A Proposal of an Open Ubiquitous Fuzzy Computing System for Ambient Intelligence.....	1
--	----------

Abstract.....	1
1.1 Introduction	1
1.2 AmI Fuzzy Ubiquitous System Architecture	3
1.3 AmI Context Representation	5
1.4 Transparent Fuzzy Control for AmI Context Representation	6
1.4.1 FML and Transparent Fuzzy Control.	8
1.5 Run Time Environment	11
1.5.1 Run Time Servers Technologies	12
1.5.2 AmI Clients.....	14
1.5.3 Client/Server Communication Protocol.....	14
1.6 Fuzzy Services Retrieval	15
1.6.1 AmI Client Sensor/Actuator Network Knowledge	18
1.6.2 Storing Algorithm	19
1.6.3 Retrieval Algorithm	23
1.7 Final Considerations	25
References	26

Agent-Controlled Sharing of Distributed Resources in User Networks	29
---	-----------

Abstract	29
2.1 Introduction	30
2.2 User-Managed Networks	32
2.3 Peer-to-Peer Models	33
2.4 Game Theory	35
2.5 Multiagent Systems	36
2.6 Strategies, Node Topology and Behavior	37
2.7 A Simple Cellular Automata Approach	40
2.8 A Basic Multi-Agent Approach	44
2.8.1 Strategy Types	44

2.8.2 Network Traffic	45
2.8.3 Simulation Scenarios	45
2.8.4 Learning <i>CreditLimit</i>	46
2.8.5 Simulation Results	47
2.9 A More Realistic Multi-Agent Approach.....	49
2.9.1 Considerations on User Network Topology and Traffic	49
2.9.2 Control Strategies, Scenarios and Settings.....	50
2.9.3 Simulation Results	52
2.10 Conclusions	56
References	57

Adding Intelligence to Ubiquitous Computing Environments	61
Abstract.....	61
3.1 Introduction	62
3.2 Ubiquitous Computing and Environments	64
3.2.1 Requirements Heterogeneity	64
3.2.2 Background.....	66
3.3 The intelligent Dormitory	69
3.4 The Intelligent Association System	73
3.4.1 From Static Wiring to Ad hoc Networks.....	73
3.4.2 Embedded Agents and Societies	74
3.4.3 Associations in IAS	77
3.5 The Fuzzy-IAS Agent	77
3.5.1 Designing Fuzzy Control Systems	78
3.5.2 The F-IAS Agent Model.....	80
3.6 Converting Rules into Fuzzy Numerical Tables	85
3.7 Distribution with FuzzyXML	86
3.8 Online Intelligent Association Mechanisms.....	88
3.8.1 Why Intelligent Associations?.....	88
3.8.2 Fuzzy Cognitive Maps (FCM)	89
3.8.3 Intelligent Association Calculation	90
3.9 Experimental Results and Analysis	93
3.9.1 Fuzzy Rule Extraction from Offline Collected Data	95
3.9.2 Calculation of the Association Weights	97
3.10 Conclusions	100
Acknowledgement	101
References	101

IJADE FreeWalker – An Intelligent Ontology Agent-based Tourist Guiding System	103
Abstract.....	103
4.1 Introduction	104

4.2	Background	105
4.2.1	Semantic Web	105
4.2.2	Agent	106
4.3	Related Work	107
4.4	Ontology-based Tourist Guide	108
4.4.1	iJADE Framework	109
4.4.2	Construction of the Travel Ontology	109
4.4.3	iJADE FreeWalker	116
4.4.4	System Architecture	118
4.5	Performance Evaluation	121
4.5.1	Precision Test	121
4.5.2	Usability Test	122
4.6	Conclusion and Future Work	123
	Reference	124

iJADE InfoSeeker: On Using Intelligent Context-Aware Agents for Retrieving and Analyzing Chinese Web Articles..... 127

	Abstract	127
5.1	Introduction	127
5.2	Background	128
5.2.1	Intelligent Agents	128
5.2.2	Web and Text Mining	129
5.2.3	Ontology	131
5.2.4	Semantic Web	132
5.3	Ontological Multi-agents Based Approach in iJADE InfoSeeker	134
5.3.1	Ontology Components for Knowledge Representation	135
5.3.2	Multi-agents Components	140
5.3.3	Semantic Web	147
5.4	Testing and Evaluation	148
5.5	Discussion and Future Work	150
5.6	Conclusion and Summary	151
	References	151

A Third-Generation Telecare System using Fuzzy Ambient Intelligence..... 155

	Abstract	155
6.1	Introduction	156
6.2	The Sensor Network	158
6.2.1	What Should be Monitored?	158
6.2.2	Pre-processing	159
6.3	Fuzzy Data Analysis	162

6.3.1 Detection of Specific Activities.....	162
6.3.2 Sleeping	163
6.3.3 Detection of Visitors.....	163
6.3.4 Fuzzy Rules for Visitor Detection	166
6.3.5 Fuzzy Association Rules.....	168
6.4 The User Interface (GUI) Components	168
6.4.1 Calendar Components.....	169
6.4.2 Monthly Association Report.....	170
6.5 System Trial and Results Validation.....	172
6.6 Conclusions	173
Acknowledgment.....	174
References	174

Interacting Agents in a Network for *in silico* Modeling

of Nature-Inspired Smart Systems.....	177
Abstract.....	177
7.1 Introduction.....	178
7.1.1 Interactive, Collective, and Efficient.....	179
7.1.2 Self-organization and Emergence.....	179
7.1.3 Power-Law Scaling or Scale-Invariance Property	179
7.1.4 Adaptive, Fault-tolerant and Resilient Against Damage ...	179
7.2 Multi-set of Agents Transactional Paradigm.....	181
7.2.1 Operational Aspects of Multiagent System	186
7.2.2 Interaction Among Agents.....	186
7.2.3 Concurrency and Conflicts	188
7.3 Agent-based Modeling and Simulation.....	189
7.3.1 Advantages of Agent Based Simulation.....	189
7.3.2 Special Purpose Agents in Simulation.....	190
7.3.3 Agents for Animation	192
7.3.4 Agent-based Models in Development Biology.....	193
7.3.5 Cell Motility	193
7.3.6 Pattern Formation Mechanisms	195
7.3.7 Signal Processing Among Cells	195
7.4 Role of Fractal and Percolation Models in NISS.....	196
7.5 Injecting Positive Entropy.....	198
7.6 Disorderly Connections Arising Among Agents	201
7.7 Nature-Inspired Smart Computations	205
7.7.1 Multiset of Agents Based Ant Colony Heuristic	207
7.7.2 Smart Bacterial Colony	210
7.7.3 Simulating Animal-Human Trails	211
7.7.4 Simulating Attractor Dynamics Using Exploration.....	212

7.7.5 Oscillatory Chemical Reactions	213
7.7.6 Graph Growth Models	215
7.8 Stigmergy and Games	215
7.8.1 Wasp Nest-like Growth	219
7.8.2 Cell Diversification Through Inductive Interaction	221
7.8.3 Synchronization Among Agent Population	222
7.9 Engineering NISS	222
7.9.1 Role of Scales in Engineering NISS	223
7.10 Multi-agent Architecture and Toolkits	224
7.11 Summary and Directions for Research	225
References	226

DigitalBeing: An Ambient Intelligence Interactive Dance Experience 233

Abstract	233
8.1 Introduction	234
8.2 Previous Work	236
8.3 Artistic Vision	239
8.3.1 Projected Imagery	240
8.3.2 Projected Sound	241
8.4 Dance Space and Equipment	242
8.5 Architecture	243
8.5.1 Sensor Analysis System	244
8.5.2 Expressing Arousal Through Lighting	245
8.5.3 Expressing Arousal Through Sound/Music	255
8.5.4 2D Imagery	257
8.5.5 Projecting Lighting and Music	258
8.6 Limitations	258
8.7 Application and Future Work	259
8.8 Conclusion	260
