PART 1 OVERVIEW

1 Introduction 1

Clinical Epidemiology	3
Research Relevant to Patient Care	3
Epidemiologic Study Design	7
Design of Data Collection	10
Design of Data Analysis	10
Diagnostic, Etiologic, Prognostic, and Intervention Research	11
Moving from Research to Practice: Relevance and Generalizability	19

PART 2 PRINCIPLES OF CLINICAL RESEARCH

2 Etiologic Research	24
Etiologic Research in Epidemiology	24
Theoretical Design	26
Confounding	28
Causality	36
Modification and Interaction	38
Modifiers and Confounders	46
Design of Data Collection in Cohort, Case-control, and Experimental Studies	48
Common Etiologic Questions in Clinical Epidemiology	52
Worked-Out Example	53
3 Diagnostic Research	58
Diagnosis in Clinical Practice	58
From Diagnosis in Clinical Practice to Diagnostic Research	66
Rational Diagnostic Research	71
Theoretical Design	72
Design of Data Collection	74
Bias in Diagnostic Research	84
Design of Data Analysis	86
Application of Study Results in Practice	97
Worked-Out Example	98
4 Prognostic Research	103
Prognosis in Clinical Practice	103
Approaches to Prognostication	106
Prognostication Is a Multivariable Process	107
Added Prognostic Value	109

From Prognosis in Clinical Practice to Prognostic Research	109
Predictive Nature of Prognostic Research	111
Appraisal of Prevailing Prognostic Research	113
Rational Prognostic Research	116
Experimental or Observational Studies	118
Bias in Prognostic Research	122
Design of Data Analysis	123
Worked-Out Example	126
Concluding Remarks	131

5 Intervention Research: Intended Effects

Effects of Intervention	134
Natural History	135
Extraneous Effects	138
Observer Effects	142
Treatment Effect	143
Comparability of Natural History	144
Randomization	147
Comparability of Extraneous Effects	150
Comparability of Observations	151
Limits to Trials	152
The Randomized Trial as a Paradigm for Etiologic Research	157

6 Intervention Research: Side Effects

Research on Side Effects of Interventions	162
Studies on Side Effects of Interventions: Causal Research	164
Type A and Type B Side Effects	167

Theoretical Design	170
Design of Data Collection	171
Comparability in Observational Research	179
Methods to Limit Confounding	182
Health Care Databases as a Framework for Research on Side Effects of Interventions	191

PART 3 TOOLS FOR CLINICAL RESEARCH

7 Design of Data Collection	193
Time	194
Census or Sampling	195
Experimental or Observational Studies	197
Taxonomy of Epidemiological Data Collection	199
8 Cohort and Cross-Sectional Studies	202
Timing of the Association Relative to the Timing of Data Collection	203
Causal and Descriptive Cohort Studies	204
Experimental Cohort Studies	207
Cross-Sectional Studies	208
Ecological Studies	209
Cohort Studies Using Routine Care Data	210
Limitations of Cohort Studies	219
Worked-Out Example: The SMART Study	221
9 Case-Control Studies	226
Rationale and Essence of Case-Control Studies	227
A Brief History of Case-Control Studies in Clinical Research	230

Theoretical Design	233
Design of Data Collection	234
Identification of Cases	236
Prevalent or Incident Cases	237
Sampling of Controls: The Study Base Principle	240
Specific Types of Control Series	245
Multiple Control Series	252
Matching of Cases and Controls	253
Design of Data Analysis	255
Case-Cohort Studies	259
Case-Crossover Studies	260
Case-Control Studies with No Controls	263
Advantages and Limitations of Case-Control Studies	264
Worked-Out Example	265
10 Randomized Trials	270
“Regular” Parallel, Factorial, Crossover and Cluster Trials	272
Participants	275
Treatment Allocation and Randomization	277
Informed Consent	279
Blinding	279
Outcome	280
Design of Data Analysis	282
11 Meta-Analyses	288
Rationale	289
Principles	290

Theoretical Design and Research Question	292
Design of Data Collection	293
Critical Appraisal	300
Design of Data Analysis	301
Reporting Results from a Meta-Analysis	314
Inferences from Meta-Analyses	322

12 Clinical Epidemiologic Data Analysis 325

Measures of Disease Frequency:	
Incidence and Prevalence	326
Data-Analytical Strategies in Clinical Epidemiology Research	328
Relationship between Determinant and Outcome	332
Adjustment for Confounding	339
Regression Analysis	340
Frequentists and Bayesians	352
