

Bach · Krause (Eds.) Low Thermal Expansion Glass Ceramics

Second Edition

Springer

Contents

1. Overview	1
<i>Wolfgang Pannhorst</i>	
1.1 The Invention of Low Expansion Glass Ceramics	1
1.2 Basic Research	2
1.3 Main Fields of Application	3
1.4 Current Developments	6
1.5 Other Glass Ceramics	7
References	10
2. The Scientific Basis	13
2.1 Structure, Composition, Stability, and Thermal Expansion of High-Quartz and Keatite-Type Alumino-Silicates	
<i>Gerd Müller</i>	
2.1.1 Crystal Structures	13
2.1.2 Compositional Ranges and Stability	15
2.1.3 Thermal Expansion	20
2.1.4 Conclusions	24
2.2 Nucleation in Parent Glasses for Lithia Alumino-Silicate Glass Ceramics	
<i>Ulrich Schiffner</i>	
2.3 Glass Ceramics Based on Lithium-Alumino-Silicate Solid Solution Crystals	
<i>Wolfgang Pannhorst</i>	
References	46
3. Glass Ceramics for Household Appliances	51
3.1 Cooking Systems with Ceran®: High-Tech Appliances for the Kitchen	
<i>Eva Willhauk, Ruban Harikantha</i>	
3.2 Cooking Systems with Ceran®: How It Works	
<i>Roland Dudek, Cora Krause, Klaus Kristen, Peter Naß, Kurt Schaupt, Herwig Scheidler, Wolfgang Schmidbauer, Patrik Schober, Martin Taplan, Ted Wegert, Evelin Weiss</i>	
3.2.1 The Concept of the Ceran-Top-System®	59
3.2.2 Heat Flow	59

3.2.3	Transmission, Temperature–Time Loading	63
3.2.4	Heating Elements	65
3.2.5	Gas-Fired Systems	66
3.2.6	Thermal Stress in Ceran® Cooktop Panels.....	67
3.2.7	Compaction Stress.....	74
3.2.8	Mechanical Strength	76
3.2.9	Chemical Stability	77
3.2.10	Electric Demands	77
3.2.11	Summary of Physical and Chemical Properties of Ceran®	78
3.2.12	Electronic Touches and Controls for Glass Ceramic Cooktops	78
3.2.13	Assembly of Cooking Systems Equipped with Ceran®	80
3.3	Development and Production of Glass Ceramic Cooktop Panels <i>Helga Götz, Ioannis Kosmas, Peter Naß, Erich W. Rodek, Hinnerk Schüldt, Wolfgang Schmidbauer, Fritz Schröder, Fritz Siebers, Martin Taplan, Waldemar Weinberg, Evelin Weiss, Dietmar Wennemann</i>	81
3.3.1	Development of Glass Ceramic Materials	81
3.3.2	Composition of Low-Expansion Glass Ceramics	84
3.3.3	Decoration	87
3.3.4	Composition of Ceramic Colors	88
3.3.5	Production	89
3.3.6	Batch Materials	91
3.3.7	Melting	92
3.3.8	Hot Forming of Glass Ceramics	93
3.3.9	Annealing	95
3.3.10	Glass Cutting and Stacking.....	95
3.3.11	Mechanical Processing	96
3.3.12	Secondary Processes	96
3.3.13	Screen Printing	99
3.3.14	Ceramization Process	100
3.3.15	Firing of the Ceramic Colors.....	103
3.4	Robax® Transparent Glass Ceramic <i>Manfred Borens, Torsten Gabelmann, Roland Leroux, Toni Münch</i>	103
3.4.1	Robax® Technical Data	104
3.4.2	Development and Production – Use of Robax® as Stove and Fireplace Sight Panels	105
3.4.3	Bending of Robax®	106
3.5	Surface Strengthening of Low-Expansion Glass Ceramics <i>Werner Kiefer</i>	107
3.5.1	Thermal Toughening of Low-Expansion Glass Ceramics.....	107

3.5.2	Chemical Strengthening of Low-Expansion Glass Ceramics	109
3.5.3	Surface Strengthening by Surface Crystallization	112
References		116

4. Zerodur® – A Low Thermal Expansion

Glass Ceramic for Optical Precision Applications		121
4.1	Development of the Optical Glass Ceramic Zerodur® <i>Wolfgang Pannhorst</i>	121
4.1.1	Laboratory Development	121
4.1.2	Development of the Technology for Large Castings	130
4.1.3	Properties	136
4.1.4	Internal Quality	140
4.1.5	Delivery Shapes, Dimensions, and Tolerances	141
4.1.6	Development of Zerodur M®	142
4.2	Conventional Production of Zerodur® <i>Rüdiger Hentschel, Hartmut Höness, Rudolf Müller, Norbert Reiser</i>	145
4.2.1	Melting	146
4.2.2	Hot Forming	148
4.2.3	Annealing and Ceramizing	150
4.2.4	Machining	154
4.2.5	Quality Assurance	155
4.3	Production of Zerodur® in Special Shapes <i>Hartmut Höness, Alfred Jacobsen, Konrad Knapp, Thomas Marx, Hans Morian, Rudolf Müller, Norbert Reiser, Armin Thomas</i>	157
4.3.1	Thin Menisci	157
4.3.2	Lightweight Mirrors	187
4.3.3	Thin-Walled Cylinders	193
4.4	Optical Figuring of High-Quality Optical Surfaces <i>Ernst-Dieter Knohl</i>	204
4.4.1	Introduction	204
4.4.2	Lapping of Aspherical Surfaces	205
4.4.3	Polishing of Aspherical Surfaces	206
4.5	Special Characteristics of Zerodur® <i>Reiner Haug, Wilfried Heimerl, Burkhard Speit</i>	207
4.5.1	Length Stability	207
4.5.2	Radiation Stability	212
4.5.3	Chemical Treatment	216
4.6	Applications of the Glass Ceramic Zerodur® <i>Alfred Jacobsen, Thomas Marx</i>	218
4.6.1	Reflective Optics	218
4.6.2	Laser Gyroscopes	227
4.6.3	Precision Engineering	229
