

The background of the book cover is a deep purple and blue space scene. A large, curved, reddish-brown horizon line, possibly representing a planet or a distant galaxy, curves across the middle. The sky is filled with numerous small, white, star-like specks and a vertical band of slightly brighter, more textured light in the center.

Paul S. Wesson

Second Edition

SPACE-TIME-MATTER

Modern Higher-Dimensional Cosmology

CONTENTS

Preface	v
1. CONCEPTS AND THEORIES OF PHYSICS	1
1.1 Introduction	1
1.2 Fundamental Constants	3
1.3 General Relativity	13
1.4 Particle Physics	22
1.5 Kaluza-Klein Theory	34
1.6 Supergravity and Superstrings	40
1.7 Conclusion	45
2. INDUCED-MATTER THEORY	51
2.1 Introduction	51
2.2 A 5D Embedding for 4D Matter	52
2.3 The Cosmological Case	54
2.4 The Soliton Case	60
2.5 The Case of Neutral Matter	70
2.6 Conclusion	81
3. THE CLASSICAL AND OTHER TESTS IN 5D	85
3.1 Introduction	85
3.2 The 1-Body Metric	86
3.3 Photon Orbits	89
3.4 Particle Orbits	96
3.5 The Redshift Effect	101
3.6 The Geodetic Effect and GP-B	102
3.7 The Equivalence Principle and STEP	106
3.8 Conclusion	109
4. COSMOLOGY AND ASTROPHYSICS IN 5D	112
4.1 Introduction	112
4.2 The Standard Cosmological Model	113
4.3 Spherically-Symmetric Astrophysical Systems	129
4.4 Waves in a de Sitter Vacuum	134
4.5 Time-Dependent Solitons	137

4.6	Systems with Axial and Cylindrical Symmetry	141
4.7	Shell-Like and Flat Systems	144
4.8	Conclusion	154
5.	5D ELECTROMAGNETISM	159
5.1	Introduction	159
5.2	Metrics and Potentials	160
5.3	Geodesic Motion	163
5.4	Charged Solitons and Black Holes	169
5.5	Charged Black Hole Dynamics	173
5.6	Field Equations and Induced Matter	180
5.7	Conclusion	186
6.	THE CANONICAL METRIC AND THE FIFTH FORCE	188
6.1	Introduction	188
6.2	Gauges in Kaluza-Klein Theory	189
6.3	The Field Equations and the Cosmological Constant	194
6.4	The Equations of Motion and the Fifth Force	197
6.5	Comments on the Fifth Force	204
6.6	A Toy Model	207
6.7	Conclusion	210
7.	CANONICAL SOLUTIONS AND PHYSICAL QUANTITIES	214
7.1	Introduction	214
7.2	The Canonical 1-Body Solution	216
7.3	The Canonical Inflationary Solution	218
7.4	A Spinning Object in a 5D Space	220
7.5	The Nature of Mass and Charge	226
7.6	Particle Physics and Geometry	233
7.7	Conclusion	242
8.	RETROSPECT AND PROSPECT	246
	Index	253
