

Electrodynamics of Metamaterials

Andrey K Sarychev

Vladimir M Shalaev

Contents

<i>Preface</i>	vii
1. Introduction	1
1.1 Surface Plasmon Resonance	2
1.2 Percolation Threshold: Singularities in Metal-dielectric Composites	11
2. Conducting Stick Composites and Left Handed Metamaterials	19
2.1 Metamaterial	19
2.2 Conductivity and Dielectric Constant: Effective Medium Theory	27
2.3 High-frequency Response	38
2.3.1 Scattering of electromagnetic wave by conducting stick	39
2.3.2 High-frequency effective dielectric function	47
2.4 Giant Enhancements of Local Electric Fields	50
2.5 Optical Magnetism, Left-handed Optical Materials and Superresolution	54
2.5.1 Analytical theory of magnetic plasmon resonances	61
2.5.2 Numerical simulations of two-dimensional nanowire structures	68
2.5.3 Capacitance and inductance of two parallel wires	72
2.6 Planar Nanowire Composites	77
3. Semicontinuous Metal Films	83
3.1 Introduction	83

3.2	Giant Field Fluctuations	89
3.2.1	Lattice model	93
3.2.2	Numerical method	95
3.2.3	Field distributions on semicontinuous metal films	97
3.3	Localization of Surface Plasmons	102
3.3.1	Localization length and average intensity of local electric field	102
3.3.2	High-order moments of local electric fields	108
3.3.3	Properties of the localized eigenmodes	111
3.3.4	Scaling theory of giant field fluctuations	117
3.4	Anomalous Light Scattering from Semicontinuous Metal Films	122
3.4.1	Rayleigh scattering	123
3.4.2	Scaling properties of correlation function	127
3.5	Surface Enhanced Raman Scattering (SERS)	130
3.6	Giant Enhancements of Optical Nonlinearities	136
3.7	Percolation-enhanced Nonlinear Scattering: High Harmonic Generation	141
4.	Optical Properties of Metal-dielectric Films: Beyond Quasistatic Approximation	153
4.1	Generalized Ohm's Law (GOL) and Basic Equations	154
4.2	Transmittance, Reflectance, and Absorptance	160
4.3	Numerical Simulations of Local Electric and Magnetic Fields	165
4.4	Spatial Moments of Local Electric and Magnetic Fields	167
4.5	Extraordinary Optical Transmittance (EOT)	172
4.5.1	Resonant transmittance	187
4.5.2	Light-induced and light-controlled transmittance	200
4.5.3	Discussion	204
5.	Electromagnetic Properties of Metal-dielectric Crystals	205
5.1	Metal-dielectric Composites	206
5.2	Electromagnetic Crystals	218
5.2.1	Cubic lattice of metal spheres	219
5.2.2	A wire-mesh electromagnetic crystal	222
	<i>Bibliography</i>	231
