Detailed Contents

Assessment Summaries/Emergency Care Protocols/Algorithms/Drug Profiles	xvii	Confidentiality	51
Photo Scans	xix	Health Insurance Portability and Accountability Act (HIPPA)	51
Acknowledgments	xxi	COBRA and EMTALA	51
Authors' Letter to Students	xxiv	Special Situations	52
About the Authors	xxvii		
MODULE 1		CHAPTER 4 The Human Body	57
Preparatory	1	Anatomical Terms	58
CHAPTER 1 Introduction to Emergency Medical Care	2	Body Systems	63
The Emergency Medical Services System	3	The Musculoskeletal System	63
A Brief History	3	The Respiratory System	69
Current Standards	4	The Circulatory System	76
The EMT	8	The Nervous System	83
Roles and Responsibilities	8	The Endocrine System	85
Professional Attributes	12	The Skin	87
Medical Direction/Medical Oversight	13	Enrichment	87
Quality Improvement	14	The Digestive System	87
		The Urinary System	89
CHAPTER 2 The Well-Being of the EMT	18	The Reproductive System	89
Emotional Aspects of Emergency Care	20	Medical Terminology	89
Death and Dying	20	Medical Words and Word Parts	90
High Stress Situations	21	CHAPTER 5 Baseline Vital Signs and History Taking	101
Stress Reactions	21	Gathering Patient Information	103
Stress Management	23	Baseline Vital Signs	103
Critical Incident Stress Management	25	Breathing (Respiration)	104
Scene Safety	26	Pulse	105
Protecting Yourself from Disease	26	Skin	108
Protecting Yourself from Accidental Injury	33	Pupils	110
Enrichment	35	Blood Pressure	111
Diseases of Concern	35	Testing Orthostatic Vital Signs	115
		Pulse Oximetry: Assessing Oxygen Saturation	116
CHAPTER 3 Medical, Legal, and Ethical Issues	41	Vital Sign Reassessment	119
The Scope of Practice	42	The Sample History	119
Legal Duties	43	CHAPTER 6 Lifting and Moving Patients	123
Ethical Responsibilities	44	Body Mechanics	124
Issues of Patient Consent and Refusal	44	Four Basic Principles	125
Types of Consent	44	Posture and Fitness	125
Advance Directives	45	Communication and Teamwork	125
Refusing Treatment	46	General Guidelines for Lifting and Moving	127
Other Legal Aspects of Emergency Care	49	The Power Lift	127
Negligence	49	The Squat Lift	128
Intentional Tort	49		

One-Handed Carrying Technique	129	Flow-Restricted, Oxygen-Powered Ventilation Device (FROPVD)	195
Reaching	129	Automatic Transport Ventilator (ATV)	196
Pushing and Pulling	129	Ventilation of the Patient Who Is Breathing Spontaneously	197
Lifting and Moving Patients	130	Hazards of Overventilation	198
Emergency Moves	130	Special Considerations in Airway Management and Ventilation	198
Urgent Moves	132	A Patient with a Stoma or Tracheostomy Tube	199
Nonurgent Moves	132	Infants and Children	200
Packaging for Transportation	135	Patients with Facial Injuries	201
Equipment	136	Foreign Body Airway Obstruction	201
Patient Positioning	145	Dental Appliances	201
Enrichment	147	Oxygen Delivery	201
Packaging Patients for Air Transport	147	Oxygen Cylinders	202
		Safety Precautions	202
		Pressure Regulators	203
		Oxygen Humidifiers	203
		Indications for Oxygen Use	204
		Hazards of Oxygen Administration	204
		Oxygen Administration Procedures	205
		Terminating Oxygen Therapy	205
		Transferring the Oxygen Source: Portable to On-Board	205
		Oxygen Delivery Equipment	205
MODULE 2		MODULE 3	
Airway	150	Patient Assessment	214
CHAPTER 7 Airway Management, Ventilation, and Oxygen Therapy	152	CHAPTER 8 Scene Size-Up	218
Respiratory System Review	154	Take the Necessary Standard Precautions and Other Personal Protection Precautions	220
Anatomy of the Respiratory System	154	Determine Scene Safety	221
Mechanics of Breathing	157	Consider Dispatch Information	221
Respiratory Physiology	158	Consider Scene Characteristics	222
Airway Anatomy in Infants and Children	160	Protect the Patient	229
Airway Assessment	162	Protect Bystanders	230
Airway Functions and Considerations	162	Control the Scene	230
Abnormal Upper Airway Sounds	163	Maintain Situation Awareness	231
Opening the Mouth	164	Determine the Nature of the Problem	231
Opening the Airway	164	Determine the Mechanism of Injury	231
Suction Equipment and Technique	167	Determine the Nature of the Illness	233
Airway Adjuncts	170	Determine the Number of Patients	234
Assessment of Breathing	173	Gain Scene Control and Establish Rapport	234
Relationship of Tidal Volume and Respiratory Rate in Assessment of Breathing	173		
Assessing for Adequate Breathing	177		
Adequate Breathing	178		
Inadequate Breathing	178		
Making the Decision to Ventilate or Not	180		
Techniques of Artificial Ventilation	183		
Basic Considerations	183		
Mouth-to-Mouth Ventilation	186		
Mouth-to-Mask and Bag-Valve Ventilation: General Considerations	186		
Mouth-to-Mask Ventilation	188		
Bag-Valve-Mask Ventilation	190		

Achieve a Smooth Transition of Care	234	Trauma Patient with No Significant Mechanism of Injury or Critical Finding	288
Reduce the Patient's Anxiety	235	Perform a Focused Trauma Assessment	288
Maintain Control	236	Obtain Baseline Vital Signs and SAMPLE History	290
CHAPTER 9 Patient Assessment	239	Perform a Rapid Trauma Assessment if Indicated	290
Part 1—Scene Size-up	241	Focused History and Physical Exam:	
Part 2—Initial Assessment	241	Medical Patient	291
Form a General Impression of the Patient	243	Unresponsive Medical Patient	292
Determine if the Patient Is Injured or Ill	243	Perform a Rapid Medical Assessment	293
Obtain the Chief Complaint	245	Assess Baseline Vital Signs	299
Identify Immediate Life Threats during the General Impression	246	Position the Patient	300
Establish In-Line Stabilization	246	Obtain a SAMPLE History	300
Position the Patient for Assessment	247	Provide Emergency Care	302
Assess Mental Status	247	Make a Transport Decision	302
Assess the Level of Responsiveness	247	Responsive Medical Patient	302
Assess the Airway	250	Assess Patient Complaints: OPQRST	302
Determine Airway Status	251	Obtain a SAMPLE History	303
Open the Airway	251	Perform a Focused Medical Assessment	303
Indications of Partial Airway Occlusion	251	Assess Baseline Vital Signs	303
Assess Breathing	252	Provide Emergency Care	303
Assess Rate and Quality of Breathing	252	Make a Transport Decision	303
Assess Circulation	255	Part 4—Detailed Physical Exam	304
Assess the Pulse	255	When to Perform a Detailed Physical Exam	305
Identify Major Bleeding	256	How to Perform a Detailed Physical Exam	305
Assess Perfusion	257	Perform the Detailed Physical Exam	306
Establish Patient Priorities	258	Reassess Vital Signs	317
Part 3—Focused History and Physical Exam	261	Continue Emergency Care	318
Focused History and Physical Exam: Trauma Patient	263	Part 5—Ongoing Assessment	318
Reevaluate the Mechanism of Injury	264	Purposes of the Ongoing Assessment	319
Significant Mechanisms of Injury	265	Detect Any Change in Condition	321
Trauma Patient with Significant Mechanism of Injury or Critical Finding	265	Identify Any Missed Injuries or Conditions	321
Continue Spinal Stabilization	266	Adjust the Emergency Care	321
Consider an Advanced Life Support Request	266	Repeat the Initial Assessment	321
Reconsider the Transport Decision	266	Reassess Mental Status	321
Reassess Mental Status	266	Reassess the Airway	321
Perform a Rapid Trauma Assessment	268	Reassess Breathing	322
Assess Baseline Vital Signs	283	Reassess Circulation	322
Obtain a SAMPLE History	286	Reestablish Patient Priorities	322
Prepare the Patient for Transport	287	Reassess and Record Vital Signs	322
Provide Emergency Care	287	Repeat the Focused Assessment for Other Complaints	322
Trauma Score	288	Check Interventions	323
		Note Trends in Patient Condition	323

Part 6—Communication and Documentation	324	CHART	353
		CHEATED	353
		Medical Abbreviations	353
CHAPTER 10 Communication	329	MODULE 4	
Components of an Emergency Communications System	331	Medical Emergencies	360
Base Station	331	CHAPTER 12 General Pharmacology	362
Mobile Transmitter/Receivers	331	Administering Medications	363
Portable Transmitter/Receivers	331	Medications Commonly Administered by the EMT	364
Repeaters	332	Medications Carried on the EMS Unit	364
Digital Equipment	332	Medications Prescribed for the Patient	365
Cellular Telephones	332	Medication Names	366
Broadcast Regulations	333	Routes of Administration	366
System Maintenance	333	Medication Forms	367
Communicating within the System	333	Essential Medication Information	369
Ground Rules for Radio Communication	333	Indications	369
Dispatch	335	Contraindications	370
Medical Personnel	335	Dose	370
Interpersonal Communications	337	Administration	370
Taking Charge	337	Actions	370
Communicating with the Patient	337	Side Effects	370
Special Circumstances	338	Key Steps in Administering Medications	370
Enrichment	339	Obtain an Order from Medical Direction	370
Radio Codes	339	Select the Proper Medication	371
Times	339	Verify the Patient's Prescription	371
Radio Terms	339	Check the Expiration Date	372
		Check for Discoloration or Impurities	372
CHAPTER 11 Documentation	342	Verify the Form, Route, and Dose	372
Reasons for Documentation	343	Medication Administration: The Five "Rights"	372
Medical Uses	343	Documentation	373
Administrative Uses	344	Reassessment Following Administration	373
Legal Uses	344	Sources of Medication Information	373
Educational and Research Uses	344	CHAPTER 13 Respiratory Emergencies	377
The Prehospital Care Report	344	Breathing Difficulty	378
PCR Formats	344	Assessment and Care: Breathing Difficulty	380
PCR Data	347	Metered-Dose Inhalers	388
Legal Concerns	349	Breathing Difficulty in the Infant or Child	390
Confidentiality	349	Breathing Difficulty in the Infant or Child: Assessment and Care	390
Refusal of Treatment	350	Summary: Assessment and Care	395
Falsification	350	Enrichment	395
Special Situations	352		
Multiple-Casualty Incidents	352		
Special Reports	352		
Enrichment	352		
SOAP	352		

Assessing Breath Sounds	395	Automatic Implantable Cardioverter Defibrillators	458
Conditions that Cause Breathing Difficulty	397	Automated Chest Compression Devices	459
CHAPTER 14 Cardiac Emergencies	412	CHAPTER 15 Altered Mental Status and Diabetic Emergencies	464
Review of the Circulatory System Anatomy and Physiology	414	Altered Mental Status with Unknown History	465
The Circulatory System	415	Assessment and Care: Altered Mental Status with Unknown History	466
The Cardiac Conduction System	417	Conditions that May Cause an Altered Mental Status	468
Blood Pressure	420	Altered Mental Status with a History of Diabetes	469
Inadequate Circulation	420	Assessment and Care: Altered Mental Status with a History of Diabetes	470
Cardiac Compromise and Acute Coronary Syndromes (ACS)	420	Oral Glucose	474
Acute Coronary Syndrome in Females	421	Summary: Assessment and Care	476
Assessment and Care: Cardiac Compromise and Acute Coronary Syndromes	422	Enrichment	476
Nitroglycerin	427	Understanding Diabetic Emergencies	476
Summary: Assessment and Care	433	Emergencies Related to Diabetes Mellitus	482
Cardiac Compromise and Cardiac Arrest	433	CHAPTER 16 Stroke	491
The Chain of Survival	433	Neurologic Deficit Resulting from Stroke	492
Automated External Defibrillation and Cardiopulmonary Resuscitation	435	Acute Stroke	492
Types of Defibrillators	437	Overview of the Disease Process	493
Analysis of Cardiac Rhythms	438	Assessment	495
When and When Not to Use the AED	440	Summary: Assessment and Care	502
Recognizing and Treating Cardiac Arrest	441	Enrichment	502
Assessment and Care: Cardiac Arrest	441	Causes of Stroke	502
Performing Defibrillation	442	CHAPTER 17 Seizures and Syncope	510
Transporting the Cardiac Arrest Patient	446	Seizure	511
Providing for Advanced Cardiac Life Support	447	Assessment and Care: Altered Mental Status and Seizure	512
Summary: Assessment and Care	447	Summary: Assessment and Care	517
Special Considerations for the AED	447	Syncope	517
Safety Considerations	447	Enrichment	519
AED Maintenance	448	Types of Seizures	519
Training and Skills Maintenance	451	CHAPTER 18 Allergic Reaction and Anaphylaxis	525
Medical Direction and the AED	451	Allergic Reaction	526
Enrichment	451	Sensitization	527
Overview of the Disease Process of Acute Coronary Syndromes	451	Anaphylactoid Reaction	528
Conditions that May Cause Cardiac Emergencies	452		
The Electrocardiogram	457		
Energy Levels of Defibrillators	457		
Cardiac Pacemakers	458		

Causes of Severe Allergic Reaction and Anaphylaxis	529	The Withdrawal Syndrome	588
Assessment and Care: Allergic Reaction and Anaphylaxis	529	Special Considerations for PCP and Cocaine	589
Summary: Assessment and Care	536	Huffing	591
Epinephrine Auto-Injector	536	Methamphetamines	592
CHAPTER 19 Poisoning Emergencies	547	CHAPTER 21 Acute Abdominal Pain	595
Poisons and Poisonings	548	Abdominal Structure and Function	596
Poisons and Routes of Exposure	548	Abdominal Quadrants and Regions	597
Managing the Poisoning Patient	551	Types of Abdominal Structures	598
Antidotes	551	Acute Abdominal Pain	598
Ingested Poisons	551	Causes of Abdominal Pain	598
Assessment and Care: Ingested Poisons	552	Types of Abdominal Pain	599
Activated Charcoal	554	Peritonitis	600
Inhaled Poisons	555	Assessment and Care: Acute Abdominal Pain	601
Assessment and Care: Inhaled Poisons	558	Summary: Assessment and Care	607
Injected Poisons	559	Conditions that May Cause Acute Abdominal Pain	607
Assessment and Care: Injected Poisons	560	Appendicitis	607
Absorbed Poisons	561	Pancreatitis	607
Assessment and Care: Absorbed Poisons	561	Cholecystitis	609
Summary: Assessment and Care	562	Intestinal Obstruction	609
Enrichment	566	Hernia	609
Food Poisoning	566	Ulcer	609
Carbon Monoxide Poisoning	566	Esophageal Varices	610
Cyanide	567	Abdominal Aortic Aneurysm	610
Acids and Alkalis	568	Vomiting and Diarrhea	611
Hydrocarbons	569	CHAPTER 22 Environmental Emergencies	614
Methanol (Wood Alcohol)	569	Heat and Cold Emergencies	615
Isopropanol (Isopropyl Alcohol)	570	Regulation of Temperature	615
Ethylene Glycol	570	Exposure to Cold	619
Poisonous Plants	571	Generalized Hypothermia	619
Poison Control Centers	571	Local Cold Injury	621
CHAPTER 20 Drug and Alcohol Emergencies	575	Assessment and Care: Cold-Related Emergency	623
Drug and Alcohol Emergencies	576	Summary: Assessment and Care—Cold Emergency	630
Assessment and Care: Drug and Alcohol Emergencies	577	Exposure to Heat	630
Summary: Assessment and Care	583	Hyperthermia	630
Managing a Violent Drug or Alcohol Abuse Patient	583	Assessment and Care: Heat-Related Emergency	634
Enrichment	583		
Drug Withdrawal	583		
The Alcoholic Syndrome	587		

<i>Summary: Assessment and Care—Heat</i>			
Emergency	638	Refusal of Care	683
Bites and Stings	638	Using Reasonable Force	683
Assessment and Care: Bites and		Police and Medical Direction	684
Stings	638	False Accusations	684
Enrichment	642		
Myxedema Coma	642	CHAPTER 25 Obstetric and Gynecological	
Lightning Strike Injuries	643	Emergencies	687
Snakebite	645	Childbirth and Obstetric Emergencies	689
Insect Bites and Stings	646	Anatomy of Pregnancy	689
Marine Life Bites and Stings	647	Stages of Labor	690
		Assessment and Care: Predelivery	
CHAPTER 23 Drowning and Diving		Emergency	693
Emergencies	651	<i>Summary: Assessment and Care—</i>	
Water-Related Injuries	652	<i>Predelivery Emergency</i>	696
Definitions	653	<i>Assessment and Care: Active Labor</i>	
Incidence of Drowning	653	<i>and Normal Delivery</i>	696
Overview of the Disease Process	653	<i>Assessment and Care: Active Labor with</i>	
Diving Emergencies	655	<i>Abnormal Delivery</i>	703
Safety Measures in Water-Related		<i>Summary: Assessment and Care—</i>	
Emergencies	655	<i>Active Labor and Delivery</i>	706
Possible Spine Injury	655	<i>Assessment and Care: The Newborn</i>	
Resuscitation	656	<i>Infant</i>	706
Assessment and Care: Water-Related		<i>Summary: Care of the Newborn Infant</i>	713
Emergencies	657	Gynecological Emergencies	713
<i>Summary: Assessment and Care</i>	660	Assessment and Care: Gynecological	
Enrichment	660	Emergency	713
Scuba- or Deep-Water-Diving		Enrichment	715
Emergencies	660	More about Predelivery Emergencies	715
CHAPTER 24 Behavioral Emergencies	669	MODULE 5	
Behavioral Problems	671	Trauma Emergencies	724
Behavioral Change	671	CHAPTER 26 Mechanisms of Injury:	
Psychiatric Problems	671	Kinetics of Trauma	726
Violence	672	The Kinetics of Trauma	727
Dealing with Behavioral Emergencies	673	Mass and Velocity	727
Basic Principles	673	Acceleration and Deceleration	728
Techniques for Treating Behavioral		Energy Changes Form and Direction	728
Emergency Patients	673	Impacts	729
Assessment and Care: Behavioral		Mechanisms of Injury	730
Emergencies	675	Vehicle Collisions	730
<i>Summary: Assessment and Care</i>	678	Falls	739
<i>Restraining a Patient</i>	678	Penetrating Injuries	740
Legal Considerations	683	Blast Injuries	741
Consent	683	The Golden Hour	743

CHAPTER 27 Bleeding and Shock	746	Summary: Assessment and Care	789
The Circulatory System	748	Enrichment	789
The Heart, Blood Vessels, and Blood Perfusion	748	Other Soft Tissue Injuries	789
External Bleeding	748	CHAPTER 29 Burn Emergencies	797
Severity	748	The Skin: Structure and Function Review	798
Types of Bleeding	749	Airway, Breathing, and Circulation	799
Assessment and Care: External Bleeding	749	Assessment and Care of Burns	799
Methods of Controlling External Bleeding	752	Classifying Burns by Depth	799
Bleeding from the Nose, Ears, or Mouth	756	Determining the Severity of Burn Injuries	800
Internal Bleeding	757	Causes of Burns	805
Severity	757	Assessment and Care: Burn Injuries	806
Assessment and Care: Internal Bleeding	758	Chemical Burns	809
Factors that May Increase Bleeding	759	Electrical Burns	810
Shock (Hypoperfusion)	760	Summary: Assessment and Care	812
Assessment and Care: Shock (Hypoperfusion)	760	Enrichment	812
Summary: Assessment and Care	763	Circulatory System	814
Enrichment	763	Respiratory System	816
Hemophilia	763	Renal System (Kidneys)	816
More about Shock	763	Nervous and Musculoskeletal Systems	816
		Gastrointestinal System	816
CHAPTER 28 Soft Tissue Injuries	772	CHAPTER 30 Musculoskeletal Injuries	819
The Skin	774	Musculoskeletal System Review	820
Closed Soft Tissue Injuries	774	The Muscles	820
Contusions	774	Tendons and Ligaments	821
Hematomas	774	The Skeletal System	821
Crush Injuries	774	Injuries to Bones and Joints	821
Assessment and Care: Closed Soft Tissue Injuries	774	Mechanism of Injury	822
Open Soft Tissue Injuries	776	Critical Fractures: The Femur and the Pelvis	822
Abrasions	777	Assessment and Care: Bone or Joint Injuries	823
Lacerations	777	Summary: Assessment and Care	826
Avulsions	778	Basics of Splinting	828
Amputations	778	General Rules of Splinting	830
Penetrations/Punctures	778	Splinting Equipment	831
Crush Injuries	780	Hazards of Improper Splinting	833
Assessment and Care: Open Soft Tissue Injuries	781	Splinting Long Bone Injuries	834
Dressings and Bandages	785	Splinting Joint Injuries	834
Dressings	785	Traction Splinting	834
Bandages	787	Splinting Specific Injuries	836
Pressure Dressings	787	Pelvic Fracture	837
General Principles of Dressing and Bandaging	787	Compartment Syndrome	837
		CHAPTER 31 Injuries to the Head	847
		Anatomy of the Skull and Brain	848

The Skull	848	Summary: Assessment and Care—	
The Brain	848	Chest Injuries	953
Types of Head Injury	850	The Abdomen	953
Scalp Injuries	850	Anatomy of the Abdominal Cavity	953
Skull Injuries	850	Abdominal Injuries	953
Brain Injuries	850	Assessment and Care: Abdominal Injuries	955
Assessment and Care: Head Injuries	851	Summary: Assessment and Care—	
Summary: Assessment and Care	859	Abdominal Injuries	959
Enrichment	859	The Genitalia	959
More about Brain Injuries	859	Enrichment	962
		Conditions that May Result from Chest	
		Injury	962
CHAPTER 32 Injuries to the Spine	867		
Anatomy and Physiology of Spine Injury	869	CHAPTER 35 Agricultural and Industrial	
The Nervous System	869	Emergencies	971
The Skeletal System	869	Response to Agricultural and Industrial	
Common Mechanisms of Spine Injury	871	Emergencies	972
Assessment and Care: Spine Injury	871	Assessment and Care: Agricultural	
Summary: Assessment and Care	883	and Industrial Emergencies	972
Guidelines for Immobilization	885	Characteristics of Agricultural Accidents	974
Tools	885	Mechanisms of Injury	975
Immobilization Techniques	893	Stabilizing and Shutting Down Agricultural	
Special Considerations	904	Equipment	976
Helmets	904	Agricultural Storage Devices	978
Infants and Children	909	Injuries from Livestock	980
Enrichment	911	Industrial Rescue	980
Neurogenic Shock (Spinal Shock)	911		
		MODULE 6	
CHAPTER 33 Eye, Face, and Neck Injuries	917	Pediatrics and Geriatrics	984
Anatomy of the Eye, Face, and Neck	918	CHAPTER 36 Infants and Children	986
The Eye	918	Dealing with Caregivers	988
The Face	919	Dealing with the Child	988
The Neck	919	Developmental Characteristics	988
Eye, Face, and Neck Injuries	920	Anatomical Differences	990
Assessment and Care: Eye, Face, and Neck		Taking a History	994
Injuries	920	Some Special Physical Exam	
Injuries to the Eye	922	Considerations	994
Injuries to the Face	928	The Pediatric Assessment Triangle	996
Injuries to the Neck	934	Airway and Breathing Problems in Infants	
		and Children	996
CHAPTER 34 Chest, Abdomen, and Genitalia		Early Respiratory Distress	997
Injuries	941	Decompensated Respiratory Failure	998
The Chest	942	Respiratory Arrest	998
Anatomy of the Chest	942	Airway Obstruction	998
Chest Injuries	943		
Assessment and Care: Chest Injuries	946		

Assessment and Care: Respiratory Emergencies	999	Focused History and Physical Exam and Detailed Physical Exam	1059
Summary: Assessment and Care—Respiratory Emergencies	1016	Emergency Medical Care and Ongoing Assessment	1062
Other Medical Problems Common to Infants and Children	1016	Special Geriatric Assessment Findings	1063
Seizures	1016	Assessment Finding: Chest Pain or Absence of Chest Pain	1063
Altered Mental Status	1020	Assessment Finding: Shortness of Breath (Dyspnea)	1064
Poisonings	1021	Assessment Finding: Altered Mental Status	1066
Fever	1022	Assessment Finding: Signs of Trauma or Shock	1069
Shock (Hypoperfusion)	1023	Assessment Finding: Environmental Temperature Extremes	1070
Drowning	1025	Assessment Finding: Geriatric Abuse	1070
Sudden Infant Death Syndrome	1026		
Trauma in Infants and Children	1028	MODULE 7	
Trauma and the Infant's or Child's Anatomy	1029	Operations	1074
Child Abuse and Neglect	1030	CHAPTER 38 Ambulance Operations	1076
Infants and Children with Special Needs	1035	Driving the Ambulance	1077
Tracheostomy Tubes	1035	Laws, Regulations, and Ordinances	1077
Home Artificial Ventilators	1036	Driving Excellence	1078
Central Lines	1037	Warning Devices	1080
Gastrostomy Tubes	1037	Colors and Markings	1080
Shunts	1037	Warning Lights and Emergency Lights	1080
Taking Care of Yourself	1038	Using Your Siren	1081
Enrichment	1038	Using Your Air Horn	1081
Pediatric Respiratory Emergencies	1038	Roadway Incident Scene Safety	1081
Infectious Diseases	1041	Phases of an Ambulance Call	1082
Pediatric Field Scoring	1042	Daily Prerun Preparation	1082
Infant and Child Car Seats in Trauma	1042	En Route to the Scene	1085
Four-Point Immobilization of an Infant or Child	1044	At the Scene	1085
		En Route to the Receiving Facility	1087
CHAPTER 37 Geriatrics	1049	At the Receiving Facility	1090
Effects of Aging on Body Systems	1050	En Route to the Station or Response Area	1090
The Cardiovascular System	1051	Post Run	1090
The Respiratory System	1052	Air Medical Transport	1092
The Musculoskeletal System	1053	When to Request Air Medical Transport	1093
The Neurological System	1053	Information Needed when Requesting Air Medical Transport	1093
The Gastrointestinal System	1053	Setting Up a Landing Zone	1093
The Renal System	1053	Enrichment	1094
The Integumentary System	1055	Operational Security Measures	1094
Assessment of the Geriatric Patient	1055	Changing Conditions	1096
Scene Size-up	1056		
Initial Assessment	1057		

Carbon Monoxide in Ambulances	1098	Triage	1145
CHAPTER 39 Gaining Access and Extrication	1101	Primary and Secondary Triage	1145
Planning Ahead	1102	START Triage System	1146
Dispatch	1102	JumpSTART Pediatric Triage System	1148
Location	1102	Patient Tagging	1150
Motor Vehicle Collisions	1103	Treatment	1151
Sizing Up the Scene	1103	Staging and Transport	1151
Personal Protective Equipment	1103	Communications	1153
Scene Safety	1104	Follow-Through	1153
Locating All Patients	1104	Reducing Stress	1153
Vehicle Safety	1106	Disaster Management	1154
Gaining Access	1106	Enrichment	1155
Residential Access	1106	Requirements of Effective Disaster Assistance	1155
Motor Vehicle Access	1107	Warning and Evacuation	1155
Extrication	1108	Disaster Communications Systems	1155
The Role of the EMT	1108	The Psychological Impact of Disasters	1156
Caring for the Patient	1108	CHAPTER 42 EMS Response to Weapons of Mass Destruction	1160
Enrichment	1110	Weapons of Mass Destruction	1161
Stabilizing a Vehicle	1110	Prehospital Response to WMD	1163
Extricating a Patient	1112	Supplies and Equipment	1163
CHAPTER 40 Hazardous Materials Emergencies	1119	Medical Direction	1163
Identifying Hazardous Materials	1120	Provider Preparation	1164
What Is a Hazardous Material?	1120	Responding to the Scene	1164
Placards and Shipping Papers	1120	Issues of Scene Safety	1164
Using Your Senses	1125	Role of the EMT at the WMD Incident	1165
Resources	1126	Conventional Weapons and Incendiary Devices	1165
Training Required by Law	1128	Explosives	1165
Guidelines for Hazardous Materials		Primary, Secondary, and Tertiary Effects	1165
Rescues	1129	Body Position	1165
General Rules	1129	Types of Injuries	1165
Incident Management	1129	Incendiary Devices	1166
Emergency Procedures	1132	Chemical Agents	1166
Enrichment	1134	Properties of Chemical Weapons	1167
Radiation Emergencies	1134	Types of Chemical Agents	1167
Terrorist Attacks Involving Weapons of Mass Destruction	1137	Biological Agents	1170
CHAPTER 41 Multiple-Casualty Incidents	1140	Specific Biological Agents	1171
Multiple-Casualty Incidents	1141	Emergency Medical Care for Biological Agents	1172
National Incident Management System	1142	Nuclear Weapons and Radiation	1173
Incident Command System	1142	Radiation	1173
		Blast Injuries	1173

Thermal Burns	1174	Insertion	1204
Radiological Dispersal Devices	1174	Complications	1206
Assessment and Care for Nuclear Detonation and Radiation Injuries	1174	Orotracheal Suctioning	1206
Personal Protection and Patient Decontamination	1175	Indications	1207
		Suctioning Technique	1207
		Complications	1208
		Enrichment	1209
		Capnometry	1209
MODULE 8		Alternative Intubation Equipment	1210
Advanced Airway Elective	1178	Alternative Intubation Techniques	1211
CHAPTER 43 Advanced Airway Management	1180	Alternative Advanced Airway Adjuncts	1214
Airway and Respiratory Anatomy and Physiology	1182	Alternative Supraglottic Airway Devices	1221
Airway Anatomy	1182		
Airway Anatomy in Infants and Children	1184	APPENDIX A Basic Life Support	1226
Basic Airway Management	1185	Basic Life Support	1226
Oropharyngeal Suctioning	1186	Age Delineation in CPR	1226
Orotracheal Intubation	1186	Assessment and Interventions	1226
Advantages	1186	Adult CPR Performed by One Rescuer	1231
Indications	1187	Adult CPR Performed by Two Rescuers	1232
Standard Precautions	1187	Performing CPR on Infants and Children	1232
Equipment	1187	Obstructed Airway Emergencies	1232
Sellick Maneuver (Cricoid Pressure)	1191	Causes of Foreign Body Airway Obstruction	1232
Tracheal Tube Insertion in an Adult	1192	Mild Foreign Body Airway Obstruction	1233
Complications	1198	Severe Foreign Body Airway Obstruction	1233
Orotracheal Intubation in Infants and Children	1199	APPENDIX B ALS-Assist Skills	1237
Indications in Infants and Children	1199	Assisting in Intravenous Therapy	1237
Anatomical Considerations	1199	Intravenous Therapy Equipment Components	1237
Equipment for Infants and Children	1200	Preparing the Intravenous Setup ("Spiking the Bag")	1238
Tracheal Tube Insertion in an Infant or Child	1202	ECG Lead Placement	1239
Nasogastric Insertion in Infants and Children	1204	3- or 4-Lead Electrode Placement	1240
Indications	1204	12-Lead Electrode Placement	1241
Contraindications	1204	Glossary	1244
Equipment	1204	Index	1256
