foundation module

Introduction	xiv
A structured learning approach	xv
Supporting DVD	xv
Research and resources	xv
Essential information	xvi
 1. The Digital Darkroom	 1
Digital setup	2
Monitor settings	3
Choosing a working space	4
Getting started with Photoshop	4
Settings and preferences	7
Navigation and viewing modes	9
Rulers and guides	12
'New and revised' for CS4	13
 2. Bridge	 25
Introduction	26
The latest version of Bridge	27
Setting up Bridge	28
Using Bridge	34
Using Bridge to access the project resources	45

3. Workflow	47
Introduction	48
A few key concepts before we start...	50
Foundation Project 1	55
Image capture – Step 1	55
Downloading files – Step 2	58
Image Management – Step 3	60
Image processing steps	61
Rotating and cropping an image – Step 4	61
Color adjustments – Step 5	64
Tonal adjustments – Step 6	67
Cleaning an image – Step 7	75
Sharpening an image – Step 8	78
Saving a modified file – Step 9	80
Foundation Project 2	84
Image capture – Step 1	85
Multi-select and open – Step 2	85
Multi-processing – Step 3	85
Fine-tune – Step 4	86
Output enhanced files – Step 5	86

4. Raw Processing	89
Introduction	90
Processing Raw data	91
Foundation Project 3	92
Straighten, crop and size – Step 1	92
Color space – Step 2	93
Choosing a bit depth – Step 3	94
White balance – Step 4	95
Global tonal adjustments – Step 5	96
Controlling saturation and vibrance – Step 6	98
Localized correction – Step 7	99
Grayscale conversion and toning – Step 8	104
Lens corrections – Step 9	107
Noise reduction and sharpening – Step 10	108
Output options – Step 11	110
Foundation Project 4	112
Preliminary enhancements – Step 1	112
Add Graduated Filter effect – Step 2	112
Adjust the Graduated Filter effect – Step 3	113
Reclaim some of the filtered detail – Step 4	113
Digital exposure	114
Adjusting exposure in ACR	115
Foundation Project 5	115
Dust on the sensor – batch removal	119
Archiving Raw files as digital negatives	120
5. Digital Printing	123
Introduction	124
The problem and the solution	125
Step 1 – Prepare your print workshop	126
Step 2 – Prepare your monitor	127
Step 3 – Prepare your inkjet printer	128
Step 4 – Select the appropriate color setting	129
Step 5 – Obtain a profile target	130
Step 6 – Open the profile target file in Photoshop	130
Step 7 – Adjust the print settings in Photoshop	131
Step 8 – Adjust the printer settings	132
Step 9 – Create and install custom profile	133
Step 10 – Tag images with the Adobe RGB profile	133
Step 11 – Test your color managed workflow	134
Step 12 – Make printer presets	134
Step 13 – Assessing the test print for accuracy	135
Step 14 – Preserving shadow detail	136
Printing using a professional laboratory	138

advanced skills module

6. Layers and Channels	141
Introduction	142
Layers overview	143
Layer types	146
Channels	150
Adjustment and filter layers and editing quality	152
Layer masks and editing adjustments	153
7. Selections	155
Introduction	156
Selection Tools overview	156
Shape-based selections with the Marquee Tools	156
Drawn selections using the Lasso Tools	157
Customizing your selections	159
Refining selections	161
Saving and loading selections	162
Feather and anti-alias	163
Defringe and Matting	164
Quick Mask or Refine Edge	165
‘Color Range’	166
Channel masking	167
Selections from paths	169

8. Layer Blends	175
Introduction	176
The 'Darken' group	178
The 'Lighten' group	181
The 'Overlay' group	184
Difference and Exclusion	186
Hue, Saturation and Color	187
Luminosity	189

9. Filters	191
Filtering in Photoshop	192
The 'Smart' way to filter	193
The Filter Gallery	195
Fade Filter command	196
Improving filter performance	196
Installing and using third party filters	196
Filtering a shape or text (vector) layer	197
The great filter round-up	197
Liquify filter	198
Vanishing Point	200
Blur filters	204
Distort filters	206
Noise filters	208
Sharpen filters	210
Other filters	212
Filter DIY	213

imaging projects module

10. Retouching Projects	215
Adjustment layers – Project 1	216
Correcting perspective – Project 2	229
Shadow/Highlight – Project 3	238
Clone and stamp – Project 4	245
Advanced sharpening techniques – Project 5	255
Replace color and tone – Project 6	263
11. Advanced Retouching	271
Black and white – Project 1	272
Gaussian Blur and toning – Project 2	284
Lens Blur – Project 3	295
Surface Blur – Project 4	305
Smooth tone and tonal mapping – Project 5	318
Smart Objects – Project 6	323
High dynamic range – Project 7	333

12. Montage Projects	343
Layer masks – Project 1	344
Paths, masks and blend modes – Project 2	362
Extracting hair – Project 3	376
Replacing a sky – Project 4	386
Studio and location composite – Project 5	392
Replacing a studio background – Project 6	401
13. Align and Blend Projects	413
Composite lighting and action – Project 1	414
HDR panoramas – Project 2	422
Vertical panoramas – Project 3	436
Glossary	443
Keyboard Shortcuts	453
Web Links	455
Index	456
