

COMPREHENSIVE CHEMOMETRICS

Chemical and Biochemical Data Analysis

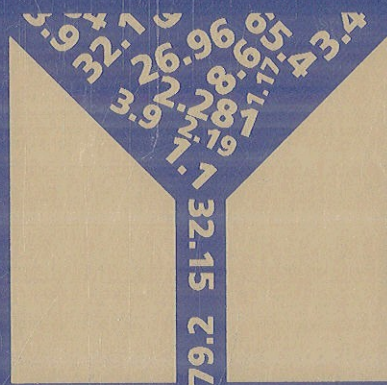

Volume

2

Data Preprocessing • Linear Soft-Modeling
• Unsupervised Data Mining

Section Editors: J. Trygg, A. de Juan, D. Coomans

Editors-in-Chief
Steven D. Brown
Romà Tauler
Beata Walczak

Contents of Volume 2

Contributors to Volume 2	ix
Preface	xiii
Editors in Chief	xiv
Contents of All Volumes	xv
Section Editors	xix

Data Preprocessing

2.01	Background Estimation, Denoising, and Preprocessing	1
	J. Frygg, <i>Umeå University, Umeå, Sweden</i>	
	J. Gabrielsson, <i>AcureOmics AB, Umeå University, Umeå, Sweden</i>	
	T. Lundstedt, <i>Uppsala University, Uppsala, Sweden</i>	
2.02	Denoising and Signal-to-Noise Ratio Enhancement: Classical Filtering	9
	D. F. Thekkudan and S. C. Ratan, <i>Virginia Commonwealth University, Richmond, VA, USA</i>	
2.03	Denoising and Signal-to-Noise Ratio Enhancement: Wavelet Transform and Fourier Transform	25
	M. S. Reis and P. M. Saraiva, <i>University of Coimbra, Coimbra, Portugal</i>	
	B. R. Bakshi, <i>Ohio State University, Columbus, OH, USA</i>	
2.04	Denoising and Signal-to-Noise Ratio Enhancement: Derivatives	57
	V.-M. Taavitsainen, <i>Helsinki Metropolia University of Applied Sciences, Vantaa, Finland</i>	
2.05	Denoising and Signal-to-Noise Ratio Enhancement: Splines	67
	V.-M. Taavitsainen, <i>Helsinki Metropolia University of Applied Sciences, Vantaa, Finland</i>	
2.06	Variable Shift and Alignment	85
	R. H. Jellema, <i>TNO Quality of Life, AZ Zeist, The Netherlands</i>	
2.07	Normalization and Closure	109
	M. Bylesjö, <i>Umeå University, Umeå, Sweden</i>	
	O. Cloarec and M. Rantalainen, <i>University of Oxford, Oxford, UK</i>	
2.08	Model Based Preprocessing and Background Elimination: OSC, OPLS, and O2PLS	129
	M. Bylesjö, <i>Umeå University, Umeå, Sweden</i>	
	M. Rantalainen, <i>University of Oxford, Oxford, UK</i>	

- 2.09 Standard Normal Variate, Multiplicative Signal Correction and Extended Multiplicative Signal Correction Preprocessing in Biospectroscopy 139
A. Kohler, *Nofima Mat, Norwegian Institute of Food, Fisheries and Aquaculture Research, Ås, Norway; Norwegian University of Life Sciences, Ås, Norway*
M. Zimonja and V. Segtnan, *Nofima Mat, Norwegian Institute of Food, Fisheries and Aquaculture Research, Ås, Norway*
H. Martens, *Nofima Mat, Norwegian Institute of Food, Fisheries and Aquaculture Research, Ås, Norway; Norwegian University of Life Sciences, Ås, Norway; Centre for Integrative Genetics, Ås, Norway*
- 2.10 Batch Process Modeling and MSPC 163
S. Wold, *Umeå University, Umeå, Sweden*
N. Kettaneh-Wold, *Umetrics Inc., Kinnelon, NJ, USA*
J. F. MacGregor, *McMaster University, Hamilton, ON, Canada*
K. G. Dunn, *ProSensus Inc., Hamilton, ON, Canada*
- 2.11 Evaluation of Preprocessing Methods 199
H. Jousson and J. Gabrielsson, *AcureOmics AB, Umeå University, Umeå, Sweden*

Linear Soft-Modeling

- 2.12 Linear Soft-Modeling: Introduction 207
A. de Juan, *University of Barcelona, Barcelona, Spain*
R. Tauler, *Institute of Environmental Assessment and Water Research (IDEA), Spanish Council of Scientific Research (CSIC), Barcelona, Spain*
- 2.13 Principal Component Analysis: Concept, Geometrical Interpretation, Mathematical Background, Algorithms, History, Practice 211
K. H. Esbensen, *Aalborg University Esbjerg, Esbjerg, Denmark*
P. Geladi, *Swedish University of Agricultural Sciences, Umeå, Sweden*
- 2.14 Independent Component Analysis 227
F. Westad, *M-Analyse, Oslo, Norway*
M. Kermit, *AMO Software AS, Oslo, Norway*
- 2.15 Introduction to Multivariate Curve Resolution 249
S. C. Rutan, *Virginia Commonwealth University, Richmond, VA, USA*
A. de Juan, *University of Barcelona, Barcelona, Spain*
R. Tauler, *Institute of Environmental Assessment and Water Research (IDEA), Spanish Council of Scientific Research (CSIC), Barcelona, Spain*
- 2.16 Two-Way Data Analysis: Evolving Factor Analysis 261
M. Maeder, *University of Newcastle, Callaghan, NSW, Australia*
A. de Juan, *University of Barcelona, Barcelona, Spain*
- 2.17 Two-Way Data Analysis: Detection of Purest Variables 275
W. Windig, *Eigenvektor Research, Inc., Wenatchee, WA, USA*
- 2.18 Two-Way Data Analysis: Multivariate Curve Resolution – Noniterative Resolution Methods 309
Y. L. Liang, *Central South University, Changsha, Hunan, People's Republic of China*
- 2.19 Two-Way Data Analysis: Multivariate Curve Resolution – Iterative Resolution Methods 325
A. de Juan, *University of Barcelona, Barcelona, Spain*
S. C. Rutan, *Virginia Commonwealth University, Richmond, VA, USA*
R. Tauler, *Institute of Environmental Assessment and Water Research (IDEA), Spanish Council of Scientific Research (CSIC), Barcelona, Spain*
- 2.20 Two-Way Data Analysis: Multivariate Curve Resolution – Error in Curve Resolution 345
R. Tauler, *Institute of Environmental Assessment and Water Research (IDEA), Spanish Council of Scientific Research (CSIC), Barcelona, Spain*
M. Maeder, *University of Newcastle, Callaghan, NSW, Australia*

2.21	Multiway Data Analysis: Eigenvector-Based Methods J. Ferré and R. Boqué, <i>Rovira i Virgili University, Tarragona, Spain</i> N. M. Faber, <i>Chemometry Consultancy, Beek-Ubbergen, The Netherlands</i>	365
2.22	Multilinear Models: Iterative Methods G. Tomasi and R. Bro, <i>University of Copenhagen, Frederiksberg, Denmark</i>	411
2.23	Multiset Data Analysis: ANOVA Simultaneous Component Analysis and Related Methods H. C. J. Hoefsloot, D. J. Vis, J. A. Westerhuis, and A. K. Smilde, <i>University of Amsterdam, Amsterdam, Netherlands</i> J. J. Jansen, <i>Netherlands Institute for Ecology, Heteren, Netherlands</i>	453
2.24	Multiset Data Analysis: Extended Multivariate Curve Resolution R. Tauler, <i>Institute of Environmental Assessment and Water Research (IDAEA), Spanish Council of Scientific Research (CSIC), Barcelona, Spain</i> M. Maeder, <i>University of Newcastle, Callaghan, NSW, Australia</i> A. de Juan, <i>University of Barcelona, Barcelona, Spain</i>	473
2.25	Other Topics in Soft-Modeling: Maximum Likelihood-Based Soft-Modeling Methods P. D. Wentzell, <i>Dalhousie University, Halifax, NS, Canada</i>	507

Unsupervised Data Mining

2.26	Unsupervised Data Mining: Introduction D. Coomans, C. Smyth, I. Lee and T. Hancock, <i>James Cook University, Townsville, QLD, Australia</i> J. Yang, <i>University of Western Sydney, Campbelltown, NSW, Australia</i>	559
2.27	Common Clustering Algorithms I. Lee, <i>James Cook University, Townsville, QLD, Australia</i> J. Yang, <i>University of Western Sydney, Campbelltown, NSW, Australia</i>	577
2.28	Data Mapping: Linear Methods versus Nonlinear Techniques R. Wehrens, <i>Radboud University Nijmegen, Nijmegen, The Netherlands</i>	619
2.29	Density-Based Clustering Methods M. Daszykowski and B. Walczak, <i>University of Silesia, Katowice, Poland</i>	635
2.30	Model-Based Clustering G. J. McLachlan, <i>University of Queensland, St. Lucia, Brisbane, Australia</i>	655
2.31	Tree-Based Clustering and Extensions T. Hancock and C. Smyth, <i>James Cook University, Townsville, QLD, Australia</i>	683
