

Biodegradable Polymer
Blends and Composites
from Renewable Resources

Edited by

LONG YU

PREFACE	vii
CONTRIBUTORS	ix
1. Polymeric Materials from Renewable Resources <i>Long Yu and Ling Chen</i>	1
PART I NATURAL POLYMER BLENDS AND COMPOSITES	17
2. Starch–Cellulose Blends <i>Ioannis S. Arvanitoyannis and A. Kassaveti</i>	19
3. Starch–Sodium Caseinate Blends <i>Ioannis S. Arvanitoyannis and Persefoni Tserkezou</i>	55
4. Novel Plastics and Foams from Starch and Polyurethanes <i>Yongshang Lu and Lan Tighzert</i>	87
5. Chitosan—Properties and Application <i>Nilda de Fátima Ferreira Soares</i>	107
6. Blends and Composites Based on Cellulose and Natural Polymers <i>Yixiang Wang and Lina Zhang</i>	129
PART II ALIPHATIC POLYESTER BLENDS	163
7. Stereocomplexation Between Enantiomeric Poly(lactide)s <i>Hideto Tsuji and Yoshito Ikada</i>	165
8. Polyhydroxyalkanoate Blends and Composites <i>Guo-Qiang Chen and Rong-Cong Luo</i>	191

PART III HYDROPHOBIC AND HYDROPHILIC POLYMERIC BLENDS	209
9. Starch–Poly(hydroxyalkanoate) Composites and Blends <i>Randal Shogren</i>	211
10. Biodegradable Blends Based on Microbial Poly(3-hydroxybutyrate) and Natural Chitosan <i>Cheng Chen and Lisong Dong</i>	227
PART IV NATURAL FIBER—REINFORCED COMPOSITES	239
11. Starch–Cellulose Fiber Composites <i>Analía Vázquez and Vera Alejandra Alvarez</i>	241
12. Poly(Lactic Acid)/Cellulosic Fiber Composites <i>Mitsuhiro Shibata</i>	287
13. Biocomposites of Natural Fibers and Poly(3-Hydroxybutyrate) and Copolymers: Improved Mechanical Properties Through Compatibilization at the Interface <i>Susan Wong and Robert Shanks</i>	303
14. Starch–Fiber Composites <i>Milford A. Hanna and Yixiang Xu</i>	349
PART V BIODEGRADABLE COMPOSITES	367
15. Starch-Based Nanocomposites Using Layered Minerals <i>H. R. Fischer and J. J. De Vlieger</i>	369
16. Polylactide-Based Nanocomposites <i>Suprakas Sinha Ray and James Ramontja</i>	389
17. Advances in Natural Rubber/Montmorillonite Nanocomposites <i>Demin Jia, Lan Liu, Xiaoping Wang, Baochun Guo, and Yuanfang Luo</i>	415
PART VI MULTILAYER DESIGNED MATERIALS	435
18. Multilayer Coextrusion of Starch/Biopolyester <i>L. Avérous</i>	437
INDEX	465
