

Gene and Cell Therapy

Therapeutic Mechanisms and Strategies

Third Edition

Edited by Nancy Smyth Templeton

Contents

Foreword	ix
Preface	xi
Editor	xiii
Contributors	xv

PART I Delivery Systems and Therapeutic Strategies

Chapter 1 Retroviral Vectors for Cell and Gene Therapy	3
<i>Axel Schambach, Tobias Maetzig, and Christopher Baum</i>	
Chapter 2 Production of Retroviral Vectors: From the Producer Cell to the Final Product.....	17
<i>Pedro E. Cruz, Ana S. Coroadinha, Teresa Rodrigues, and Hansjörg Hauser</i>	
Chapter 3 Adenovirus Vectors for Gene Therapy.....	39
<i>Neil R. Hackett and Ronald G. Crystal</i>	
Chapter 4 Modified Adenoviruses for Gene Therapy.....	69
<i>Joel N. Glasgow, Akseli Hemminki, and David T. Curiel</i>	
Chapter 5 Helper-Dependent Adenoviral Vectors for Gene Therapy	87
<i>Nicola Brunetti-Pierri and Philip Ng</i>	
Chapter 6 Adeno-Associated Virus and AAV Vectors for Gene Delivery	115
<i>Barrie J. Carter, Haim Burstein, and Richard W. Peluso</i>	
Chapter 7 Therapeutic Gene Transfer with Replication-Defective Herpes Simplex Viral Vectors	159
<i>D. Wolfe, W.F. Goins, A.R. Frampton, Jr., Marina Mata, D.J. Fink, and J.C. Glorioso</i>	
Chapter 8 Oncolytic Viruses for Treatment of Cancer	193
<i>Mari Raki, Maria Rajecki, David Kirn, and Akseli Hemminki</i>	
Chapter 9 Lentiviral Vectors.....	207
<i>John M. Felder III and Richard E. Sutton</i>	
Chapter 10 Vaccinia Viral Vectors	245
<i>J. Andrea McCart and David L. Bartlett</i>	
Chapter 11 Baculovirus-Mediated Gene Transfer: An Emerging Universal Concept	263
<i>Kari J. Airene, Anssi J. Mähönen, Olli H. Laitinen, and Seppo Ylä-Herttuala</i>	

Chapter 12	Bacterial Vector in Gene Therapy.....	293
	<i>Ming-Shen Dai and Georges Vassaux</i>	
Chapter 13	Redox-Responsive Polymer-Based Gene Delivery Systems	309
	<i>David Oupický, Ye-Zi You, and Devika Soundara Manickam</i>	
Chapter 14	Polymers and Dendrimers for Gene Delivery in Gene Therapy.....	321
	<i>Ijeoma F. Uchegbu, Christine Dufès, Pei Lee Kan, and Andreas G. Schätzlein</i>	
Chapter 15	Receptor-Targeted Polyplexes for DNA and siRNA Delivery	341
	<i>Alexander Philipp and Ernst Wagner</i>	
Chapter 16	Electroporation of Plasmid-Based Vaccines and Therapeutics	363
	<i>Ruxandra Draghia-Akli and Amir S. Khan</i>	
Chapter 17	Magnetofection: Using Magnetic Particles and Magnetic Force to Enhance and to Target Nucleic Acid Delivery	379
	<i>Franz Scherer and Christian Plank</i>	
Chapter 18	Biolistic and Other Needle-Free Delivery Systems	405
	<i>Mark A.F. Kendall</i>	
Chapter 19	Optimization of Nonviral Gene Therapeutics.....	423
	<i>Nancy Smyth Templeton</i>	
Chapter 20	Photochemical Internalization: A Technology for Efficient and Site-Specific Gene Delivery	435
	<i>Anette Bonsted, Anders Høgset, and Kristian Berg</i>	
Chapter 21	Interactions in Macromolecular Complexes Used as Nonviral Vectors for Gene Delivery	443
	<i>Rudolf Podgornik, Daniel Harries, Jason DeRouchey, Hemult H. Strey, and V. Adrian Parsegian</i>	
 PART II Other Therapeutic Strategies		
Chapter 22	<i>In Vivo</i> Applications of Morpholino Oligonucleotides	487
	<i>Jeff S. Isenberg, William A. Frazier, and David D. Roberts</i>	
Chapter 23	Antisense Oligonucleotide-Based Therapeutics.....	497
	<i>C. Frank Bennett, Eric Swayze, Richard Geary, Scott Henry, Lloyd Tillman, and Greg Hardee</i>	
Chapter 24	Development of RNAi Therapeutics	523
	<i>Antonin R. de Fougères</i>	
Chapter 25	Suicide Gene Therapy	539
	<i>Nikiforos Ballian, Bert W. O'Malley Jr., and F. Charles Brunnicardi</i>	

Chapter 26	Selectable Markers for Gene Therapy.....	555
	<i>Jean-Pierre Gillet, Chava Kimchi-Sarfaty, Shiri Shinar, Thomas Licht, Caroline Lee, Peter Hafkemeyer, Christine A. Hrycyna, Ira Pastan, and Michael M. Gottesman</i>	

Chapter 27	Embryonic Stem Cells and Their Application in Regenerative Medicine and Tissue Engineering.....	581
	<i>Nicholas D. Evans and Julia M. Polak</i>	

Chapter 28	Polymeric Nano- and Microparticles for the Delivery of Antisense Oligonucleotides and siRNA	599
	<i>Elias Fattal and Giuseppe De Rosa</i>	

PART III Gene Expression and Detection

Chapter 29	Deliberate Regulation of Therapeutic Transgenes.....	619
	<i>Nuria Vilaboa and Richard Voellmy</i>	

Chapter 30	Monitoring Gene and Cell Therapies in Living Subjects with Molecular Imaging Technologies	637
	<i>Sunetra Ray, Sandip Biswal, and Sanjiv Sam Gambhir</i>	

Chapter 31	Nonviral Genome Modification Strategies for Gene Therapy: Transposon, Integrase, and Homologous Recombination Systems.....	677
	<i>Lauren E. Woodard and Michele P. Calos</i>	

PART IV Disease Targets and Therapeutic Strategies

Chapter 32	Hematopoietic Progenitor Cells	695
	<i>Kuan-Yin Karen Lin, Olga Sirin, and Margaret A. Goodell</i>	

Chapter 33	Gene Therapy for Hematopoietic Disorders	713
	<i>Elizabeth M. Kang, Mitchell E. Horwitz, and Harry L. Malech</i>	

Chapter 34	Use of Genetically Modified Stem Cells in Experimental Gene Therapies	731
	<i>Thomas P. Zwaka</i>	

Chapter 35	Cardiovascular Gene and Cell Therapy	737
	<i>Kazuhiro Oka</i>	

Chapter 36	Gene Therapy for Cancer	761
	<i>Karsten Brand</i>	

Chapter 37	Molecular Therapy for Type 1 and Type 2 Diabetes.....	801
	<i>Susan Leanne Samson, Vijay Yechoor, and Lawrence Chan</i>	

Chapter 38	Progress toward Gene Therapy for Cystic Fibrosis.....	817
	<i>Ruth S. Everett and Larry G. Johnson</i>	

Chapter 39	Gene Therapy for Neurological Diseases.....	833
	<i>William J. Bowers, Suresh de Silva, and Howard J. Federoff</i>	
Chapter 40	Principles of Gene Therapy for Inborn Errors of Metabolism.....	869
	<i>Jon A. Wolff and Cary O. Harding</i>	
Chapter 41	RNA Interference–Based Gene Therapy Strategies for the Treatment of HIV Infection	881
	<i>Lisa J. Scherer and John J. Rossi</i>	
Chapter 42	Cutaneous Gene Transfer: Cell and Gene Therapy of Skin and Systemic Disorders.....	889
	<i>William Buitrago and Dennis R. Roop</i>	
Chapter 43	Gene Therapy for Childhood Onset Blindness	913
	<i>Matthew C. Canver and Jean Bennett</i>	
Chapter 44	DNA Vaccines.....	921
	<i>Jian Yan and David B. Weiner</i>	
Chapter 45	Immunoisolation for CNS Cell Therapy	949
	<i>Dwaine F. Emerich and Christopher G. Thanos</i>	
 PART V Clinical Trials and Regulatory Issues		
Chapter 46	Cardiovascular Gene Therapy.....	975
	<i>Jörn Tongers, Jerome G. Roncalli, and Douglas W. Losordo</i>	
Chapter 47	Gene Therapy for the Treatment of Cancer: From Laboratory to Bedside.....	1001
	<i>Gianpietro Dotti, Barbara Savoldo, Fatma Okur, Raphaël F. Rousseau, and Malcolm K. Brenner</i>	
Chapter 48	p53 Tumor Suppressor Opens Gateways for Cancer Therapy.....	1019
	<i>Mu-Shui Dai, Jayme R. Gallegos, and Hua Lu</i>	
Chapter 49	Recombinant Adenoviral-p53 Agent for Treatment of Cancers.....	1033
	<i>Zhaohui Peng, Qing Yu, and Jingya Zhu</i>	
Chapter 50	Gene Marking Studies of Hematopoietic Cells.....	1057
	<i>Catherine M. Bollard, Siok K. Tey, Malcolm K. Brenner, and Helen E. Heslop</i>	
Chapter 51	Regulatory Aspects of Gene Therapy	1071
	<i>Stephanie L. Simek and Lilia Bi</i>	
Index		1087
