

INTERNATIONAL SI EDITION

Vibrations

Second Edition

Balakumar Balachandran

Edward B. Magrab

Contents

1	Introduction	1
1.1	Introduction	1
1.2	Preliminaries from Dynamics	4
1.3	Summary	19
	Exercises	19
2	Modeling of Vibratory Systems	23
2.1	Introduction	23
2.2	Inertia Elements	24
2.3	Stiffness Elements	28
2.4	Dissipation Elements	49
2.5	Model Construction	54
2.6	Design for Vibration	60
2.7	Summary	61
	Exercises	61
3	Single Degree-Of-Freedom Systems: Governing Equations	69
3.1	Introduction	69
3.2	Force-Balance and Moment-Balance Methods	70

3.3	Natural Frequency and Damping Factor	79
3.4	Governing Equations for Different Types of Damping	88
3.5	Governing Equations for Different Types of Applied Forces	89
3.6	Lagrange's Equations	93
3.7	Summary	116
	Exercises	117

4 Single Degree-of-Freedom System: Free-Response Characteristics 127

4.1	Introduction	127
4.2	Free Responses of Undamped and Damped Systems	129
4.3	Stability of a Single Degree-of-Freedom System	161
4.4	Machine Tool Chatter	165
4.5	Single Degree-of-Freedom Systems with Nonlinear Elements	168
4.6	Summary	174
	Exercises	174

5 Single Degree-of-Freedom Systems Subjected to Periodic Excitations 181

5.1	Introduction	181
5.2	Response to Harmonic Excitation	183
5.3	Frequency-Response Function	204
5.4	System with Rotating Unbalanced Mass	218
5.5	System with Base Excitation	225
5.6	Acceleration Measurement: Accelerometer	235
5.7	Vibration Isolation	238

5.8	Energy Dissipation and Equivalent Damping	244
5.9	Response to Excitation with Harmonic Components	255
5.10	Influence of Nonlinear Stiffness on Forced Response	269
5.11	Summary	277
	Exercises	277

6 Single Degree-of-Freedom Systems Subjected to Transient Excitations 285

6.1	Introduction	285
6.2	Response to Impulse Excitation	287
6.3	Response to Step Input	300
6.4	Response to Ramp Input	310
6.5	Spectral Energy of the Response	316
6.6	Response to Rectangular Pulse Excitation	317
6.7	Response to Half-Sine Wave Pulse	322
6.8	Impact Testing	332
6.8	Summary	333
	Exercises	333

7 Multiple Degree-of-Freedom Systems: Governing Equations, Natural Frequencies, and Mode Shapes 337

7.1	Introduction	337
7.2	Governing Equations	338
7.3	Free Response Characteristics	369
7.4	Rotating Shafts On Flexible Supports	409
7.5	Stability	419
7.6	Summary	422
	Exercises	422

8 Multiple Degree-of-Freedom Systems: General Solution for Response and Forced Oscillations 435

- 8.1 Introduction 435
- 8.2 Normal-Mode Approach 438
- 8.3 State-Space Formulation 458
- 8.4 Laplace Transform Approach 471
- 8.5 Transfer Functions and Frequency-Response Functions 481
- 8.6 Vibration Absorbers 495
- 8.7 Vibration Isolation: Transmissibility Ratio 525
- 8.8 Systems with Moving Base 530
- 8.9 Summary 534
- Exercises 535

9 Vibrations of Beams 541

- 9.1 Introduction 541
- 9.2 Governing Equations of Motion 543
- 9.3 Free Oscillations: Natural Frequencies and Mode Shapes 562
- 9.4 Forced Oscillations 632
- 9.5 Summary 648

Glossary 649

Appendix

- A** Laplace Transform Pairs 653
- B** Fourier Series 660
- C** Decibel Scale 661
- D** Solutions to Ordinary Differential Equations 663

E Matrices 675

F Complex Numbers and Variables 679

G Natural Frequencies and Mode Shapes of Bars,
Shafts, and Strings 683

Answers to Selected Exercises 693

Index 701
