

PROPERTY TABLES FOR THERMAL FLUIDS ENGINEERING

STEPHEN R. TURNS
DAVID R. KRAIGE

Contents

PART ONE SI UNITS, APPENDICES A-M

APPENDIX A: THERMODYNAMIC PROPERTIES OF REFRIGERANT-134a

Table A.1	Saturation Properties of Refrigerant R-134a: Temperature Increments	4
Table A.2	Saturation Properties of Refrigerant R-134a: Pressure Increments	6
Table A.3	Superheated Vapor	7

APPENDIX B: THERMODYNAMIC PROPERTIES OF IDEAL GASES AND CARBON

Table B.1	CO	14
Table B.2	CO ₂	15
Table B.3	H ₂	16
Table B.4	H	17
Table B.5	OH	18
Table B.6	H ₂ O	19
Table B.7	N ₂	20
Table B.8	N	21
Table B.9	NO	22
Table B.10	NO ₂	23
Table B.11	O ₂	24
Table B.12	O	25
Table B.13	C(s) (Graphite)	26
Table B.14	Curve-Fit Coefficients for Thermodynamic Properties	30

APPENDIX C: THERMODYNAMIC AND THERMO-PHYSICAL PROPERTIES OF AIR

Table C.1	Approximate Composition, Apparent Molecular Weight, and Gas Constant for Dry Air	31
-----------	---	----

Table C.2	Thermodynamic Properties of Air at 1 atm	31
Table C.3	Thermo-Physical Properties of Air	34

APPENDIX D: THERMODYNAMIC PROPERTIES OF H₂O

Table D.1	Saturation Properties of Water and Steam: Temperature Increments	36
Table D.2	Saturation Properties of Water and Steam: Pressure Increments	38
Table D.3	Superheated Vapor (Steam)	41
Table D.4	Compressed Liquid (Water)	53
Table D.5	Vapor Properties: Saturated Solid (Ice)–Water Vapor	56

APPENDIX E: VARIOUS THERMODYNAMIC DATA

Table E.1	Critical Constants and Specific Heats for Selected Gases	57
Table E.2	Van der Waals Constants for Selected Gases	57

APPENDIX F: THERMO-PHYSICAL PROPERTIES OF SELECTED GASES AT 1 ATM

Table F.1	Thermo-Physical Properties of Selected Gases (1 atm)	58
-----------	--	----

APPENDIX G: THERMO-PHYSICAL PROPERTIES OF SELECTED LIQUIDS

Table G.1	Thermo-Physical Properties of Saturated Water	66
Table G.2	Thermo-Physical Properties of Various Saturated Liquids	68

APPENDIX H: THERMO-PHYSICAL PROPERTIES OF HYDROCARBON FUELS

Table H.1	Selected Properties of Hydrocarbon Fuels	72
Table H.2	Curve-Fit Coefficients for Fuel Specific Heat and Enthalpy	73
Table H.3	Curve-Fit Coefficients for Fuel Vapor Thermal Conductivity, Viscosity, and Specific Heat	74

APPENDIX I: THERMO-PHYSICAL PROPERTIES OF SELECTED SOLIDS

Table I.1	Thermo-Physical Properties of Selected Metallic Solids	76
Table I.2	Thermo-Physical Properties of Selected Nonmetallic Solids	81
Table I.3	Thermo-Physical Properties of Common Materials	83
Table I.4	Thermo-Physical Properties of Structural Building Materials	85
Table I.5	Thermo-Physical Properties of Industrial Insulation	87

APPENDIX J: RADIATION PROPERTIES OF SELECTED MATERIALS AND SUBSTANCES

Table J.1	Total, Normal (n), or Hemispherical (h) Emissivity of Selected Surfaces: Metallic Solids and Their Oxides	89
Table J.2	Total, Normal (n), or Hemispherical (h) Emissivity of Selected Surfaces: Nonmetallic Substances	90

APPENDIX K: MACH NUMBER RELATIONSHIPS FOR COMPRESSIBLE FLOW

Table K.1	One-Dimensional, Isentropic, Variable-Area Flow of Air with Constant Properties ($\gamma = 1.4$)	91
Table K.2	One-Dimensional Normal-Shock Functions for Air with Constant Properties ($\gamma = 1.4$)	92

APPENDIX L: PSYCHROMETRY CHART

Appendix L.1	Psychrometry Chart	93
--------------	------------------------------	----

APPENDIX M: PROPERTIES OF THE ATMOSPHERE AT HIGH ALTITUDE

Table M.1	Properties of the Atmosphere at High Altitude	94
-----------	---	----

PART TWO: U.S. CUSTOMARY UNITS

APPENDIX AE: THERMODYNAMIC PROPERTIES OF REFRIGERANT-134a

Table AE.1	Saturated Properties of Refrigerant R-134a: Temperature Increments	98
Table AE.2	Saturated Properties of Refrigerant R-134a: Pressure Increments	99
Table AE.3	Superheated Vapor	100

APPENDIX BE: THERMODYNAMIC PROPERTIES OF IDEAL GASES AND CARBON

Table BE.1	CO	106
Table BE.2	CO ₂	110
Table BE.3	H ₂	114
Table BE.4	H	118
Table BE.5	OH	122
Table BE.6	H ₂ O	126
Table BE.7	N ₂	130
Table BE.8	N	134

Table BE.9	NO	138
Table BE.10	NO ₂	142
Table BE.11	O ₂	146
Table BE.12	O	150
Table BE.13	C(s) (Graphite)	154

APPENDIX CE: THERMODYNAMIC AND THERMO-PHYSICAL PROPERTIES OF AIR

Table CE.1	Approximate Composition, Apparent Molecular Weight, and Gas Constant for Dry Air	158
Table CE.2	Thermodynamic Properties of Air at 1 atm	158
Table CE.3	Thermo-Physical Properties of Air at 1 atm	161

APPENDIX DE: THERMODYNAMIC PROPERTIES OF H₂O

Table DE.1	Saturated Properties of Water and Steam: Temperature Increments	164
Table DE.2	Saturated Properties of Water and Steam: Pressure Increments	166
Table DE.3	Superheated Vapor (Steam)	168
Table DE.4	Compressed Liquid (Water)	186
Table DE.5	Vapor Properties: Saturated Solid (Ice)—Vapor	189

APPENDIX EE: VARIOUS THERMODYNAMIC DATA

Table EE.1	Critical Constants and Specific Heats for Selected Gases	190
Table EE.2	Van der Waals Constants for Selected Gases	190

APPENDIX FE: THERMO-PHYSICAL PROPERTIES OF SELECTED GASES AT 1 atm

Table FE.1	Thermo-Physical Properties of Selected Gases (1 atm)	192
------------	--	-----

APPENDIX GE: THERMO-PHYSICAL PROPERTIES OF SELECTED LIQUIDS

Table GE.1	Thermo-Physical Properties of Saturated Water	202
Table GE.2	Thermo-Physical Properties of Saturated Refrigerant-134a	204

APPENDIX HE: THERMO-PHYSICAL PROPERTIES OF HYDROCARBON FUELS

Table HE.1	Selected Properties of Hydrocarbon Fuels	205
------------	--	-----

APPENDIX IE: THERMO-PHYSICAL PROPERTIES OF SELECTED SOLIDS

Table IE.1	Thermo-Physical Properties of Selected Metallic Solids	208
Table IE.2	Thermo-Physical Properties of Selected Nonmetallic Solids	211
Table IE.3	Thermo-Physical Properties of Common Materials	212
Table IE.4	Thermo-Physical Properties of Structural Building Materials	214
Table IE.5	Thermo-Physical Properties of Industrial Insulation	216

APPENDIX LE: PSYCHROMETRY CHART

Table LE:	Psychrometry Chart	218
-----------	------------------------------	-----

APPENDIX ME: PROPERTIES OF THE ATMOSPHERE AT HIGH ALTITUDES

Table ME.1	Properties of the Atmosphere at High Altitude	219
------------	---	-----
