

Physical Processes in
Earth and Environmental Sciences
Mike Leeder and Marta Pérez-Arlucea

Contents

Preface

Acknowledgments

Chapter 1 Planet Earth and Earth systems, 1

- 1.1 Comparative planetology, 1
- 1.2 Unique Earth, 3
- 1.3 Earth systems snapshots, 5
- 1.4 Measuring Earth, 7
- 1.5 Whole Earth, 10
- 1.6 Subtle, interactive Earth, 14
- Further reading, 16

Chapter 2 Matters of state and motion, 18

- 2.1 Matters of state, 18
- 2.2 Thermal matters, 20
- 2.3 Quantity of matter, 24
- 2.4 Motion matters: kinematics, 26
- 2.5 Continuity: mass conservation of fluids, 33
- Further reading, 35

Chapter 3 Forces and dynamics, 36

- 3.1 Quantity of motion: momentum, 36
- 3.2 Acceleration, 38
- 3.3 Force, work, energy, and power, 40
- 3.4 Thermal energy and mechanical work, 45
- 3.5 Hydrostatic pressure, 49
- 3.6 Buoyancy force, 52
- 3.7 Inward acceleration, 55
- 3.8 Rotation, vorticity, and Coriolis force, 57
- 3.9 Viscosity, 61
- 3.10 Viscous force, 63
- 3.11 Turbulent force, 65
- 3.12 Overall forces of fluid motion, 67
- 3.13 Solid stress, 71
- 3.14 Solid strain, 83
- 3.15 Rheology, 92
- Further reading, 101

Chapter 4 Flow, deformation, and transport, 102

- 4.1 The origin of large-scale fluid flow, 102
- 4.2 Fluid flow types, 105
- 4.3 Fluid boundary layers, 109
- 4.4 Laminar flow, 111
- 4.5 Turbulent flow, 113
- 4.6 Stratified flow, 117
- 4.7 Particle settling, 119
- 4.8 Particle transport by flows, 121
- 4.9 Waves and liquids, 125
- 4.10 Transport by waves, 131
- 4.11 Granular gravity flow, 133
- 4.12 Turbidity flows, 138
- 4.13 Flow through porous and granular solids, 142
- 4.14 Fractures, 144
- 4.15 Faults, 156
- 4.16 Solid bending, buckling, and folds, 172
- 4.17 Seismic waves, 179
- 4.18 Molecules in motion: kinetic theory, heat conduction, and diffusion, 191
- 4.19 Heat transport by radiation, 195
- 4.20 Heat transport by convection, 197
- Further reading, 202

Chapter 5 Inner Earth processes and systems, 203

- 5.1 Melting, magmas, and volcanoes, 203
- 5.2 Plate tectonics, 223
- Further reading, 236

Chapter 6 Outer Earth processes and systems, 237

- 6.1 Atmosphere, 237
- 6.2 Atmosphere–ocean interface, 248
- 6.3 Atmosphere–land interface, 254
- 6.4 Deep ocean, 256
- 6.5 Shallow ocean, 263
- 6.6 Ocean–land interface: coasts, 270
- 6.7 Land surface, 278
- Further reading, 292

Appendix Brief mathematical refresher or study guide, 293
