

THE EXPERT'S VOICE® IN OPEN SOURCE

Beginning Ubuntu Server Administration

From Novice to Professional

Everything you need to know to manage Ubuntu Server

Sander van Vugt

Apress®

Contents

About the Author	xv
About the Technical Reviewer	xvii
Introduction	xix
CHAPTER 1 Installing Ubuntu Server	1
Preparing for the Installation	1
Starting the Ubuntu Server Installation Process	2
Configuring the Server's Hard Drive	8
Completing the Installation	22
Summary	24
CHAPTER 2 Getting the Most Out of the Command Line	25
Working As root?	25
Working with the Shell	26
Using Bash to Best Effect	26
Managing Bash with Key Sequences	29
Performing Basic File System Management Tasks	30
Working with Directories	30
Working with Files	31
Viewing the Content of Text Files	33
Finding Files That Contain Specific Text	35
Creating Empty Files	36
Piping and Redirection	37
Piping	37
Redirection	37
Finding Files	40
Working with an Editor	40
Vi Modes	41
Saving and Quitting	42
Cut, Copy, and Paste	42
Deleting Text	42

Getting Help	43
Using man to Get Help	43
Using the --help Option	45
Getting Information on Installed Packages	46
Summary	46

CHAPTER 3 Performing Essential System Administration Tasks 47

Software Management	47
Software Repositories and Package Databases	48
Package Management Utilities	49
Installing Software from Tarballs	57
Configuring a Graphical User Interface	58
Creating Backups	60
Making File Backups with tar	60
Making Device Backups Using dd	63
Configuring Logging	64
Configuring syslog	64
Logging in Other Ways	69
Rotating Log Files	69
Summary	72

CHAPTER 4 Performing File System Management Tasks 73

Mounting Disks	73
Using the mount Command	73
Unmounting Devices	77
Automating Mounts with /etc/fstab	78
Checking File System Integrity	81
Working with Links	82
Why Use Links?	82
Working with Symbolic Links	82
Working with Hard Links	84
Configuring Storage	85
Comparing File Systems	85
Creating File Systems	94
Working with Logical Volumes	97
Doing Magic on Your File Systems with dd	102
Summary	105

CHAPTER 5	Configuring Your Server for Security	107
	Setting Up User Accounts	107
	Commands for User Management	108
	Managing Passwords	110
	Modifying and Deleting User Accounts	112
	Behind the Commands: Configuration Files	112
	Creating Groups	117
	Commands for Group Management	117
	Behind the Commands: /etc/group	117
	Managing the User's Shell Environment	118
	Configuring Permissions	119
	Read, Write, and Execute: The Three Basic Linux Permissions	119
	Permissions and the Concept of Ownership	119
	Working with Advanced Linux Permissions	122
	Setting Permissions	124
	Using umask to Set Default Permissions	125
	Working with Access Control Lists	126
	Preparing the File System for ACLs	127
	ACL Limitations	129
	Applying File Attributes	130
	Apply Quota to Allow a Maximum Amount of Files	131
	Installing the Quota Software	132
	Preparing the File System for Quota	132
	Initializing Quota	132
	Setting Quota for Users and Groups	133
	Understanding Pluggable Authentication Modules	134
	Creating a Default Policy for Security	136
	Discovering PAM Modules	136
	Configuring Administrator Tasks with sudo	140
	An Introduction to Setting Up the Netfilter Firewall with iptables	141
	Netfilter Building Blocks	142
	Using iptables to Create a Firewall	144
	Summary	149
CHAPTER 6	Setting the System to Your Hand	151
	Process Monitoring and Management	151
	Different Kinds of Processes	151
	Foreground and Background	152
	Managing Processes	154
	Other Tools to Monitor System Activity	157
	Setting Process Priority	160

Executing Processes Automatically	161
Configuring cron	161
Executing Once with at	163
Tuning the Boot Procedure	164
Managing the GRUB Boot Loader	164
The GRUB Configuration File	165
Installing GRUB	167
Working with the GRUB Boot Menu	168
Upstart	169
Runlevels	171
Making Service Management Easier	173
Managing Hardware	174
Kernel Management	174
Installing Your Own Custom Kernel	178
Hardware Management with udev	180
Summary	183

CHAPTER 7 **Running It Anyway You Like**

Before You Even Start	185
To Script or Not to Script?	185
What Shell?	186
Basic Elements of a Shell Script	187
Making It Executable	188
Making a Script Interactive	190
Working with Arguments	191
Working with Variables	194
Command Substitution	194
Changing Variables	195
Substitution Operators	195
Pattern-Matching Operators	197
Performing Calculations in Scripts	199
Using Flow Control	203
Using if then else	204
Case	207
Using while	209
Using until	209
Using for	210
Using a Stream Editor	211
Working with Functions	212
A Complex Scripting Example	213
Summary	215

CHAPTER 8	Making Connection	217
	Configuring the Network Card	217
	Using ifup, ifdown, and Related Tools	219
	Using ifconfig	219
	Using the ip Tool	221
	Managing IPv6	224
	Managing Routes	227
	Configuring the DNS Resolver	228
	Configuring Network Card Properties with the ethtool Command	230
	Troubleshooting Network Connections	230
	Testing Connectivity	231
	Testing Routability	232
	Testing Availability of Services	234
	Monitoring the Network Interface	238
	Monitoring Network Traffic	240
	Connecting Remotely with SSH	243
	Working with Public/Private Key Pairs	244
	Working with Secure Shell	244
	Configuring SSH	245
	Using Key-Based Authentication	247
	A Short Introduction to Cryptography	248
	Using Public/Private Key–Based Authentication in an SSH Environment	248
	Setting Up SSH for Key-Based Authentication	249
	Caching Keys with ssh-agent	250
	Tunneling Traffic with SSH	251
	X Forwarding	251
	Generic TCP Port Forwarding	252
	Summary	253
CHAPTER 9	Configuring Network Infrastructure Services	255
	Configuring DNS	255
	Methods of Name Resolution	255
	Structure of the DNS Hierarchy	257
	Introducing Forward and Reverse DNS	260
	Configuring DNS	261
	Configuring Reversed Lookup	267
	Testing Your Name Server	268

Configuring DHCP	269
Understanding the DHCP Protocol	269
Creating the DHCP Server Configuration	269
The DHCP Process	270
The /etc/dhcpd.conf Configuration File	270
Advanced DHCP Configuration Options	273
The DHCP Relay Agent	275
Configuring NTP	276
How NTP Works	276
Configuring a Stand-Alone NTP Time Server	277
Pulling or Pushing the Time	278
Configuring an NTP Client	279
Checking NTP Synchronization Status	279
Customizing Your NTP Server	280
Applying NTP Security	281
Starting Services with xinetd	282
Setting up xinetd by Hand	282
Tuning Access to Services with TCP Wrapper	284
Summary	286

CHAPTER 10 Using Ubuntu Server As a File and Print Server 287

Setting Up a CUPS Print Server	287
Adding Printers	288
Sharing Printers	290
Managing Printers	291
Accessing CUPS Printers	292
Sharing Files with NFS	293
Using the NFS Server	294
Understanding How the NFS Works	294
Configuring an NFS Server	296
Configuring an NFS Client	298
Monitoring the NFS Server	299
Sharing Files with Samba	299
Samba Server Possibilities and Impossibilities	300
Configuring the Samba Server	300
Integrating CUPS with Samba	305
Setting Up Samba As a Domain Controller	307
Client Access to the Samba Server	309
Summary	311

CHAPTER 11	Setting Up Web Services	313
	Setting Up Apache	313
	Apache Components	314
	Starting, Stopping, and Testing the Apache Web Server	314
	Exploring the Configuration Files	316
	The Structure of the Apache Configuration Files	317
	Checking the Configuration	318
	Working with Virtual Hosts	318
	Configuring Virtual Hosts	319
	Managing Access to the Web Server	320
	Configuring Host-Based Access Restrictions	320
	Configuring User-Based Access Restrictions	322
	Some Words on Apache Performance Tuning	323
	Using PHP	324
	Setting Up MySQL	325
	Setting the MySQL Root Password	325
	Creating a MySQL Database	326
	Setting Up FTP	326
	Configuring the pure-ftpd Server	326
	Summary	328
CHAPTER 12	Multiplying Your Server	329
	Understanding Virtualization	329
	Virtualization Solutions	329
	Approaches to Virtualization	330
	Installing Virtual Machines with KVM	332
	Setting Up KVM on Ubuntu Server	332
	Installing Windows As a Guest Operating System on KVM	333
	Installing Ubuntu Server As a Guest Operating System on KVM	334
	Setting Up Networking in KVM Virtual Machines	334
	Installing Virtual Machines Using Xen	335
	Setting Up Xen on Ubuntu Server	336
	Installing Windows As a Guest Operating System on Xen	338
	Installing Ubuntu Server As a Guest Operating System on Xen	340
	Using Xen Management Commands	341
	Ubuntu Server in a VMware Environment	342
	Summary	342
INDEX		343
