

INTRODUCING AUTOCAD® 2009 AND AUTOCAD LT® 2009

George Omura

SERIOUS SKILLS.

Contents

Introduction	xv
Chapter 1 ■ Getting Familiar with AutoCAD	1
Understanding the AutoCAD Window	2
Starting a Drawing	21
Panning and Zooming to Adjust Your View	25
Understanding the Layout View	28
Understanding How Command Options Work	30
Getting Help	32
Summary	36
Chapter 2 ■ Understanding the Drafting Tools	37
Understanding the AutoCAD Coordinate System	38
Setting Up a Drawing	48
Using a Digital T Square and Triangle	53
Getting a Visual Reference with the Grid Mode	56
Snapping to the Grid or Other Regular Intervals	57
Changing the Grid and Snap Settings	58
Selecting Exact Locations on Objects	62
Aligning Objects Using Object Snap Tracking and Tracking Points	67
Using the Temporary Tracking Point Feature	70
Summary	72
Chapter 3 ■ Drawing 2D Objects	73
Working with the Draw Panel	74
Drawing Straight Lines	74

Drawing Circles and Arcs	75
Drawing Curves	79
Drawing Parallel Lines	85
Drawing Revision Clouds	86
Working with Hatch Patterns and Solid Fills	88
Drawing Regular Polygons	102
Using Objects to Lay Out Your Drawing	104
Summary	110
Chapter 4 ■ Editing AutoCAD Objects	111
Selecting Objects	112
Editing the Windows Way	115
Changing Objects with Grips and Dynamic Input	119
Controlling Objects Using the Properties Palette	123
Summary	125
Chapter 5 ■ Editing with the Modify Panel Tools	127
Selecting Objects	128
Erasing Objects	129
Joining Objects	130
Moving and Copying	137
Scaling, Stretching, and Rotating	142
Breaking an Object into Two	146
Editing Xrefs and Blocks	147
Editing Polylines	150
Summary	153
Chapter 6 ■ Creating 3D Drawings	155
Getting to Know the 3D Modeling Workspace	156
Drawing in 3D Using Solids and Surfaces	159
Changing Your Point of View	173

Creating 3D Forms from 2D Shapes	180
Specifying Exact Distances in 3D Space	193
Controlling the Appearance of Your Model	194
Summary	211
Chapter 7 ■ Getting Organized with Layers	213
Creating and Assigning Layers	214
Setting the Current Layer	218
Controlling Layer Visibility	219
Locking Layers from Printing and Editing	224
Finding the Layers You Want	225
Taming an Unwieldy List of Layers	226
Saving and Recalling Layer Settings	231
Using the Layers Panel to Manage Layers	233
Organizing Visual Content by Using Properties	235
Summary	244
Chapter 8 ■ Using Blocks, Groups, Xrefs, and DesignCenter	245
Using Blocks to Organize Objects	246
Organizing Objects by Using Groups	256
Getting Multiple Uses from Drawings Using External References	261
Keeping Track of Drawing Components with DesignCenter	265
Keeping Tools on Hand with the Tool Palettes Window	272
Summary	275
Chapter 9 ■ Creating Text	277
Adding and Formatting Text	278
Understanding Text and Scale	287
Using Styles to Organize Your Fonts	289

Adding Single Words with the Single-Line Text Object	292
Adding Tables to Your Drawing	293
Summary	307
Chapter 10 ■ Using Dimensions	309
Understanding the Parts of an AutoCAD Dimension	310
Dimensioning in the Model or Layout View	311
Drawing Linear Dimensions	312
Dimensioning Nonorthogonal Objects	316
Adding a Note with an Arrow Using the Leader Tool	320
Using Ordinate Dimensions	324
Adding Tolerance Notation	325
Editing Dimensions	327
Setting Up the Dimension's Appearance	330
Summary	343
Chapter 11 ■ Gathering Information	345
Measuring Areas	346
Finding the Coordinate of a Point	349
Measuring Distances	350
Measuring Angles	350
Getting the General Status of the Drawing	351
Finding the Time Spent on a Drawing	352
Adding Nondrawing Data to Store with Your Drawing	353
Finding Text in a Drawing	354
Locating and Selecting Named Components	355
Finding Missing Support Files	356
Summary	359

Chapter 12 ■ Laying Out and Printing Your Drawing	361
Setting Up a Drawing for Printing	362
Printing Your Drawing	375
Storing Your Printer Settings	382
Controlling Color, Lines, and Fills Through Plot Styles	384
Assigning Named Plot Styles Directly to Layers and Objects	392
Converting a Drawing from Color Plot Styles to Named Plot Styles	395
Summary	395
Index	397
