

Kinanthropometry and Exercise Physiology Laboratory Manual

Tests, procedures and data

Volume 1: Anthropometry

Third edition

Edited by

Roger Eston and Thomas Reilly

CONTENTS

<i>List of illustrations</i>	x
<i>List of contributors</i>	xvii
<i>Preface</i>	xix
<i>Introduction</i>	xxi

PART ONE

Body composition, proportion and growth: implications for health and performance	1
---	----------

1 Human body composition	3
---------------------------------	----------

ROGER ESTON, MICHAEL HAWES, ALAN MARTIN AND THOMAS REILLY

1.1 <i>Aims</i>	3
1.2 <i>Introduction</i>	3
1.3 <i>Levels of approach</i>	4
1.4 <i>Validity</i>	6
1.5 <i>The chemical model</i>	7
1.6 <i>Simple indices of fatness, muscularity and fat distribution</i>	18
1.7 <i>The anatomical model</i>	22
1.8 <i>Other considerations</i>	25
1.9 <i>Practical 1: Densitometry</i>	25
1.10 <i>Practical 2: Measurement of skinfolds</i>	29
1.11 <i>Practical 3: Simple indices of body fat distribution</i>	35
1.12 <i>Practical 4: Bioelectrical impedance analysis</i>	37
1.13 <i>Practical 5: Estimation of muscle mass and regional muscularity using in vivo- and in vitro-derived equations</i>	39
1.14 <i>Practical 6: Estimation of skeletal mass</i>	42
1.15 <i>Practical 7: Example of a multi-component model of body composition assessment</i>	44
1.16 <i>Anthropometric landmarks and measurement definitions</i>	44
<i>Acknowledgements</i>	47

References 48

2 Somatotyping 54

WILLIAM DUQUET AND J. E. LINDSAY CARTER

2.1 *Aims* 54

2.2 *History* 54

2.3 *The Heath-Carter somatotype method* 55

2.4 *Relevance of somatotyping* 58

2.5 *Practical 1: Calculation of anthropometric somatotypes* 59

2.6 *Practical 2: Comparison of somatotypes of different groups* 64

2.7 *Practical 3: Analysis of longitudinal somatotype series* 68

2.8 *Practical 4: Visual inspection of somatotype photographs: an introduction to photoscopic somatotyping* 69

Further reading and useful websites 71

References 71

3 Physical growth, maturation and performance 73

GASTON BEUNEN

3.1 *Aims* 73

3.2 *Introduction* 73

3.3 *Reference values for normal growth* 76

3.4 *Biological maturation: sexual, morphological, dental maturation and skeletal age* 83

3.5 *Physical fitness* 90

3.6 *Summary and conclusions* 96

Appendix 96

Further reading 97

PART TWO

Goniometric aspects of movement 101

4 Assessment of posture 103

PETER H. DANGERFIELD

4.1 *Aims* 103

4.2 *Introduction* 103

4.3 *Curvatures and movement of the vertebral column* 105

4.4 *Defining and quantification of posture* 106

4.5 *Assessment of posture and body shape* 108

4.6 *Other clinical methods of posture assessment* 112

4.7 *Movement analysis: Measurements in a dynamic phase of posture* 115

4.8	<i>Spinal length and diurnal variation</i>	119
4.9	<i>Deviation from normal posture and injury</i>	120
4.10	<i>Errors and reproducibility</i>	120
4.11	<i>Conclusion</i>	121
4.12	<i>Practical 1: Measurement of posture and body shape</i>	121
4.13	<i>Practical 2: Assessment of sitting posture</i>	122
4.14	<i>Practical 3: Lateral deviations</i>	123
4.15	<i>Practical 4: Leg-length discrepancy</i>	123
	<i>Further reading</i>	124
	<i>References</i>	125
5	Flexibility	129
	PETER VAN ROY AND JAN BORMS	
5.1	<i>Aims</i>	129
5.2	<i>Introduction and historical overview</i>	129
5.3	<i>Theory and application of clinical goniometry</i>	133
5.4	<i>Laboratory sessions: Flexibility measurements with goniometry</i>	136
5.5	<i>Summary and conclusion</i>	154
	<i>Further reading</i>	156
	<i>References</i>	156
PART THREE		
	Assessment of physical activity and performance	161
6	Field methods of assessing physical activity and energy balance	163
	ANN V. ROWLANDS	
6.1	<i>Aims</i>	163
6.2	<i>Why estimate physical activity? The need for a valid measure</i>	163
6.3	<i>Energy expenditure and physical activity</i>	163
6.4	<i>Methods of estimating physical activity or energy expenditure</i>	164
6.5	<i>Considerations when using accelerometers to assess physical activity</i>	173
6.6	<i>Multiple measures of physical activity</i>	175
6.7	<i>Practical 1: Relationship between selected measures of physical activity and oxygen uptake during treadmill walking and running</i>	176
	<i>Further reading and useful websites</i>	177
	<i>References</i>	178
7	Assessment of performance in team games	184
	THOMAS REILLY	
7.1	<i>Aims</i>	184
7.2	<i>Introduction</i>	184
7.3	<i>Method of analyzing team performance</i>	185

7.4	<i>Field Tests</i>	188
7.5	<i>Overview</i>	192
7.6	<i>Practical 1: The use of repeated sprint tests</i>	193
7.7	<i>Practical 2: Cooper's 12-minute run test</i>	193
	<i>Further reading</i>	195
	<i>References</i>	195
8	Special considerations for assessing performance in young people	197
	ALAN BARKER, COLIN BOREHAM, EMMANUEL VAN PRAAGH AND ANN V. ROWLANDS	
8.1	<i>Aims</i>	197
8.2	<i>Introduction</i>	197
8.3	<i>Growth maturation and performance</i>	198
8.4	<i>Anthropometric tests (body composition)</i>	201
8.5	<i>General considerations when assessing performance in children</i>	202
8.6	<i>Assessment of aerobic performance in the laboratory</i>	203
8.7	<i>Assessment of anaerobic performance in the laboratory</i>	209
8.8	<i>Adjusting aerobic and anaerobic performance for body size</i>	216
8.9	<i>Field tests</i>	217
	<i>Further reading</i>	225
	<i>References</i>	225
PART FOUR		
	Special considerations	231
9	Anthropometry and body image	233
	TIM S. OLDS	
9.1	<i>Aims</i>	233
9.2	<i>Historical Perspective</i>	233
9.3	<i>Theory and applications</i>	234
9.4	<i>Practical 1: The anthropometric characteristics of beautiful female bodies</i>	241
9.5	<i>Practical 2: The anthropometry of the 'ideal' male body</i>	242
9.6	<i>Practical 3: The anthropometry of Ken and Barbie</i>	243
9.7	<i>Practical 4: The anthropometry of the ideal face</i>	246
9.8	<i>Summary and conclusion</i>	247
	<i>Further reading and useful websites</i>	247
	<i>References</i>	248
10	Statistical methods in kinanthropometry and exercise physiology	250
	ALAN M. NEVILL, GREG ATKINSON AND MARK A. SCOTT	
10.1	<i>Aims</i>	250
10.2	<i>Organizing and describing data in kinanthropometry and exercise physiology</i>	250

10.3	<i>Investigating relationships in kinanthropometry and exercise physiology</i>	261
10.4	<i>Comparing experimental data in kinanthropometry</i>	272
10.5	<i>Summary</i>	291
	<i>Appendix</i>	292
	<i>Further reading and useful websites</i>	298
	<i>References</i>	298

11 Scaling: adjusting for differences in body size **300**

EDWARD M. WINTER AND ALAN M. NEVILL

11.1	<i>Aims</i>	300
11.2	<i>Introduction</i>	300
11.3	<i>Historical background</i>	301
11.4	<i>The ratio standard: the traditional method</i>	301
11.5	<i>Regression standards and ANCOVA</i>	303
11.6	<i>Allometry and power function standards</i>	306
11.7	<i>Practical 1: The identification of allometric relationships</i>	307
11.8	<i>Practical 2: Power function ratio standards</i>	311
11.9	<i>Elasticity</i>	312
11.10	<i>Allometric cascade</i>	313
11.11	<i>Geometric similarity and non-isometric growth</i>	313
11.12	<i>Scaling longitudinal data</i>	313
11.13	<i>Summary</i>	314
	<i>Appendix A</i>	315
	<i>Appendix B</i>	316
	<i>Acknowledgement</i>	317
	<i>Further reading and useful websites</i>	318
	<i>References</i>	318
