

INDUSTRIAL WATER QUALITY

FOURTH
EDITION

WEFPRESS
For the Water Quality Professional

W. Wesley Eckenfelder, Jr.

Davis L. Ford

Andrew J. Englande, Jr.

Contents

Preface	xix
Acknowledgments	xxi
1 Source and Characteristics of	
Industrial Wastewaters	1
1.1 Introduction	1
1.2 Undesirable Wastewater Characteristics ...	2
1.3 Partial List of Regulations Which Affect Wastewater Treatment Requirements within the United States	6
Air	6
Liquid	6
1.4 Sources and Characteristics of Wastewaters ...	7
1.5 Industrial Waste Survey	8
1.6 Waste Characteristics—Estimating the Organic Content	18
1.7 Measuring Effluent Toxicity	32
Toxicity Identification of Effluent Fractionation	36
Source Analysis and Sorting	39
1.8 In-Plant Waste Control and Water Reuse ...	40
Waste Minimization	40
1.9 Problems	46
References	48
2 Wastewater Treatment Processes	49
2.1 Introduction	49
2.2 Process Selection	52
3 Pre- and Primary Treatment	65
3.1 Introduction	65
3.2 Equalization	67
3.3 Neutralization	83
Types of Processes	83
System	87
Control of Process	87
3.4 Sedimentation	94
Discrete Settling	94
Flocculent Settling	98
Zone Settling	106

	Laboratory Evaluation of Zone Settling and Calculation of Solids Flux	106
	Clarifiers	107
3.5	Oil Separation	110
3.6	Oil Processing in a Typical Petroleum Refinery	116
3.7	Sour Water Strippers	119
3.8	Flotation	120
	Air Solubility and Release	120
3.9	Problems	131
	References	134
4	Coagulation, Precipitation, and	
	Metals Removal	137
4.1	Introduction	137
4.2	Coagulation	137
	Zeta Potential	139
	Mechanism of Coagulation	141
	Properties of Coagulants	143
	Coagulant Aids	144
	Laboratory Control of Coagulation	146
	Coagulation Equipment	147
	Coagulation of Industrial Wastes	148
4.3	Heavy Metals Removal	151
	Arsenic	157
	Barium	159
	Cadmium	159
	Chromium	159
	Copper	166
	Fluorides	166
	Iron	167
	Lead	169
	Manganese	169
	Mercury	169
	Nickel	170
	Selenium	171
	Silver	171
	Zinc	172
4.4	Summary	172
4.5	Problem	177
	References	177
5	Aeration and Mass Transfer	179
5.1	Introduction	179
5.2	Mechanism of Oxygen Transfer	179

5.3	Aeration Equipment	195
	Diffused Aeration Equipment	197
	Turbine Aeration Equipment	201
	Surface-Aeration Equipment	202
	Measurement of Oxygen Transfer	
	Efficiency	205
	Other Measuring Techniques	210
5.4	Air Stripping of Volatile Organic	
	Compounds	211
	Packed Towers	213
5.5	Problems	221
	References	223
6	Principles of Aerobic Biological Oxidation	225
6.1	Introduction	225
6.2	Organics Removal Mechanisms	225
	Sorption	227
	Stripping	228
	Sorbability	229
	Biodegradation	232
6.3	Mechanisms of Organic Removal	
	by Biooxidation	233
	Sludge Yield and Oxygen Utilization ...	237
	Oxygen Requirements	246
	Nutrient Requirements	253
	Mathematical Relationships	
	of Organic Removal	256
	Specific Organic Compounds	278
6.4	Effect of Temperature	284
	Effect of pH	293
	Toxicity	294
6.5	Sludge Quality Considerations	299
	Filamentous Bulking Control	307
	Biological Selectors	308
	Design of Aerobic Selectors	308
6.6	Soluble Microbial Product Formation	316
6.7	Bioinhibition of the Activated	
	Sludge Process	318
	OECD Method 209	321
	Fed Batch Reactor	322
	Glucose Inhibition Test	323
6.8	Stripping of Volatile Organics	326
	Treatment of VOC Emissions	332
6.9	Nitrification and Denitrification	334
	Nitrification	334

	Nitrification Kinetics	335
	Nitrification of High-Strength Wastewaters	342
	Inhibition of Nitrification	343
	Batch Activated Sludge Nitrification	355
	Fed Batch Reactor Nitrification Test	357
	Denitrification	358
	Nitrification and Denitrification Systems	368
	Nitrification Design Procedure	369
	Denitrification Design Procedure	372
6.10	Phosphorus Removal	375
	Chemical Phosphorus Removal	375
	Biological Phosphorus Removal	380
	Mechanism for Biological Phosphorus Removal	381
	Glycogen Accumulating Organisms	383
	Biological Phosphorus Removal Design Considerations	383
	Other Mechanisms of Phosphorus Removal	385
	Membrane Bioreactors (MBRs)	385
6.11	Laboratory and Pilot Plant Procedures for Development of Process Design Criteria ..	386
	Wastewater Characterization	386
	Reactor Operation	388
	Volatile Organic Carbon	389
	Reduction of Aquatic Toxicity	392
6.12	Problems	396
	References	399
7	Biological Wastewater Treatment Processes	403
7.1	Introduction	403
7.2	Lagoons and Stabilization Basins	403
	Type I. Facultative Ponds	404
	Type II. Anaerobic Ponds	404
	Type III. Aerated Lagoons	405
	Lagoon Applications	405
7.3	Aerated Lagoons	414
	Aerobic Lagoons	415
	Facultative Lagoons	418
	Temperature Effects in Aerated Lagoons ...	420
	Aerated Lagoon Systems	422
7.4	Activated Sludge Processes	434
	Plug Flow Activated Sludge	435

	Complete Mix Activated Sludge	436
	Extended Aeration	437
	Oxidation Ditch Systems	439
	Sequencing Batch Reactor	440
	Batch-Activated Sludge	445
	Oxygen-Activated Sludge	448
	Deep-Shaft-Activated Sludge	451
	Biohoch Process	451
	Integrated Fixed Film Activated Sludge	453
	Thermophilic Aerobic Activated Sludge	454
	Final Clarification	454
	Flocculation and Hydraulic Problems	462
	Treatment of Industrial Wastewaters in Municipal-Activated Sludge Plants	462
	Effluent Suspended Solids Control	465
7.5	Trickling Filtration	474
	Theory	474
	Oxygen Transfer and Utilization	479
	Effect of Temperature	482
	Trickling Filter Applications	482
	Tertiary Nitrification	485
7.6	Rotating Biological Contactors	488
7.7	Anaerobic Treatment Processes	494
	Process Alternatives	495
	Mechanism of Anaerobic Fermentation	499
	Biodegradation of Organic Compounds under Anaerobic Conditions	505
	Factors Affecting Process Operation	507
7.8	Laboratory Evaluation of Anaerobic Treatment	511
7.9	Problems	518
	References	521
8	Adsorption	525
8.1	Introduction	525
8.2	Theory of Adsorption	525
	Formulation of Adsorption	526
8.3	Properties of Activated Carbon	530
	Laboratory Evaluation of Adsorption	532
	Continuous Carbon Filters	532
	Carbon Regeneration	534
	Adsorption System Design	536
	GAC Small Column Tests	550

	Performance of Activated Carbon Systems	553
8.4	The PACT Process	554
8.5	Problems	562
	References	563
9	Ion Exchange	565
9.1	Introduction	565
9.2	Theory of Ion Exchange	565
	Experimental Procedure	570
9.3	Plating Waste Treatment	572
9.4	Problem	576
	References	576
10	Chemical Oxidation	577
10.1	Introduction	577
10.2	Stoichiometry	578
10.3	Applicability	581
10.4	Ozone	582
10.5	Hydrogen Peroxide	586
10.6	Chlorine	590
10.7	Potassium Permanganate	596
10.8	Oxidation Overview	596
10.9	Hydrothermal Processes	596
10.10	Problem	600
	References	601
11	Sludge Handling and Disposal	603
11.1	Introduction	603
11.2	Characteristics of Sludges for Disposal ...	606
	Leaching Tests to Characterize Residuals	606
11.3	Aerobic Digestion	609
11.4	Gravity Thickening	616
11.5	Flotation Thickening	621
11.6	Rotary Drum Screen	625
11.7	Gravity Belt Thickener	625
11.8	Disk Centrifuge	626
11.9	Basket Centrifuge	626
11.10	Specific Resistance	628
	Laboratory Procedures	631
	Capillary Suction Time Test	634
11.11	Centrifugation	635
11.12	Vacuum Filtration	638
11.13	Pressure Filtration	642

11.14	Belt Filter Press	645
11.15	Screw Press	647
11.16	Sand Bed Drying	648
11.17	Factors Affecting Dewatering Performance	649
11.18	Land Disposal of Sludges	650
11.19	Incineration	657
11.20	Problems	658
	References	661
12	Miscellaneous Treatment Processes	663
12.1	Introduction	663
12.2	Land Treatment	663
	Irrigation	663
	Rapid Infiltration	666
	Overland Flow	667
	Waste Characteristics	667
	Design of Irrigation Systems	668
	Performance of Land Application Systems	671
12.3	Deep-Well Disposal	672
12.4	Membrane Processes	679
	Pressure	685
	Temperature	686
	Membrane Packing Density	686
	Flux	686
	Recovery Factor	686
	Salt Rejection	686
	Membrane Life	686
	pH	686
	Turbidity	687
	Feedwater Stream Velocity	687
	Power Utilization	687
	Pretreatment	687
	Cleaning	687
	Applications	688
12.5	Membrane Bioreactors	693
	Types of Membranes and Reactor Configuration	693
	Benefits of Membranes Compared to Conventional Technology	694
	Membrane Issues	695
	Application	697
	Case Study A	698
	Case Study B	699

12.6	Granular Media Filtration	700
12.7	Microscreen	706
	References	708
13	Treatment: Oil/Gas Exploration/Production	
	Residuals	711
13.1	Introduction and Background	
	Information	711
	Introduction	711
	Background Information	712
13.2	Regulations	717
	Introduction	717
	Federal Regulations	717
	Exempt and Nonexempt E&P Wastes ...	720
	State Regulations	724
	Local Regulations	725
	Lease Agreements and Miscellaneous Issues	725
13.3	E&P-Related Fluid Characterization	726
13.4	E&P Treatment Processes, Waste Sources, and Residual Reuse/Disposal	729
	Water Sources Description	734
	E&P Waste Residuals and Treatment Options	735
13.5	Problems	744
	References	745
14	Chlorinated Compounds, VOCs, and Odor Control	747
14.1	Introduction	747
14.2	Polychlorinated Biphenyls	748
	Introduction	748
	Environmental Impacts	749
	Regulatory History of PCBs	750
	Treatment Methodologies	751
14.3	Chlorinated Solvents	755
	Introduction and Historical Perspective ...	755
	Treatment Methodologies	758
14.4	Chlorinated Pesticides	766
	Introduction	766
	Regulatory History	766
	Pesticide Characterization	767
	Treatment Methodologies	775
14.5	Perchlorates	775
	Introduction	775
	Treatment Technologies	775

14.6	Other Miscellaneous Chlorinated Organics	777
14.7	Chlorinated By-Products, Other VOCs, and Odor Control	779
	Odor Control	780
14.8	Problems	786
	References	787
15	Waste Minimization and Water Reuse	791
15.1	Introduction	791
15.2	Water Recycle and Reuse	791
	Limits of Water Reuse	792
	Reuse or Wastewater Treatment	
	Plant Effluents	793
	The Decision-Making Process	794
	Case Histories	795
	Benchmarking	802
15.3	Waste Minimization—RCRA Hazardous Waste Issues	806
15.4	Zero Effluent Discharge and Economic Concepts	809
15.5	Case History	810
	Formosa Plastics, Point Comfort, Texas	810
	History of Zero Discharge Technologies	811
	Industry Applications of Zero Discharge Technology	813
	Formosa Studies Zero Discharge Options	813
	Zero Effluent Discharge Technologies	
	Appropriate for Formosa	815
	Initial Evaluation Results	817
	Recycle Effects on Effluent Toxicity Testing	821
15.6	Summary	821
15.7	Problem	822
	References	823
16	Allocation of Superfund Disposal Site Response Costs	825
16.1	Introduction and Literature Review	825
16.2	Cost Allocation Principles	828
	Volume, Weight, Operating Time History	828

16.3	Contaminant Selection, Mobility, Toxicity, Persistence, Content, and Physical State—Multiple Off-Site Contributors	830
16.4	Allocation Methods for Same-Site Multiple Contributors	837
16.5	Summary	842
16.6	Problem	843
	References	845
17	Industrial Pretreatment	847
17.1	Introduction	847
17.2	National Categorical Pretreatment Standards and Local Limits Development	848
17.3	Pretreatment Compliance Monitoring for Industrial Users	849
17.4	POTW Ordinance Guidelines for Industrial Users (EPA Model)	851
17.5	User Charge Rates and POTW Cost Recovery	852
17.6	Case Histories	854
	City of Chicago, Illinois	854
	City of Indianapolis, Indiana	855
	City of San Diego, California	855
	City of Shreveport, Louisiana	855
	City of Austin, Texas	858
	Barceloneta POTW, Puerto Rico, and Pharmaceutical Pretreatment	863
	Determining Limits for Pollutants Regulated under PSES	866
	Determining Compliance Monitoring for PSES Pollutants	871
	Final Limits as They Would Appear in a Permit for Facility B	872
	Pretreatment of Leachate Discharges ...	873
	References	874
18	Environmental Economics	875
PART 1	INDUSTRIAL ENVIRONMENTAL ECONOMICS	875
18.1	Introduction	875
18.2	Industrial Environmental Economics and Regulatory Compliance Metrics	875
	Evolution of Environmental Laws and Regulations in the United States	876
18.3	Capital and Operational Economic Planning	878

18.4	Economics of New Facility Siting Analysis and Planning	880
18.5	Environmental Compliance	883
18.6	CERCLA, Superfund, and Joint and Several and Retroactive Economic Exposure	895
18.7	Environmental Litigation Exposure	896
18.8	Industrial Environmental Governance	901
	Sarbanes-Oxley Act (SOX) (Publicly Owned Companies)	902
	ISO 14001 Certification	902
	Creation of Internal Environmental Cost Accounting System	902
	Annual Reports for Publicly Owned Industrial Complexes	903
	Utilization of Third-Party Consulting Specialists, Advisory Groups, and Regulation Experts	903
	Organizational Structure and Participatory Policies	903
PART 2	ENVIRONMENTAL ECONOMICS FROM THE CONSULTANT AND CLIENT PERSPECTIVES	904
18.9	Introduction	904
18.10	SUM Concept	905
	Basic Equation	905
	Parameter Sensitivity	907
18.11	Consulting Internals—Salary to Expense Ratio and Utilization	910
18.12	Consulting Externals: Multiplier and Pricing	916
18.13	Project Economics	918
	References	920
Index		921
