

Pearson International Edition

BRADY

INTERNATIONAL TRAUMA LIFE SUPPORT for Prehospital Care Providers

John Emory Campbell, MD, FACEP
and Alabama Chapter, American College of Emergency Physicians

Sixth Edition

Contents

ABOUT THE EDITOR	xii
AUTHORS	xiii
WHAT'S NEW IN THIS EDITION	xv
ACKNOWLEDGMENTS	xvii
ABOUT ITLS	xix
ITLS COURSE DESCRIPTIONS	xxii
ENROLLING IN AN ITLS COURSE	xxiii

Chapter 1 Scene Size-up 1

Objectives • Case Study	
Introduction	2
Philosophy of Assessment and Management of the Trauma Patient	2
Scene Size-up	4
Standard Precautions	4
Scene Safety	4
Total Number of Patients	5
Essential Equipment and Additional Resources	6
Mechanism of Injury	6
Motor-Vehicle Collisions	8
Head-on Collision	10
T-Bone or Lateral-Impact Collision	12
Rear-Impact Collision	13
Rollover Collision	14
Rotational Collision	15
Occupant Restraint Systems	15
Tractor Accidents	17
Small-Vehicle Crashes	18
Pedestrian Injuries	19
Falls	19
Penetrating Injuries	20
Wound Ballistics	20
Blast Injuries	22
Case Study (continued) • Case Study Wrap-up • Summary • Bibliography	

Chapter 2 Assessment and Initial Management of the Trauma Patient 27

Objectives • Case Study	
Introduction	28
Patient Assessment	29
ITLS Primary Survey	29
ITLS Secondary Survey	38
Procedure: Performing a Secondary Survey	38
ITLS Ongoing Exam	41
Procedure: Performing an Ongoing Exam	41
Case Study (continued) • Case Study Wrap-up • Summary • Bibliography	

Chapter 3 Patient Assessment Skills 45

Objectives	
Procedure: ITLS Primary Survey—Critical Information	46
Procedure: ITLS Secondary Survey—Critical Information	50
Procedure: ITLS Ongoing Exam—Critical Information	53
Procedure: Patient Assessment and Management	54

Chapter 4 Initial Airway Management 58

Objectives • Case Study	
Introduction	59
Anatomy and Physiology	60
Nasopharynx	60
Oropharynx	60
Hypopharynx	60
Larynx	61
Trachea and Bronchi	62
The Lungs	64

The Patent Airway	64
Observation	65
Suction	66
Airway Adjuncts	67
Supplemental Oxygen	70
Ventilation	71
Normal Ventilation	71
Positive Pressure (Artificial) Ventilation	71
Compliance	72
Ventilation Techniques	73
Airway Equipment	74
Case Study (continued) • Case Study Wrap-up • Summary • Bibliography	

Chapter 5 Airway Management

Skills 78

Objectives	
Basic Airway Management	79
Procedure: <i>Suctioning the Airway</i>	79
Procedure: <i>Inserting the Nasopharyngeal Airway (NPA)</i>	79
Procedure: <i>Inserting the Oropharyngeal Airway (OPA)</i>	79
Procedure: <i>Using a Pocket Mask with Supplemental Oxygen</i>	80
Procedure: <i>Using the Bag-Valve Mask</i>	80
The Pulse Oximeter	80
Advanced Airway Management	81
Preparations	81
Laryngoscopic Orotracheal Intubation	82
Procedure: <i>Laryngoscopic Orotracheal Intubation</i>	83
Nasotracheal Intubation	87
Procedure: <i>Nasotracheal Intubation</i>	87
Immediate Confirmation of Tube Placement	88
Procedure: <i>Immediate Confirmation of Tube Placement</i>	89
Procedure: <i>Reconfirming ET Tube Position</i>	90
Procedure: <i>Confirming and Monitoring ET Tube Placement with Capnography</i>	92
Anchoring the Tube	93

Chapter 6 Thoracic Trauma 94

Objectives • Case Study	
Introduction	95
Anatomy of the Chest	95

Pathophysiology	96
Emergency Care of Chest Injuries	97
Airway Obstruction	97
Open Pneumothorax	97
Procedure: <i>Management of Open Pneumothorax</i>	99
Flail Chest	99
Procedure: <i>Management of Flail Chest</i>	101
Tension Pneumothorax	103
Procedure: <i>Management of Tension Pneumothorax</i>	104
Massive Hemothorax	104
Procedure: <i>Management of Massive Hemothorax</i>	105
Cardiac Tamponade	106
Procedure: <i>Management of Cardiac Tamponade</i>	106
Traumatic Aortic Rupture	107
Procedure: <i>Management of Potential Aortic Tears</i>	108
Tracheal or Bronchial Tree Injury	108
Myocardial Contusion	108
Diaphragmatic Tears	109
Procedure: <i>Management of Diaphragmatic Rupture</i>	109
Pulmonary Contusion	109
Other Chest Injuries	110
Case Study (continued) • Case Study Wrap-up • Summary • Bibliography	

Chapter 7 Thoracic Trauma Skills 114

Objectives	
Chest Decompression	115
Indications	115
Complications	115
Procedure: <i>Performing a Chest Decompression</i>	115
Bibliography	

Chapter 8 Shock Evaluation and Management 118

Objectives • Case Study	
Introduction	119
Basic Pathophysiology	119
Assessment and Shock	120
Compensated and Decompensated Shock	121

Evaluation of Tachycardia 122

Capnography 123

The Shock Syndromes 123

Management and Treatment 128

General Management of Post-Traumatic

Shock States 128

Treatment of Post-Traumatic

Hemorrhage 129

Procedure: Managing Shock When Bleeding Has Been Controlled 129

Procedure: Managing Shock Due to Exsanguinating External Hemorrhage That You Cannot Control 130

Procedure: Managing Shock Due to Internal Hemorrhage 131

Special Situations in Hypovolemic

Shock 132

Treatment of Nonhemorrhagic Shock Syndromes 133

Case Study (continued) • Case Study Wrap-up • Summary • Bibliography

Chapter 9 Fluid Resuscitation Skills 136

Objectives

Cannulation of the External Jugular Vein 137

Procedure: Performing External Jugular Cannulation 137

Intraosseous Infusion 137

Indications 137

Potential Complications 138

Procedure: Performing Intraosseous Infusion in a Child 138

Length-Based Resuscitation Tapes 139

Procedure: Estimating a Child's Weight with a Length-Based Resuscitation Tape 140

Chapter 10 Head Trauma 141

Objectives • Case Study

Introduction 142

Anatomy of the Head 143

Pathophysiology of Head Trauma 144

Primary and Secondary Brain Injuries 144

Intracranial Pressure 145

Cerebral Herniation Syndrome 146

Head Injuries 147

Scalp Wounds 147

Skull Injuries 147

Brain Injuries 148

Evaluation of the Head-Trauma Patient 150

ITLS Primary Survey 150

ITLS Secondary Survey 155

ITLS Ongoing Exam 155

Management of the Head-Trauma Patient 155

Procedure: Managing the Head-Trauma Patient 155

Case Study (continued) • Case Study Wrap-up • Summary • Bibliography

Chapter 11 Spinal Trauma 160

Objectives • Case Study

Introduction 161

The Normal Spinal Column and Cord 161

Spinal Column 161

Spinal Cord 162

Spinal Injury 164

Mechanisms of Blunt Spinal-Column Injury 164

Mechanisms of Blunt Spinal-Cord Injury 164

Neurogenic Shock 166

Assessment and Management of the Trauma Patient 166

Assessing for Possible Spine Injury 166

Managing the Trauma Patient 167

Airway Intervention 175

Special SMR Situations 175

Case Study (continued) • Case Study Wrap-up • Summary • Bibliography

Chapter 12 Spine Management Skills 183

Objectives

Essential Components of an SMR System 184

Applying Spinal Motion Restrictions (SMR) 184

Patients Requiring SMR 184

SMR with a Short Backboard 184

Procedure: Applying a Short Backboard 184

Emergency Rescue and Rapid Extrication 190

Procedure: Performing a Rapid Extrication 191

SMR Using the Long Backboard 191

Procedure: Log-Rolling the Supine Patient onto a Long Backboard 194

Procedure: Log-Rolling the Prone Patient with an Adequate Airway onto a Long Backboard 197

Securing the Patient to the Backboard 198

Procedure: Applying and Securing a Long Backboard to a Standing Patient 198

Helmet Management 199

Procedure: Removing a Motorcycle Helmet from a Trauma Patient 199

Procedure: Alternative Procedure for Removing a Helmet 201

Bibliography

Chapter 13 Abdominal Trauma 203

Objectives • Case Study

Introduction 204

Anatomy of the Abdomen 204

Types of Injuries 205

Assessment and Stabilization 206

Scene Size-up 206

Patient Assessment 207

Stabilization 207

Case Study (continued) • Case Study Wrap-up • Summary • Bibliography

Chapter 14 Extremity Trauma 211

Objectives • Case Study

Introduction 212

Injuries to Extremities 212

Fractures 212

Dislocations 213

Amputations 214

Open Wounds 215

Neurovascular Injuries 215

Impaled Objects 215

Compartment Syndrome 215

Assessment and Management 216

Scene Size-up and History 216

Assessment 216

Management of Extremity Injuries 216

Procedure: Rules of Splinting 217

Management of Specific Injuries 220

Case Study (continued) • Case Study Wrap-up • Summary • Bibliography

Chapter 15 Extremity Trauma

Skills

229

Objectives

Traction Splints 230

Procedure: Applying a Thomas Traction Splint (Half-Ring Splint) 230

Procedure: Applying a Hare Traction Splint 231

Procedure: Applying a Sager Traction Splint 234

Pelvic Stabilization Techniques 234

Procedure: Stabilizing the Pelvis with a Sheet or Blanket 236

Procedure: Stabilizing the Pelvis with a Commercial Device 236

Chapter 16 Burns 237

Objectives • Case Study

Introduction 238

Anatomy and Pathophysiology 238

The Skin 238

Classifying Burns by Depth 239

Determining the Severity of Burns 240

Patient Assessment and Management 242

Patient Assessment 243

Patient Management 245

Special Problems in Burn

Management 245

Procedure: Removing the Source of Chemical Burns 249

Case Study (continued) • Case Study Wrap-up • Summary • Bibliography

Chapter 17 Trauma in Children 258

Objectives • Case Study

Introduction 259

Communicating with the Child and Family 259

Parental Consent 261

Assessment and Care 261

Pediatric Equipment 261

Common Mechanisms of Injury 261

Assessment of the Airway 264

Assessment of Breathing 266

Assessment of Circulation 268

Control of Bleeding 269

The Critical Trauma Situation 269

ITLS Secondary Survey 271

Potentially Life-Threatening Injuries 271

Head Injury 271

Chest Injury 272

Abdominal Injury 273

Spinal Injury 273

Child Restraint Seats 273Case Study (continued) • Case Study Wrap-up •
Summary • Bibliography**Chapter 18 Trauma in the Elderly 278**

Objectives • Case Study

Introduction 279**Pathophysiology of Aging 280**

The Aging Body 280

Medications 281

Assessment and Management 282

ITLS Primary Survey 283

Critical Transport Decisions 284

Packaging and Transport 285

ITLS Secondary Survey and Ongoing

Exams 285

Case Study (continued) • Case Study Wrap-up •
Summary • Bibliography**Chapter 19 Trauma in Pregnancy 288**

Objectives • Case Study

Introduction 289**Pregnancy 290**

Fetal Development 290

Physiological Changes During

Pregnancy 290

Responses to Hypovolemia 291

Assessment and Management 292

Special Considerations 292

Types of Trauma 294

Trauma Prevention in Pregnancy 296Case Study (continued) • Case Study Wrap-up •
Summary • Bibliography**Chapter 20 Patients Under the
Influence of Alcohol or Drugs 299**

Objectives • Case Study

Introduction 300**Assessment and Management 300****The Uncooperative Patient 302**Case Study (continued) • Case Study Wrap-up •
Summary • Bibliography**Chapter 21 The Trauma****Cardiopulmonary Arrest 306**

Objectives • Case Study

Introduction 307

The Unsalvageable Patient 307

Hypoxemia 308

Circulatory Problems 310

Approach to Trauma Patients in Cardiac

Arrest 311

General Plan of Action 311

Procedure: *Initial Assessment and Critical
Actions* 312Case Study (continued) • Case Study Wrap-up •
Summary • Bibliography**Chapter 22 Standard Precautions in the
Prehospital Setting 315**

Objectives • Case Study

Introduction 317

Hepatitis B 317

Hepatitis C 318

Human Immunodeficiency Virus

Infection 318

Tuberculosis 319

Precautions for Prevention of Transmission of
Infectious Agents 321Procedure: *General Considerations* 321Procedure: *Personal Protection During
Patient Exposures* 323Procedure: *Handling and Cleaning of Items
Exposed to Blood or OPIM* 323Procedure: *Reporting Accidental Exposure to
Blood or OPIM* 323Case Study (continued) • Case Study Wrap-up •
Summary • Bibliography**Appendix A Optional Skills 327**

Optional Skill 1: Digital Intubation 327

Optional Skill 2: Transillumination (Lighted
Stylet) 330Optional Skill 3: Translaryngeal Jet
Ventilation 333Optional Skill 4: Pharyngotracheal Lumen
Airway 336Optional Skill 5: Esophageal Tracheal
Combitube 339

Optional Skill 6: King LT-D Airway	341
Optional Skill 7: Laryngeal Mask Airway	345
Optional Skill 8: Adult Intraosseous Infusion	348
Optional Skill 9: Rapid Sequence Intubation	351

Appendix B	Communications with the Receiving Hospital	356
	Objectives	356
	Communication Basics	356
	Four-Phase Communications Policy	356
	Bibliography	361

Appendix C	Documentation: The Patient Care Record	362
	Objectives	362
	Introduction	362
	The Narrative Report	362
	Improving Documentation Skills	368
	Important Points About the Written Report	368
	Bibliography	370

Appendix D	Trauma Care in the Cold	371
	Objectives	371
	Introduction	371
	Cold Weather Trauma Care	371
	Notes for Wilderness Rescuers	375
	Bibliography	376

Appendix E	Role of the Medical Helicopter	377
	Objectives	377
	Medical Helicopter Services	377
	The Medical Helicopter and the Trauma Patient	378
	ITLS and the Medical Helicopter	379
	Bibliography	379

Appendix F	Trauma Scoring in the Prehospital Care Setting	380
	Objectives	380
	Trauma Scoring Systems	380
	Uses for Trauma Scoring	380
	Bibliography	383

Appendix G	Drowning, Barotrauma, and Decompression Injury	384
	Objectives	384
	Drowning	385
	Barotrauma	385
	Decompression Sickness	387
	Management of Diving Injuries	389
	Bibliography	390

Appendix H	Injury Prevention and the Role of the EMS Provider	391
	Objectives	391
	The Injury Epidemic	391
	The Injury Process	392
	Injury Prevention and Control	395
	Bibliography	399

**Appendix I Multicasualty Incidents
and Triage 400**

Objectives 400

Disasters and Multicasualty Incidents 400

Triage 403

ITLS Recommendations 407

Bibliography 407

**Appendix J Agricultural Rescue Course
Overview 408**

Objectives 408

Rescue on the Farm 408

Rural Rescue 409

Farm Trauma Is Unique 409

Teamwork Training 409

Tractor and Machinery Incidents 410

Farm Confined Spaces 410

Agricultural Rescue—An Opportunity 411

Bibliography 411

**Appendix K ITLS Access
Overview 412**

Objectives 412

Bibliography 413

Appendix L Tactical EMS 414

Objectives 414

Introduction 414

What Is Tactical EMS? 415

Tactical EMS Models 417

Specific TEMS Equipment and Tactics 419

Evidence Preservation 426

Toxic Material Hazards 426

Special Issues 426

Additional Resources for TEMS Training 427

Bibliography 428

GLOSSARY 429

INDEX 433
