

INTERNATIONAL STUDENT EDITION

4th Edition

# The World of Chemistry

## Essentials

Joesten, Castellion & Hogg

Not for Sale in the  
United States

# Contents

## 1 Living in a World of Chemistry 1

- 1.1 The World of Chemistry 1
- 1.2 DNA, Biochemistry, and Science 4
- 1.3 Air-Conditioning, the Ozone Hole, and Technology 7
- 1.4 Fossil Fuel Use and Global Warming 10
- 1.5 Benefits/Risks and the Law 10
- 1.6 What Is Your Attitude Toward Chemistry? 14
- The Chemistry of Harry Potter and the Chamber of Secrets (2002) 5*

## 2 The Chemical View of Matter 17

- 2.1 Elements—The Simplest Kind of Matter 18
- 2.2 Chemical Compounds—Atoms in Combination 19
- 2.3 Mixtures and Pure Substances 19
- 2.4 Changes in Matter: Is It Physical or Chemical? 21
- 2.5 Classification of Matter 22
- 2.6 The Chemical Elements 26
- 2.7 Using Chemical Symbols 28
- 2.8 The Quantitative Side of Science 31
- The Personal Side Alfred Bernhard Nobel (1833–1896) 25*

## 3 Atoms and the Periodic Table 39

- 3.1 John Dalton's Atomic Theory 40
- 3.2 Structure of the Atom 41
- 3.3 Modern View of the Atom 45
- 3.4 Where Are the Electrons in Atoms? 49
- 3.5 Development of the Periodic Table 57
- 3.6 The Modern Periodic Table 59
- 3.7 Periodic Trends 61
- 3.8 Properties of Main-Group Elements 64
- The Personal Side Ernest Rutherford (1871–1937) 44*
- The Personal Side Niels Bohr (1885–1962) 51*

© Roger Rossmeier/CORBIS

Page 126

## 4 The Air We Breathe 71

- 4.1 The Lower Atmospheric Regions and Their Composition 72
- 4.2 Air: A Source of Pure Gases 75
- 4.3 Natural Versus Anthropogenic Air Pollution 76
- 4.4 Air Pollutants: Particle Size Makes a Difference 77
- 4.5 Smog 77
- 4.6 Nitrogen Oxides 80
- 4.7 Ozone as a Pollutant 83
- 4.8 Sulfur Dioxide: A Major Primary Pollutant 84
- 4.9 Hydrocarbons and Air Pollution 86
- 4.10 Carbon Monoxide 86
- 4.11 A Look Ahead 88

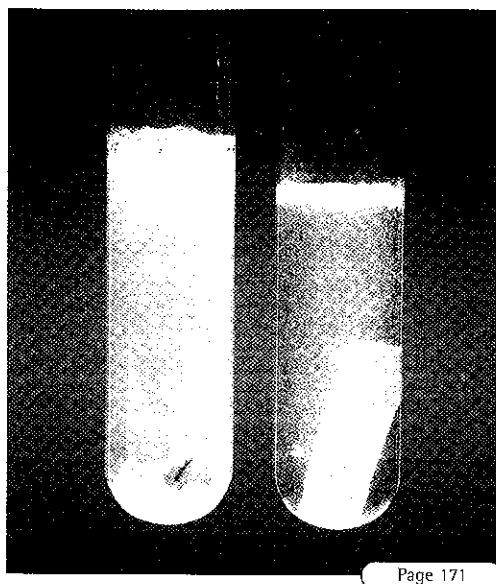

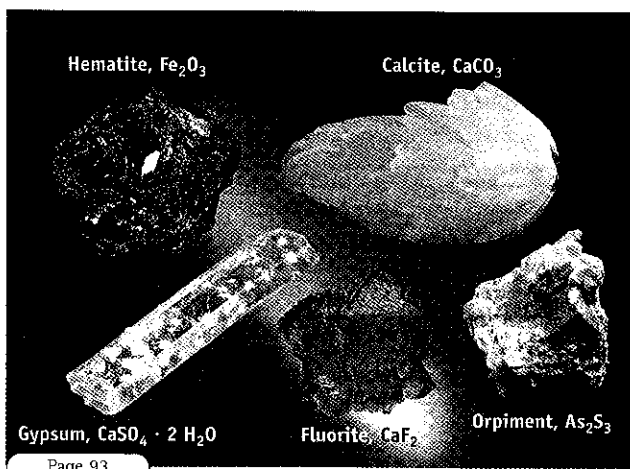

## 5 Chemical Bonding and States of Matter 93

- 5.1 Electronegativity and Bonding 94
- 5.2 Ionic Bonds and Ionic Compounds 95
- 5.3 Covalent Bonds 101
- 5.4 Shapes of Molecules 107
- 5.5 Polar and Nonpolar Bonding 111
- 5.6 Properties of Molecular and Ionic Compounds Compared 112
- 5.7 Intermolecular Forces 113
- 5.8 The States of Matter 114
- 5.9 Gases 116
- 5.10 Liquids 117
- 5.11 Solutions 117
- 5.12 Solids 119
- 5.13 Reversible State Changes 120

The Personal Side *Gilbert Newton Lewis* (1875–1946) 103

## 6 Carbon Dioxide and the Greenhouse Effect 125

- 6.1 Atmospheric Carbon Dioxide Concentration over Time 126
  - 6.2 What Is the Greenhouse Effect? 128
  - 6.3 Why Worry about Carbon Dioxide? 130
  - 6.4 Other Greenhouse Gases 133
  - 6.5 Sources of Greenhouse Gases 133
  - 6.6 What Do We Know for Sure about Global Warming? 136
  - 6.7 Consequences of Global Warming—Good or Bad? 136
  - 6.8 The Kyoto Conference Addresses Global Warming 137
  - 6.9 Possible Responses to Global Warming 138
- The Chemistry of *Apollo 13* (1995) 127

## 7 Chlorofluorocarbons and the Ozone Layer 143

- 7.1 The Oxygen–Ozone Screen 144
- 7.2 Where Is the Ozone? 145
- 7.3 The Ozone Layer Is Disappearing 147
- 7.4 Why CFCs and Why at the Poles? 151
- 7.5 What Are the Implications of Increases in the Size of the Ozone Hole? 154
- 7.6 Can We Do Anything about the Ozone Hole? 155
- 7.7 What Will Replace CFCs? 156

The Personal Side *Susan Solomon* (1956– ) 148

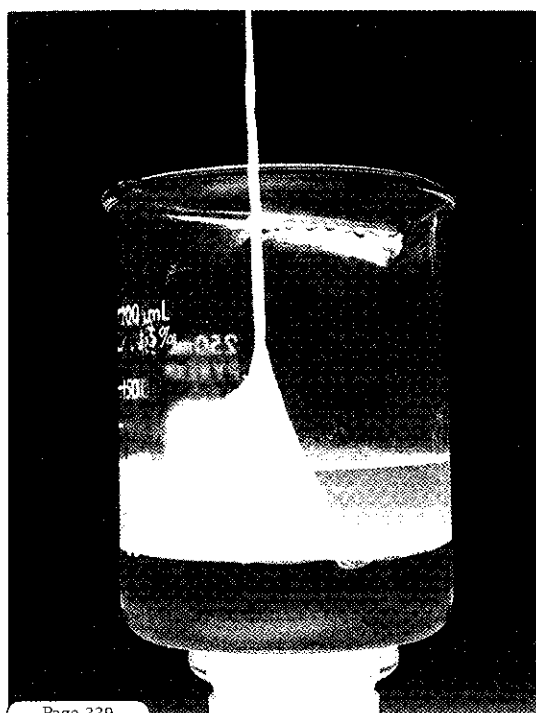

The Personal Side *Paul J. Crutzen* (1933– ),  
*Mario J. Molina* (1943– ), and  
*F. Sherwood Rowland* (1927– ) 150

## 8 Chemical Reactivity: Chemicals in Action 161

- 8.1 Balanced Chemical Equations and What They Tell Us 162
- 8.2 The Mighty Mole and the “How Much?” Question 164
- 8.3 Rates and Reaction Pathways: The “How Fast?” Question 169
- 8.4 Chemical Equilibrium and the “How Far?” Question 173
- 8.5 The Driving Forces and the “Why?” Question 175
- 8.6 Recycling: New Metal for Old 179

The Personal Side *Amadeo Avogadro* (1776–1856) 168

The World of Chemistry *Green Design* 180

Page 339

## 9 Acid-Base Reactions 185

- 9.1 Acids and Bases: Chemical Opposites 186
- 9.2 The Strengths of Acids and Bases 190
- 9.3 Molarity and the pH Scale 192
- 9.4 Acid-Base Buffers 196
- 9.5 Corrosive Cleaners 198
- 9.6 Heartburn: Why Reach for an Antacid? 199

## 10 Oxidation-Reduction Reactions 203

- 10.1 Oxidation and Reduction 204
- 10.2 Oxidizing Agents: They Bleach and They Disinfect 205
- 10.3 Reducing Agents: For Metallurgy and Good Health 207
- 10.4 Batteries 210
- 10.5 Electrolysis: Chemical Reactions Caused by Electron Flow 215
- 10.6 Corrosion: Unwanted Oxidation-Reduction 217
- The Personal Side *Richard Feynman and the Challenger Explosion* 207

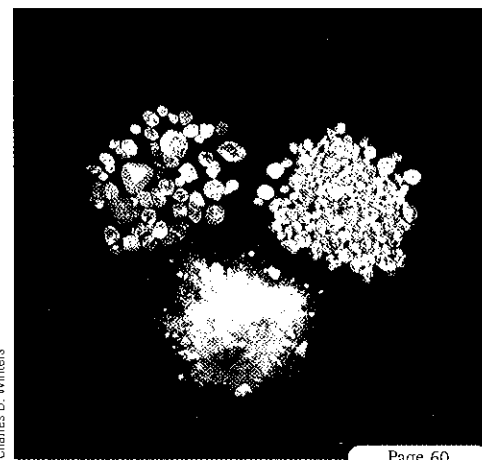

## 11 Water, Water Everywhere, But Not a Drop to Drink? 221

- 11.1 The Unique Properties of Water 222
- 11.2 Acid Rainfall 226
- 11.3 How Can There Be a Shortage of Something as Abundant as Water? 228

- 11.4 What Is the Difference between Clean Water and Polluted Water? 231
- 11.5 The Impact of Hazardous Industrial Wastes on Water Quality 233
- 11.6 Household Wastes that Affect Water Quality 236
- 11.7 Toxic Elements Often Found in Water 237
- 11.8 Measuring Water Pollution 238
- 11.9 How Water Is Purified Naturally 239
- 11.10 Water Purification Processes: Classical and Modern 241
- 11.11 Softening Hard Water 242
- 11.12 Chlorination and Ozone Treatment of Water 243
- 11.13 Freshwater from the Sea 245
- 11.14 Pure Drinking Water for the Home 247
- The World of Chemistry *Green Chemistry* 235
- The Chemistry of *Dr. Strangelove, or How I Learned to Stop Worrying and Love the Bomb* (1964) 245

## 12 Energy and Hydrocarbons 251

- 12.1 Energy from Fuels 252
- 12.2 Petroleum 257
- 12.3 Natural Gas 262
- 12.4 Coal 263
- 12.5 Methanol as a Fuel 264
- 12.6 Classes of Hydrocarbons 266
- 12.7 Alkenes and Alkynes: Reactive Cousins of Alkanes 271
- 12.8 The Cyclic Hydrocarbons 275
- 12.9 Alcohols: Oxygen Comes on Board 278
- The World of Chemistry *Organic Metals* 275
- The Personal Side *Percy Lavon Julian* (1899-1975) 280

### 13 Nuclear Changes and Nuclear Power 285

- 13.1 The Discovery of Radioactivity 286
- 13.2 Nuclear Reactions 287
- 13.3 The Stability of Atomic Nuclei 291
- 13.4 Activity and Rates of Nuclear Disintegrations 292
- 13.5 Artificial Nuclear Reactions 295
- 13.6 Transuranium Elements 296
- 13.7 Radon and Other Sources of Background Radiation 297
- 13.8 Useful Applications of Radioactivity 300
- 13.9 Energy from Nuclear Reactions 303
- 13.10 Useful Nuclear Energy 306
  - The Personal Side *The Curies* 287
  - The Chemistry of *The Saint* (1997) 290
  - The Personal Side *Glenn Theodore Seaborg* (1912–1999) 298
  - The Chemistry of *Spider-Man 2* (2004) 312

### 14 Organic Chemicals and Polymers 317

- 14.1 Organic Chemicals 319
- 14.2 Alcohols and Their Oxidation Products 320
- 14.3 Carboxylic Acids and Esters 326
- 14.4 Synthetic Organic Polymers 328
- 14.5 New Polymer Materials 341
- 14.6 Recycling Plastics 343
  - The Chemistry of *Romy and Michelle's High School Reunion* (1995) 336
  - The Personal Side *Stephanie Louise Kwolek* (1925– ) 341
  - The World of Chemistry *Chemistry in Outer Space* 342
  - The Chemistry of *The Man in the White Suit* (1951) 345

### 15 The Chemistry of Life 351

- 15.1 Handedness and Optical Isomerism 352
- 15.2 Carbohydrates 357
- 15.3 Lipids 362
- 15.4 Soaps, Detergents, and Shampoos 368
- 15.5 Creams and Lotions 371
- 15.6 Amino Acids 373
- 15.7 Peptides and Proteins 376
- 15.8 Protein Structure and Function 379
- 15.9 Hair Protein and Permanent Waves 382
- 15.10 Energy and Biochemical Systems 385

- 15.11 Nucleic Acids 387
  - The World of Chemistry *Chiral Drugs* 356
  - The World of Chemistry *Cis and Trans Fatty Acids and Your Health* 364
  - The Chemistry of *Men in Black II* (2002) 386

### 16 Nutrition: The Basis of Healthy Living 397

- 16.1 Digestion: It's Just Chemical Decomposition 398
- 16.2 Energy: Use It or Store It 399
- 16.3 Sugar and Polysaccharides: Digestible and Indigestible 403
- 16.4 Lipids, Mostly Fats and Oils 403
- 16.5 Proteins in the Diet 405
- 16.6 Our Daily Diet 407
- 16.7 Vitamins in the Diet 409
- 16.8 Minerals in the Diet 412
- 16.9 Food Additives 415
- 16.10 Some Daily Diet Arithmetic 418
  - The Chemistry of *Lorenzo's Oil* (1992) 404
  - The World of Chemistry *The Dietary Guidelines for Americans 2005* 406
  - The World of Chemistry *Olestra, a "Fat" for Calorie Counters* 411

### 17 Chemistry and Medicine 425

- 17.1 Medicines, Prescription Drugs, and Diseases: The Top Tens 426
- 17.2 Drugs for Infectious Diseases 428
- 17.3 AIDS, a Viral Disease 431
- 17.4 Steroid Hormones 434
- 17.5 Neurotransmitters 435
- 17.6 The Dose Makes the Poison 438

|       |   |     |
|-------|---|-----|
| 17.7  | Painkillers of All Kinds                                    | 439 |
| 17.8  | Mood-Altering Drugs, Legal and Illegal                      | 441 |
| 17.9  | Colds, Allergies, and Other “Over-the-Counter” Conditions   | 445 |
| 17.10 | Preventive Maintenance: Sunscreens and Toothpaste           | 447 |
| 17.11 | Heart Disease   | 450 |
| 17.12 | Cancer, Carcinogens, and Anticancer Drugs                   | 452 |
| 17.13 | Homeopathic Medicine  | 456 |
|       | <b>The Personal Side</b> <i>Paul Ehrlich</i> (1854–1915)    | 429 |
|       | <b>The Chemistry of</b> <i>Me &amp; Isaac Newton</i> (1999) | 431 |
|       | <b>The World of Chemistry</b> <i>Addictive Drugs</i>        | 445 |

## 18 The Chemistry of Useful Materials 461

|      |   |     |
|------|---|-----|
| 18.1 | The Whole Earth   | 462 |
| 18.2 | Chemicals from the Hydrosphere                          | 463 |
| 18.3 | Metals and Their Ores                                   | 466 |
| 18.4 | Conductors, Semiconductors, and Superconductors         | 471 |
| 18.5 | From Rocks to Glass, Ceramics, and Cement               | 476 |
|      | <b>The World of Chemistry</b> <i>Swords of Damascus</i> |     |
|      | <i>Leave Legacy of Superplastic Steel</i>               | 470 |
|      | <b>The World of Chemistry</b> <i>Asbestos</i>           | 479 |

## 19 Feeding the World 485

|      |   |     |
|------|---|-----|
| 19.1 | World Population Growth                                     | 486 |
| 19.2 | What Is Soil?   | 488 |
| 19.3 | Nutrients   | 491 |
| 19.4 | Fertilizers Supplement Natural Soils                        | 494 |
| 19.5 | Protecting Food Crops                                       | 499 |
| 19.6 | Sustainable Agriculture                                     | 503 |
| 19.7 | Agricultural Genetic Engineering                            | 506 |
|      | <b>The World of Chemistry</b> <i>Trying to Mimic Nature</i> | 493 |
|      | <b>The Personal Side</b> <i>Fritz Haber</i> (1868–1934)     | 497 |

|                                 |     |
|---------------------------------|-----|
| Appendix A: Significant Figures | 513 |
|---------------------------------|-----|

|                                 |     |
|---------------------------------|-----|
| Appendix B: Scientific Notation | 517 |
|---------------------------------|-----|

|   |     |
|---|-----|
| Appendix C: Units of Measure, Unit Conversion and Problem Solving | 523 |
|---|-----|

|                                      |     |
|--------------------------------------|-----|
| Appendix D: Naming Organic Compounds | 531 |
|--------------------------------------|-----|

|   |     |
|---|-----|
| Appendix E: Answers to Concept Checks and The Language of Chemistry | 537 |
|---|-----|

|                               |     |
|-------------------------------|-----|
| Appendix F: Answers to Try It | 547 |
|-------------------------------|-----|

|  |     |
|--|-----|
| Appendix G: Answers to Applying Your Knowledge | 551 |
|--|-----|

|          |     |
|----------|-----|
| Glossary | 565 |
|----------|-----|

|         |     |
