Series Editor

Thematic Cartography and Geovisualization

Third Edition

Terry A. Slocum
Robert B. McMaster
Fritz C. Kessler
Hugh H. Howard

Contents

Preface	viii	3.3 Methods for Analyzing Spatial Data, Ignoring Location 35
Part I Introduction		3.4 Numerical Summaries in Which Location Is an Integral Component 48
Chapter 1 Thematic Cartography and Geovisualization	1	Part II Principles of Cartography
1.1 What Is a Thematic Map? 2		Chapter 4 Data Classification 57
1.2 How Are Thematic Maps Used? 2		4.1 Common Methods of Data Classification 58
1.3 Basic Steps for Communicating Map Information 3		4.2 Using Spatial Context to Simplify Choropleth Maps 69
1.4 Consequences of Technological Change in Cartography 8		4.3 Using Multiple Criteria to Determine Class Intervals 70
1.5 Geovisualization 12		Chapter 5 Principles of Symbolization 76
1.6 Related Techniques 14		5.1 Nature of Geographic Phenomena 77
1.7 Cognitive Issues in Cartography 15		5.2 Levels of Measurement 79
1.8 Social and Ethical Issues in Cartography 16		5.3 Visual Variables 81
Chapter 2 A Historical Perspective on Thematic Cartography	19	5.4 Comparison of Choropleth, Proportional Symbol, Isopleth, and Dot Mapping 85
2.1 A Brief History of Cartography 20		5.5 Selecting Visual Variables for Choropleth Maps 91
2.2 History of Thematic Cartography 21		Chapter 6 Scale and Generalization 96
2.3 History of U.S. Academic Cartography 23		6.1 Geographic and Cartographic Scale 96
2.4 The Paradigms of American Cartography 31		6.2 Definitions of Generalization 97
Chapter 3 Statistical and Graphical Foundation	34	6.3 Models of Generalization 98
3.1 Population and Sample 35		6.4 The Fundamental Operations of Generalization 101
3.2 Descriptive Versus Inferential Statistics 35		6.5 An Example of Generalization 107
		6.6 MapShaper: A Free Web-Based Generalization Service 108

Chapter 7 The Earth and Its Coordinate System 113

- 7.1 Basic Characteristics of the Earth's Graticule *113*
- 7.2 A Brief History of Latitude and Longitude *118*
- 7.3 Determining the Earth's Size and Shape *119*

Chapter 8 Elements of Map Projections 130

- 8.1 The Map Projection Concept *131*
- 8.2 The Reference Globe and Developable Surfaces *131*
- 8.3 The Mathematics of Map Projections *132*
- 8.4 Map Projection Characteristics *135*
- 8.5 Distortion on Map Projections *139*
- 8.6 Projection Properties *145*

Chapter 9 Selecting an Appropriate Map Projection 153

- 9.1 Potential Selection Guidelines *154*
- 9.2 Examples of Selecting Projections *159*

Chapter 10 Principles of Color 173

- 10.1 How Color Is Processed by the Human Visual System *173*
- 10.2 Hardware Considerations in Producing Color Maps for Graphics Displays *179*
- 10.3 Models for Specifying Color *181*

Chapter 11 Map Elements and Typography 188

- 11.1 Alignment and Centering *189*
- 11.2 Map Elements *189*
- 11.3 Typography *202*

Chapter 12 Cartographic Design 211

- 12.1 Cartographic Design *212*
- 12.2 Case Study: Real Estate Site Suitability Map *221*

Chapter 13 Map Reproduction 232

- 13.1 Reproduction Versus Dissemination *233*
- 13.2 Planning Ahead *233*
- 13.3 Map Editing *233*
- 13.4 Raster Image Processing for Print Reproduction *234*

- 13.5 Screening for Print Reproduction *235*
- 13.6 Aspects of Color Printing *238*
- 13.7 High-Volume Print Reproduction *240*
- 13.8 Nonprint Reproduction and Dissemination *246*

Part III Mapping Techniques

Chapter 14 Choropleth Mapping 251

- 14.1 Selecting Appropriate Data *252*
- 14.2 Data Classification *253*
- 14.3 Factors for Selecting a Color Scheme *254*
- 14.4 Details of Color Specification *259*
- 14.5 Legend Design *262*
- 14.6 Classed Versus Unclassed Mapping *264*

Chapter 15 Dasymetric Mapping 271

- 15.1 Selecting Appropriate Data and Ancillary Information *272*
- 15.2 Eicher and Brewer's Work *272*
- 15.3 Mennis and Hultgren's Intelligent Dasymetric Mapping (IDM) *274*
- 15.4 LandScan *276*
- 15.5 Langford and Unwin's Generalized Dasymetric Approach *277*

Chapter 16 Isarithmic Mapping 281

- 16.1 Selecting Appropriate Data *282*
- 16.2 Manual Interpolation *282*
- 16.3 Automated Interpolation for True Point Data *283*
- 16.4 Criteria for Selecting an Interpolation Method for True Point Data *292*
- 16.5 Limitations of Automated Interpolation Approaches *293*
- 16.6 Tobler's Pycnophylactic Approach: An Interpolation Method for Conceptual Point Data *294*
- 16.7 Symbolization *296*

Chapter 17 Proportional Symbol and Dot Mapping 302

- 17.1 Selecting Appropriate Data for Proportional Symbol Maps *303*
- 17.2 Kinds of Proportional Symbols *303*
- 17.3 Scaling Proportional Symbols *305*

17.4 Legend Design for Proportional Symbol Maps	314	23.3 Visual Variables for Depicting Uncertainty	427
17.5 Handling Overlap on Proportional Symbol Maps	315	23.4 Applications of Visualizing Uncertainty	429
17.6 Redundant Symbols	318	23.5 Studies of the Effectiveness of Methods for Visualizing Uncertainty	436
17.7 Selecting Appropriate Data for Dot Maps	318		
17.8 Creating a Dot Map	319		
Chapter 18 Multivariate Mapping	327	Chapter 24 Web Mapping	441
18.1 Bivariate Mapping	328	24.1 A Brief History of Web Mapping	442
18.2 Multivariate Mapping Involving Three or More Attributes	335	24.2 Cartographic Web Sites: A Classification	444
18.3 Cluster Analysis	344	24.3 Tying Together the Five Continua	456
Chapter 19 Cartograms and Flow Maps	355	Chapter 25 Virtual Environments	460
19.1 Cartograms	355	25.1 Defining Virtual and Mixed Environments	460
19.2 Flow Mapping	360	25.2 Technologies for Creating Virtual Environments	462
Part IV Geovisualization		25.3 The Four "I" Factors of Virtual Environments	465
Chapter 20 Visualizing Terrain	371	25.4 Applications of Geospatial Virtual Environments	467
20.1 Nature of the Data	371	25.5 Research Issues in Geospatial Virtual Environments	471
20.2 Vertical Views	372	25.6 Developments in Mixed Environments	473
20.3 Oblique Views	384	25.7 Health, Safety, and Social Issues	475
20.4 Physical Models	387	Chapter 26 Trends in Research and Development	478
Chapter 21 Map Animation	389	26.1 Linked Micromap Plots and Conditioned Choropleth Maps	479
21.1 Early Developments	390	26.2 Using Senses Other Than Vision to Interpret Spatial Patterns	481
21.2 Visual Variables and Categories of Animation	390	26.3 Collaborative Geovisualization	485
21.3 Examples of Animations	392	26.4 Multimodal Interfaces	487
21.4 Using 3-D Space to Display Temporal Data	402	26.5 Information Visualization and Spatialization	489
21.5 Does Animation Work?	403	26.6 Spatial Data Mining	491
Chapter 22 Data Exploration	408	26.7 Visual Analytics	493
22.1 Goals of Data Exploration	408	26.8 Mobile Mapping and Location-Based Services	494
22.2 Methods of Data Exploration	409	26.9 Keeping Pace with Recent Developments	494
22.3 Examples of Data Exploration Software	411	Appendix Lengths of One Degree Latitude and Longitude	498
Chapter 23 Visualizing Uncertainty	425	Glossary	501
23.1 Basic Elements of Uncertainty	425	References	519
23.2 General Methods for Depicting Uncertainty	426	Index	546
