SECTION 1: PERSPECTIVES 1

Chapter 1 INTRODUCTION 3

1.0 Nanoscience and Nanotechnology—
The Distinction 5

- 1.0.1 *Requisite Definitions* 6
- 1.0.2 *Government Line* 8
- 1.0.3 *Working Definitions* 9

1.1 Historical Perspectives 13

- 1.1.1 *Concept of Atomism* 13
- 1.1.2 *Colored Glasses* 14
- 1.1.3 *Photography* 19
- 1.1.4 *Catalysis* 19
- 1.1.5 *Integrated Circuits and Chips* 21
- 1.1.6 *Microelectromechanical Systems* 23

1.2 Advanced Materials 23

- 1.2.1 *Thin Films* 25
- 1.2.2 *Fullerenes and Carbon Nanotubes* 30
- 1.2.3 *Quantum Dots* 31
- 1.2.4 *Other Advanced Materials* 32

1.3 Tools of Nano 33

- 1.3.1 *Electron Microscopy* 35
- 1.3.2 *Atomic Probe Microscopes* 36
- 1.3.3 *X-Ray Spectroscopy* 36
- 1.3.4 *Surface Enhanced Raman Spectroscopy* 38
- 1.3.5 *Lithography* 38
- 1.3.6 *Computer Modeling and Simulation* 39
- 1.3.7 *Molecular Electronics* 40

SECTION 2: NANOTOOLS 105

| | |
|--|------------|
| Chapter 3 CHARACTERIZATION METHODS | 107 |
| 3.0 Characterization of Nanomaterials | 108 |
| 3.0.1 <i>Background</i> | 109 |
| 3.0.2 <i>Types of Characterization Methods</i> | 113 |
| 3.0.3 <i>Optics and Resolution</i> | 116 |
| 3.0.4 <i>The Nano Perspective</i> | 122 |
| 3.1 Electron Probe Methods | 123 |
| 3.1.1 <i>Electron Interactions with Matter</i> | 125 |
| 3.1.2 <i>Scanning Electron Microscopy</i> <i>and Electron Probe Microanalysis</i> | 131 |
| 3.1.3 <i>Transmission Electron Microscopy</i> | 135 |
| 3.1.4 <i>Other Important Electron Probe Methods</i> | 140 |
| 3.2 Scanning Probe Microscopy Methods | 142 |
| 3.2.1 <i>Atomic Force Microscopy</i> | 144 |
| 3.2.2 <i>Scanning Tunneling Microscopy</i> | 148 |
| 3.2.3 <i>Other Important Scanning Probe Methods</i> | 152 |
| 3.2.4 <i>Atom-Probe Methods</i> | 153 |
| 3.3 Spectroscopic Methods | 154 |
| 3.3.1 <i>UV–Visible Absorption</i> <i>and Emission Spectroscopy</i> | 155 |
| 3.3.2 <i>Infrared and Raman Spectroscopy</i> | 157 |
| 3.3.3 <i>X-Ray Methods</i> | 158 |
| 3.4 Nonradiative and Nonelectron Characterization Methods | 159 |
| 3.4.1 <i>Particle Spectroscopy</i> | 159 |
| 3.4.2 <i>Thermodynamic Methods</i> | 161 |

| | | |
|------------|---|-----|
| 3.4.3 | <i>Particle Size Determination</i> | 161 |
| 3.4.4 | <i>Surface Area and Porosity</i> | 162 |
| 3.4.5 | <i>Other Important Characterization Methods</i> | 167 |
| References | 171 | |
| Problems | 173 | |

Chapter 4 FABRICATION METHODS 177

| | | |
|------------|--|-----|
| 4.0 | Fabrication of Nanomaterials | 178 |
| 4.0.1 | <i>Background</i> | 178 |
| 4.0.2 | <i>Types of Top-Down Fabrication Methods</i> | 180 |
| 4.0.3 | <i>Types of Bottom-Up Fabrication Methods</i> | 185 |
| 4.0.4 | <i>Nebulous Bottom-Up Fabrication Categories</i> | 191 |
| 4.0.5 | <i>The Nano Perspective</i> | 192 |
| 4.1 | Top-Down Fabrication | 193 |
| 4.1.1 | <i>Mechanical Methods (Mechanosynthesis)</i> | 194 |
| 4.1.2 | <i>Thermal Methods</i> | 196 |
| 4.1.3 | <i>High-Energy Methods</i> | 197 |
| 4.1.4 | <i>Chemical Fabrication Methods</i> | 200 |
| 4.1.5 | <i>Lithographic Methods</i> | 203 |
| 4.2 | Bottom-Up Fabrication | 210 |
| 4.2.1 | <i>Gaseous-Phase Methods</i> | 210 |
| 4.2.2 | <i>Liquid-Phase Methods</i> | 217 |
| 4.2.3 | <i>Solid-Phase Bottom-Up Fabrication?</i> | 223 |
| 4.2.4 | <i>Template Synthesis</i> | 224 |
| 4.3 | Computational Chemistry and Molecular Modeling | 225 |
| 4.3.1 | <i>History</i> | 226 |
| 4.3.2 | <i>General Types of Molecular Modeling Methods</i> | 227 |
| References | 231 | |
| Problems | 235 | |

SECTION 3: PHYSICS: PROPERTIES AND PHENOMENA 237

Chapter 5 MATERIALS, STRUCTURE, AND THE NANOSURFACE 239

| | | |
|-------|------------------------------|-----|
| 5.0 | Importance of the Surface | 240 |
| 5.0.1 | <i>Background</i> | 240 |
| 5.0.2 | <i>Natural Perspective</i> | 241 |
| 5.0.3 | <i>Inorganic Perspective</i> | 241 |
| 5.0.4 | <i>The Nano Perspective</i> | 243 |
| 5.1 | Engineering Materials | 243 |
| 5.1.1 | <i>Metals and Alloys</i> | 245 |
| 5.1.2 | <i>Semiconductors</i> | 246 |

| | | |
|------------|--|-----|
| 5.1.3 | <i>Ceramic and Glassy Materials</i> | 247 |
| 5.1.4 | <i>Carbon-Based Materials</i> | 247 |
| 5.1.5 | <i>Polymers</i> | 247 |
| 5.1.6 | <i>Biological Materials</i> | 249 |
| 5.1.7 | <i>Composites</i> | 249 |
| 5.2 | Particle Shape and the Surface | 250 |
| 5.2.1 | <i>Exterior Surface and Particle Shape</i> | 251 |
| 5.2.2 | <i>Interior Nanoscale Surface Area</i> | 255 |
| 5.3 | Surface and Volume | 257 |
| 5.3.1 | <i>Geometric Surface-to-Volume Ratio</i> | 258 |
| 5.3.2 | <i>Specific Surface Area</i> | 258 |
| 5.3.3 | <i>Spherical Cluster Approximation</i> | 260 |
| 5.4 | Atomic Structure | 261 |
| 5.4.1 | <i>Crystal Systems and the Unit Cell</i> | 261 |
| 5.4.2 | <i>Cubic and Hexagonal Systems</i> | 264 |
| 5.4.3 | <i>Packing Fraction and Density</i> | 267 |
| 5.4.4 | <i>Structural Magic Numbers</i> | 268 |
| 5.4.5 | <i>Miller Indices and X-Ray Diffraction</i> | 271 |
| 5.5 | Particle Orientation | 274 |
| 5.5.1 | <i>Surface Polarization in Metals</i> | 275 |
| 5.5.2 | <i>Particle Depolarization Factor and Screening Parameters</i> | 278 |
| 5.5.3 | <i>Quasi-Static Limit</i> | 280 |
| 5.5.4 | <i>Orientation of Nanometals in Transparent Media</i> | 281 |
| References | | 284 |
| Problems | | 285 |

Chapter 6 ENERGY AT THE NANOSCALE 289

| | | |
|-------|--|-----|
| 6.0 | Surface Energy | 290 |
| 6.0.1 | <i>Background</i> | 292 |
| 6.0.2 | <i>Nature</i> | 293 |
| 6.0.3 | <i>Introduction to Surface Stabilization</i> | 295 |
| 6.0.4 | <i>The Nano Perspective</i> | 296 |
| 6.1 | Basic Thermodynamics | 297 |
| 6.1.1 | <i>Derivation of Surface Tension, γ</i> | 297 |
| 6.1.2 | <i>Surface Excess</i> | 298 |
| 6.1.3 | <i>Kelvin Equation</i> | 299 |
| 6.1.4 | <i>Particle Curvature and the Young–Laplace Equation</i> | 300 |
| 6.1.5 | <i>Chemical Potential</i> | 302 |
| 6.2 | Liquid State | 302 |
| 6.2.1 | <i>Classical Surface Tension</i> | 305 |
| 6.2.2 | <i>Capillarity</i> | 307 |
| 6.2.3 | <i>Surface Tension Measurements</i> | 308 |

| | | |
|------------|---|-----|
| 6.3 | Surface Energy (and Stress) of Solids | 311 |
| 6.3.1 | <i>Interaction Pair Potentials</i> | 313 |
| 6.3.2 | <i>Surface Energy of Low-Index Crystals</i> | 313 |
| 6.3.3 | <i>Surface Energy of Nanoparticles</i> | 316 |
| 6.4 | Surface Energy Minimization Mechanisms | 317 |
| 6.4.1 | <i>Surface Tension Reduction in Liquids</i> | 317 |
| 6.4.2 | <i>DIVO Theory</i> | 318 |
| 6.4.3 | <i>Polymeric (Steric) Stabilization</i> | 321 |
| 6.4.4 | <i>Nucleation</i> | 321 |
| 6.4.5 | <i>Ostwald Ripening</i> | 322 |
| 6.4.6 | <i>Sintering</i> | 325 |
| 6.4.7 | <i>Structural Stabilization in Solids</i> | 326 |
| References | | 332 |
| Problems | | 333 |

| | | |
|------------------|---|-----|
| Chapter 7 | THE MATERIAL CONTINUUM | 335 |
| 7.0 | Material Continuum | 336 |
| 7.0.1 | <i>Material Properties and Phenomena</i> | 337 |
| 7.0.2 | <i>Background</i> | 339 |
| 7.0.3 | <i>Nano (Quantum) Perspective</i> | 341 |
| 7.1 | Basic Quantum Mechanics and the Solid State | 342 |
| 7.1.1 | <i>Ubiquitous Particle in a Box</i> | 343 |
| 7.1.2 | <i>Two-Dimensional Quantum Systems</i> | 348 |
| 7.1.3 | <i>Schrödinger Equation</i> | 350 |
| 7.1.4 | <i>Bohr Exciton Radius</i> | 352 |
| 7.1.5 | <i>Bandgaps</i> | 354 |
| 7.2 | Zero-Dimensional Materials | 357 |
| 7.2.1 | <i>Clusters</i> | 357 |
| 7.2.2 | <i>Metal Clusters and the HOCO-LUCO</i> | 360 |
| 7.2.3 | <i>Optical Properties of Clusters</i> | 360 |
| 7.2.4 | <i>Other Physical Properties and Phenomena</i> | 362 |
| 7.3 | One-Dimensional Materials | 367 |
| 7.3.1 | <i>Types of Nanowires</i> | 369 |
| 7.3.2 | <i>Physical Properties and Phenomena</i> | 369 |
| 7.4 | Two-Dimensional Materials | 370 |
| 7.4.1 | <i>Types of Thin Films</i> | 371 |
| 7.4.2 | <i>Physical Properties</i> | 371 |
| 7.5 | Hierarchical Structures | 372 |
| 7.5.1 | <i>Importance of Hierarchical Materials</i> | 372 |
| 7.6 | Quantum Size Effects and Scaling Laws | 373 |
| 7.6.1 | <i>Scaling Laws</i> | 374 |
| 7.6.2 | <i>Classical Scaling Laws and the Nanoscale</i> | 375 |
| 7.6.3 | <i>Scaling Laws for Clusters</i> | 376 |
| References | | 378 |
| Problems | | 380 |

| | | |
|------------------|---|------------|
| Chapter 8 | NANOTHERMODYNAMICS | 383 |
| 8.0 | Thermodynamics and Nanothermodynamics | 384 |
| 8.0.1 | <i>Background</i> | 384 |
| 8.0.2 | <i>The Nano Perspective</i> | 386 |
| 8.1 | Classical Equilibrium Thermodynamics | 387 |
| 8.1.1 | <i>Extensive and Intensive Properties and State Functions</i> | 387 |
| 8.1.2 | <i>The System, Its Surroundings, and Equilibrium</i> | 390 |
| 8.1.3 | <i>Laws of Thermodynamics</i> | 391 |
| 8.1.4 | <i>Fundamental Equations of Thermodynamics</i> | 395 |
| 8.1.5 | <i>Equilibrium Constant and Reaction Kinetics</i> | 397 |
| 8.2 | Statistical Mechanics | 398 |
| 8.2.1 | <i>Microstates and Macrostates</i> | 398 |
| 8.2.2 | <i>Canonical Ensembles</i> | 399 |
| 8.2.3 | <i>Energy (Molecular) Partition Functions</i> | 402 |
| 8.3 | Other Kinds of Thermodynamics | 402 |
| 8.3.1 | <i>The Onsager Relations</i> | 403 |
| 8.3.2 | <i>Nonequilibrium Thermodynamics</i> | 404 |
| 8.3.3 | <i>The Concept of Pseudoequilibrium</i> | 406 |
| 8.3.4 | <i>Cellular and Subcellular Systems</i> | 407 |
| 8.4 | Nanothermodynamics | 410 |
| 8.4.1 | <i>Background</i> | 413 |
| 8.4.2 | <i>Application of Classical Thermodynamics to Nanomaterials</i> | 415 |
| 8.4.3 | <i>Small System Thermodynamics (the Theory of T. L. Hill)</i> | 421 |
| 8.5 | Modern Nanothermodynamics | 424 |
| 8.5.1 | <i>Nonextensivity and Nonintensivity</i> | 424 |
| 8.5.2 | <i>Nanothermodynamics of a Single Molecule</i> | 427 |
| 8.5.3 | <i>Modeling Nanomaterials</i> | 427 |
| 8.5.4 | <i>Modern Non-nanothermodynamics?</i> | 429 |
| | References | 430 |
| | Problems | 433 |

SECTION 4: CHEMISTRY: SYNTHESIS AND MODIFICATION 435

| | | |
|------------------|--|------------|
| Chapter 9 | CARBON-BASED NANOMATERIALS | 437 |
| 9.0 | Carbon | 438 |
| 9.0.1 | <i>Types of Carbon Materials</i> | 439 |
| 9.0.2 | <i>Bonding in Carbon Compounds</i> | 442 |
| 9.0.3 | <i>The Nano Perspective</i> | 443 |
| 9.1 | Fullerenes | 445 |
| 9.1.1 | <i>Fullerene Properties</i> | 446 |
| 9.1.2 | <i>Fullerene Synthesis</i> | 447 |
| 9.1.3 | <i>Physical and Chemical Reactions of Fullerenes</i> | 448 |

| | | |
|-------|--|-----|
| 9.2 | Carbon Nanotubes | 453 |
| 9.2.1 | <i>Structure of Single-Walled Carbon Nanotubes</i> | 454 |
| 9.2.2 | <i>Physical Properties of Single-Walled Carbon Nanotubes</i> | 458 |
| 9.2.3 | <i>Synthesis of Carbon Nanotubes</i> | 464 |
| 9.2.4 | <i>Growth Mechanisms</i> | 467 |
| 9.2.5 | <i>Chemical Modification of Carbon Nanotubes</i> | 469 |
| 9.3 | Diamondoid Nanomaterials | 474 |
| 9.3.1 | <i>Diamondoids</i> | 476 |
| 9.3.2 | <i>Thin Diamond Films (and Other Ultrahard Substances)</i> | 477 |
| 9.3.3 | <i>Chemical Modification of CVD Diamond</i> | 478 |
| | References | 480 |
| | Problems | 485 |

Chapter 10 CHEMICAL INTERACTIONS AT THE NANOSCALE 487

| | | |
|--------|---|-----|
| 10.0 | Bonding Considerations at the Nanoscale | 488 |
| 10.0.1 | <i>Background</i> | 490 |
| 10.0.2 | <i>Intramolecular versus Intermolecular Bonding</i> | 492 |
| 10.0.3 | <i>Types of Intermolecular Bonding</i> | 494 |
| 10.0.4 | <i>The Nano Perspective</i> | 496 |
| 10.1 | Electrostatic Interactions | 497 |
| 10.1.1 | <i>Ion Pair Interactions</i> | 500 |
| 10.1.2 | <i>Solvent Effects</i> | 501 |
| 10.1.3 | <i>Ion-Dipole and Dipole-Dipole Interactions</i> | 505 |
| 10.1.4 | <i>Dative Bonds</i> | 509 |
| 10.1.5 | <i>π-Interactions</i> | 515 |
| 10.2 | Hydrogen Bonding | 517 |
| 10.2.1 | <i>Standard Hydrogen Bonds</i> | 517 |
| 10.2.2 | <i>C-α-H\cdotsO Hydrogen Bonds</i> | 523 |
| 10.2.3 | <i>Halogen Bonds</i> | 523 |
| 10.2.4 | <i>Hydrogen Bonds and Living Things</i> | 524 |
| 10.3 | Van der Waals Attraction | 524 |
| 10.3.1 | <i>Contributions to the van der Waals Interaction</i> | 526 |
| 10.3.2 | <i>Van der Waals Radius</i> | 529 |
| 10.3.3 | <i>Physical Property Dependence</i> | 529 |
| 10.4 | Hydrophobic Effect | 533 |
| 10.4.1 | <i>Background</i> | 533 |

| | Problems | 540 |

Chapter 11 SUPRAMOLECULAR CHEMISTRY 543

- 11.0 Chemistry of Nanomaterials 545
 11.0.1 *Background* 546
 11.0.2 *Types of Chemical Synthesis* 548
 11.0.3 *Thermodynamic versus Kinetic Control and Selectivity* 550
 11.0.4 *Introduction to Supramolecular Design* 554
 11.0.5 *The Nano Perspective* 555
- 11.1 Supramolecular Chemistry 557
 11.1.1 *The Host–Guest Relationship* 557
 11.1.2 *Molecular Recognition* 559
 11.1.3 *Synthetic Supramolecular Host Species* 567
 11.1.4 *Surfactants and Micelles* 576
 11.1.5 *Biological Supramolecular Host Species* 578
- 11.2 Design and Synthesis of Selected Supramolecular Species 581
 11.2.1 *Thermodynamic and Kinetic Effects* 585
 11.2.2 *Basic Design Parameters: The Host, the Guest, and the Solvent* 593
- 11.3 Extended Supramolecular Structures 595
 11.3.1 *Golden Molecular Squares* 596
 11.3.2 *Synthesis of Benzocoronene Complexes* 599
 11.3.3 *Helical Supramolecular Polymers* 602
- References 603
Problems 605

Chapter 12 CHEMICAL SYNTHESIS AND MODIFICATION OF NANOMATERIALS 609

- 12.0 Chemistry and Chemical Modification 610
 12.0.1 *Types of Synthesis Processes* 611
 12.0.2 *Introduction to Molecular Self-Assembly* 611
 12.0.3 *Introduction to Chemical Functionalization* 613
 12.0.4 *The Nano Perspective* 614
- 12.1 Self-Assembly Revisited 615
 12.1.1 *Langmuir–Blodgett Films* 619
 12.1.2 *Gold–Thiol Monolayers* 626
 12.1.3 *Organosilanes* 629
- 12.2 Synthesis and Chemical Modification of Nanomaterials 631
 12.2.1 *Synthesis and Modification of Zero-Dimensional Materials* 631
 12.2.2 *Synthesis and Modification of One-Dimensional Materials* 645

| | | |
|--------|--|-----|
| 12.2.3 | <i>Synthesis and Modification of Two-Dimensional Materials</i> | 647 |
| 12.3 | Template Synthesis | 651 |
| 12.3.1 | <i>Macroporous Template Materials</i> | 657 |
| 12.3.2 | <i>Mesoporous Template Materials</i> | 658 |
| 12.3.3 | <i>Microporous Template Materials</i> | 668 |
| 12.3.4 | <i>Other Interesting Template Materials</i> | 668 |
| 12.4 | Polymer Chemistry and Nanocomposites | 669 |
| 12.4.1 | <i>Introduction to Polymer Chemistry</i> | 669 |
| 12.4.2 | <i>Polymer Synthesis</i> | 670 |
| 12.4.3 | <i>Block Copolymers</i> | 675 |
| 12.4.4 | <i>Emulsion Polymerization</i> | 676 |
| 12.4.5 | <i>Nanocomposites</i> | 681 |
| | References | 683 |
| | Problems | 690 |

SECTION 5: NATURAL AND BIONANOSCIENCE 693

Chapter 13 NATURAL NANOMATERIALS 695

| | | |
|--------|---|-----|
| 13.0 | Natural Nanomaterials | 696 |
| 13.0.1 | <i>Nanomaterials All around Us</i> | 697 |
| 13.0.2 | <i>Aesthetic and Practical Value of Natural Nanomaterials</i> | 697 |
| 13.0.3 | <i>Learning from Natural Nanomaterials</i> | 697 |
| 13.0.4 | <i>The Nano Perspective</i> | 697 |
| 13.1 | Inorganic Natural Nanomaterials | 698 |
| 13.1.1 | <i>Minerals</i> | 698 |
| 13.1.2 | <i>Clays</i> | 700 |
| 13.1.3 | <i>Natural Carbon Nanoparticles</i> | 703 |
| 13.1.4 | <i>Nanoparticles from Space</i> | 706 |
| 13.2 | Nanomaterials from the Animal Kingdom | 706 |
| 13.2.1 | <i>Building Blocks of Biomaterials</i> | 707 |
| 13.2.2 | <i>Shells</i> | 709 |
| 13.2.3 | <i>Exoskeletons</i> | 711 |
| 13.2.4 | <i>Endoskeletons</i> | 713 |
| 13.2.5 | <i>Skin and Its Extensions</i> | 718 |
| 13.2.6 | <i>Summary</i> | 720 |
| 13.3 | Nanomaterials Derived from Cell Walls | 721 |
| 13.3.1 | <i>Paper</i> | 721 |
| 13.3.2 | <i>Cotton</i> | 722 |
| 13.3.3 | <i>Bacterial Fibers</i> | 723 |
| 13.3.4 | <i>Diatoms</i> | 725 |
| 13.3.5 | <i>Lotus Flower</i> | 726 |
| 13.4 | Nanomaterials in Insects | 728 |
| 13.4.1 | <i>Chitin</i> | 728 |

| | | |
|--------|--|-----|
| 13.4.2 | <i>Chitin Structures in Insect Wings</i> | 729 |
| 13.4.3 | <i>Butterfly Wings</i> | 730 |
| 13.4.4 | <i>Color and Structure</i> | 730 |
| 13.5 | Gecko Feet: Adhesive Nanostructures | 734 |

Chapter 14 BIOMOLECULAR NANOSCIENCE 749

| | | |
|--------|---|-----|
| 14.0 | Introduction to Biomolecular Nanoscience | 751 |
| 14.0.1 | <i>Definitions: Biomolecular Nanoscience</i> | 751 |
| 14.0.2 | <i>Historical Origins</i> | 752 |
| 14.0.3 | <i>Biomolecular Nanoscience: Roots in Traditional Science</i> | 752 |
| 14.0.4 | <i>The Nano Perspective</i> | 754 |
| 14.1 | Material Basis of Life | 755 |
| 14.1.1 | <i>Molecular Building Blocks—From the Bottom Up</i> | 755 |
| 14.1.2 | <i>Cells and Organized Structures</i> | 761 |
| 14.1.3 | <i>Viruses</i> | 768 |
| 14.1.4 | <i>Prions</i> | 768 |
| 14.1.5 | <i>Toxins and Disruptive Nanoparticles</i> | 769 |
| 14.1.6 | <i>Completing the Circle from Top Down to Bottom Up</i> | 769 |
| 14.2 | Cellular Membranes and Signaling Systems | 772 |
| 14.2.1 | <i>Cell Membrane Function</i> | 773 |
| 14.2.2 | <i>Ion Pumps, Ion Channels, and Maintenance of the Cellular Environment</i> | 775 |
| 14.2.3 | <i>Transmission of Neural Impulses: Action Potential and K Channel</i> | 775 |
| 14.2.4 | <i>Synapses and Neurotransmitters</i> | 782 |
| 14.2.5 | <i>Hormones and Regulation of Cell Growth and Metabolism</i> | 783 |
| 14.3 | DNA, RNA, and Protein Synthesis | 785 |
| 14.3.1 | <i>DNA and RNA Function and Structure</i> | 785 |
| 14.3.2 | <i>DNA Replication</i> | 787 |

| | | |
|--------|--|-----|
| 14.3.3 | <i>DNA as a Genetic Information Storage Material</i> | 789 |
| 14.3.4 | <i>RNA and DNA Nanoengines: Viruses and Phages</i> | 792 |
| 14.3.5 | <i>The Role of the Protein Environment</i> | 793 |
| 14.4 | Concluding Remarks | 794 |
| 14.4.1 | <i>Emerging Concepts and Developments</i> | 794 |
| | References | 794 |
| | Problems | 799 |
