

“An excellent introduction to
PerformancePoint Server.”

—Russ Whitney, PerformancePoint
Development Manager, Microsoft Corporation

Business Intelligence with Microsoft® Office PerformancePoint™ Server 2007

ESSENTIAL SKILLS FOR DATABASE PROFESSIONALS

- Collect, warehouse, and analyze enterprise data
- Create and deliver intuitive scorecards and dashboards
- Integrate with ProClarity, Excel 2007, and SQL Server Reporting Services

Craig Utley

Part I **Business Intelligence**

Chapter 1	The Case for Business Intelligence	3
	What Is Business Intelligence?	4
	The Consumers of Business Intelligence	7
	Business Decision-Makers	7
	Knowledge Workers	8
	Analysts	8
	Line Workers	9
	Delivering Data to Business Intelligence Consumers	9
	Business Scorecards	10
	Reports	12
	Analytic Applications	14
	Line-of-Business Applications	16
	Real World Examples	16
	Scorecard for Non-Profit Entity	16
	Where's the Time Going?	18
	Tracking Retail Sales	19
	Summary	20
Chapter 2	Introducing PerformancePoint Server 2007	21
	What Is PerformancePoint Server 2007?	22
	Monitoring with PerformancePoint Server	23
	Analysis with PerformancePoint Server	25
	Planning with PerformancePoint Server	26
	Summary	29

Chapter 3	Data Warehousing and Business Intelligence	31
	Designing to Solve the Problem	33
	Dimensions and Dimension Tables	34
	Fact Tables	39
	Extracting, Transforming, and Loading Data	43
	ETL Using SQL Server Integration Services	44
	Data Quality	46
	Building Cubes	47
	Steps to Cube Design	48
	Cube Deployment and Processing	57
	Delivering Data to Consumers	58
	Summary	59
Chapter 4	Scorecards and Key Performance Indicators	61
	Key Performance Indicators	62
	KPIs and Measures	62
	Deciding What KPIs to Track	65
	Example KPIs	66
	Scorecards and Dashboards	69
	Balanced Scorecards	71
	Business Scorecards	72
	Strategy Maps	74
	Summary	77
Part II	Monitoring, Analysis, and Planning	
Chapter 5	Monitoring in PerformancePoint Server	81
	Data Sources and Scorecards	82
	Creating Data Sources	85
	Creating a Scorecard	90
	Creating and Modifying KPIs	97
	KPIs with Multiple Targets	105
	Adding Multiple KPIs at Once	107
	Working with Objectives	109
	Aggregations and Trends	111
	Indicators	113

	Reports and Strategy Maps	116
	Creating an Analytic Chart Report	117
	Creating a Trend Analysis Chart	119
	Strategy Maps	122
	Dashboards — Putting it All Together	127
	Creating a Dashboard	127
	Adding Filters to the Dashboard	130
	Summary	136
Chapter 6	Analysis with PerformancePoint Server and ProClarity	137
	Analysis with PerformancePoint Server	138
	Analytic Charts	140
	Analytic Grids	159
	Analysis with ProClarity	168
	The ProClarity Professional Client	169
	The ProClarity Standard Client	207
	Summary	214
Chapter 7	Planning Module in PerformancePoint Server	215
	Planning Administration Console	216
	Planning Business Modeler	231
	Dimensions	234
	Models	257
	Forms and Reports	261
	Process Management	262
	Security and Roles	269
	Associations	271
	PerformancePoint Add-in for Excel	271
	Creating Reports and Forms	271
	Submitting Plan Data	277
	Summary	280
Part III	Additional Tools and Security	
Chapter 8	PerformancePoint Deployment and Security	283
	Deploying PerformancePoint Server	284
	Installing the Monitoring Server	285
	Installing the Planning Server	289

	Security Considerations for PerformancePoint Server	292
	Internet Information Services Security	292
	Secure Sockets Layer	293
	Kerberos and Delegation	293
	Summary	294
Chapter 9	Analysis with Excel 2007	295
	Performing Analysis with Excel 2007	296
	Using the PivotTable	296
	Using the PivotChart	311
	Summary	315
Chapter 10	SQL Server Reporting Services	317
	Creating Reports with Reporting Services	318
	Accessing Cubes with Reporting Services	319
	Accessing Relational Data	335
	Summary	343
	Index	345
