# CONTENTS

---

<i>List of contributors</i>	ix	Annexe: Testing for prions	
<i>Foreword</i>		<b>David J. Anstee and Gary Mallinson</b>	148
Roger Y. Dodd	xiii		
<i>Preface</i>	xv	<b>Section 2: Selection and testing</b>	153
<i>Acknowledgements</i>	xvii	10 Blood donor selection and qualification	
<i>Glossary</i>	xviii	Virge James	153
Introduction: Transfusion-transmitted infections, then and now		11 Current serological methods of testing and automation	
John A. J. Barbara and Roger Eglin	1	Peter D. Rogan	159
<b>Section 1: Agents</b>	9	12 Confirmatory testing and donor re-admission	
1 Hepatitis viruses		Alan D. Kitchen and Brian C. Dow	173
Denis M. Dwyre and Paul V. Holland	9	13 The strategy for applications of nucleic acid testing	
2 Antibody to hepatitis B core antigen		Paul R. Grant and Richard S. Tedder	183
Joan O'Riordan	25	14 Nucleic acid testing: general view	
3 Herpes viruses		W. Kurt Roth	193
Eleftherios C. Vamvakas and Gary E. Tegtmeier	35	15 Nucleic acid testing: the US approach	
4 Retroviruses		Susan L. Stramer	203
Brian C. Dow, Eberhard W. Fiebig and Michael P. Busch	59	16 Nucleic acid testing: the UK approach	
5 Parvovirus B19 (human erythroviruses)		Roger Eglin	209
Kevin E. Brown	67	17 Quality in the screening of donations for transfusion-transmissible infections	
6 Emerging viruses in transfusion		John A. J. Barbara and Alan D. Kitchen	217
Jean-Pierre Allain	75	18 Microbiological blood testing and new technologies	
Annexe: Respiratory viruses: SARS and influenza		Juraj Petrik	227
John A. J. Barbara	83	19 Processing and components: leucodepletion and pathogen reduction	
7 Bacterial contamination in blood and blood components		Rebecca Cardigan, Chris Prowse and Lorna M. Williamson	239
Carl P. McDonald and M. A. Blajchman	87	20 Fractionated products	
Annexe: Syphilis		Peter R. Foster and Carol Bienek	259
Brian C. Dow	110		
8 The protozoan parasites			
David A. Leiby and Silvano Wendel	117		
9 Prion diseases			
Marc L. Turner, Patricia E. Hewitt, Moira Bruce and James W. Ironside	141		

**Section 3: Surveillance, risk and regulation**

21	Serious hazards of transfusion (SHOT); haemovigilance Elizabeth M. Love	305	25	How to assess risk: prospective studies and calculations Kate Soldan and Katy Davison	329
22	Investigation of post-transfusion infection Patricia E. Hewitt and Chris Moore	305	26	Risk management Arturo Pereira	341
23	Notification of donors with significant microbiological test results Patricia E. Hewitt and Chris Moore	311	27	The regulatory environment in Europe Virge James	363
24	Researching the natural history of transfusion- transmitted infections: the UK hepatitis C (HCV) national register Helen Harris	317	28	Blood safety in developing countries Jean-Pierre Allain, Elizabeth Vinelli and Yasmin Ayob	369
				<i>Index</i>	381
		323		<i>The colour plates are situated between pages 140 and 141</i>
