Clinical

Neuro-Ophthalmology:

THE ESSENTIALS

Second Edition

Neil R. Miller

Nancy J. Newman

Valérie Biousse

John B. Kerrison

CONTENTS

Preface vii
Acknowledgments ix
Contributors xi

SECTION I

THE AFFERENT VISUAL SYSTEM..... 1

1	Examination of the Visual Sensory System.....	1
2	Anatomy and Physiology of the Retina and Optic Nerve: Distinguishing Retinal from Optic Nerve Disease.....	42
3	Congenital Anomalies of the Optic Disc.....	73
4	Topical Diagnosis of Acquired Optic Nerve Disorders.....	98
5	Papilledema.....	122
6	Optic Neuritis.....	146
7	Ischemic Optic Neuropathies.....	162
8	Compressive and Infiltrative Optic Neuropathies.....	176
9	Traumatic Optic Neuropathies.....	195
10	Toxic and Deficiency Optic Neuropathies.....	202
11	Hereditary Optic Neuropathies.....	211
12	Topical Diagnosis of Chiasmal and Retrochiasmal Lesions.....	224
13	Central Disorders of Visual Function.....	263

SECTION II

THE PUPIL..... 285

14	Examination of the Pupils, Accommodation, and Lacrimation.....	285
15	Disorders of Pupillary Function, Accommodation, and Lacrimation.....	299

SECTION III

THE EFFERENT SYSTEM..... 331

16	Examination of Ocular Motility and Alignment.....	331
17	Supranuclear and Internuclear Ocular Motor Disorders.....	344
18	Nuclear and Infranuclear Ocular Motility Disorders.....	377
19	Disorders of Neuromuscular Transmission.....	407
20	Myopathies Affecting the Extraocular Muscles.....	422
21	Nystagmus and Related Ocular Motility Disorders.....	444

SECTION IV

EYELID 465

22 Normal and Abnormal Eyelid Function 465

SECTION V

NONORGANIC DISEASE 499

23 Neuro-Ophthalmologic Manifestations of Nonorganic Disease 499
