Bible

The book you need to succeed!

Preface	vii
----------------------	------------

Part I: Illustrator Basics	1
-----------------------------------	----------

Chapter 1: What's New in Illustrator CS4?	3
--	----------

Multiple Artboards.....	3
Welcome to the New and Improved Appearance Panel	5
Dropdowns (and Popups) Aplenty	6
Align Points Like They're Objects.....	6
Smart Guides That Are Really Smart	6
The Blob Brush Tool	7
Color Separations Preview	8
Color Blindness Preview	9
Gradient Enhancements	9
No More Filter Menu!	9
Summary	10

Chapter 2: Understanding Illustrator's Desktop	11
---	-----------

Picasso Meets Illustrator: Getting Started	11
Getting started with Illustrator	12
Quitting Illustrator	12
Working with Illustrator's Interface.....	13
Working in the document window	14
Understanding the Artboard	15
Getting to know the work area	16
Using the Print Tiling tool	16
Working with the Tools panel	17
Viewing the Tool Tips	18
Using the panels	18
Linking together and tearing apart panels.....	21
Working with panels	21

Using Illustrator's menus.....	23
Panel menus.....	24
Context-sensitive menus.....	24
Typing keyboard commands.....	25
Using the status bar.....	26
Navigating Around Your Document.....	27
Understanding the Zoom tool.....	27
Using the Zoom tool.....	27
Other zooming techniques.....	29
Zooming to Actual Size.....	30
Zooming to Fit in Window size.....	30
Zooming to a specific magnification.....	31
Zooming with the Navigator panel.....	31
Using the scroll bars to view your document.....	32
Scrolling with the Hand tool.....	33
Scrolling with the Navigator panel.....	34
Opening a new window.....	34
Using Illustrator's Modes.....	34
Working in Outline mode versus Preview mode.....	34
Understanding Outline mode.....	35
Understanding Preview mode.....	36
Understanding Overprint Preview mode.....	36
Understanding Pixel Preview mode.....	37
Using and creating custom views.....	38
Using screen modes.....	38
Using the Edit Commands.....	38
Using the Clear command.....	39
Cutting, copying, and pasting.....	40
Undoing and redoing.....	41
Summary.....	41

Chapter 3: Working with Illustrator Documents. 43

Setting Up a New Document.....	43
Modifying the Setup of a Document.....	46
Adjusting the Bleed and View Options.....	47
Working with Transparency options.....	47
Changing Type options.....	48
Artboards.....	49
Choosing the Artboard measurement units.....	49
The Artboard tool.....	50
Changing the Artboard size using the Control panel.....	51
Setting the Artboard orientation using the Control panel.....	52
The Artboard Options dialog box.....	52

Opening and Closing Illustrator Files	53
Saving Files	54
Using the Save As command	56
Understanding the Save a Copy command	56
Reverting to the last saved version	56
Saving for Web & Devices option	57
Understanding file types and options	58
Using Illustrator's compatibility options	58
Saving as Illustrator EPS	59
Saving files as Adobe PDF	61
Saving files in SVG	63
Using the Export Command	65
Placing Art	66
Placing Photoshop Art in Illustrator: Understanding Vectors and Pixels	68
Placing raster images	69
Using the Clipboard	70
Dragging and dropping	70
Working with Document and File Information	70
Looking at document information	71
Saving document information	72
Finding file information	72
Summary	73
Chapter 4: Understanding Drawing and Painting Techniques	75
Working with Paths	75
Understanding types of paths	76
Understanding anchor points	77
Understanding control handles and control handle lines	77
Understanding how fills and strokes relate to paths	82
Drawing Paths with Illustrator Tools	86
Using the Pencil tool	86
Drawing open paths and closed paths	90
Connecting Pencil paths	92
Adding to an existing open path	92
Working with the Smooth tool	92
Erasing with the Path Eraser tool	94
Drawing with the Pen tool	94
Drawing straight lines with the Pen tool	95
Closing paths with the Pen tool	96
Drawing curves with the Pen tool	97
Closing curved paths with the Pen tool	99
Working with curved corner points	100
Combination corner points	100
Using basic Pen tool drawing techniques	100

Using the various line tools	102
Using the Line Segment tool	102
Working with the Arc tool	103
Creating spirals with the Spiral tool	104
Making grid lines using the Rectangular Grid tool	105
Understanding the Polar Grid tool	107
Using the Paintbrush tool	109
Using brushes	111
Using the Calligraphic brush	111
Creating a Calligraphic brush	113
Variable widths and pressure-sensitive tablets	113
Creating with the Scatter brush	113
Working with the Art brush	115
Creating tiles using the Pattern brush	117
Making a custom brush	119
Understanding colorization tips	120
Checking out the Brush libraries	121
Summary	123

Chapter 5: Creating Objects, Graphs, and Symbols 125

Making Basic Shapes	125
Drawing shapes from their centers	128
Drawing symmetric shapes	128
Drawing shapes at an angle	128
Drawing rectangles using the Rectangle tool	129
Defining properties with the Rectangle dialog box	130
Drawing rounded rectangles and squares	131
Using the Round Corners command to round straight corners	134
Rounding corners backward	135
Drawing ellipses	136
Creating polygons	137
Seeing stars	139
Working with the Flare Tool	144
Understanding Flare options	144
Using a flare to add highlight	144
Editing a flare	146
Filling and Stroking Shapes	147
Using fills	147
Using strokes	149
Setting stroke color	149
Changing stroke weight	149
Modifying stroke attributes	150
Combining strokes with fills	152
Applying fills and strokes	153

Creating and Embellishing Graphs and Charts	155
Importing Microsoft Excel graph data	155
Making and editing graphs	156
Customizing graphs	158
Choosing a graph type	159
Grouped-column graphs	160
Stacked-column graphs	160
Line graphs	160
Area graphs	162
Pie graphs	162
Scatter graphs and radar graphs	163
Creating Flowcharts, Diagrams, and Site Maps	164
Using Symbols	165
Spraying with the Symbol Sprayer tool	165
Making a new symbol	168
Using the Symbol tool	170
Summary	171

Chapter 6: Learning How to Select and Edit 173

Selecting a Path for Editing	173
Understanding the selection methods	173
Using Intrapath selecting	175
Using Path selecting	176
Using Group and IntraGroup selecting	176
Using Select All	177
Deciding which selection tool to use	178
Using the Selection tool	178
Using the Direct Selection tool	179
Using the Group Selection tool	180
Using the Magic Wand tool	181
Using the Lasso tool	182
Selecting, moving, and deleting entire paths	182
Using different selection options	183
Select Inverse	186
Select Same Blending Mode	186
Select Same Fill & Stroke	186
Select Same Fill Color	187
Select Same Opacity	187
Select Same Stroke Color	187
Select Same Stroke Weight	187
Select Same Style	188
Select Same Symbol Instance	188
Select Same Link Block Series	188
Select Object All on Same Layers	188

Select Object Direction Handles	188
Select Object Brush Strokes	188
Select Object Clipping Masks	188
Select Object Stray Points	189
Select Object Text Objects	189
Select Flash Dynamic Text	189
Select Flash Input Text	189
Keeping and labeling a selection	190
Custom paint style selections	190
Editing Paths in Illustrator	191
Editing with anchor points	192
The Add Anchor Points function	193
Removing anchor points	194
Simplifying paths by removing anchor points	195
Removing anchor points using Simplify	195
Splitting paths	196
Sectioning and repeating paths	197
The Knife tool	198
The Slice tool	199
Reshaping paths	199
Cleaning up a path	200
Offsetting a path	202
Outlining a path	203
Aligning and distributing points	203
Joining	206
Converting Anchor Points	207
Converting Smooth Points	208
Converting straight corner points	209
Converting combination corner points	209
Converting curved corner points	210
Using Illustrator's Pathfinder Functions	211
Setting the Pathfinder options	212
Adding to a shape	212
Subtracting from a shape	214
Intersecting and excluding shapes	214
Using the Expand button	215
Dividing paths	215
Trimming paths	216
Merging paths	217
Cropping paths	217
Outlining paths	218
Using Minus Back	218
Trapping	219
Summary	220

Chapter 7: Understanding Color, Gradients, and Mesh 221

Working with the Swatches Panel	221
Using the color swatches	222
Using the Swatches popup menu	224
Using other swatch libraries	226
Using color space options in the Color panel	228
Using the Color Ramp	231
Working with gamut	232
Spot colors	232
Applying colors with the Color panel	233
Transferring color from one object to another	233
The Eyedropper tool	234
The Live Paint Bucket tool	234
Using Transparency	235
Defining transparency between objects, groups, and layers	236
Working with opacity	237
Using blending modes	238
Isolating blending	239
Knocking out a group	240
Using opacity, clipping, and invert masks	240
Viewing the transparency grid	241
Printing and flattening	243
Transparency and type	245
Separating transparent objects	245
3-D, symbols, and transparency	246
Creating Gradients	248
Using preset gradients	249
Using the Gradient panel	249
Working with the Gradient tool	250
Expanding gradient objects	254
Printing gradients	254
Adding Realism with Mesh	255
Enhancing with highlights and color	256
Adding multiple highlights	257
Summary	260

Part II: Putting Illustrator to Work 261

Chapter 8: Using Illustrator to Organize Objects 263

Locking and Hiding Objects	263
Locking objects	264
Hiding objects	264
Setting object attributes	265

Understanding Object Stacking Order	266
Controlling the stacking order for objects	266
Understanding the stacking order for text	267
Using a stacking order for strokes and fills	268
Pasting objects in front of and behind selected objects	268
Creating and Deconstructing Groups	268
Grouping objects.....	269
Ungrouping.....	269
Layering Your Artwork	270
Getting started with layers.....	271
Using the Layers panel	273
Using the Layers panel columns	273
Using the Layers panel buttons.....	274
Moving and layers	276
Using the Layers panel's popup menu	276
Working with Templates in Illustrator	279
Placing a template on a layer	279
Using a template to trace an image	281
Using Align and Distribute	281
Measuring an Image.....	283
Changing the measurement units	283
Using the Measure tool.....	285
Sizing objects with the Transform panel.....	286
Using rulers.....	288
Measuring with objects.....	288
Using Offset Path (for equidistant measuring)	289
Working with Grids.....	290
Creating grid color, style, and spacing	290
Spinning grids.....	292
Using Guides	292
Creating guides	292
Locking, unlocking, and moving guides	293
Releasing guides	293
Deleting guides	294
Changing guide preferences	294
Understanding Smart Guides	294
Measuring for Printing	296
Tiling	296
Creating crop marks.....	297
Summary	300

Chapter 9: Working with Type 301

Understanding Fonts	301
Understanding bitmap fonts.....	301
Understanding PostScript fonts.....	302

Understanding TrueType fonts.....	302
Understanding OpenType fonts	302
Adding type with Multiple Master fonts	303
Understanding Basic Type Menu Commands.....	303
Using the Font submenu	304
Understanding the Recent Fonts submenu	306
Choosing a font size	306
Using alternate glyphs	306
Using the Type Tools	307
Using the Type tool.....	308
Using the Area Type tool.....	308
Using the Type on a Path tool	308
Using the Vertical Type tool	310
Creating Individual Type	311
Placing Area Type in a Rectangle.....	311
Working with Type Areas	312
Creating Area Type	313
Using area type functions	314
Choosing good shapes for area type	315
Outlining areas of area type.....	315
Selecting carefully with area type	315
Changing the area, not the type	316
Flowing area type into shapes	318
Wrapping type around paths.....	318
Placing Type on a Path.....	318
Adding effects to type on a path.....	320
Using vertical type.....	321
Selecting Type.....	323
Editing Type	324
Using the Type Panels.....	325
Working with the Character panel	325
Changing fonts and styles.....	327
Measuring type	327
Changing type size	327
Adjusting the leading.....	328
Kerning and tracking.....	329
Using vertical scale and horizontal scale	331
Using baseline shift.....	331
Using character rotation	332
Using text underlining and strikethrough.....	332
Understanding the language barrier.....	333
More multinational options	333
Working with the Paragraph panel.....	333
Adding paragraph options	333
Aligning type.....	334

Indenting paragraphs	335
Spacing before or after paragraphs	335
Spacing through justification	335
Hyphenating text	337
Using Every-line and Single-line Composer	337
Controlling punctuation	338
Working with the OpenType panel	338
Working with the Tabs panel	338
Using Advanced Type Functions	341
Threading text	341
Unthreading text	342
Fitting a headline	342
Finding and replacing text	342
Finding fonts	344
Checking spelling	344
Changing case	346
Using Smart Punctuation	347
Adding rows and columns	348
Showing hidden characters	350
Changing type orientation	350
Updating legacy text	350
Exporting and placing	350
Creating Outlines	351
Distorting characters for special effects	353
Masking and other effects	353
Avoiding font conflicts by creating outlines	354
Understanding hinting	354
Understanding Other Type Considerations	355
Summary	355

Chapter 10: Using Creative Strokes and Fills with Patterns 357

Using Creative Strokes	357
Stroke essentials	358
Using the stroke charts	359
Creating parallel strokes	363
Creating map elements	366
Creating a railroad track with a gradient	366
Creating a highway	368
Creating Perfect Patterns	369
Using the default patterns	371
Creating custom patterns	371
Understanding pattern backgrounds and boundaries	373
Making seamless patterns	374
Creating symmetrical patterns	374

Creating line patterns and grids.....	374
Creating line patterns.....	375
Creating grid patterns.....	375
Using diagonal-line and grid patterns.....	377
Using transparency and patterns together.....	377
Transforming patterns.....	378
Summary	379

Chapter 11 Applying Transformations and Distortions 381

Adding a Transformation with Tools.....	381
Rotating with the Rotate tool.....	385
Reflecting with the Reflect tool.....	386
Scaling with the Scale tool.....	387
Shearing with the Shear tool.....	389
Reshaping with the Reshape tool.....	391
Moving objects.....	391
Using the Free Transform tool.....	393
Working with the Transform Panel	394
Using Transform Each.....	395
Using Transformations	398
Creating shadows	399
Rotating into a path.....	400
Making tiles using the Reflect tool	400
Using transformation tools on portions of paths	402
Transforming patterns	403
Using Liquify Tools on Objects.....	404
Warping objects	405
Twirling objects	405
Puckering.....	407
Bloating.....	407
Scalloping	407
Crystallizing.....	409
Wrinkling	409
Distorting with Effects.....	410
Using free distortions	410
Using Pucker & Bloat.....	411
Roughening objects.....	413
Transforming objects.....	415
Tweaking transforms.....	416
Using the Twist command.....	419
Working with the Zig Zag effect	421
Using Warp Effects	422
Understanding Warp types.....	423
Summary	425

Chapter 12: Using Path Blends, Compound Paths, and Masks 427

Understanding the Difference between Blends and Gradients	427
Creating Path Blends.....	429
Defining Linear Blends.....	430
Working with Blend Options.....	432
Using the Blend option.....	432
Blending multiple objects.....	433
Editing a blended object.....	433
Releasing a blend.....	434
Expanding blends	434
Replacing the spine	434
Reversing the spine	436
Reversing front to back.....	436
Using nonlinear blends	437
Finding end paths for linear blends	439
Calculating the number of steps	439
Creating radial blends	441
Making a Color Blend	443
Using multiple colors with linear blends	443
Using guidelines for creating color linear blends	444
Creating Shape Blends	445
Complex-shape blending.....	445
Creating realism with shape blends.....	446
Blending symbols.....	449
Blending envelopes	450
Blending 3-D objects.....	450
Airbrushing shadows.....	453
Creating glows	454
Softening edges	454
Designing neon effects	456
Using Compound Paths	458
Creating compound paths.....	458
Releasing compound paths	460
Understanding holes	460
Overlapping holes.....	461
Creating compound paths from separate sets of paths.....	461
Working with type and compound paths.....	462
Finding Path Directions	463
Figuring out which way to go.....	464
Reversing path directions	465
Faking a compound path	466
Using Clipping Masks.....	466
Creating masks.....	467
Masking raster images	468

Using a mask with other masks	469
Releasing masks	469
Masking and printing	469
Masking and compound paths	470
Summary	471

Chapter 13: Using Live Trace 473

Understanding Live Trace	473
Learning Live Trace Modes	475
Getting to know Outline mode	476
Using Tracing Result mode	477
Combining Outline and Tracing Result modes	477
Setting Live Trace Options	478
Understanding the Live Trace presets	479
Choosing custom Live Trace options	490
Tracing Raster Images with Live Trace	492
Summary	494

Chapter 14: Using Live Paint. 495

Understanding Live Paint	495
Setting the Live Paint Options	498
Using Live Paint	500
Summary	501

Part III: Mastering Illustrator 503

Chapter 15: Working with Graphic Styles and Effects 505

Understanding How Graphic Styles Work	505
Using the Appearance panel	506
Editing and adding strokes and fills	507
Duplicating and removing items	508
Clearing an appearance	509
Reducing to basic appearance	509
Showing and hiding Appearance panel attributes	510
Setting New Art preferences	510
Viewing thumbnails	510
Redefining graphic styles	511
Working with the Graphic Styles panel	511
Creating a new graphic style	512
Duplicating and merging graphic styles	512
Deleting a graphic style	513
Breaking the link to a graphic style	513
Understanding the other Graphic Styles panel options	513
Opening and saving Graphic Style Libraries	514

Using Effects	515
Understanding 3-D effects	515
Using Convert to Shape effects	515
Distorting and transforming effects	517
Creating Path effects	517
Understanding the Rasterize effect	517
Stylizing effects	517
Using the Add Arrowheads effect	518
Using the Drop Shadow effect	520
Understanding the Feather effect	521
Using the Inner Glow and Outer Glow effects	522
Using the Round Corners effect	523
Understanding Scribble	523
Using SVG Filters effects	526
Warp effects	527
Creating Photoshop effects	527
Summary	527

Chapter 16: Creating 3-D in Illustrator 529

Using 3-D in Illustrator	529
Understanding the Three-Dimensional World	530
Changing from two dimensions to three dimensions	530
Three-dimensional positioning	531
Extruding and Revolving 2-D Objects	533
Extruding flat art	533
Extruding a stroke	534
Understanding bevels	536
Revolving objects	537
Rotating Objects	540
Changing the Appearance of Three-Dimensional Objects	541
The Surface characteristics	541
Understanding lighting	543
Lighting options	543
Using the Appearance panel with 3-D	545
Mapping 2-D art to 3-D surfaces	545
Using Other 3-D Techniques	549
Using gradients to make bumps and dents	549
Perspective drawing	549
Summary	550

Chapter 17: Customizing and Automating Illustrator 551

Who's Responsible for Illustrator?	551
Customization Options	552
Changing Preferences	553
Altering the Keyboard Increment option	554
Using the Constrain Angle option	554

Changing the Corner Radius option	555
Adjusting the General options	556
Use Precise Cursors	556
Show Tool Tips	556
Anti-aliased Artwork	558
Select Same Tint %	558
Append [Converted] Upon Opening Legacy Files	558
Disable Auto Add/Delete	558
Use Japanese Crop Marks	558
Transform Pattern Tiles	558
Scale Strokes & Effects	560
Use Preview Bounds	560
Reset All Warning Dialogs	560
Changing the Selection & Anchor Display options	560
Tolerance	560
Object Selection by Path Only	560
Snap to Point	560
Anchors/Handles	560
Highlight anchors on mouse over	561
Show handles when multiple anchors are selected	561
Changing Preferences for Type	561
The Size/Leading option	562
The Baseline Shift option	563
The Tracking option	563
The Type Object Selection by Path Only option	563
The Show Asian Options option	563
The Show Font Names in English option	564
Setting the Number of Recent Fonts option	564
Choosing a Font Preview size	564
Enable Missing Glyph Protection	564
Use Inline Input for Non-Latin text	564
Using Units & Display Performance	564
Changing Units settings	565
Changing Display Performance	566
Changing Guides & Grid Preferences	566
Adjusting Smart Guides	567
Changing Display Options	567
Altering angles (for construction guides)	568
Changing the Snapping Tolerance	568
Adjusting Slices Preferences	569
Changing Hyphenation	569
Adjusting the Plug-Ins & Scratch Disks	570
Customizing the User Interface	570
Customizing the File Handling & Clipboard	571

Setting the Appearance of Black Options.....	572
Altering Placement and Tools Panel Value Preferences	573
Adding Keyboard Customization	573
Knowing What You Can't Customize	574
Using Actions	575
Using a Default Action	575
Creating a new action	575
Creating a new set	575
What is recordable?.....	577
Duplicating and deleting an action	577
Starting and stopping recording	578
Inserting a menu item	578
Inserting a stop	578
Action Options	579
Playback Options	579
Inserting a selected path	580
Selecting an object	580
Clearing, resetting, loading, replacing, and saving actions	580
Summary	581

Part IV: Getting Art Out of Illustrator **583**

Chapter 18: Understanding PostScript and Printing 585

Understanding the Benefits of PostScript.....	586
Using PostScript.....	587
Knowing What to Do Prior to Printing.....	587
Changing the Artboard size	587
Printing composites.....	588
Working with gray colors.....	592
Using the Separation Setup	593
Understanding the printer's marks and bleeds.....	593
Changing printer information.....	593
Changing the page size.....	595
Changing the orientation.....	595
Understanding emulsion	597
Changing from positive to negative to positive	597
Working with different colors	597
Outputting a Color-Separated File	598
Using spot color separations.....	598
Printing process color separation.....	600
Choosing numerous colors.....	601
Combining spot and process color separations.....	602
Using Other Applications to Print	604

Understanding Trapping.....	604
Understanding misaligned color separations	607
Knowing how much you need to trap	608
Trapping Illustrator files	608
Using complex trapping techniques in Illustrator	609
Summary	610

Chapter 19: Creating Web Graphics 611

Designing for the Web versus Designing for Print	611
Illustrator and the Web — the Basics	612
Understanding Pixel Preview mode	613
Using Web-safe colors.....	618
Understanding hexadecimal colors.....	619
Optimizing and Saving Web Graphics	621
Introducing the Save for Web & Devices dialog box	621
Previewing Web graphics	621
Learning the Web-graphic formats	626
Understanding GIF	626
Using the JPEG format.....	627
Understanding the PNG format	628
Using the WBMP format.....	628
Choosing output options.....	628
Creating Vector Graphics for the Web.....	633
Using Flash graphics	634
Creating SVG files	636
Applying SVG effects.....	639
The SVG Interactivity panel.....	640
Understanding Web Slicing	642
Object-Based Web Slicing.....	643
Working with slices.....	646
Understanding CSS layers	647
Getting Interactive	648
Specifying an image map.....	648
Creating animations	649
Using Data-Driven Graphics to Streamline Design Work	653
Understanding variables.....	654
Using the Variables panel	655
Understanding scripting.....	656
Scripting versus actions.....	656
Setting up a data-driven graphics template	657
Taking advantage of data-driven graphics with Adobe GoLive.....	660
Summary	662

Chapter 20: Illustrator Workflow 663

Project Background.....	663
Building the Documents.....	665
Setting up the document.....	665
Creating the front cover	665
Creating the box sides	668
Creating the box bottom	671
Preparing for production.....	674
Summary	676

Appendix: Shortcuts in Illustrator CS4 677

Menu Commands	678
Toolbox Commands	682
Type Commands.....	695
Color Commands.....	697
Other Panels	699
Miscellaneous Commands.....	701
Generic Dialog Box Commands	702

Index 703
