

Practical Design, Construction and Operation of Food Facilities

J. Peter Clark

Food Science and Technology, International Series

Contents

1.	Introduction	1
	How to use this book.....	3
2.	Context for new or expanded facility	5
	Typical corporate structure.....	5
	Food industry overview	7
	Reasons for new or expanded facilities	11
	Typical procedures for initiating a project.....	12
	Discussion questions or assignments.....	14
3.	Economic evaluation	17
	Measures of worth	17
	Estimating costs and benefits	23
	Discussion questions or assignments.....	33
4.	Design of a new facility	35
	Site selection	35
	Size	42
	Capability.....	43
	Overall layout	46
	Sanitary design	49
	Security	58
	Support facilities.....	60
	Welfare facilities	66
	Discussion questions or assignments.....	70

5.	Expansions and conversions	71
	Advantages of expansion	71
	Challenges of expansion	73
	Overcoming the challenges	75
	Getting more out of an existing line	77
	Discussion questions or assignments.....	84
6.	Process and equipment selection	85
	Process development and design.....	86
	Aseptic processing/pasteurization.....	86
	Orange juice	92
	Dairy.....	95
	Cereal	98
	Categories of food processes	99
	Thermal treatment	100
	Forming and cooking	101
	Mixing and formulating.....	106
	Good manufacturing practices	112
	Personnel practices	116
	Regulatory issues	118
	Discussion questions or assignments.....	122
7.	Equipment selection	125
	Relatively standard equipment.....	127
	Proprietary equipment	144
	Selecting and buying equipment	155
	Buying new equipment.....	157
	Used equipment can be a good value.....	158
	Other factors in evaluating equipment	159
	Discussion questions or assignments.....	162
8.	Project management and execution	163
	The typical phases of a project.....	163
	Feasibility	164
	Appropriation request.....	167
	Funds granted	168
	Detailed design	169
	Construction	173
	Commissioning.....	177
	Close out and production	178
	Roles and responsibilities during design and construction	179
	Issues	180
	Tools of project management	181
	Discussion questions or assignments.....	182

9.	Plant operations	183
	Leadership and organization	186
	Troubleshooting	187
	Discussion questions or assignments.....	188
	Appendix I Basic heat transfer	189
	Appendix II Residence time in hold tubes	193
	Appendix III Flow chart symbols	197
	Appendix IV Glossary of some terms used	199
	Appendix V Short Discussions of Various Topics, based on the Processing Column in <i>Food Technology</i> , published by the Institute of Food Technologists 2002–2006	203
	References	303
	Index	307
