

Carbon Capture and Sequestration

Integrating
Technology, Monitoring and Regulation

EDITED BY
Elizabeth J. Wilson and David Gerard

Blackwell
Publishing

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xvii</i>
<i>List of Acronyms</i>	<i>xix</i>
1 Carbon Capture and Sequestration in Context: Technology, Regulation, and Social Acceptance	1
<i>Elizabeth J. Wilson and David Gerard</i>	
1.1 Introduction	1
1.2 The Structure of the Book	4
PART I TECHNICAL OVERVIEW FOR CARBON CAPTURE AND SEQUESTRATION	
2 Technologies: Separation and Capture	11
<i>Anand B. Rao</i>	
2.1 Introduction	11
2.2 Technology Options—CO ₂ Capture and Separation	16
2.3 Comparative Assessment	29
2.4 Current Status and Future Potential	30
3 Modeling to Understand and Simulate Physico-chemical Processes of CO₂ Geological Storage	35
<i>Chin-Fu Tsang, Christine Doughty, Jonny Rutqvist, and Tianfu Xu</i>	
3.1 Introduction	35
3.2 A Comparison of CO ₂ Geologic Storage with Underground Injection Disposal of Liquids	36
3.3 Basic Scenario of CO ₂ Injection and Storage	39
3.4 Hydrologic Processes	40
3.5 Hydromechanical Processes	47
3.6 Geochemical Processes	55
3.7 Concluding Remarks and Summary	66
	 vii

4	Monitoring Geological Storage of Carbon Dioxide	73
	<i>Sally M. Benson</i>	
4.1	Introduction	73
4.2	Purposes of Monitoring	74
4.3	Monitoring Over the Life Cycle of a Storage Project	75
4.4	Measurement Methods	77
4.5	Monitoring Programs for CO ₂ Storage Projects	90
4.6	Detection of Seepage from Storage Formations	94
4.7	Conclusions	95
5	Risk Assessment and Management for Geologic Sequestration of Carbon Dioxide	101
	<i>Elizabeth J. Wilson and David Gerard</i>	
5.1	Introduction	101
5.2	CO ₂ Properties and Behavior Underground	102
5.3	Characterizing Pathways of Surface Leakage and Exposure	105
5.4	Risks from Geological Sequestration of CO ₂	107
5.5	Global Emissions from Leakage	114
5.6	Risk Management: Technical Aspects	116
5.7	Risk Management: Social Aspects	119
5.8	Conclusions	122
6	Migration Mechanisms and Potential Impacts of CO₂ Leakage and Seepage	127
	<i>Curtis M. Oldenburg</i>	
6.1	Introduction	127
6.2	Fluid Properties Relevant to Geologic Storage	130
6.3	CO ₂ Flow Processes and Potential Impacts	136
6.4	Discussion and Conclusions	142
PART II BRIDGING TECHNOLOGY AND PUBLIC POLICY		
7	Calculating the Costs of Electric Sector Carbon Mitigation	149
	<i>Timothy L. Johnson</i>	
7.1	Chapter Overview	149
7.2	CO ₂ Mitigation Supply Curves: A Few Examples from the Literature	151
7.3	Mitigation Supply Curves for Electric Sector CO ₂ Abatement	152
7.4	A Plant-level Approach to CO ₂ Mitigation Cost Calculation	156

7.5	The Cost of CO ₂ Mitigation and the Need for an Electric Market Dispatch Model	159
7.6	Existing Models of CO ₂ Mitigation and a Niche for Assessments of CCS	162
7.7	The Electric Sector in Context	164
8	Geologic Sequestration Under Current U.S. Regulations: Problems and Prospects	169
	<i>Elizabeth J. Wilson and David Gerard</i>	
8.1	Introduction	169
8.2	A Brief Regulatory History of Underground Injection in the United States	170
8.3	Permitting Underground Injection Control (UIC)	174
8.4	Problems Experienced with a Fluid Similar to CO ₂ Regulated as a Class I Well	186
8.5	Alternatives to Permitting GS Projects as Class I or Class II Wells	187
8.6	Measurement, Monitoring, Verification, and a Carbon Management Framework	189
8.7	Transportation of CO ₂ in Pipelines	190
8.8	Stakeholder Involvement	191
8.9	Conclusions	193
9	Initial Public Perceptions of Deep Geological and Oceanic Disposal of Carbon Dioxide	199
	<i>Claire R. Palmgren, M. Granger Morgan, Wändi Bruine de Bruin and David W. Keith</i>	
9.1	Introduction	199
9.2	Design of Study 1	200
9.3	Results from Study 1	201
9.4	Discussion of Study 1	203
9.5	Design of Study 2	204
9.6	Results from Study 2	211
9.7	Discussion	216
10	Siting Geologic Sequestration: Problems and Prospects	223
	<i>Carissa Schively</i>	
10.1	Introduction	223
10.2	Overview of the NIMBY Phenomenon	224
10.3	Responding to the Impacts of NIMBY Facilities	226
10.4	NIMBY Siting Processes	228
10.5	Methods to Address NIMBY Concerns	229
10.6	The Potential for NIMBY Responses to Siting Geologic Sequestration	236

11	Property Interests and Liability of Geologic Carbon Dioxide Storage	243
	<i>Mark A. de Figueiredo</i>	
11.1	Introduction	243
11.2	Acquisition and Ownership of Geologic Storage Reservoir	244
11.3	Ownership of Injected CO ₂	247
11.4	Liability	250
11.5	Potential for Legislation of Property Interests and Liability	253
11.6	Conclusion	256
	Index	261
