824
18.10 Landfills	826
18.11 Radionuclides in Soil	831
18.12 Radon Gas from Soils	833
18.13 Conclusion	836
