Part 1 Engineering Guides of Modular Design and Description Methodology of Machine Tools

Chapter 1. Basic Knowledge: What Is the Modular Design?				3	
1	1.1	Definition and Overall View of Modular Design			
1	1.2	Adva	ntageous and Disadvantageous Aspects of Modular Design	17	
	1.3	A Firs	thand View of Developing History and		
	-		sentative Applications	20	
		•	Application to TL and FTL	27	
		1.3.2	Application to conventional machine tools	40	
			Application to NC machine tools	47	
		1.3.4	Different-kind generating modular design	54

to Engineering Design		
4.1	Application of Functional Description	131
	4.1.1 Classification of machining centers and its application	131
	to marketability analysis	131
	4.1.2 Analysis of machining function and its application	
	to evaluate compatibility with production systems	135
	4.1.3 Automated generation of concept drawing	138
	4.1.4 Estimation of assembly accuracy in design stage	148
4.2	Application of Structural Description	149
	4.2.1 Similarity evaluation of structural configuration—availability	
	constraints of modular design	150
	4.2.2 Variant design for structural configuration	157
D-4	4.2.3 Free design for structural configuration	165
