

Applied Seismology

A Comprehensive Guide to Seismic Theory and Application

Mamdouh R. Gadallah and Ray L. Fisher

Contents

Preface	.xxxiii
Acknowledgments	.xxxv
1 Overview and Summary	1
<i>Introduction</i>	1
Seismic Refraction Exploration Overview	2
Seismic Reflection Exploration Overview	2
2 Geological Background	7
Introduction	7
Uniformitarianism	7
Law of Superposition	7
Law of Horizontality	8
Geologic Time Scale	8
Internal Structure of the Earth	9
Rocks in the Earth's Crust	12
Deformation of Crustal Rocks	14
The Nature of Petroleum	19
Oil and Gas Accumulation	21
Hydrocarbon Traps	24
Workshop	29
3 Geophysical and Mathematical Background	33
Basic Geophysical Theory	33
Wave propagation	34
Seismic amplitudes	38
The seismic record	39
Mathematical Theory and Concepts	42
Sampled data	42
Convolution and correlation	44
Time and frequency domains	46
Phase and its effect on waveforms	50
Effect of bandwidth	52
The F-K domain	55
The Z-transform	58
The radon transform	60
The complex trace	61
Workshop	63

4 Seismic Refraction Exploration	.67
Introduction	.67
Refraction Methods	.67
Workshop	.70
5 Seismic Reflection Data Acquisition	.71
Introduction	.71
Permitting	.72
Positioning	.73
Positioning summary	.83
Signal Generation	.83
Recording	.99
Noise	.105
Recording systems	.110
2-D Acquisition Parameters and Operations	.119
3-D Acquisition Parameters and Operations	.125
Workshop	.142
6 Seismic Reflection Data Processing	.147
Introduction	.147
Preliminary processing for vibrator data	.147
Data Initialization	.154
Preliminary Signal Processing	.160
Noise Suppression	.167
Velocity Analysis	.170
Brute Stack	.185
Deconvolution	.186
Surface-consistent Scaling	.199
Time-variant Spectral Whitening (TVSW)	.201
Model-based Wavelet Processing (MBWP)	.204
Inverse-Q Filtering	.208
Residual Statics	.211
Pre-stack Multiple Attenuation	.216
CMP Stack	.241
Post-stack Multiple Attenuation	.242
Migration	.246
Gazdag's phase-shift migration input parameters	.269
Band-pass Filtering	.279
Time-to-depth Conversion	.282
Display	.282
Seismic Data Processing Summary	.285
Workshop	.287

7 Seismic Reflection Data Interpretation	297
Introduction	297
Modeling	298
Seismic Inversion and Wavelet Processing	310
Seismic Stratigraphy	318
Modern Techniques and Future Applications of Sequence Stratigraphy	361
High-resolution seismic data acquisition	362
Vertical seismic profiling (VSP)	362
Amplitude versus offset analysis (AVO)	369
4-D seismic technology	385
Appendix A: Refraction Calculations	393
Single horizontal layer, $V_1 > V_0$	393
Two horizontal layers, $V_2 > V_1 > V_0$	395
N horizontal layers, $V_0 < V_1 < V_2 < \dots < V_N$	396
Single dipping layer, $V_1 > V_0$	397
Two dipping layers, $V_2 > V_1 > V_0$	399
Appendix B: SEG Standard Tape Formats	401
Introduction	401
Comments and notes	402
Standard tape formats	402
Appendix C: Workshop Answers	413
Geological background workshop answers	413
Geophysical and mathematical background workshop answers	416
Seismic refraction exploration workshop answers	417
Seismic reflection data acquisition workshop answers	418
Seismic reflection data processing workshop answers	421
Appendix D: Color Plates	427
Bibliography	445
Index	455
