

3RD EDITION

# KINANTHROPOMETRY AND EXERCISE PHYSIOLOGY LABORATORY MANUAL

TESTS, PROCEDURES AND DATA

VOLUME 2: **PHYSIOLOGY**

EDITED BY  
**ROGER ESTON**  
**THOMAS REILLY**

# CONTENTS

<i>Illustrations</i>	xii
<i>List of contributors</i>	xxi
<i>Preface</i>	xxiii
<i>Introduction</i>	xxv

## PART ONE

### **Neuromuscular aspects of movement** 1

#### **1 Skeletal muscle function** 3

VASILIOS BALTZOPOULOS AND NIGEL GLEESON

1.1 *Aims* 3

1.2 *Introduction* 3

1.3 *Physiological aspects of muscle and joint function* 3

1.4 *Mechanical aspects of muscle and joint function* 6

1.5 *Isokinetic dynamometry applications* 11

1.6 *Practical 1: Assessment of muscle function during isokinetic knee extension and flexion* 23

1.7 *Practical 2: Assessment of isometric force–joint position relationship* 27

1.8 *Practical 3: Assessment of knee joint proprioception performance: reproduction of passive joint positioning* 28

1.9 *Practical 4: Assessment of knee joint proprioception performance: reproduction of net joint moment* 30

*Further reading and useful websites* 32

*References* 32

#### **2 Assessment of neuromuscular performance using electromyography** 41

NIGEL GLEESON

2.1 *Aims* 41

2.2 *Introduction* 41

2.3 *Factors influencing the electromyographic signal* 42

- 2.4 EMG electrodes 44
- 2.5 Overview of hardware 47
- 2.6 Recording of data 48
- 2.7 Selected applications utilizing EMG techniques 49
- 2.8 Measurement utility: Principles of measurement and evaluation in indices of neuromuscular performance involving EMG 54
- 2.9 Practical 1. Assessment of electromechanical delay of the knee flexors associated with static maximal voluntary muscle actions 59
- 2.10 Practical 2. Assessment of electromyographic signal amplitude and force of the knee flexors associated with static voluntary muscle actions 64
- Further reading and useful websites 68
- References 68

## PART TWO

### Oxygen transport system and exercise 73

### 3 Lung function 75

ROGER ESTON AND LEE M. ROMER

- 3.1 Aims 75
- 3.2 Assessment of resting lung function 75
- 3.3 Sources of variation in lung function testing 79
- 3.4 Prediction of lung function 81
- 3.5 Interpretation of lung function tests 83
- 3.6 Post-exercise changes in lung function 83
- 3.7 Adaptations to external stimuli 84
- 3.8 Ventilation 86
- 3.9 Ventilatory responses to exercise 88
- 3.10 Practical exercises 91
- 3.11 Practical 1: Assessment of resting lung function 91
- 3.12 Practical 2: Assessment of lung function during exercise 94
- 3.13 Practical 3: Measurement of oxygen uptake by closed-circuit calorimetry 97
- Further reading and useful websites 99
- References 99

### 4 Haematology 104

RON MAUGHAN, JOHN LEIPER AND SUSAN SHIRREFFS

- 4.1 Aims 104
- 4.2 Introduction 104
- 4.3 Health and Safety and the Human Tissue Act 105
- 4.4 Blood sampling and handling 106
- 4.5 Blood treatment after collection 110
- 4.6 Measurement of circulating haemoglobin concentration 111
- 4.7 Measurement of red cell parameters 117

4.8	<i>Anaemia and measurement of iron status</i>	118
4.9	<i>Altitude training, blood doping and erythropoietin</i>	119
4.10	<i>Blood and plasma volume changes</i>	120
	<i>Further reading and useful websites</i>	122
	<i>References</i>	122

## 5 Cardiovascular function 124

TIM CABLE

5.1	<i>Aims</i>	124
5.2	<i>Introduction</i>	124
5.3	<i>Cardiovascular adjustments during exercise</i>	124
5.4	<i>Control of blood flow at rest and during exercise</i>	128
5.5	<i>Control of skin blood flow during exercise</i>	130
5.6	<i>Measurement of blood pressure</i>	132
5.7	<i>Measurement of peripheral blood flow</i>	133
5.8	<i>Practical exercises</i>	136
5.9	<i>Practical 1: Skin blood flow response to reactive hyperaemia and exercise</i>	136
5.10	<i>Practical 2: Acute effects of exercise on cardiovascular function</i>	138
5.11	<i>Practical 3: Exercise pressor response</i>	141
	<i>Further reading and useful websites</i>	142
	<i>References</i>	142

## PART THREE

## Assessment of energy and efficiency 145

## 6 Metabolic Rate and Energy Balance 147

CARLTON B. COOKE

6.1	<i>Aims</i>	147
6.2	<i>Basal metabolic rate</i>	147
6.3	<i>Measurement of energy expenditure</i>	148
6.4	<i>Practical 1: Estimation of body surface area and Resting Metabolic Rate (RMR)</i>	149
6.5	<i>Practical 2: Estimation of RMR from fat-free mass</i>	151
6.6	<i>Practical 3: Measurement of oxygen uptake using the Douglas bag technique</i>	151
6.7	<i>Practical 4: The respiratory quotient</i>	160
6.8	<i>Practical 5: Estimation of RMR using the Douglas bag technique</i>	164
6.9	<i>Practical 6: Energy balance</i>	165
6.10	<i>Summary</i>	171
	<i>Further reading and useful websites</i>	171
	<i>References</i>	172

## 7 Maximal oxygen uptake, economy and efficiency

174

CARLTON B. COOKE

7.1 Aims 174

7.2 Introduction 174

7.3 Direct determination of maximal oxygen uptake 175

7.4 Prediction of maximal oxygen uptake 179

7.5 Economy 182

7.6 Efficiency 189

7.7 Load carriage 191

7.8 Practical 1: Direct determination of  $\dot{V}O_{2max}$  using a discontinuous cycle ergometer protocol 195

7.9 Practical 2: Measurement of running economy 198

7.10 Practical 3: Combined measurement of running economy, lactate threshold and turnpoint, and  $\dot{V}O_{2max}$  199

7.11 Practical 4: Measurement of loaded running efficiency 201

7.12 Practical 5: Measurement of the efficiency of cycling and stepping 204

7.13 Practical 6: The effects of load carriage on the economy of walking 206

Further reading 208

References 208

## 8 Thermoregulation

213

THOMAS REILLY AND TIM CABLE

8.1 Aims 213

8.2 Introduction 213

8.3 Processes of heat loss/heat gain 213

8.4 Control of body temperature 215

8.5 Thermoregulation and other control systems 217

8.6 Measurement of body temperature 219

8.7 Thermoregulatory responses to exercise 221

8.8 Environmental factors 221

8.9 Anthropometry and heat exchange 226

8.10 Practical exercises 227

8.11 Practical 1: Muscular efficiency 227

8.12 Practical 2: Thermoregulatory responses to exercise 228

8.13 Practical 3: Estimation of partitioned heat exchange 230

Further reading 232

References 232

## PART FOUR

### Assessment and regulation of energy expenditure and exercise intensity 235

#### 9 Control of exercise intensity using heart rate, perceived exertion and other non-invasive procedures 237

ROGER ESTON, JOHN G. WILLIAMS AND JAMES FAULKNER

9.1 *Aims* 237

9.2 *Introduction* 237

9.3 *Using oxygen consumption and heart rate to prescribe exercise intensity* 238

9.4 *Using the rating of perceived exertion to prescribe exercise intensity* 242

9.5 *Effort perception in children* 252

9.6 *Practical 1: Use of ratings of perceived exertion to determine and control the intensity of cycling exercise* 256

9.7 *Practical 2: Analysis of the effort of estimation and production test data shown in Tables 5, 6 and 7.* 259

9.8 *Practical 3: Relationship between power output, perceived exertion (CR10), heart rate and blood lactate* 260

9.9 *Practical 4: The Borg Cycling Strength Test with constant load* 262

9.10 *Summary* 264

*Further reading and useful websites* 265

*References* 266

#### 10 Aerobic exercise performance 271

ANDREW M. JONES, ANNI T. VANHATALO AND JONATHAN H. DOUST

10.1 *Aims* 271

10.2 *Introduction* 271

10.3 *Exercise intensity domains* 272

10.4 *From moderate to heavy exercise: the lactate/gas exchange threshold* 274

10.5 *From heavy to severe exercise: the maximal lactate steady-state and critical power* 279

10.6 *From severe to extreme:  $\dot{V}O_{2max}$*  289

10.7 *Conclusion* 289

10.8 *Practical exercises* 292

10.9 *Practical 1: The Tlac (lactate threshold) and OBLA (onset of blood lactate accumulation)* 294

10.10 *Practical 2: Gas exchange and ventilatory threshold* 294

10.11 *Practical 3: Critical power* 295

10.12 *Practical 4: Lactate minimum speed* 296

10.13 *Practical 5: Heart rate deflection point (Conconi Test)* 297

*Further reading* 298

*References* 298

<b>11 Assessment of maximal-intensity exercise</b>	<b>307</b>
EDWARD M. WINTER AND DON P. MACLAREN	
11.1 <i>Aims</i>	307
11.2 <i>Introduction</i>	307
11.3 <i>Terms and nomenclature</i>	308
11.4 <i>Historical background</i>	309
11.5 <i>Screening</i>	310
11.6 <i>Procedures for assessing maximal intensity exercise</i>	310
11.7 <i>Assessment of metabolism</i>	315
11.8 <i>Summary and conclusion</i>	319
11.9 <i>Practical 1: Wingate test</i>	319
11.10 <i>Practical 2: Optimization procedures</i>	323
11.11 <i>Practical 3: Correction procedures</i>	326
11.12 <i>Practical 4: Assessment of maximal accumulated oxygen deficit</i>	327
<i>Further reading and useful websites</i>	329
<i>References</i>	329
<b>Appendix: Relationships between units of energy, work, power and speed</b>	<b>334</b>
<i>Index</i>	336
